Well there are a lot of places you can order but I would suggest getting some catalogs first and studying them. There is AES, Universal Radio, HRO, Burkhards (sp?) and probably some others. You might consider looking through the ads in the back of Now You're Talking.

Notes:
Don't operate until you are licensed. Listen only. Don't even key up.
The handhelds are limited in power and capabilities. You can only do FM on them.

And as the knowledge of new Hams shrinks (thanks to the efforts of NCI and the like to reduce Ham radio to little more than CB radio) you will see more of it.

Ham Radio, RIP.

10-73's!

Ah phonetics

The ARRL and many other national entities recommend the NATO phonetics
for Amateur Radio use as most Hams around the world recognize them.

This alphabet dates from about 1955 and is approved by the
International Civil Aviation Organization, the FAA and the
International Telecommunication Union,
and many National Amateur Leagues/Societies/Orgs.
Note that different bodies prefer different spellings, so one also sees:
Alfa Juliett Juliette Oskar Viktor]

Alpha Bravo Charlie Delta Echo Foxtrot Golf Hotel India
Juliet Kilo Lima Mike November Oscar Papa Quebec Romeo
Sierra Tango Uniform Victor Whiskey Xray Yankee Zulu

See URL: http://www.bckelk.uklinux.net/phon.full.html

However the DX crowd over many years have used their own set --
which includes kilowatt. May be "wrong phonetics", but a fact of life for a
long time.
Unofficial but common DX phonetics are at URL:
http://ac6v.com/dxphonetics.htm

Next we have funny phonetics which are memorable and easy to recall -
like K6AKT - Karl Six Always Killing Time
Wrong phonetics but very very common on VHF repeaters and HF Contests
---

Next we have the old timers who insist on the WWII phonetics:
Able Baker Charlie Dog Easy Fox George How Item Jig King
Love Mike Nan Oboe Peter Queen Roger Sugar Tare Uncle Victor
William X-ray Yoke Zebra
And these guys are always tuning after a CQ Call !!

Then we have the civil entity phonetics. Some hams but many don't use or
understand these:
Adam Boy Charlie David Edward Frank George Henry Ida John
King Lincoln Mary Nora Ocean Peter Queen Robert Sam Tom
Union Victor William X-ray Young Zebra
And a lot of other Boy/Girl names depending on locale

Then we have Hams who don't know any of these and you might hear -- Name is
Tim - Texaco Indigo Macy's
Actually heard this one!

Bottom line -- use the NATO phonetics -- so most all will understand and
always during an emergency.

From: Caveat Lector <CL@latin.com>
Message-ID: <yzjbb.1933$Ms2.1243@fed1read03>
Source record: 63598

As a matter of reference -- see URL:
http://www.wikipedia.org/wiki/NATO_phonetic_alphabet

Sez

NATO phonetic alphabet
From Wikipedia, the free encyclopedia.

The NATO phonetic alphabet was developed in the 1950s to be intelligible (and pronounceable) to all NATO allies in the heat of battle. It replaced other phonetic alphabets, for example the US military Joint Army/Navy Phonetic Alphabet ("able baker") and several versions of RAF phonetic alphabets. It is sometimes inappropriately referred to as International Phonetic Alphabet, which is actually the official name of an alphabet used in linguistics created in the late nineteeth century.

The NATO phonetic alphabet is now widely used in business and telecommunications in Europe and North America, and has been approved by ICAO for use in international civil aviation. It has been adopted by the International Telegraphers Union (ITU), after which it is named by many radio operators. Although it consists of English words, its letter codewords can easily be recognised by speakers of languages other than English.

Anyone have adjustment tips for the Kent SP-1 paddle? This is the single lever "swiper", not the iambic. The instructions were minimal. I noticed on the Eham reviews that the only gripe on this unit was weak instructions.

Any help appreciated.

Dave - W9DPY

The reason that kilowatt is particularly bad is that the listener can't be sure whether it is "kilowatt" or "kilo watt"

For example:

What is the callsign when the speaker says "kilowatt eight kilowatt sugar"? It could be K8KS or KW8KWS or K8KWS or KW8KS. In other words, there are 3 wrong possibilities and 1 right one. Thus the listener has only a 25% chance of getting it right. Phonetics should be chosen with the goal of clarity not confusion.

Now among friends or once the QSO has been established and the call signs clearly understood, there's no harm in using different or cutesy phonetics.

The best one was printed in a magazine at some point. It was using
words that would always add to the confusion. I can't remember specific
examples, but it would have been like xylophone and psychiatrist.

Of course, it was intended to be funny (it was), and was not intended
to be used on the air (though I wouldn't put it past someone).

E-mail is as common as the telephone. MARS serves no purpose since
satellite and cellular have taken over. MARS is dying just like code.
Both served it's purpose in it's day but the day has come. I'm not
slamming MARS but the frequencies it occupies could be used for other
things.

wrote:

>Ah phonetics

Sorry to tag on this post out of sequence.

The bottom line is communications. While it is true that by using a
standard alphabet one maximizes the probability of being understood,
in truth and in real practice, there are times when deviation may be
necessary.

First my qualifications: I was an air traffic controller for 30 years
and a pilot for some years before that, thus I have been intimately
familiar with the ICAO alphabet for nearly 40 years; using it on a
daily basis for most of that time. When everyone is on the same page
by official fiat, it is unusual to find the need for other than the
standard words.

However, in all the years I was DXing (on the way to Honor Roll), I
found that my particular callsign (N9AKE at the time) had a couple of
shortcomings in real world, difficult conditions. The "K" spoken as
"kilo" was often and easily lost in QSB or QRN. However, whenever I
used "kilowatt" there was a almost always complete understanding by
the other party, and I was able to successfully conclude my QSO.

The key here, however, is that "kilowatt" is almost universally
understood by hams, being a part of the argot of the pasttime. I doubt
I would have had more than a 50% success rate had I tried it at work.

Similarly, it is unlikely that substitutions others might try would
have as good a success rate unless they, too, were related to amateur
radio. If one were to try to use xenophobic, for example, most hams
(or other people) would choke on the word itself, since few are likely
to have even heard of it.

The argument made by someone that "kilowatt" could be confused for
"kilo" "watt" is specious, since in real communications, the use of
"kilowatt" is clearly a single word. If one were to use "kilo" and
"watt" as phonetics for discrete letters, they would be spoken clearly
and separately, whereas "kilowatt" is spoken almost as one syllable.

Context and common sense are somewhat of a determinant in successful
communications using phonetics. That is one reason why many DXers are
very successful using America, Brazil, Canada, Denmark, England,
France, Guatemala, etc., as phonetics. Hardly a DXer exists who
doesn't immediately recognize those words.

Finally we are not a commercial service, and public service aside, we have no particular external requirement to get our communications completed. There is no "officially sanctioned" alphabet that we are required to use. Although, my skin crawls when I hear Bob say, "Broken Old Bottle," the fact remains he is perfectly legal in doing so. In amateur radio, success in communications is the only motive. If "Boston London" (remember him?) gets it done regularly and reliably, it's a good combination. If you don't want to have think one up, stick with the ICAO (NATO) alphabet. For the vast majority of cases it's a proven winner.

I agree with that. There's been times when I've had to shift to some other phonetic. But I always tried the standard first. Then if that failed, went to one of the other frequently used phonetics such as "sugar" for "sierra".

That's the very reason for using the standard.

I have heard plenty of mixups on HF when kilowatt was used. Between talking too fast and/or various foreign or dialectal accents and/or the fact that there are plenty of older hams who may be somewhat hard of hearing, kilowatt isn't a good choice as an alternate.

See my comment above. Many people, for a variety of reasons, don't speak clearly enough to make sure that there is a distinction.

> Context and common sense are somewhat of a determinant in successful

Agreed. I'll use some of these if the standard isn't getting through but I always try the standard first.

> Finally we are not a commercial service, and public service aside, we

And that's why it should be used first and a switch made when necessary.

Hi,

To make changes, or customize, the clock use the windows "Display
Properties" dialog, "Screen Saver" tab/page. Note the button labeled
"Settings". Clicking the settings button displays the clock settings dialog.
Click the read me button for a bit more info.

There are two email address links near the bottom of each web page. One is
the logo graphic, the other invites "Comments, Criticisms and Suggestions".
<G> Also find the email address in the "read me" from the settings dialog.

Regards,
Jim

Hi,

Yes, http://www.boulder.nist.gov/timefreq/service/its.htm
is a fair link. However their "example" apps apparently do not use the best
time setting protocol, which is NTP. ID Wizard uses NTP, is free for the
price of a single email and has numerous additional tools. <G>

The two time protocols demonstrated by the NIST example apps work well
enough for most projects.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

2003 MOST WANTED SURVEY. Carl Smith, N4AA, Editor/Publisher - QRZ DX and The DX Magazine (Also, DX Column Editor for CQ Magazine), has once again asked OPDX to help spread the word that the "DX Magazine Most Wanted Survey" is now being taken, and the deadline to respond is October 15th. Here is your chance to be counted and list the DXCC entities you need or do not have confirmed yet. Not all DXCC entities are listed, only the

obvious hard ones. The 2003 survey is available on the Web at:
http://www.dxpub.com/dx_survey2003.html
Look for the results to be listed in early 2004.

3C0, ANNOBON ISLAND. Everything seems to be a go with next weekend's 3C0V DXpedition which begins Sepptember 26th and ends October 10th. Operators and their callsigns are: Franz/DJ9ZB - 3C0F Elmo/EA5BYP - 3C0A Victor/EA5FO - 3C0R Vicente/EA5YN - 3C0V
Activity will be on all bands 160-6 meters CW, SSB, RTTY, PSK and some SSTV. They hope to have at least two stations on the air 24 hours a day. They are still looking for donations; any amount as small as it may be will be appreciated and can be sent to: DX Club Tabarca Island, President Elmo EA5BYP, P.O. Box 3097, 03080 Alicante, Spain. QSL via DJ9ZB. For more information on the 3C0V DXpedition, visit the following Web page at: http://www.tabarca.es.mn

4W, TIMOR LESTE. Peter, 4W3CW, was heard this past weekend on 30/20/17/12 meters CW between 1000-1330z. He will be on the air for one more year. He works only CW with 100 watts into a vertical. QSL via: Peter McKay, UNMISET, PO Box 2436, Darwin, NT 0801, Australia.

5R8, MADAGASCAR (IOTA Op). Remember Phil, G3SWH, and his wife are expected to fly to Ile Sainte Marie (IOTA AF-090) on September 22nd and stay until the 27th. Phil was active this past week as 5R8HA on 30/20/17 meters CW. He will use the callsign 5R8HA/p from IOTA AF-090. Again, activity is expected on 40-10 meters, CW only. Please remember that he is on holiday and not a DXpedition. QSL via G3SWH.

9H, MALTA (Contest/IOTA Op). The Latvia team consisting of Girts/YL2KL, Karl/YL2MD and Andy/YL2GQT will be active from Gozo Island (EU-023) as 9H3M during the CQ/RJ Worldwide DX RTTY Contest (September 27-28th) as a Multi-Single or Multi-2 entry. QSL via YL2KL. The team will be there from September 24-30th and will be active outside of the contest. Look for Girts/YL2KL as 9H3KKL, Karl/YL2MD as 9H3MMD and Andy/YL2GQT as 9H3GQT. Activity will be on all HF bands CW/SSB/RTTY.

9M6, EAST MALAYSIA. Bob, N2OO, will once again be operating from the Hillview Gardens Resort station < http://www.qsl.net/9m6aac > from October 19th through November 13th as 9M6OO. QSL via N2OO.
Visit Bob's, N2OO/9M6OO, homepage at: http://www.qsl.net/n2oo
Check out the 9M6AAC/9M6A Web page at: http://www.qsl.net/9m6aac

9N, NEPAL. Janusz, SP9FIH, informs OPDX that he will probably be in Nepal from November 15th to December 5th. He expects to only be active on the bands between 20-12 meters because the cost of the amateur radio licence is rather high (about 50 USD per band and 100W transmiter). He will try to concentrate on U.S. propagation as he knows it is a difficult area for U.S. amateurs. Janusz is looking for any advice on what bands and at what times he should operate from during this time of the year (Is there a long path route?). Suggestions are welcome, E-mail to: sp9fih@poczta.onet.pl

9Y4, TRINIDAD AND TOBAGO. Ben, DL6FBL, will be active as 9Y4TBG in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/ High Power entry. Antennas to be used are: 10/15/20m (two Tribanders), 40m (2-element beam) and 80/160m (Titanex Vertical, K9AY Loop). QSL via DL4MDO. His web page for this operation is at: http://www.dl6fbl.de/9y4tbg/

A5, BHUTAN. Hawk, SM5AQD, informs OPDX that he and Pelle, SM7EHU, would be active from A52-land between September 25th and October 2nd. Callsigns and their plans of activity/operations were not provided. QSL via SM7EHU.

BQ9P, PRATAS ISLAND. The Chinese Taipei Amateur Radio League (CTARL) is planning to head back to Pratas Island during an upcoming freight schedule arrangement for Pratas Island, October 7-16th. Updated operator list so far is: BV4FH, BV3BW, BV3FG, JI6KVR, DL3DXX, DK7YY, ZL4PO, OE1WHC and N2OO. They plan to have two stations on the low bands, which will be the focus of DL3DXX and DK7YY. Concentration will also be made on the WARC bands and SSTV. Paul, BV4FH, and team are looking for BQ9P DXpedition sponsors and pilot stations. If you can help, please contact JI6KVR at: ji6kvr@orange.ocn.ne.jp
Lee, ZL2AL, is the pilot station for the ZL/VK area. The BQ9P Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, announced that the following operation is approved for DXCC credit:
IRAQ - YI1BGD - This operation was on hold for DXCC credit from March 18, 2003 and after. Anyone who had this rejected should contact DXCC at < dxcc@arrl.org > to have their record updated.

EY8, TAJUKISTAN. Nodir, EY8MM, expects to be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (80m) entry. QSL via K1BV.

FK, NEW CALEDONIA. Akira, JE4WKR, will be active as FK/JE4WKR from September 23-26th from Ile de Pins (OC-032). Activity will be on 40-10 meters CW/SSB. QSL via the bureau to his home callsign or direct to: Akira Yasumoto, 1-56, Asahihonmachi, Okayama, 700-0865 JAPAN.

FO/A, AUSTRAL ISLANDS. Operaors Richard/DJ4OI, Andreas/DL3GA, Markus/ DL1IAN, and Joachim/DF6IC are now active as FO/homecall from Tubuai (OC-152) until October 3rd. Activity has been mainly CW/SSB but look for RTTY and digital modes. Their expected activity should be on 80-6 meters including the WARC bands. QSL via their home callsign, bureau or direct.

FS, ST. MARTIN. Operators David/K3LP (leader), Larry/N7DD and Clint/W3ARS will head to St. Martin and arrive November 14th. They plan to install antennas and operate as FS/K3LP in the CQWW CW Contest as a Multi-Single entry. QSL via K5KV. Outside of the contest, look for them to sign FS/K3LP (David), FS/N7DD (Larry), and FS/W3ARS. They will return home in December.

HR6, HONDURAS. Joe, VE3BW, has informed OPDX that he has changed his plans for the CQWW SSB Contest and will not be going to St. Kitts (V4). Instead, he will be operating from Roatan, Honduras, from October 19th to November 2nd as VE3BW/HR6. His activity will be on 160-6 meters CW prior to

contest. Peter, VA3WET, will also be joining him and when they are not diving, they will be active on the bands. QSL to their home callsigns.

IOTA NEWS.....
EU-038. Look for Madeleine, PA3CUZ, to be active from Texel Island between October 2-9th. Activity will be on SSB. Please, watch the usual IOTA frequencies. QSL via home callsign.

LIGHTHOUSE ACTIVITY. Look for Kevin, MW3AFR/p, and Mel (callsign not provided) to be active September 28th from Holyhead Breakwater Lighthouse (ARLHS WAL-011). Activity will be mostly on 40 meters. QSL via home call, direct or bureau.

QSL INFO AND NEWS.....
Ron Lago, AC7DX, would like to tell the Ham community that he has found the following OLD logs and will try to confirm all old requests. Some logs are partial logs, some barely readable. Not all blank QSL cards have been found, but he will reprint the ones he does not have. These are all hand written logs and in disarray. Please allow him time to search through these by hand to find your call. Please send your request direct with return envelope and postage to: AC7DX, POB 25426, Eugene, Oregon 97402. Here is the list he has provided:
VK0HM Heard Is. VU2ACD JT1AN 1978-80
VQ9CQ XW8FA C21BD
VQ9SS ZK2VE Niue T30W 1994
VR1BD 1979 KC6VE 1995 T30AC
VR1PK 1979 KC6HA 4B9CQ
VR1AY 1979 KP4AM 1979-81 XB9Z 1992
VP8AWU 1994 HL9MM 3D2WM
V31UN HL9KLT XH9Z 1993

TG0AA QSL DELAY. Dennis Motschenbacher, K7BV, informs OPDX: "The cards for my TG0AA operation in 2003 ARRL DX CW were ordered months ago from the PY2TNT QSL printing service. In the mean time, the fine gentlemen of the Club de Radioaficionados de Guatemala have been getting increasing numbers of anxious inquiries from DXers for status of QSL requests sent to the club. Weeks and weeks of emails to Anderson, PY2TNT, requesting status or return of my money have gone unanswered. Now E-mails bounce and the website of this questionable business is off line. The TG9 club is moving ahead with printing the cards via another route so this matter can be cleared up. Please accept my apologizes for this unfortunate delay brought on by unethical business practices - I hope other operators are not waiting on cards from PY2TNT."

ROUTE 66 CALLSIGNS. OPDX has been asked to explain what are "Route 66" callsigns (N6A-N6M). This is a special event which took place between September 6-14th. This year's 4th annual "Route 66 On The Air" event was hosted by the "Citrus Belt Amateur Radio Club". Several clubs from CA to IL particapate in the event. There are certificates and special QSL cards available. The event is to celebrate the U.S. Highway 66, which was established in 1926 and was the first major improved highway that

linked the West Coast with the nation's heartland. More details and QSL info is available via the following Web page:
http://www.qsl.net/w6jbt

SPECIAL EVENT. The special event station, EM225G, is celebrating the 225th anniversary of Kherson City, Ukraine (CQ zone 16, KH66hp), from September 19-30th. Activity over the past weekend was on 40/20 meters. Watch around 7076 and between 14200-210 kHz between 0900-1330z. QSL via UR3GM, by the bureau (Box 56, Kiev 01001, Ukraine), or direct to: Igor Pulin, Box 23, Kherson 73022, Ukraine. Bureau QSLs can be requested by sending an E-mail to: itel@ukrincom.net

SPECIAL EVENT. During the month of October, look for special event station, HF8JP, to be active to celebrate the 25 years of Pope John Paul II pontificate. The station will be active on 80-2 meters CW/SSB and the digital modes. A special QSL will be available via SP8QED (direct or via the bureau).

V26, ANTIGUA AND BARBUDA. "Team Antigua" will once again activate V26B on the Beautiful Island Nation of Antigua and Barbuda in the 2003 running of the CQWW SSB Contest on October 24-25th. Their plans are to enter the Multi-Operator/Two-Transmitter category. Members of "Team Antigua" will also make special attempts to be active on RTTY, PSK31, 160 meters and the WARC bands a few days both before and after the contest. There is also a possibility of some 6 meter operations with conditions permitting. Their Grid Square is FK-97 and IOTA Number is NA-100. Operators will make their presence felt on all bands starting on or about October 22th until about November 2nd. The members of "Team Antigua" and their callsigns are: V26B - Sam/WT3Q, QSL via WT3Q
V26EW - Ed/N2ED, QSL via N2ED
V26OC - Brian/N3OC, QSL via N3OC
V26R - Mike/KA2AEV, QSL via KA2AEV
V26U - Bill/W2UDT, QSL via W2UDT
Also, a few new members will be announced later with their QSL routes when their Antigian Callsigns become finalized. For a complete station description (with photographs and rate charts) of The Team Antigua, V26B, Superstation, please visit their Web page at:
http://www.frc-contest.org/
(Click on the DXpeditions page and then the Team Antigua, V26B Link!)

V26, ANTIGUA AND BARBUDA. Operators Doug/W3CF, John/WX0B, Sharon/N5CK, Irwin/KD3TB, Andrew/KD3RF, Heinz/DL2BO and Sigmond/KM9M will activate the Royal Antiguan Radio Club Station, V26DX, as a Multi/2 Low Power entry for the CQWW Phone Contest. Operators begin activity October 19th, and the last one out is November 1st. QSL all V26DX QSOs via KU9C with appropriate return postage and self addressed envelope or via the bureau. QSL individual ops via on air instructions. Their planned activity will be on 6 meters and the WARC bands before and after the contest. ADDED NOTES: A "Top Gun" plaque will be given to the first single op station to work them on 6 bands. "Top Gun" T-Shirts will be awarded to the top 9 fastest 6 band single op Q's after that. Their antennas will include:

Force 12 C4 yagi at 120', Optibeam 12-6 at 120', home brew - bent up 6 meter yagi at 120' and a 270' wire terminated over a salt pond @ 120'. Last year's pictures are available at: http://w3cf.com

FREE TRIP TO VP5! Kyle, WA4PGM, informs OPDX that "This is the final notice for those young ops interested in a FREE trip to VP5 during the CQWW CW Contest. Response has been disappointing so far with very few entries, go to < http://www.vp5x.com > for more details and get your essay in ASAP. A participant will be selected soon!"

VP5, TURKS AND CAICOS ISLANDS. Dave, AH6HY, will be up and running from relatively rare Grand Turk Island (IOTA NA-003) from September 26th to October 4th, as VP5/AH6HY. His concentration will be on 40-10 meters, SSB only, using a combination of wire antennas or dipoles depending on the band. QSL is via AH6HY direct or via the bureau.

VP9, BERMUDA. Sasi, VU3SNM/9V1SM, will be active from Bermuda's Biological Station for Research, October 18-27th. Look for VU3SNM/VP9 on 20-6 meters, PSK31 and SSB. Since this is a work related trip, most of the operations will be confined to a few hours in the evenings. QSL to his Manager Joe, W3HNK.

VP9, BERMUDA (Update/Postponed). Due to the result of the damage caused by the hurricane Fabian, Bert, PA3GIO, will now be active as PA3GIO/VP9 from Bermuda (NA-005), November 8-18th (not September 18-28th as first planned). He will operate from the QTH of Ed, VP9GE, and will be active on 80/40/20/17/15/12/10 meters SSB. QSL via PA3GIO, preferably through the bureau (E-mail requests for bureau cards will be welcome at: qsl@pa3gio.nl
The Web page for the operation is at: http://www.pa3gio.nl/VP9

XU, CAMBODIA. Hubert, XU7ACI, can sometimes be found on 15/20 meters SSB between 1300-1500z. He is currently working as a missionary in Phnom Penh for the next two years. QSL via KB8TJP.

YA, AFGHANISTAN. Masa, JG1OWV, informs OPDX that Sada, JA1AKF (not JA1AHF as listed in OPDX.626), signing YA1D from Kabul, is now active on SSTV and PSK with the help of YA1PBV. Look for low band operations to take place after November (Masa will keep us informed). Also, the club station, YA0J, was active on September 11th with guest operators as a memorial. QSL for YA1D and YA0J is via JG1OWV. Masa states that YA1D QSL should be in the mail this week.

ZK3, TOKELAU ISLANDS. Willie, DJ7RJ, is now active as ZK3MW. Over the past weekend he has been very active on 30/12 meters CW with some 15 meters SSB (with a good signal). He is expected to be there until September 28th. QSL via DJ7RJ.

ZK1, SOUTH COOK ISLANDS. Allen, K6USN, was expected to be active as ZK1USN from Rarotonga Island (OC-013) this past week, but there were no QSNs reported. By the time you read this, he is expected to activate Aitutaki Island (OC-083) next for nine days. Activity will be on 40-10 meters CW/SSB. QSL via K6USN.

ZL, NEW ZEALAND. Sasi, 9V1SM (VU3SNM), will be active as ZL/9V1SM/P from the QTHs of Christchurch and Auckland. His operation should commence on September 27th and ends on October 4th. Activity will be on 20-6 meters, PSK31 and SSB. QSL to his Manager, Joe, W3HNK.

Cellular???? How many locations with troops in the field overseas
have cellular access? How many of those same troops have access to a
sattelite hookup? Check your facts. Listen to the troops who have
actually used it, including some of those currently deployed.

Coffs Harbour Girl Guides will be active on IRLP node 6625 VK2EVB for
contacts with other JOTA stations around the world. Activity will begin
00:00 UTC and continue till approx. 07:00 UTC on the Saturday 18th only. The
girls are looking forward to chatting with Scouts/Guides etc. from overseas.
Hope to hear you on IRLP node 6625.

73 Peter VK2EVB

Tell that to the troops in Iraq and Afghanistan. You know the ones that are
in the 'crap'. You know the ones that can't get to a terminal of a sat
phone. You know the ones that hunt down a ham who is a MARS member and
fires up his track vehicle HF rig. Or his 20 watt PEP output manpack HF rig
and connects to a MARS station in Saudi Arabia, Europe or even the states.

Try again dipshit.

Dan/W4NTI Member USAF MARS.

2113. Hal Turner: U.S. DOLLAR COULD COLLAPSE AT ANY MOMENT!

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-22 03:12:28 UTC
From: daviesl2003@aol.com
Message-ID: <20030921231228.05965.00001076@mb-m07.aol.com>
Source record: 63633

INTERNATIONAL MONETARY FUND ISSUES WARNING: U.S. DOLLAR COULD COLLAPSE AT ANY MOMENT!
HORRIBLE TRADE DEFICIT IS A "NOOSE AROUND THE NECK OF THE U.S."
Warns the "once mighty dollar" is now unstable and our paper currency "could collapse at any moment."

Now, even the IMF agrees with me. I have been telling you this for MONTHS! If you doubted me, think again. Now take my advice: Take some money out of your bank accounts, IRA's, 401(k)'s, and other accounts and use it to buy small denominations of gold and silver. Take possession of that gold and silver and keep it in a safe place -- NOT IN A BANK SAFE DEPOSIT BOX.

When the paper currency collapses, banks will close and if your gold and silver is in their vault, you will NOT be able to get it.

Begin storing-up on dry foods: Dry cereal, dry rice, oatmeal. Sore up on honey, flour, sugar and canned goods. Get yourself a gravity-fed water filter. Store up on guns and ammunition, because when things go south, the violent minorities will attack and steal everything they can. It's _REALLY_ going to happen folks. It happened in 1929, but what is coming now will be ten times worse than "the great depression."

I wanted to view the original text of the items of proposed rulemaking
(specifically RM-10781 ... 10787) and was unable to find a document source
anywhere on the fcc site. I found all the comments just fine. However, I
do find it rather difficult to comment on something if I don't know whats
in it.

anyone have any source docs for these proposed rulemaking dockets?

I'm setting up my ham station. I just passed my general and I would to be able to operate when I find out what my call is. Do I hook up the red wire from my rig to the plus terminal on the power supply?

My friend, who is a new Extra, says the red wire goes to the minus terminal, but that can't be right because it's opposite of how I hooked my CB. What wire goes where? Thanks

John

I'm an extra "lite" :-) and the red wire is usually the positive, and
black the negative return.
But I wouldn't depend on anything posted in the r.r.a.p. group, so
either RTFM (if
you have it), or ask over in r.r.a.equipment

assuming that this isn't a troll. But most trolls usually go for "know
code = no ham" or such....

4382 virii currently quarantined in Postini for my benefit... 20 have
sneaked through and been gutshot by Snortin' Futilities Antivirus...
have already deleted 1500 virii friday and saturday and gave up to see
what the count rises to. so we're around 5600 for the weakend.

and there were folks at my home ISP who had 4800 by noon saturday.

clearly these script kiddies are not very clever... they could have
directed all this excitement to, say, whitehouse.gov or verisign.com,
and done something useful. or to microsoft.com, where by rights they
really belong :(

Cross posted to multiple newsgroups, a dumb question, and a mention of CB in the same message. This has got to be a troll. But, in case it isn't, unless someone has messed with the wiring, the red wire almost always goes to the positive (+).

Welcome back then !
It's pretty much the same principle thing as MS Netmeeting
(internet conference tool that is). Some hook up their
repeaters to echolink and access it with their ht and call
that ham radio.

> IRLP (which is connected to Echolink, BTW).

It way have been connected during the emergency, but there are some basic differences between the two. IRLP is REPEATER LINKING. This does not mean using your PC as a radio like Echolink. You are not allowed to connect to IRLP with a computer, you must use a radio.

I don't use echolink because I cannot be guaranteed a radio on the other end. I haven't used IRLP much because it's fake skip. I can talk real skip on my old 11 meter radio. It's not legal, but you can't stop mother nature.

P.S. I use all radios, Ham, MURS, FRS, CB, scanners, SWL, cellphone, etc. TV sucks. I don't watch it.

Thanks to all who responded. Luckily, I got an exact replacement for
my Radio Shack clock from a friend who had a brand new one squirreled
away!

Still, after searching high and low, I'm amazed that there's nothing
similar available (115 VAC, etc.). The MFJ clocks looked ok. But kind
of pricey, and battery powered clocks tend to drift more than one
running off 60 Hz AC.

For a spectrum chart showing all frequencies and useage -- including
frequencies up to 530 kHz -- see URL:
http://www.ntia.doc.gov/osmhome/chp04chart.pdf

Frequecies below 530 kHz classified as:
Extremely Low Frequency (ELF) 0 to 3 KHz
Very Low Frequency (VLF) 3 KHz to 30 KHz
Radio Navigation &
maritime/aeronautical mobile 9 KHz to 540 KHz
Low Frequency (LF) 30 KHz to 300 KHz

Also see Longwave Non-Directional Beacons (NDBs)

Untrue on both counts goofball. MARS did handle traffic from the battle
zone. Written and Phone Patch. Army AND Air Force. In fact the phone
patch links in AF MARS were quite active.

Perhaps you should get your facts straight before inserting foot in your
mouth Dean.

HICKORY, NC [UPDATE]: The FCC wrote General licensee John A. Abernethy, K4OKA, July 27, 1999, modifying his license to prohibit operation below 30 MHz for 180 days, effective immediately. Unless he appeals the action, Abernethy may not get back on HF until January 22, 2000. The FCC letter included a copy of a tape recording--supplied by complainants--of transmissions said to be of Abernethy's station on July 16. Hollingsworth's letter described the tape as "consisting of deliberate interference on 3.965 MHz." In the letter, FCC Attorney Riley Hollingsworth, K4ZDH, noted that Abernethy had been warned about deliberate interference at the time his station was inspected last January. Abernethy has 30 days to protest the sanction. FCC personnel inspected Abernethy's station January 21 and 22 in the wake of what Hollingsworth called "longstanding complaints from other amateurs and from our field offices." In particular, he said, the FCC had received "numerous complaints" about profanity, obscenity, deliberate interference, and failure to properly identify. Other complaints to the FCC alleged that Abernethy had aired something called the "Porkbutt Song," the letter said, "for the purpose of harassment or deliberate interference." Hollingsworth said the FCC's High Frequency Direction Finding Center in Maryland tracked the transmissions of the "Porkbutt Song" to K4OKA. The FCC letter also said the Commission had received complaints that Abernethy had used AM and upper sideband on 75 "for the purpose of interference" on or near 3894.5 kHz. Abernethy also was warned in the letter about over-power operation. Hollingsworth said that the FCC has no plans to start revocation proceedings against Abernethy "unless we have evidence of continued violations" of the type the FCC described in its July 27 letter. (For additional details, see "FCC Takes North Carolina Ham off HF for Six Months" elsewhere on the AWE news page.)

This is a little out of date, but should give a little background info for those who are unfamiliar with "BIG AL"...

HICKORY, NC [UPDATE]: The FCC wrote General licensee John A. Abernethy, K4OKA, July 27, 1999, modifying his license to prohibit operation below 30 MHz for 180 days, effective immediately. Unless he appeals the action, Abernethy may not get back on HF until January 22, 2000. The FCC letter included a copy of a tape recording--supplied by complainants--of transmissions said to be of Abernethy's station on July 16. Hollingsworth's letter described the tape as "consisting of deliberate interference on 3.965 MHz." In the letter, FCC Attorney Riley Hollingsworth, K4ZDH, noted that Abernethy had been warned about deliberate interference at the time his station was inspected last January. Abernethy has 30 days to protest the sanction. FCC personnel inspected Abernethy's station January 21 and 22 in the wake of what Hollingsworth called "longstanding complaints from other amateurs and from our field offices." In particular, he said, the FCC had received "numerous complaints" about profanity, obscenity, deliberate interference, and failure to properly identify. Other complaints to the FCC alleged that Abernethy had aired something called the "Porkbutt Song," the letter said, "for the purpose of harassment or deliberate interference." Hollingsworth said the FCC's High Frequency Direction Finding Center in Maryland tracked the transmissions of the "Porkbutt Song" to K4OKA. The FCC letter also said the Commission had received complaints that Abernethy had used AM and upper sideband on 75 "for the purpose of interference" on or near 3894.5 kHz. Abernethy also was warned in the letter about over-power operation. Hollingsworth said that the FCC has no plans to start revocation proceedings against Abernethy "unless we have evidence of continued violations" of the type the FCC described in its July 27 letter. (For additional details, see "FCC Takes North Carolina Ham off HF for Six Months" elsewhere on the AWE news page.)

I wonder if FCC knows he's up to it again?
Maybe we should refer them to this NG...
I don't know if it's such a smart idea for him to brag about his illegal activities on a public newsgroup which is archived by servers everywhere for permanent storage. Especially when everybody knows exactly who he is.

Well, he didn't claim to be "smart". So, I'm sure, in due time he'll be busted again. Those who brag usually are begging to be caught or need severe help! Matter of psychology.

Lou

<drivelectomy>

Gang, it's just a troll, fercryinoutloud! They've been around
since the early days of Usenet, and their entire existence seems to be
centered around making outrageous posts just to see what kind of replies
they get.

Just killfile him and be at peace. Don't even waste your energy on
a reply.

Well, it's pretty unlikely that the guy who got busted for this back
in 1999 is doing this, unless he's incredibly stupid. The headers on
his newsgroup postings point right back to his pesonal account on
Supernews, and the FCC could subpoena his user info and usenet usage
logs from Supernews in a flash if illegal activity is involved.

More likely, it's some troll who heard about the "Porkbutt" story, and
is having some fun stirring the pot a bit. If he really is creating
interference on 3894.5 and bragging about it here, however, he could
get a guest shot on "America's Dumbest Criminals" for this one -
should the FCC get a copy of this somehow.... :)

73, Leo

Better yet, killfile him and create a message rule like this:

Apply this rule after the message arrives
Where the Subject line contains '3.894' or '3894' or 'bigal'
Delete it

That way you not only kill the messanger but all the
inane followups to the thread - end of problem.

Ken

Not a bad idea.. I hate blocking innocent replies out, but you're right, it
should stop it. Lou

2191. Theoretical Question

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-23 16:36:05 UTC
From: mike@unfolded.com
Message-ID: <7562d656.0309230836.391470fa@posting.google.com>
Source record: 63467

Hello!

Can someone point out any mistakes in the following conclusion? I'm just trying to find out if my understanding of stuff is correct.

If I transmit a signal at a frequency of 2.4 GHz (2 400 000 000 Hz), the wavelength of that signal is 12.5 cm (speed of light/frequency in Hz). One wavelength can transport one bit of information in one wave length. In one second the signal travels ~300 000 km (speed of light). So I have 2 400 000 000 waves per second, which translates to 2 400 000 000 Bit per second. This translates to a "raw" throughput of ~2289 MBit / s.

This seems to be a bit high looking at current gear on the market, but I guess much gets lost in error detection/recovery and stuff. Anyways, can any of you pros take a short look on it and point out any mistakes I made?

cheers
Mike

Hey,

That appears to be a great article. Did you also post the link to:
rec.radio.shortwave ? There may be more users of that rig over there.

Regards,
Jim

Not sure how the thread made it past my kill file, but to respond to your comment, I only went with what I was told and seen for myself as witnessed above.. IF there was more than one incident mentioned, then I didn't notice in my speed read of the article.
But, if it's been more than once, then maybe it's time they show him they're done playing games.

I hear that Captain Truth was invited up to give the Guest Sermon
at one of those "snake-handling" churches up in the mountains of
Western NC recently. (That's right, C.T. was permitted to learn on the
lectern and speak to the congregation) What power! They were
all rapt with attention as he eventually launched into his homily:
"Why Does God Give Us Gastro-enteritis ?" Then, proclaiming
with the power of Daniel Webster, he thundered: "So we can FART
like THIS glub dammit!!" Then, grasping the lectern's side white knuckled
and with a look of sheer insane delight in his bloodshot eyes, he promptly
raised his right leg to a 45ï¿½ angle and let fly with a pants-splitting
anyl depth charge of hitherto unheard of duration, bass and volume.

His lovely portly wife, Betty Dee Badabumski, who wonders every day
how she landed him for a hubby, asked several people "who that man up
there was?" before the sheer stench and rising barometric pressure
sent everyone running for the fresh NC mountain air via the doors
and 2 out windows. (the snakes in the cage were also gone, having
bent the wire cages and slithered out the back door) C.T. was asked
not to return by spontaneous vote, wherupon he hopped into his
1977 Caddy with Betty Dee and was last seen heading back in the
direction of Hickory...

(word has it that he's been invited to call next week
at the 1st AME Church of The Apostolic Friday
night Bingo game. Let's hope they don't let him
near the buckets of fried chicken and Pepsi while
he's pullin numbered ping-pong bingo balls...)

Actually, it looks like "BIG AL" might be a fan of K40KA who's trying to stir things up. He's been using a few key details from the article in his posts. For example, he never mentioned the callsign K40KA until shortly after I posted that news article.

I'm going to traceroute his IP and see at least what part of the country he's in.
Results later.

Actually, you're probably right. You know, he didn't even start using that
callsign until after the article I posted. I'm going to traceroute his IP so
we know his general location and the name of his ISP. If anyone had actually
heard him on the air we could go straight to the FCC.
Are there any confirmed reports of this guy actually transmitting?

2224. Anybody actually heard "BIG AL" on the air?

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-23 23:41:28 UTC
From: Greg Courville <EngNOSPAMinuitor@Gee-Enginuity.com>
Message-ID: <vn1mh7gl0j7b9d@corp.supernews.com>

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy

As most of you know, there is a troll on these boards claiming to be K40KA. I'm still trying to figure out whether this guy is just trying to be annoying. If he is actually doing what he said he is, we can go to the FCC, so I'd like to find out if he's actually on the air. Not owning any HF equipment, I can't do much my self. If somebody could listen in when he says he'll be transmitting...

>

Well first off, the reference violation above is long done with. He spent his time in radio prison and returned to the HF bands. He has basically learned his lesson, this time. And has been a decent operator for several years now.

What I was refering to was he was removed from the radio voluntarily in lieu of being fined a big chunk of bux back in the 70s. He stayed off the air for years. Returned as KJ4JX and began his crap again. He later got his original call back under the vanity system.

He has been a QRMer for many years. BUT as stated above has finally seen the light.

This crap you see here from "BIG AL" is BS.. And same for the "3894.5" crap. Its just a troll.

But I wanted to set the record straight.

Dan/W4NTI

It'd s troll. Big AL gets on occasionaly on 3894.5 and talks with whats left of his "Abernathy Radio Group". Without his Henry 8K of course.

So don't worry about it.

No transmissions that I could hear tonight, leading me to belive that
he is bogus. His ISP, however, cannot be seen, as he is posting
through a third-party newsgroup service, Supernews. We can only trace
him back that far - by the message headers.

Supernews, however, has a very strict Terms Of Service" (TOS)
agreement with its subscribers, which prohibit multiple postings of
this type of nuisance message and nym shifting (at least three
different ones so far, including stealing mine for a while :)).

A few complaints to abuse@supernews.com from the folks in these
newsgroups, with a copy of some of these messages **including
headers** , and he will be 'off the air' here quicker faster than he
can spell FCC! If he can, that is...

So if I come upon a burning house, I may then, and only then, modify my radio to call for help. IF I have means to do so.

Disabled as I am, I guess I must watch house burn and take occupants with it.

N'est ce pas?

Yeah, if you look at some of the other Big-Al threads you'll see that we've decided he's not for real.
Now we're trying to get him for violations of Supernews's policy. Write to abuse@supernews.com and attach segments of his posts. Maybe then he'll have to post directly...

Dan says that I never admitted to what I did in the past. This post from a few years back shows that I did.

PS: I also apologized to him for my actions!

Doc,

You owe Herb Schoenbohm a thank you for helping put Frank on the
correct path. One day Frank was on 20ssb from Herb's station. I was
on frequency and broke in to say hello to Herb. Herb said would I like
to talk with Franky, I declined. He asked why...and I told him I
didn't appreciate how he treated me on the air without him even having
a callsign (at that time). A short pause later Frank came on the air
and apologized to me. I accepted and from then on have been in contact
with him via e-mail.

As for him talking with you and some of the "others in our camp" ...he
and I discussed it and he made the proper moves..with some minor help
from me.

Frank Todd is a good young man now, and a asset to amateur radio.

Dan/W4NTI

Yes, because that's the situation most people would be in. Most people
don't walk around with radio transceivers, so they'd run to a phone
and call it in. Or in recent years, use their cellphone.

As ham, you have the advantage of being licensed to use certain frequencies,
and likely have the radio to go with those frequencies. So you can
use it to call for help.

If you can't get through with amateur radio, that license doesn't
give you super-communication privileges.

The bit about "I better modify my radio just in case there's an
emergency" is just the talk of someone playing at emergency communication.
If you didn't have a ham license, you wouldn't be giving any of
this consideration. Yet, because you do, you think you have an absolute
need to call in an emergency, instead of maybe being helpful with
your hobby transceiver. If you can call in an emergency via ham
radio, that's great.

But the minute you go beyond amateur radio, not only do you
suggest that ham radio isn't useful in emergencies, but you step
down to being just like any other citizen. And they don't worry
about having bootleg radios around, just in case of an emergency.
They don't even think in terms of being a "great communicator".

Gee, what a moron. If the guy was a BoD member at TAPR or something like that, his behavior would be understandable.

After all, he has demonstrated that he lacks the intelligence and social skills necessary to operate on either usenet or ham radio...

Hey, Big Al: Can you give us the latest scoop on what's going on at TAPR? I've noticed that the newsletter is getting really sucky, kind of like the one at TPRS did, right before they went belly-up.

Tell us about it, Big Al!

??????
How would transmitting on FRS frequencies help in this situation? On
the FRS frequencies, the only people I can communicate with, besides anyone
that I have arranged to talk to, are the kids playing around with their toys
and they aren't going to help in a "burning house" situation.
However, ham frequencies are usually monitored and repeaters are more
common. There is always the possibility of autopatch or some other ham to
relay an emergency message.

and we still have to put up with idiots like you, no matter the band or technology.

besides, if you look at echolink, some of the stations in there are linked to repeaters. believe me, if too many bootleggers show up on echolink, it won't be long before their accounts are terminated and they have some explaining to do (the echolink servers to track IP addresses of those who connect).

as for the technical remark, perhaps you don't realize that a computer is almost an essential part of the station these days (logging, aprs, packet, propogation predictions, etc). so don't gripe at us because of YOUR technical and mental deficiencies.

If you insist.....Boss Hogg....looks like there are 5 Bushoggs listed.

Bushong, Bill
36 Loring Ave,
Salem, MA 01970-4536
(978)744-0507

Bushong, C
170 Lexington Ave,
Cambridge, MA 02138-3368
(617)864-0481

Bushong, HA
34 Merri Vlg,
Merrimac, MA 01860-1936
(978)346-4611

Bushong, Melanie
36 Loring Ave,
Salem, MA 01970-4536
(978)744-0507

Bushong John R
73 Church Lane
Barre, MA 01005
(978) 355-4971

So either you are still living at home or you have
an unpublished directory listing. What were you saying about cowardice?

> Wow, you are the man.

Looks like you are the woman, as much whining you are doing you cunt.

FOR IMMEDIATE RELEASE

For Further Information:
Horace Ward
President and Chief Executive Officer
(309) 633-6886
horace.ward@rohnnet.com

ROHN INDUSTRIES, INC. FILES FOR CHAPTER 11 PROTECTION;
$9.5 MILLION DEBTOR-IN-POSSESSION FINANCING SECURED;
BOARD MEMBERS RESIGN

PEORIA, IL, September 16, 2003 ï¿½ ROHN Industries, Inc., (OTCBB: ROHN), (the "Company") a provider of infrastructure equipment to the telecommunications industry, announced today that the Company and five of its direct and indirect subsidiaries have filed voluntary petitions for Chapter 11 relief in the United States Bankruptcy Court for the Southern District of Indiana (the "Bankruptcy Court").

The Company also announced that, concurrent with the Chapter 11 filing, it has entered into a $9.5 million debtor-in-possession ("DIP") line of credit with the lenders that are party to the Company's Amended and Restated Credit Agreement, subject to the approval of the Bankruptcy Court, which will include funds that will be rolled forward from the Company's current credit facility. Subject to the provisions of the Bankruptcy Code, the Company remains in possession of its assets and properties, and continues to operate its business. The Company said that the objective of the Chapter 11 proceeding is to maximize recovery to creditors by facilitating an orderly sale of assets. The Company is currently in discussions with an unrelated third party regarding a proposed sale of the assets of the Company.

Upon the filing of the bankruptcy petition of the Company, but following the approval by the Board of Directors of the Chapter 11 filing, Stephen Gorman and Jordan Roderick each have resigned from the Board of Directors of the Company. Currently, Horace Ward, the Chief Executive

Officer of the Company, is the only remaining director of the Company.

Commenting on today's announcement, Mr. Ward said, "Our immediate goal is to stabilize the Company's financial situation and utilize the Chapter 11 process to enable the Company to conduct normal business operations as the Company works to complete a sale transaction."

The Company has retained the Indianapolis law firm of Ice Miller to act as its legal counsel in the bankruptcy proceedings. The Company has also retained Silverman Consulting, a national turnaround consulting firm.

About the Company

The Company is a manufacturer and installer of telecommunications infrastructure equipment for the wireless industry. Its products are used in cellular, PCS, radio and television broadcast markets. The Companyï¿½s products include towers, poles, related accessories and antennae mounts. The Company also provides design and construction services. The Company has a manufacturing location in Frankfort, IN along with offices in Peoria, IL and Mexico City, Mexico.

Statements in this press release include ï¿½forward-looking statementsï¿½ within the meaning of the Securities Exchange Act of 1934, the Private Securities Litigation Reform Act of 1995 and other related laws, and include, but are not limited to, those statements relating to sales and earning expectations, expected demand and other statements of outlook. The Companyï¿½s actual results and effects could differ materially from those currently anticipated in our forward-looking statements. Factors and risks that could cause such differences include, but are not limited to: wireless and fiber optic communications industry capital spending; the ability of the Companyï¿½s customers to secure adequate financing; elections by customers to terminate or delay previously placed orders; the effects of competition, particularly on pricing and margins; the Companyï¿½s implementation of our growth objectives in foreign markets; the Companyï¿½s indebtedness, which could restrict its operations, making it more vulnerable to adverse economic conditions and making it more difficult for us to implement its business strategy; liquidity problems that confront or may confront the Company; the Companyï¿½s inability to obtain bonding required for certain customer contracts or potential contracts; liabilities arising from an engineering problem with the Companyï¿½s internal flange poles and a testing and repair program undertaken by the Company in connection with that problem; unexpected problems and costs the Company may encounter or incur in consolidating our manufacturing operations at its facilities in Frankfort, Indiana; the Companyï¿½s Commonwealth of Pennsylvania construction project staying on its currently anticipated schedule; and regulatory changes affecting the industry in which the Company operates. The cautionary statement contained in Exhibit 99.1 to the Companyï¿½s Form 10-K for the year ended December 31, 2002 is incorporated herein by reference. Forward-looking statements are given as of the date of this release and the Company is

not undertaking any duty or obligation to update these statements
publicly as a result of new information, future events or otherwise.

Hi

Set the radio to receive one of the noaa weather radio frequencies so
they it will
work when they turn it on. Plus, it won't xmt out of band if they try to
use it.

Dan doesn't have to answer you, you slimy little turd. You have
answered yourself three times. What a fucking dork you are.

Too bad that the chemo worked on your little ass. The world would have
been better off without your smart ass mouth.

You are nothing more than a little sniveling weasel who needs a good
old fashioned ass whipping.

Keep fucking with the wrong people, and you will be in for a thrill!

Hit the road fwankie toad!!!

fwankie toad will be on tonight, on top of his gay lover's pole. Him
and loid da toid davies are butt buddies.

fwankie is a regular visitor to lloyd's hud apartment, They were
caught by the athens, alabama police a couple of weeks ago. They were
caught in the local pickle park, lloyd said....."we were playing
leapfrog and I got stuck," fwankie couldn't say anything as his mouth
was full of jizz!

Don't hold your breath on that Lou. Christy D. or christy davies et al is
nothing more than a trol. She/he has claimed over the years to be an attorney

at law etc.

She/he is a known usenet troll. And, as full of shit as the proverbial christmas goose.

Don't count on that you troll. There is a file about a foot thick on you and
the various aliases you have and are presently using. Attorney my ass! I would
bet money that nothing happens on this non-event.

Whos is this Les you seem fixated on? Must be one of lloyd davies the
deliverance extras butt buddies. Or lloyd himself.............:-)

Maybe I know more than you think?

Keep fishing.....LOL!!!

I'm sure many people have noticed that "christy's" posts stop when lloyd goes into work as a pizza delivery boy.

You are almost laughable. Your webpage seems to be drawing a lot of attention.

http://www.angelfire.com/freak2/lardasslloyd/

Sure looks like lloyd has a sense of humor, posting a picture of himself and the self depracating humor. What a great guy.....But maybe not!

What happened to the lawyer act? I knew you wouldn't keep up that act you dumbass!

By the way, you get maybe a D- for this charade.

Les

Makes you wonder what drives some of these folks to behave the way
they do.....and in some cases (like today's example, posting obscene
crap from an DoD network), pretty stupid.

Guess these guys aren't too Internet literate - nym-shifting might
fool some of the Usenet community, but the ISP's server logs don't
lie!

Now, if Supernews would be so kind as to TOS this 'Big Al' character,
we could get back to dealing with the usual level of nutbar that lurks
here :)

Belly laughing.....christy d has lot's of posts on the usenets where
he/she claims to be an attorney.

I would bet the Attorney general would be interested in you posing as an
Attorney at Law wouldn't he Counselor?

The proper authorities will be contacted at the open of business tomorrow, you
can be assured of that. Unlike you, I don't lie or play games.

Bye, Bye, fake attorney.

Les

This will be the last one this evening you fucking fake lawyer! I'll save all the others for future ammunition.

Let me know when the state attorney general attorney's investigator contacts you. I've got more of these juicy tidbits.

Les

If true, since such use is now considered a serious offense, this person would be well advised to discuss the rules governing the use of military computers for private recreational activities with the facility's system adminstrator or IT security officer. DoD has already come down hard on a few violators (I read in S&S that one E-6 was sentenced to two years in jail and discharged).

2307. Amateur Radio Transceiver On A Chip

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-25 15:35:03 UTC
From: Fudge <fudge@nrtco.net>
Message-ID: <4WDcb.6424$1H3.397930@news20.bellglobal.com>
Source record: 63377

How about a complete Amateur Radio Transceiver on a chip mounted on a printed circuit card that plugs into my computer. I do not care if the output is only 1 Milliwat. Failing that, I would like a complete transceiver with software that is computer compatible. Again power output is not a concern. Now that Kachina is no longer producing a computer compatible rig, who has stepped in to fill a market need? I would like to operate from my desktop. I would like to operate from my desktop and not cost a small fortune. Help please!

Imagine never being lost while driving. Garmin® makes it possible. Meet the StreetPilot III - the ultimate traveling companion and guide. Create a route and then put your mind on cruise as you follow clear, accurate, voice-prompted turn-by-turn directions to safely reach your destination.

The simple, intuitive menus of the StreetPilot III offer access to the shortest and fastest routes, directions, and estimated arrival time of your intended destination. Automated voice prompts alert you to upcoming turns, course deviation, and distance to final destination. At the touch of a button, view the locations of all the nearest highway exits, gas stations, restaurants, ATMs, hospitals, and rest areas on a full-color L CD.

The StreetPilot® III comes with MapSource® City Navigator CD-Rom and everything you need to download street-level mapsets from your PC. Then, just place the portable system on the dash of any vehicle, and enjoy stress-free driving and peace of mind-without any costly service charges or hook-up fees.

This unit is in mint condition and includes full unlock for the entire US and all accessories, manuals and original box

Asking $550 shipped in CONUS

As you probably could have known, he was referring to french-speaking
people, not the French as a people.

The poster is from Belgium.

YOU DO LIVE FOR MY EVERY POST DONT YOU.

I DO OWN YOU AND YOU KNOW IT.

YOU MUST BE A SHUT IN. YOUR ON HERE MOST OF THE DAY. BIG AL GETS OUT AND
ABOUT UNLIKE YOU. HAVE A NURSE TO WHEEL YOU OUTSIDE EVERY ONCE IN A WHILE
GET SOME AIR.

WELL YOU DONT HAVE TO HEAR US FOR US TO HEAR YOU. SO COME ON DOWN YOU CAN BE
THE NEXT CONTESTANT ON AY-YI- YI YES ITS THE PORKBUTT SONG. BUT NOW IF YOUR
AFFRAID OF BIG-AL STAY AWAY AND HIDE WE ALL UNDERSTAND. MAYBE YOUR SIGNAL
WILL BE BETTER THAN THOSE GUYS FROM ARKANSAS WHO ALWAYS TRY TO QRM US BUT
NEVER GET THE JOB DONE.

BYE HO$$$HO$$$

Hello,
I am thinking of selling up my Kenwood TS790 VHF/UHF rig
and getting one of these portable Yaesu FT897' for both HF
and VHF/UHF contest operation.
Well I would like to hear what the views of others are .
I have already read some of the reviews on eHam.net
I just want to pole a larger number of people.

What have you found are good and bad about the rig ?
is the FE any good for DX working and will it cope with
BIG signals near to the RX frequency .. Etc Etc

Cheers Martin G1GYC

2319. GOOD NEWS-------France heat wave deaths top 14,000

Then I was wrong to accept your apology back in 99. I must have actually
fallen for your BS.. You did notice that I stopped replying to your
e-mails, a long time ago, didn't you? Ever wonder why? I'll tell ya.

As far as Im concerned the BARF and the sister organization the Stumpjumpers are nothing but radio terrorists. And if Herby hadn't been popped and thrown off the bands you would ALL still be jamming Intercon and MM nets on 14300/14313. Your ALL A BUNCH OF RADIO TRASH.

That clear enough Franky?

Dan/W4NTI

I guess I HAVE TO SPELL IT OUT TO NUMBNUTS, eh? Ref my last post to you.
Now here is another.

I no longer believe your apology was sincere. Based on your actions and
your remaining membership in a Ham Radio Terrorist group (s).

In otherwords Franky, you have no credibility.

Now take your HO HOs and shove them up your BARFY/SJ arse.

Dan/W4NTI

Okay, so we know two things about this guy:

1. He's not origional, the best he can do is copy the style of another, allegedly dead, US operator. Badly, as it happens.
2. More interestingly (to me, at least) is that he connects to the Internet from a mainland UK address.

I'll not bother posting his street address on here. It's more fun to deal with this my way when it suits me.

Cheers all

Ya sure you betcha! I'm laughing my ass off as I read this stuff. Of course she is fake, she was uncovered quite awhile back. She or whatever it is has been a troll for a looooooong time.

Poor Lloyd, will he never learn? Just about everyone owns Lloyd on the internet.

Incidentally Lloyd or whoever you are, I have enjoyed your new webpage. Seems the old one was moved to a better location, loads faster too. What wonderful music! Is it true that you were the body double for Ned Beatty in the bend over the stump scene? Squeal like a pig boy! Ya sure, you gotta love it.

Well, got to go, almost finished stacking the firewood for the oncoming winter.

Ya Sure, You Betcha.....

Hi,

This is at least passable - JUPITER HF TRANSCEIVER
http://www.tentec.com/TT538.htm

Not outragously expensive and can be operated from computer or stand alone.

Regards,
Jim

Ok, so he copies the style of a dead man, making him a dead loser.. Pretty
bad when ya can't be original....
But the one thing he IS good at, is being an ASS HOLE... No wonder he likes
PORK BUTT -> = FAT ASS. HIS!
As I said, BIG AL... BIG MOUTH - BIG ASS..... ALL YOURS! If YO momma
lost "her" balls as you claim, then you ain't right! You're one screwed up
individual.. But then we already knew that. You've proven your point. Just
as a reminder dick wad, IF I ever want to get on the frequency, YOU will
NEVER chase me off, so long as "I" am running per the laws established.
Jam all you want ASS HOLE, it will bury you, not me.
Enjoy!

Lloyd ... Besides the fact you miss-spelled "VICTORIOUS" ...
by SLEDGEHAMMER88
Hello Lloyd,

How have you been? It has been quite some time since I have spoken to you. I am not mad or anything, just had nothing to say.

I hear you are going for a law suit against The NIMBusters. Good luck. It will take a lot of time and money to accomplish it.

What I really want to ask is, Do you really think it will be advantageous for you in the long run?

It might start a lot of shit, but it will bring your sister into this mess. Why not just say 'to hell with it' and view it as a psychological challenge like the rest of us do?

Let me give you an example. For years The Busters have been bugging Mr. Hutchins of The National Independents Movement ... through Message Board attacks and personal emails that I post and contribute to this site.

It hasn't bothered me, nor has it up-set Mr. Hutchins. I report regularly to The National Independents Movement of my activities ... and the sites I post on. That is why those emails just get deleted.

But let's get down to brass tacks, Lloyd. Why do you keep posting on The NIMBusters Message Board?

I will tell you why ... and there are two reasons common to all posters on this site.

1. You are as much of a Net Idiot as the rest of us ... including Steve Holsten, VONBLUVENS, and THE INCREDIBLY HANDSOME SLEDGEHAMMER88.

2. NIMBusters is the last existing site of TOTAL INSANITY. We all love it because we can be as crazy, or as normal as we choose to be.

NIMBusters is also SACRED GROUND for all to meet and post, without fear. Over time we all become cut-throat friends!

Last, but not least ... Lloyd, think seriously about wearing long trousers from now on. Those fat legs are your undoing!

I hope your sister is slimmer and better looking than you!

GET RAILED LLOYD ... YOU FAT FUCK!

SLEDGEHAMMER88

Source record: 63238

All this bluster about 3894.5 must be aimed at the QRP users. Sorry Big Al, but many of us have yet to hear anybody on this freq.
What are you guys using for antennas? Do you even HAVE antennas?
I got it! You stalwarts of the Ham Community are using Dummy Loads! How fitting.
Perhaps Dumbass Donnie or Preacher John should give you some pointers...or you could always approach David Tolassi for some ass istance...
You guys would be better served by using old soup cans and string....stretch them around your neighborhood, feed them into a large, centrally located, empty V-8 juice can (preferably fifty feet in the air) and call that your Repeater.
You could be creative, too. Slap the bottom of the empty soup can with a spoon two, three times and use that as your "tone" activation. You could have a "private" line, too. All you need do is untie the incoming string from one of the other cans and there you go!
So, you see, there is hope for 3894.5. All you need is a little creativity and lots of imagination.

PS:
Keep your cans clean and your strings tight. Dit-dit-dit-dah.

I did not write what follows. It was "found" it in another NG.

I feel however that it would be an appropriate footnote
to this thread in lieu of the above original
and ongoing commentary. -

Enjoy!

--------- cut here ---------

The Mythology of Obesity tells us that sex with a fat partner is either fruitless or impossible. It's a prejudice that crosses all boundaries of race, class, education, and physique: you're as likely to encounter it in a gynecologist's office as in the pages of The National Lampoon.

In the real world, sex is more likely to be impeded by anxiety than adiposity. Fear of rejection, fear of not meeting the partner's expectations, and fear of not being able to perform are among the most common emotional barriers to intercourse. Some dysfunctional people harbor feelings of guilt over their sexual needs, or lack the skill or desire to stimulate their partner. Even mild anxiety can impede or disable sexual performance. Ignorance and inexperience contribute their own problems. "Frequently, for instance" reveals Dr. Helen Singer Kaplan in Psychology Today, "neither spouse knows where the clitoris is or recognizes its potential for eliciting erotic pleasure. They have intercourse as soon as the husband has an erection, and he ejaculates without considering whether his partner is ready. Such couples genuinely wonder why the wife does not reach orgasm."

Fat people suffer all these problems in spades. The social pressures they endure create numerous obstacles to sexual interaction. The most direct effect comes from dieting: prolonged semistarvation can seriously dampen the libido, and a woman who is losing weight can experience a disruption of her normal menstrual cycle. Indirect effects of prejudice include a lack of opportunity, a history of rejection, and a negative body image. "Some obese woman, fearful of competing for a man's interest, avoid interpersonal encounters and disparage males in general," writes Dr. Barbara E. Bess in the journal Consultant. "Once involved in a relationship, they doubt the

partner's sincerity." Self-hatred manifests itself in a number of anti-erotic behaviors. "Some women are reluctant to act seductively for fear of rejection and ridicule. Young women ... express the desire to look 'sexy' and wear seductive clothes, but fear that men in particular will think them grotesque. ... Many obese persons attempt to hide their bodies under cover of darkness, or keep their clothes on during sexual intimacy."

Shelley Bovey found similar body- and self-image problems among fat women in Britain:

The concept of being sexually undesirable because of their weight figured strongly in the majority of the interviews I conducted with large women. Apart from agonizing experiences of rejection, I discovered a lowering of expectations. Women felt they were risking too much rejection by even contemplating a relationship with the sort of man they wanted. ... This is a circular situation which can only be broken by women acquiring self-esteem and confidence in their sexuality. While they are prepared to accept second bestï¿½p;whatever that may mean for themï¿½p;those arrogant men who talked about going on 'mercy missions' will continue to claim their place in sexual politics. If women cannot believe they deserve more, then sex for them will be like 'squirting jam into a doughnut.' as Germaine Greer so graphically put it...

Fat men have even less opportunity for sexual interaction. "Despite changing social and sexual mores," notes Dr. Bess, "men still are presumed to be the sexual initiators, and such fat men are inhibited from approaching woman by the fear of rejection. This reticence can lead to social and sexual isolation." As for the FA, fear of rejection combined with a general fear of being labeled "different" may keep him out of the sexual arena for many years. Instead of going through the grope-and-fumble stage in adolescence, he has to do it as an adult. Thus, the average FA displays all the sophistication and tact of the Festrunk brothers.

Taken together, these social side-effects mean that the average fat man or woman tends to be somewhat sexually retarded, though perfectly capable of catching up with their thinner peers if the right situation presents itself. Dr. Bess marvels at the resiliency of fat women. Despite all the degradation and rejection they have suffered, she finds them "eager to enter into sexual relationships if initiated by men who are affirming, reassuring, and accepting." Most fat people, she finds, develop a normal sex life in spite of all society can do to prevent them. Among the more notable findings she culls from the recent literature are these:

The sexual functioning of the hyperobese falls within the normal range. Few had problems with sexual performance or libido.
For married obese persons, sex is an important source of pleasure.
Single obese persons have a normal interest in sex, but have less opportunity to find sexual partners who consider them sexually attractive, due to the negative cultural bias. Limited sexual opportunity, rather than lack of desire, is their real problem.
Obese persons who are not able to attract sexual partners engage in normal autoerotic masturbatory activity.

Some fat persons are extremely active sexually, in both desire and practice, and can be stimulatingï¿½p; and stimulated - sexual partners. ... Thus some obese persons actually may be more sexually active than their nonobese counterparts.
Hyperobese persons display great ingenuity in finding comfortable sexual positions, thus minimizing the potential obstacles due to their great size.

But let us suppose that you've found the right partner and you've found the right attitude, but you just can't seem to find the right position. Even Dr. Bess isn't much help here. "Although very few such persons are unable to consummate the act," she writes, "this is sometimes the case, especially when both partners are massively obese. Having the less heavy partner assume the upper position facilitates intercourse for many such couples, but suitable positioning is an individual matter best worked out by the persons involved."

This is about as much useful advice as you're likely to get from even the most well-informed physician. What doctors don't know about fat people and sex could fill an encyclopedia. I testify from experience. It is frightening to be asked, by a man with eight diplomas on his wall, if you have ever "achieved penetration" with your wife.

In an effort to dispel such ignorance, I've undertaken an exhaustive search of the literature on fat sex. I find that those authorities who have taken the trouble to investigate the matter report that obesity is rarely, if ever, a barrier to intercourse. Fat is never stored in the penis, nor does it choke off access to the ovaries (as Hippocrates taught, and generations of physicians believed). In fact, the human body is remarkably well-designed for storing fat in large quantities. Mother Nature keeps fat away from the vital and sensory organs, away from the joints, and away from the genitals. "To put it bluntly and squarely, no woman is so fat that her vagina is inaccessible," states Marvin Grosswirth in Fat Pride, adding:

The only report I had of an unsuccessful attempt at intercourse came from one of my informants who went to bed with a man who was as fat as she was. "Our bellies got in the way," she said with a giggle, and then confessed that they had not really tried very hard. "The whole thing struck us both as kind of funny and we broke up. Of course, there went the whole ball game." This woman is inclined to believe, on the basis of her own single experience, that sex between two fat people is difficult if not impossible. But she did not attend the NAAFA meeting at which my wife and I met a charming couple and their beautiful year-old daughter. Both the man and his wife weighed easily in excess of 300 pounds.

Mr. Grosswirth did pause to wonder if a woman of 700 pounds might have difficulty with intercourse. He had apparently missed an item in the New York Times, datelined March 28, 1936. It seems that Mrs. Gertrude Karns gave birth that day to a healthy 9-pound 3-ounce baby girl at a hospital in Shreveport, Louisiana. The new mother weighed 745 pounds. The icing on the cake is that the father, Cliff Karns, weighed a hefty 304.

The Karns, alas, did not leave us a manual to quote from (or even a set of diagrams). But several other authorities on sex (self-proclaimed and otherwise) have addressed the matter of obesity and intercourse. A few betrayed a vested interest in finding that fat sex is uncommon or unpleasant, and their comments have been omitted. The rest are quoted liberally below.

MALE-DOMINANT POSITION-
Commonly known as the "missionary position," or, in George Carlin's phrase, "good old American man-on-top-get-it-over-with-quick." Authoritative medical opinion since the time of Hippocrates has written off this arrangement for fat people. Many authorities still hold the notion that a fat man simply cannot perform in the dominant position. "If he has a belly," writes Alex Comfort, "... he won't be able to come on top, and will quite often prefer to avoid male-active positions because of breathlessness." As for a fat woman, John F. Oliver's authoritative textbook Clinical Sexuality states that "Marked obesity of the wife, especially of the thighs, pelvic girdle and abdomen, can make intercourse in the standard position well-nigh impossible. Even moderate stoutness, if it involves thick labia majora and a prominent mons, can keep the male organ from penetrating to a satisfactory depth."

So much for authority. Those with practical experience in the matter adamantly disagree. Conventional sex is rarely impeded by any degree of fatness: experimentation and a few minor adjustments are all that the average fat couple require. Most would find it harder to program a new VCR.

When the woman is fat, Abraham Friedman recommends that she lie on her back, "her legs bent at the hips, her thighs open as wide as possible, and her knees fully bent, thus completely exposing her vulva and vagina." If she has a big tummy, she can lift it away from her pubic region with both hands, at least until the man gets himself positioned between her thighs. If penetration is still difficult, it can help to put one or more pillows under her buttocks. "Considerable variety is available to you through the simple expediency of changing the position of your legs," writes Marvin Grosswirth. "If you use a pillow, your vagina becomes elevated and entry is easier. If you use two pillows, entry will not only be easy, it will be different. If you raise your legs to a certain height, the angle of penetration and the points of friction will be different than if you raise your legs to another height, or if you do not raise them at all. You would be amazed at the variations three inches up or down can create."

However tempting it may be to lie atop that heavenly pillow of female flesh, when the woman is fat it makes more sense for the man to sit back on his haunches during intercourse. (Where you choose to lie afterwards is up to you.) You might call it "male upright" rather than "male dominant." This has the added advantage of freeing the man's handsï¿½p;and with both hands free, a woman's tummy becomes a plaything rather than a hindrance.

"There are only a few basic rules for a fat man to remember in the male-dominant position," advises Grosswirth. "First, raise your body high enoughï¿½p;or lift your abdomen with your hands, if necessaryï¿½p;so that your partner can guide the penis to its destination. This will be a little

easier if the woman places a pillow beneath her buttocks. ... Second, never drop your full weight on your partner. Prop yourself up with your hands rather than your elbows, and lower yourself gradually. At the first indication that your weight is uncomfortable for her, raise yourself again. (Be prepared for a surprise: most women, even the smallest and most fragile-looking, can support a good deal more weight than you would suppose.) That is all."

In fact, a fat man should be prepared to find that his weight adds to his partner's pleasure. "The stimulating aspect of a fat man is manifested in the way he uses his weight to apply intense titillating pressure on the woman's genital area," writes Lisa Davis. "What with the physical power of most men, physical weight is not a necessity for a man to make his presence felt, but it can be an advantage. I first learned this with my lover Donald. When we made love, he would center much of his weight over and around my clitoris and gently rock back and forth, stimulating me to long, ecstatic climaxes."

Drawbacks to this position are usually pulmonary. A fat woman may find it difficult to breathe while lying flat on her back, and a fat man my find it difficult to catch his breath while doing the work of lovemaking for an extended period of time. In such cases, a couple can follow the same "stop-and-start" method advised for men with premature ejaculation problems. The man first stimulates the woman to orgasm without intercourse. The couple then has intercourse in the female-dominant position, and finally in the male-dominant position. As this last is usually the most stimulating position for the male, he is likely to finish before either partner runs out of air.

FEMALE-DOMINANT POSITION-
This position comes highly recommended, both by those who write about sex with a fat partner and those who have experienced it. "The female-dominant position is especially useful for very fat men, or where both partners are fat" advises Marvin Grosswirth. "Among its many benefits is the ease with which it permits touching, stroking, and caressing of almost the entire body." Dr Friedman concurs. "In this position, which seems to be the best," he writes, "the man lies on his back, with his legs straight, or knees slightly bent. If there is much abdominal fat, he can lift it up with both hands, as the woman straddles over him with her knees bent, facing him. She can thus easily slide his erect penis into her vagina and start her pelvic thrusts either alone or in conjunction with his."

Many writers, and many Hustler cartoons, make the point that a fat woman should avoid this position, for fear of injuring her partner. As with any such assumption, it's best not to judge the case without a trial. I have had incredible sex with a 500-pound woman sitting atop my pelvis, her belly tucked up to my chin like a comforter. It didn't last long, and it required a good store of oxygen, but it was incredible. It was never painful, and it always provided mutual satisfaction.

Writer Jack Jardine interviewed several fat women on their sexual technique for Penthouse Variations, and found one who was particularly outspoken on

the subject. Adrena (he tells us) says she loves being on top, "because I'm more in control and can get penetrated deeper this way. Since my hips are wide and I've got so much belly I've noticed that sometimes it's real hard for the guy to penetrate me completely so I'll take my hand down there and help him, maybe extend my vagina with my fingers and make sure he gets everything in there. When I'm on top I can reach around from the rear and make sure the cock goes all the way in. That little hand motion helps when you're a big lady."

FEMALE DOMINANT, BACK TO FRONT-
When both partners have particularly large tummies, the dominant woman can face her partner's feet. "In this variation of the above position," writes Dr. Friedman, "the man lies on his back and the woman straddles him with her back facing his front. She then inserts his penis into her vagina from the rear. ... Here, too, the partners' abdomens do not come in contact with each other, thus enabling satisfactory sexual intercourse." The problem here is that the woman may have to stay in a crouching posture for quite some minutes before the man adjusts himself to the angle of penetration. "Push his belly up before you sit completely," adds Screw magazine; "then he can rest it up against your ass."

REAR ENTRY POSITION-
Impolitely known as "doggie style," this position has long been advocated as the best for fat couples. "Given an obese man and a woman likewise obese or with child, how are they to do the thing otherwise?" asked 18th-Century German pornographer Friedrich Karl Forsberg. Rear entry is not without its drawbacks, however. If the man's penis is particularly short, or if the woman's internal anatomy is positioned at an unusual angle, it may be literally impossible for a couple to copulate from the rear. It can also be hard on a fat woman's knees.

Nevertheless, many couples swear by it, and the size of a woman's buttocks and thighs doesn't seem to affect the matter. Both Alex Comfort and Abraham Friedman recommend it. Dr. Friedman describes it thusly: "the woman kneels on the bed with her legs slightly apart, and lowers her chest so that her behind is elevated. By kneeling behind her, and holding his stomach up with his hand at the same time, the man can readily insert his penis from the rear. He can also rest his abdomen on the woman's buttocks to make it easier for him to continue his sexual thrusts throughout intercourse."

SIM'S POSITION-
This position, named after a famous surgeon-gynecologist, is a modified rear-entry position, recommended by Dr. Friedman for instances where the woman is obese and the man is not. The woman begins by lying on one side. Then, the doctor informs us, "she draws her upper leg all the way up (toward her head) so that the knee of the upper leg is opposite the hip of her lower leg. This position makes her vagina readily accessible from slightly above and behind. The man kneels behind her, with one knee on each side of her straight leg, and makes entry from the rear at a slight sideward angle. If necessary, he can raise his body slightly by means of a pillow below each knee."

Frankly, I think this just makes the whole process unnecessarily complex, and it seems to me that a woman would need ballet training before she could lift her knee to the desired height, even assuming that other parts of her anatomy didn't get in the way. Nevertheless, this is just a personal prejudice. I can't speak from experience.

UPSIDE-DOWN POSITION-
crew magazine offers this approach for a fat couple: "Lying down on your side, turn yourself around so that your partner's head is at your feet, and vice versa. Then shift slowly until your genitals are aligned. This way, you can completely avoid belly-to-belly contact."

T-SOUARE POSITION-
"One of the most effective positions is the 'T-square' technique," suggests David Reuben. "The woman is in the usual position on her back with her legs spread wide apart. Her partner lies with his hips under the arch formed by her raised legs. With both abdomens safely out of the way, penis and vagina have a clear field for fun."

X POSITION-
A modified T-square, the X position is another form of acrobatic copulation recommended by Dr. Friedman. "Here, too, the woman lies on her back with her legs bent at the hips and her thighs spread as wide as possible. After the penis is inserted into the vagina, the woman then brings both legs together, while the man swings his body in either direction 45 degrees, thus forming a large X. The woman should contract the muscles of her vagina during this maneuver to avoid the possibility of the penis slipping out. In this position, the partners' abdomens are not in juxtaposition, but sufficiently removed from each other to permit proper sexual thrusting and satisfactory consummation of the sex act."

STAND AND DELIVER-
Sometimes a fat couple needs to copulate at a greater-than ninety degree angle in order to keep their abdomens out of the way. "In these cases," states Oliver's Clinical Sexuality, "an alternative position such as the woman semi-reclining across the edge of a low bed or a padded table, two chairs supporting the feet, and the man kneeling or standing in front of her, recommends itself." Alex Comfort concurs. "If approach is tricky," he writes, "she can lie face up over the edge of the bed and he can stand or kneel."

Dr. Friedman gives a different set of blueprints for when the man is fat and the woman isn't. "In this position," he writes, "the man lies face up over the edge of the bed with his legs together and his feet touching the floor. I would suggest that he place a pillow under the small of his back for support. The woman then stands astride him close to the edge of the bed, and thus is able to make contact with his erect penis." Either way, with one partner standing and the other lying over the edge of the bed, the standing partner has a lot of options for adjusting the angle of approach. The more furniture, the more options.

Rear entry is often facilitated when both partners are standing (the woman can rest her arms and/or torso on the bed). "One guy told me he loved to enter his wife who is big and fat by having her stand up and put one leg up," noted Jack Jardine's Adrena. "I've tried that, and it works pretty well."

ORAL SEX-
Oral sex can be tremendously fulfilling if you enjoy it, tremendously demeaning if you don't. The stereotypical view of fat women holds that they enjoy all oral activities. "The plump woman will often be adroit at oral sex because she is generally expert at other oral pursuits," suggests Eugene Schaimann. "She is usually a warm person who enjoys conversation. She is a healthy eater who loves food. Using her mouth to express herself is a thing that almost seems to come naturally to her." Porn publisher Al Goldsten has different ideas. "The fatty's expertise in oral sex," he writes, " ... comes from her own desexualization. She would rather give because she does not feel herself worthy to receive."

Shelley Bovey might agree. After interviewing woman at a gathering of fat feminists, she concluded that lesbian sex could be as demeaning to fat women as the heterosexual variety. "In lesbian lovemaking there are elements of activity and passivity; there is making love and being made love to," she writes. "And the women who felt bad about their fat bodies found themselves in the age-old female place of being the giverï¿½p;they could make love to their partner, but could not easily accept being made love to, in case they repelled their partner, or from a conviction that it must be revolting to make love to their fat bodies. So they were constantly giving, and constantly deprived. It was clear that where lesbianism is a part of feminism, then feminists have let their sisters down badly."
Sex should be a meeting of equals, not a game of conquest and plunder. Oral sex, like any other sexual act-including the sharing of food-should be an occasion for mutual pleasure, not a means of establishing dominance. So long as that caveat is kept in mind, there can be nothing more pleasurable and natural. Positioning is not generally a problem in oral sex, though I am reminded of a cartoon in which a fat couple is advised by a sex therapist that "you can do six, and you can do nine, but 69 is pretty much out of the question." It might also help to avoid a partner with claustrophobic tendencies.

ASSISTED INTERCOURSE-
Screw magazine facetiously recommends that a fat couple call upon friends and family to assist them in achieving intercourse. Failing that, the author suggests that the woman wear a sexy corset. King Edward VII used an adjustable bed (built rather like an examining table) in order to find the best sexual positions to accommodate his own bulk and that of his partners. (Edward, a born FA, also had a chair that doubled as a set of scales. He liked to weigh his guests twice: once when they arrived, and once again just before they left, to see how many pounds he'd added in the meantime.) A certain enormous and libidinous 17th-century Cardinal is famous for having installed a system of slings and pulleys over his bed so that he could enjoy near-weightless sex with a young mistress. The possibilities appear limited only by one's imagination, one's budget, and one's sense of

modesty.

SEX WITHOUT INTERCOURSE-
That may seem like an oxymoron, but it isn't. One can do amazing things with a properly trained set of fingers. A fat woman's body also provides opportunities for pleasure that a thin woman's body cannot. Some men swear that the sensation of having the penis fondled by a woman's cleavage is the closest thing to heaven on earth. Fat women have cleavage *everywhere*.

There are other forms of intercourse between men and women: talking, laughing, touching, reading the Sunday paper together, watching a favorite movie on late night TV, or driving to the airport together just to watch the planes take off. Sometimes the feelings you get from just being close to someone are as good or better than any feelings you can get from intercourse itself. It may not be sex, but it sure is making love. ï¿½

Dr. Katzenklutter is better known to Dimensions readers by another equally preposterous name.

---------- end ---------- (whew! what a ride that one was)

http://groups.yahoo.com/group/FT897 has over 4000 comments.

I am happy with my FT897.

The receiver is pretty good, clearly better than my FT100D.

Do not even think about buying the FC30. If you need an autotuner get the
AT897 from LDG.

The SDR-1000 looks like the real thing. Too bad about their half assed website where nothing works. I just hope their technology works a Hell of a lot better than their web site. It may be worth while waiting a bit until someone offers the complete hardware and software package so guys like me can just plug it into our computer and are on the air. I really like the 1 watt output and the desk top layout. I hope this is offered as a mature design real soon.

No, that is not it Frank. You just don't get it, do you? Being a member
of the BARF and SJ crowd is not the best thing for ham radio. When you
understand that, we can go from there.

I doubt that anyone sold a new SP3 for $499. That is way, way below
dealer cost. Probably a ColorMap which is a huge difference.

Not sure if you misunderstood ME or who it was Rene! I was posing a question of why Big Al has a fascination now for what seems another man who someone else pointed out was referred to as Pork Butt at some point in time. He - in a previous post - alluded to "you" - being a fag..... So, I was questioning HIS reasoning there, when it is HIM who seems to have the fascination with men - NOT YOU (Rene). So I TOO am wondering the same thing here.. I question no ones sexuality here except BIG ASS er I mean BIG AL's. I don't hear anyone else singing the Pork Butt song.. I bet his room is full of Porky the pig and Miss Piggy pictures and stuffed animals. He probably has a stuffed animal of each and rubs it on his dong too! The only wet dreams here are Big Ass er I mean Big AL doing Miss Piggy. Probably the only thing that will give him any attention sexually.

Well, it happened. Blind pig finding an acorn, or repeatable science?

This technique was also described in the Fall 1990 WHOLE EARTH REVIEW (not on line) in an article _Radio Earth: The Radio-Seismic Connection_ which has an extensive bibliography citing peer-reviewed science journals.

May I suggest that hams in seismically sensitive consider building appropriate receivers, log the data to computers and report the results?

First of all, you can find surplus commercial repeater equipment at hamfests with fair prices. You would also need a repeater controller (that has a CW or voice ID), a duplexer, and of course, an antenna. I would suggest Motorola Micor's, but GE Mastr II's work just fine as well. For the controller, S-Com makes a nice one (7K). Stationmaster would be the best antenna for your system, but they are pricey. I would check with www.tessco.com for pricing info. You need to have the repeater coordinated with your local repeater council. HOpe this info helps.

73

Frank K3EKO

PS: I would recommend TXRX or Celwave for the duplexer, and Andrews Heliax for coax and connectors.

2406. YAESU FT-1000D HELP

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-27 04:56:36 UTC
From: Zeca <peixoto@ispwest.com>
Message-ID: <3F751883.76D7CB8F@ispwest.com>
Source record: 63276

Hi all, I have a Yaesu FT-1000D. I removed the transistor Q3027 from the AF board and the odd thing is that I put a new one back in place the

same way the original one was. However, the flat side part of the transistor listed on the rest of the board is flat with flat, but with this particular one the transistor is opposite? Has anyone out there already replaced this transistor and which way is it suppose to be on the circuit board?
With headphones works fine but with the internal speaker half volume and

up the audio distorts and sometimes cuts out, but I just ordered the transistor and will replace it, but just wanted to now for sure which way it is suppose to be on the circuit board.

Thanks to everyone,

Carlos

WHITE ELEPHANT INTERNATIONAL CB CLUB:
Hello and welcome to a group that can bring CB Radio operators
together to enjoy what this hobby is all about, talking and meeting
new people by the means of radio communications on 11 meter Citizens
Band Radio`s all over the World.
Any information on theory, tips, tricks, wiring, repairs and
modifications is welcome.This list is for informational purposes only
and is not intended to promote or condone any illegal activities.
If you are a CB Radio operator or technically oriented person (or
desire to be that way), you are welcome.
Innovation, experimentation & enthusiasm is encouraged here to help
get the 27Mhz systems on the air again.
To sighn up, send blank e-mail to:

Google (http://groups.google.com) can be a revealing database when used to check up on a poster's history. Take for example the three entities who call themselves "Ed Norton," "Firebottle," and "Les Locklear," and who have an obsession with trashing someone named Lloyd Davies.

They have the following things in common: (1) they claim to know one another (Firebottle even claimed that Ed Norton hangs out with Les on weekends); (2) they all have AOL accounts; (3) they all have Google accounts, and (4) they all post through Keesler AFB from time to time.

Here are a few of the message IDs which are archived on Google and which contain the supporting information. You can retrieve the message itself by putting the message ID into the form on the advanced search page at Google. Once you have the message, click on "original format", and then take a careful look at the NNTP-Posting-Host header. It identifies the computer which had connected to Google's machines in order to make the post.

Keesler AFB often uses Ft McPherson's proxy server, and so it arises as the NNTP-Posting-Host in those cases. Here are a few messages posted by "Ed Norton" via the McPherson route (IP address 198.26.120.13):

Message-ID: <999c58d3.0302050507.235363ea@posting.google.com>
Message-ID: <999c58d3.0301220427.5ac785b1@posting.google.com>
Message-ID: <999c58d3.0208140417.417b9d96@posting.google.com>

And here is a message that "Ed Norton" posted directly from Keesler via IP address 131.22.200.54:

Message-ID: <999c58d3.0301270810.218de3f1@posting.google.com>

"Firebottle" likes the McPherson route too, as can be seen in:

Message-ID: <edaa3c2a.0301130628.26862bd@posting.google.com>
Message-ID: <edaa3c2a.0301130622.35a242d5@posting.google.com>
Message-ID: <edaa3c2a.0301150542.56b0ab39@posting.google.com>

And Les Locklear also posts through Keesler, as recorded in
Message-ID: <cbf9555c.0301140634.421d12b5@posting.google.com>

Les also connects to Google through Ft McPherson, as indicated in
Message-ID: <cbf9555c.0301131014.ea9f7a5@posting.google.com>

-...-

So what does this mean? The simplest explanation for the great
commonality among those three posters would be that they are all the
same person. If not, and the sock puppet operator is, as he claimed,
a friend of Les', then I'd say that with friends like that, Les
doesn't need any enemies.
-.-.-.-.-.-.

Hey! How about one of us sends these posts to the server to see what
happens? I think it would be a great way to see if Les/Firebottle/Norton and
his other sock puppets can be dealt with on one fell swoop.
Losing Les could hardly be considered a loss. The poor old man injects much
rhetoric but says so little anyway, so who would miss him?
I don't think Lloyd would....

2409. Re: PORKBUTT PORKBUTT PORKBUTT

Porkbutt is the ex-WB2OTK Rich Whiten out of Easley, South Carolina, USA.

73

Frank K3EKO

==========

Yes, Porkbutt IS the ex operator so named. He made himself infamous during his years as an overbearing, selfish, and overpowered Ham op on 14.313.
Rich is not missed save by a few of his malingerers.
The band is a better place without him.

And Frankie, why can't you and Dan just get along? Yeah, Dan is garrulous, he is known to be a pain in the ass at times, but why promulgate it with your inane comments?
Do you take pleasure in needling Dan? Why?
Dan has his schedule full enough as it is...he has to deal with jammers and the likes of David Tolassi and Dumbass Donnie. There is no need for you, Frankie, to be tossing your two cents worth into the already confused foray.
Frankie...ever pull your dictionary off the shelf and read the definition of "maturity"? Perhaps you and Dan should both do so, but most of all, YOU should do so Frankie.

One thing still eludes me in all of this. Why the Hell are all of you guys so set on attacking Lloyd? He doesn't really upset the cart all that much, but yet you guys persist in attacking him at every turn. What gives? Is this a "pile-on" mentality whereby all you macho Ham geeks attack the weakest of the weak? Like sharks going for the scent of blood? Playground Bullies? Cowards? Pussies? Whassa matter? Lloyd doesn't use a pocket protector for his fifteen multi-colored ball-point pens? Doesn't wear his callsign on his baseball hat? Doesn't run around with six HT's on his belt? Doesn't have six antennas on his SUV?
Face it...look at all the posts allegedly made by Lloyd...there are many. You guys don't know the real Lloyd from the sock puppet Lloyds, nor do you care to find out, if you can.

Give Lloyd a break, whoever he is. It is beyond your areas of expertise to cull out the real Lloyd from the anonymous Lloyds.

Maybe one of these days you freaks can take off your aluminum helmets with the rubber duckies mounted on them and join the real world.

Frankie...stop messing with Dan. Change your diapers and move on....

No but you better plan on getting it coordinated through your local repeater coordinating council. If you do not and it causes interference to any coordinated repeater, the FCC will consider it your responsibility to solve the interference problem even if that means shutting down. You should know this from studying for your amateur licensing exams. You should also get a copy of the Part 97 FCC rules and regs if you are going to operate a repeater as there are limits on how much power a repeater can put out and requirements for IDing your repeater.

2414. Amateur Radio Newsline™ Report 1363 – September 26 2003

Newsgroup: rec.radio.amateur.misc
Date: 2003-09-27 18:16:07 UTC
From: radionews@aol.com
Message-ID: <20030927141607.29755.00000308@mb-m29.aol.com>
Source record: 63284

Amateur Radio Newsline™ Report 1363 – September 26 2003

Amateur Radio Newsline report number 1363 with a release date of Friday, September 26th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Two more nations go code free and if you wanted to go to Albania to teach ham radio, you are to late. Find out the details on Amateur Radio Newsline report number 1363 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: TWO MORE NATIONS GO NO-CODE

Two more countries have dropped the Morse code requirement for operation on the High Frequency bands. Amateur Rado Newsline's Don Wilbanks, AE5DW, has the details:

--

Two nations on opposite sides of the world have opted to join the growing no-code brigade. On September 15th, Ireland announced that they no longer require a Morse test. As a result, all Irish B licensees now have Full license privileges. But with a few caveats.

At this point there will be no change to existing callsigns. But Class B licensees may apply for a Class A callsign but to do so they will be required to pass a Morse test. New license applicants who have passed the Theory Test will continue to be issued with a callsign having a three letter suffix ending in B, unless they also pass a Morse Test. Also, because not all countries operating under the CEPT agreement have yet removed the mandatory Morse requirement, operation abroad on the HF Bands by Irish Class B licenses is confined to those countries that have done so.

Meantime, the Singapore Amateur Radio Transmitting Society has been advised by the nations Info-comm Development Authority that, as of the 15th of September, the requirement for a Morse code examination for High Frequency operating privileges in Singapore has been removed. And as from the 16th of September all current and future licenses became convertible to the Singapore General Class. This, with full High Frequency operating privileges.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

By the way; Singapore is thought to be the first country in Asia to adopt the recent amendments of Article 25 of the ITU Radio Regulations. Many others

around the world are expected to follow in coming days. (GB2RS, Q-News)

**

RESTRUCTURING: CQ READERS FAVOR HF PRIVILEGES FOR TECHS BUT ARE SPLIT ON CODE TESTS

A survey of CQ magazine readers shows respondents are strongly in favor of granting at least some high-frequency operating privileges to already-licensed hams who have not taken a Morse code test, but are evenly split over the question of continued Morse code exams for amateur licenses. Amateur Radio Newsline's Mark Abramovitz, NT3V, took a look at the survey results and has more:

--

According to CQ Editor Rich Moseson, W2VU, nearly two-thirds of the CQ readers who responded to the survey favor giving limited High Frequency privileges to currently-licensed Technician Class hams who have not taken a code test. Another 36% of those responding said there should be no changes in operating privileges.

Among those who favor changes, 43% support merging the current Novice and Technician licenses and combining the privileges of both, while another 26% favor expanded privileges for both classes, including High Frequency subbands offering voice, CW and data at limited power levels. In addition, 14% supported giving Novice High Frequency privileges to Technicians, but not giving full VHF privileges to Novices. The remaining 17% were split between giving current Technicians only current Novice voice privileges and only current Novice code privileges.

Moseson says that readers were split, 50-50, on the question of whether the FCC should change its current code test requirements. Of those who favored change, 50% called for the elimination of code tests for both General and Extra Class licenses, while 42% favored eliminating the General Class code exam but keeping it for the Extra Class license. The remaining 8% supported replacing the current code test with a code recognition test similar to the exam used for the Foundation class license in the United Kingdom.

And heres a big surprise. While only half the CQ readers want the FCC to change the current code test requirements, three quarters of those who sent in the survey said they agreed with the decision at the 2003 World Radiocommunication Conference to leave the question of code tests up to each country to decide.

Finally, the ARRL and International Amateur Radio Union got a strong vote of support for the time and money they invested in securing the compromise agreement on 40 meters. One that will eventually double the size of the band for amateurs in Europe, Asia, Africa and Oceania, while removing broadcasters from the 7 point 100 to 7 point 200 MHz segment by 2009. Seventy-eight per cent of C-Q readers responding to this question said the effort was a worthwhile investment of member dues and staff time. On the other side only 9% said the benefit was not worth the cost. 13% had no opinion on the issue.

According to Moseson, a significant aspect of these survey results is that 84% of the readers responding already have High Frequency operating privileges, 75% report being active on HF, and 58% hold Extra Class licenses.

For the Amateur Radio Newsline, I’m Mark Abramowicz, NT3V, in Philadelphia.

--

The survey was included in the September, 2003 issue of the magazine. CQ Editor Rich Moseson, W2VU, said over 400 CQ readers responded to it. Moseson admits that it was in no way a scientific poll but he says that it does provide a "snapshot" of reader views on various topics. (ARNewsline(tm))

**

RADIO LAW: A BPL DOCUMENT FOR HAM RADIO

Turning to the latest in ham radios war against the introductuion of Bradband Over Powerlines or BPL, the Wireless Institute of Australia has prepared a document detailing the pros and cons. Phil White, VK2DKN, is its author:

--

White: “The purpose of the document was not only to advise the WIA of the exact position of BPL in Australia, but also to educate the general Amateur fraturnity on the situation wth BPL that was likely to affect them.”

--

White said that he tried to present a balanced view of the BPL situation, covering both sides:

--

White: “I tied to present a fairly balanced view in the document so Amateurs can see both sides of the argument. And there are some very strong arguments for and against the adoption Broadband Over Powerlines.”

--

How best to fight the introduction of this technology? White says hams need to forge alliances with others who will be affected:

--

White: “My opinion is that Amateurs need to for an associatoon wih other HF users, and those users may include people like defense, four-wheel-drive groups, CB’ers -- any people who are affected by the introductuion of BPL technology.”

--

According to White, alliances like this will put Amateur Radio in a much stronger position to gain access to any standards committees working on the introduction of BPL. (Q-News)

RESCUE RADIO: TEXT MESSAGE RESCUE

If you think that Morse code is still needed for a successful rescue at sea, guess again. Three men who were rescued from the hull of a capsized boat on Saturday, September 13th definately know this. You see, they were saved after one of the sailors sent an electronic text message to his father using a two-way pager.

Caught in what the British Coastguard later described as rough seas and gusts up to 45 knots, the men used a combination of a mobile phone and VHF radio to call for help. The Coastguard first received an emergency assistance request at 4:50 pm UTC but that call was dropped due to poor signal strength.

Then came a signal from an emergency locating beacon triggered by the men. It showed the vessel to be south-west of St. Catherine's point on the Isle of Wight. But it wasn't until the Coastguard received a call from one man's father - calling from his home, near Southampton - that the position was confirmed. His son had dent him a text message that he passed onytto the Coastguard. A helocopter was dispatched and the men were plucked to safety.

Commenting on the rescue, and the way text messaging can often make it through when coverage is patchy was Watch Manager Colin Griffiths. He said that the incident adds to the number of times the Coastguard has been alerted to a marine incident by just such a text message. (silicon.com via KB4KCH)

**

HAM RADIO BUSINESS: ROHN FILES CHAPTER 11

A company that literally as well as figuratively supports more ham radio antennas than any other is fighting for its survival. This as tower manufacturer Rohn Industries announces that it and five of its subsidiaries have filed for Chapter 11 bankruptcy relief in federal court.

Subject to the provisions of the Bankruptcy Code, the September 16th filing means that Rohn remains in possession of its properties and continues to operate its business. The company says that the objective of the Chapter 11 proceeding is to maximize recovery to creditors by facilitating an orderly sale of its assets. (QRZ.com)

**

ENFORCEMENT: SEATTLE CB’ER FINED FOR REFUSING STATION INSPECTION

A Citizens Band radio operator has been ordered to pay the FCC $500 for his refusal to permit agency inspection of his station. Amateur Radio Newsline’s

Mert Garlick, N6AWE, has the rest of the story.

--

Tacoma Washington resident William A. Woods is the CB operator in question. According to the FCC, Woods was initially fined $7000 for failure to make his CB radio station available for inspection at the request of authorized Commission personnel.

On September 3, 2002, the Seattle FCC Office received a report from the City of Tacoma, Washington, concerning complaints about interference to home entertainment equipment in the 3000 block of South Madison Street. A few weeks later agents determined that an interfering signal on 27.025 MHz was coming from Woods home. The agents also observed that the signal strength levels were significantly higher than those expected from an authorized CB transmitter.

After a second observation on November 5th, 2002, the agents, who were accompanied by two police officers, requested that Woods make his CB station available for inspection. After a delay, Woods allowed the agents but not the police officers to enter his residence. Once the agents began the inspection of the CB station, Woods changed his mind and refused to allow the examination to continue. The agents then informed Woods that his refusal to allow an inspection could result in a monetary forfeiture.

On December 30, 2002, the Seattle Office issued a Notice of Apparent Liability to Monetary Forfeiture in the amount of $7,000 for refusing to allow an inspection of his station. In his response Woods claims that the agents who came to his residence on November 5, 2002, did not present any identification and that he did not refuse to allow the agents to inspect his station. He also stated that he had taken medication before the agents arrived at his house. Woods also submitted financial documentation concerning his inability to pay the proposed monetary forfeiture. After considering his response the FCC elected to reduce the fine to the $500 level and gave Woods the customary 30 days to pay.

For the Amateur Radio Newsline, I’m Mert Garlick, N6AWE, reporting.

--

No word if Woods plans to pay the $500 fine, or file a further appeal. (FCC)

**

ENFORCEMENT: FAILURE TO REGISTER TOWER BRINGS $3000 FINE
The FCC has fined Dewey D. Lankford $3000 for his failure to register his broadcast tower. Lankford is the licensee of station WANA-AM in Anniston, Alabama, and owns that station’s antenna structure.
According to the Commission’s records, the towers height above ground is over 200 feet. On June 26, 2002, an agent from the Atlanta Office inspected the antenna structure. A recent check of the of the Commission’s tower registration records indicates that WANA’s tower still remains unregistered. In his defense Lankford asserted that the previous owner of the station told him that everything regarding the station was “in order” and there was a

“variance” regarding registration. Lankford further states that he believed, on the basis of a telegram from the FCC received by the previous licensee of WANA, that the tower was not required to be registered because it has no marking or lighting requirements.
But in imposing the fine the FCC says that Section 17.4(a) of the Rules requires the registration of antenna structures which require notice to the Federal Aviation Administration. FAA notification is required for towers whose height above ground level exceeds 200 feet. According to the Commission’s records, the height of Mr. Lankford’s antenna structure is over 200 feet. The antenna structure is, therefore, required to be registered. The FCC adds that the lack of marking and lighting requirements does not negate the tower registration requirement. (FCC)

HAM ENTERTAINMENT: UPDATE ON THE HUMAN RACE

Remember the proposed television show The Human Race. The one which would pit two teams of hams against one another in a race around the world? Well, the producers have announced the availability of a short video to that they have produced to accompany grant applications and have also posted it on the shows website. The mini show is an 8 megabyte file. You can download and view it www.humanrace.fr.st or
www.qsl.net/w1zy/archive/july/video.html (Q-News)

**

NAMES IN THE NEWS: W6OBB RETURNS TO COAST TO COAST AM

Some names in the news. First up is Art Bell, W6OBB, who has returned to the radio show he made famous, but only for two days – or should I say two nights -- a week. According to an announcement from Premiere Radio Networks, Bell has agreed to replace Barbara Simpson as weekend host of Coast to Coast AM.

W-6-O-B-B began broadcasting live on Saturday night September 20th. His new version of weekend Coast to Coast AM is live from 1-5 a.m. Eastern Time on Saturdays and Sundays with a re-feed from 5 from 9 a.m.

Bell broadcasts from a studio in his home studio in Pahrump, Nevada. According to Premiere Netwoks Bell staid that for him, a return to radio is both mysterious and reassuring. (Premiere Radio)

**

NAMES IN THE NEWS: PRODUCTION COMPANY SUES WALTER CRONKITE, KB2GSD

And a Florida company has sued Walter Cronkite, KB2GSD, for $75,000. WJMK, Inc. claims that the former CBS anchorman illegally backed out of a contract to film what amounted to infomercials.

According to the Charleston Post-Courrier, Cronkite had agreed to show up for two days of taping with WJMK Inc.. This is a company which provides segments for TV stations on health care and the drug industry. Cronkite backed out in May after a New York Times article questioned whether he was being paid to help produce commercials designed to look like news.

The lawsuit was filed Wednesday September 17th by WJMK in Manhattan federal court. It claims the 86-year-old Cronkite and his production company knew his name and image could be used for any and all media. But Cronkite's lawyers insist he was misled into believing he was filming educational programming when in fact WJMK was taking money from health care companies to produce segments on their products.

As most hams are aware, late last year Cronkite volunteered his services to the not-for-proft Amarican Radio elay League as host of its new video Amateur Radio Today. As reported here on Nerwsline, that show was recently honored with a third place award at the Chicago Film Festival in Illinois. The story is in cyberspace at http://www.charleston.net/stories/092003/wor_20people.shtml (Charleston Post-Courrier)

HAM RADIO EDUCATION: ALBANIA HAM TEACHING POSITION FILLED

A follow up to last weeks story on the search for a ham radio instructor willing to teach Amateur Radio in Albania. Well, if you wanted the position and waited to respond, forget it. Word from the planners is that hey had quite a few responses. They are now assessing the candidates and the person chosen will be announced shortly.

The Albanian ham radio training course will be presented at the Technical University of Tirana in November. It is being organized in coordination with the Albanian Ministry of Telecommunications in conjunction with the IARU using Radio Society of Great Britain Radio Amateur Examination documentation. (Various sources)

**

WITH THE ARRL: 160 METER CW PRACTICE SHIFT

Starting Monday, September 29th, ARRL headquarters station W1AW will shift its 160-meter code practice and bulletin transmission frequency to 1817.5 kHz. The frequency shift not only brings W1AW's Top Band frequency in line with those the station uses on other bands, it also should help to eliminate possible interference from broadcast station harmonics and birdies.

W1AW has been conducting code practice and bulletin transmissions on its current 1818 kHz since 1982. Prior to that, W1AW transmitted both CW and phone bulletins on 1835 kHz. The frequency change is effective starting with the September 29th 2000 UTC code practice run. (ARRL)

**

HAM ANIVERSARIES: THE WS9CAN REPEATER AT 25

The Southern Counties Amateur Network Harrisburg Il. is celebrating the 25th Anniversary of its 146.880 repeater. To share his milestone the club plans to operate a special event station on October 5th 2003. W-S-9-C-A-N will oprate from 1800 to 2300z UTC on 40 through 15 meters. If you work them, Q-S-L with a self addressed stamped envelope to Vic Maue Jr., WD9EMF, RR#1 Box 102, Simpson Illinois. The zipcode is 62985. (VHF Reflector)

**

CONFERENCES: 2003 MID ATLANTIC STATES VHF CONFERENCE IN PA

Make your reservations now for the upcoming Mid Atlantic States VHF Conference, this year at the Radisson North East in Trevose, Pennsylvania. The date is Saturday, October 11th. The conference is sponsored by the Mt. Airy Radio Club and everyone is invited to attend. For more information via e-mail write to packrats_w3ccx@yahoo.com or visit www.ij.net/packrats on the world wide web. (VHF REflector)

**

RADIOSPORTS: ARDF REGION 3 GAMES THIS FALL

Planning for the 5th annual IARU Region 3 Amateur Radio Direction Finding Championships is reportedly progressing well. The games are slated to be held in the town of Ballarat Australia this November and December. To register, e-mail registration@ardf.org.au. Full details are on the web at www.ardf.org.au (News release)

**

DX

In D-X S57CQ, is very active slash YI from Iraq, especially around 14.270 MHz SSB. He expects to be in Iraq until mid-October. QSL via S57DX. (GB2RS)

And YA1D in Afghanistan is active almost daily after 1230 UTC on 80 to 10 meters. His operation is mainly on SSB but with some slow CW. (GB2RS)

Lastly, G4VGO, reports that he will be active for about two years from Singapore as 9V1GO. His activity will be mainly on the low bands on CW, especially 30, 80 and 160 meters, at his sunset and sunrise. QSL as directed on the air. (GB2RS)

**

THAT FINAL ITEM: TURNING BACK THE SANDS OF TIME

And finally, we began this weeks newscast with a restructuring story and we will end it on the same note. In this case a look at some petitions for rule making that are reportedly on their way to the FCC. And when it comes to opening up ham radio to more people, one appears to want to turn back the hands of time. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with a little

bit of information on two of the stranger ones being talked about in cybrspace:

--

Audio report only. Hear it by downloding the newscast at
http://www.arnewsline.org

--

Just before going to air we checked the FCC’s website and could not find a Rule Making designation for either of these. But it does not end here. More petitions, both for and against continuing Morse testing are believed in route to the FCC. (Listener reports)

**

NEWSCAST CLOSE

It sure looks like the Marshall County ARES, and it even has a place to
send email."

<more bullshit and backpedaling>

>prune-like face once again.

You must be thinking of your wife...

>[rest of Woger's lame attempt to change the subject snipped]

Maybe if you kiss your wife's cellulite-laden ass, she'll pop you the money for that speech therapist you so desperately need. Or you could quit sucking so many of your neighbor's black cocks. After all, you take the name of a fictious Negro, which indicates you are mulatto or a half breed, or are trying to fit in with the blacks in your ghetto neighborhood, so they won't steal your property again.

Lloyd, tragically un-aborted discharge from a leper's rectum:
When your family get together for a shotgun wedding or to pool their meager resources for bail money, it must be like watching one of the most pitiful episodes of Jerry Springer: all that squabbling poor white trash packed into one doublewide trailer! No doubt mongrel dogs squatting in full dump mode are prettier sights to behold than your grotesque gargoyle gallery of family freaks. President Bush should declare your family a Genetic Disaster Zone. So, the owner of the tainted sperm that spawned your litter was promoted to assistant burger-flipper at Billy-Bob's Truck Stop Cafe, and now his squalid, squealing sow ex-brawl-and-chain wants the high achiever back to bankroll her crack habit, right? It is revealing that the only reason you haven't betrayed your prize catch of a financed and slept with his cousin is because said cousin is a "repulsive asshole" and "gay." How noble of you! No doubt your future mother-in-law and you will summon the demented demons of hell upon each other; and spend countless wretched years skirmishing for control of said Burger-flipper, in-between plotting each other's ruin and taking it up the ass from clan leaders, meter men, mail men, stray dogs, debt collectors and anyone else who happens to wander by with a leaflet or a court order. Really, I'm just relieved that genetically-damaged backwater mutants interbreed and don't contaminate the non-Redneck gene pool.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, N3ZOM, NG3K, W3CF, W3UR & The Daily DX, N4AA & QRZ DX, N5FG, WB6RSE, AC7DX, K8YSE, DK7PE, DL/VE3ZIK & Contesting.INFO, DL1EK/DL7VOA & DX Newsletter, DL2VFR, DL9NDS, F5NQL & UFT, JA1ELY, JF6DEA, JI6KVR & JA-IOTA Islands News, LU6EF, OH4JFN, OK1JR, OM3JW, PP2BT, S52DG, SP4GFG, SP6M, SQ4NR, UA0FZ, VA3RJ & ICPO and VK3DYL for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st/September, through Sunday, 28th/September there were 228 countries active. Countries available: 3A, 3B8, 3B9, 3C0, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VP2M, VP2V, VP5, VP8, VP8/o, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZK1/s, ZK2, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. 3C0V is now active until October 10th on all HF bands 160-6 meters on CW/SSB/RTTY/PSK/SSTV. QSL via DJ9ZB.

BQ9P, PRATAS ISLAND (Update). The Chinese Taipei Amateur Radio League (CTARL) received their official document (landing permission) September 25th from the Ministry of Defense. The BQ9P Pratas Island DXpedition will take place on October 7-16th. They expect to be on air at 1000z on October 7th and go QRT at 0100z on October 16th. They plan to have at least two antennas set up before dark in the first day and will have 5 stations set up (total) after that. Activity will be on 160-6 meters, including the WARC bands on CW/SSB/RTTY/SSTV/PSK31. Frequncies will be in most DX window (+/- QRM). Also, DXer Floyd Gerald, N5FG, a member of the Magnolia DX Association (ed. great bunch of guys who I met during my vacation in Mississippi!), was named pilot station for the Eastern USA. Floyd's E-mail address is: floydgee@datasync.com
The BQ9P's Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

CU2, AZORES. Members from the Lufthansa Amateur Radio Club (DL0DLH) will be operating from the Acores, October 9-12th, under the callsign CU2L. Activity will be on HF bands (160 meters included) on SSB, CW and PSK. Operators are: DL1FDS, DK7TF, DG5FCN, DL4FP and DK7PE. QSL via DL4FP.

FK, NEW CALEDONIA (IOTA Op). Yoshi, JA7AQR, will be active from Male Island (OC-033) from New Caledonia, October 2-6th. He will operate as FK/JA7AQR on 40-10 meters SSB and RTTY. QSL via JARL or direct to his home address at: Yoshihiro Tanaka, 1-10-6 Minamihara, Yamagata, 990-2413 JAPAN.

FR/E, EUROPA. It was announced this past week that the world's number 6th most wanted entity (Europe 10th and U.S 6th), Europa Island (IOTA AF-009) would be active between November 22nd and December 5th. A team of eight French military operators also plan to operate in the CQ World-Wide CW DX Contest during the last weekend of November. They report that it was a difficult project to secure permission to go to this rare island, however thanks to the persistence of Didier, F5OGL, and his team, they did receive the "OK" from the general headquarters to go. The team hopes to have three stations active on 160-6 meters on CW, SSB and the digital modes. The team members for this operation include: Didier/F5OGL, Dany/F5CW, Eric/ F5JKK, Stephane/F5KIN, Freddy/F5IRO, David/F0CRS, Chris/TU5AX and possibly another operator. The callsign will not be announced until the operation begins. QSL cards will be handled by F5OGL and may be sent via the bureau or direct to: Didier Senmartin, P.O. Box 7, 53320 Loiron, France. ADDED NOTE: It was also announced: "Be aware of the possibility that the operation could be cancelled if the international situation were to unfold, as these operators would have to all go on active duty because of their military jobs."

HK0, SAN ANDRES ISLAND (Top Band Added). It was announced this past week that the team members of the Florida Dxpedition Group going to San Andres Island Dxpedition will be active on 160 meters (1826.5) in a few weeks. The antenna will be a 80/160 vertical, the one used by ZL7C (Chatham Island DXpedition) last October 2002. The operation/DXpedition is scheduled to take place October 20-28th. They will have 8 operators and plan to run 4-5 stations before and after the CQWW Contest (contest callsign will be 5J0J). The San Andres Island DXpedition 2003 Web page is at:

http://www.geocities.com/hk02003/

IOTA NEWS.....
EU-136. Look for Dusan, S52DG, to be active as 9A/S52DG/P from Krk Island (CI-046), from October 2-5th. QSL direct or via bureau to S52DG.

OC-228. Peter, VK3QI, reports that they had to postpone their Baudin Rocks operation for the time being. Reasons given are that two of the operators could not go, and also the weather has been very bad for the last week (with continuous 35-45 knot winds making landing and exiting the Rocks difficult in the time slot they had available for the remaining operators). Peter said, "Not worth taking the risk at the moment. We hope to put the operation on later in the next 6 months when the weather is much better and operators are better placed to be available."

LU, ARGENTINA (Rare Province). Alberto/LU1DZ, Hector/LU6UO and Fernando/ LW2DX, are going to "Valle Fertil" near Moon Valley in the San Juan Province to operate from this "rare" Province between October 2-6th. Due to LU regulations, they will use the callsigns LU1DZ/P, LU6UO/P and LW2DX/P, where "P" stands for San Juan Province. They plan to operate on all HF bands, from 160-6 meters, both CW and SSB.

OH0, ALAND ISLAND. Marko, OH4JFN, will be active as OH0Z (Zone 15) during the CQWW SSB Contest as a Single-Op/All Band entry. Marko's activity will take place between October 25-28th. QSL via OH5DX. More information concerning OH0Z can be found via the Web page at: http://www.qsl.net/oh0z

PACIFIC OPERATIONS (5W and ZK2). Anci, JA2ZL, will be active from Niue Island (OC-040) as ZK2ZY, October 18-24th. His activity will be on 80-12 meters on SSB/CW/RTTY with 100w with dipoles and a 2 element beam. After Niue Island, Anci will move to Samoa and operate from here as 5W0ZY from October 25-28th. His activities will be only SSB on 75-12 meters, and he hopes to participate in the CQWW DX Phone Contest. QSL to his home callsign via JARL bureau (until July 2004) or direct to his home address: Anci Yamada, 17-8-2 Takirocho, Tajima, 507-0813 JAPAN. Please visit to his Web page at: http://www4.ocn.ne.jp/~ja2zl

PJ4, NETHERLANDS ANTILLIES (Update OPDX.625). Uwe, DL9NDS, informs OPDX that the German team going to Bonaire Island (October 16-26th) has received their CQWW DX SSB Contest callsign, PJ4T. QSL Route for PJ4T and all personal callsigns (PJ4/Homecall) is via DL9NDS.

PY9, BRAZIL. Julio, PP2BT, will activate the callsign PY9BT from Chapada dos Guimaraes-MT from October 1-8th. Activity will be on 80-10 meters using CW and SSB. QSL via the PP2 Bureau PP2 (slow) or via P.O.Box 105, Itumbiara-GO, ZIP 75500-970. QSLs for the 2001 PY9BT operation not receveid may be claimed via E-mail at: pp2bt@arrl.net

PZ5, SURINAME. Operators Bob/PZ5JR, John/PZ5DX and Arnold/PZ1AP will be active during the CQWW SSB Contest as PZ5JR from October 20th to November 4th. operators PZ5JR and PZ5DX will be operating in different parts of

the country, possibly from the jungle as portable seven. Their bands/modes of activity were not provided.

QSL INFO AND NEWS.....
DIRECT ONLY PLEASE. QSL Manager Frank, N3ZOM, informs OPDX that he only accepts QSL cards for CO6XN, CO6TB, and CL6BIA, "DIRECT ONLY" with the proper return envelope and sufficient postage. He mentions that he received a shipment of bureau cards recently and found quite a few of CO stations he manages. These cards that Frank received will be answered via the bureau, but any cards received after this will NOT.

Operators RA0FU and UA0FZ from Sakhalin Island who operated from Moneron Island on August 20th should be QSLed as follows:
QSL for RA0FU/P: Yurij Buryh, Box 12, Sakhalin Island, ZIP 693023
QSL for UA0FZ/P: Vlad Kovalev, Box 43, Sakhalin Island, ZIP 693020

QSL YB0ZZ via the address on QRZ.com. The operator this past weekend during the CQ WW RTTY Contest from Jakarta, Jawa Island, was Stan, OK1JR (YB0AJR).

Zik, DL/VE3ZIK, wants to remind everyone that QSL info for this past weekend's CQ WW RTTY Contest will be published on Wednesday on the Web site at: http://www.contesting.info

The JAs that were active from Sri Lanka a couple of weeks ago should be QSLed via the following managers by the bureau or CBA (QRZ.com):
CALL NAME MANAGER
4S7YHG Yshihiko Hasegawa ----- JA3HXJ
4S7CHG Sadao Konagai ----- JA3CHS
4S7FAG Nobuko Hasegawa ----- JH3FAR
4S7GXG Satoshi Abiko ----- JH3GXF
4S7DUG Masahiko Ikeda ----- JQ3DUE
4S7YJG Hikari Sakamoto ----- JR3QHQ
4S7GGG Kazuo Ebihara ----- JA3ART
4S7QHG Toru Tanaka ----- JR3QHQ
4S7UJG Tsuguya Nakasako ----- JA3UJR
4S7DBG Soichi Mitamoto ----- JA3DBD
4S7ARG Tatsuo Okushi ----- JA3ARJ
4S7LSG Kunio Miyagawa ----- JH3LSS
4S7JKG Tadaaki Tanigawa ----- JG3JKG
4S7AQG Hiroshi Shirahara ----- 7J3AOZ
4S7QIG Misaki Shirahara ----- JN4QIN
4S7OCG Fumie Miyamoto ----- JR3OCS
4S7FDG Takuo Omura ----- JA5FDI
4S7AVG Masumi Nakade ----- JA3AVO
4S7PBG Horoko Nakade ----- JH3PBL
4S7DSG Takeshi Funaki ----- JI3DST

SPECIAL EVENT. Look for KL7FAA to be active the first weekend of October to commemorate the "Centennial year of flight". For QSL only, send a standard SAE and proper postage to AC7DX. For those wishing a certificate, please send a business size SASE.

SPECIAL EVENT. Ric, DL2VFR, informs OPDX that during the month of October look for a special DOK (SDOK) callsign that was issued to the "Klubstation des Ortsverbandes", DL0KWH. The SDOK callsign is "80VOX" and celebrates the 80th anniversary of starting a regular radio broadcast service in Germany. The program was produced in the historical "VOX-Haus" in Berlin and transferred to the transmitting station in Konigs Wusterhausen where it hit the waves worldwide. The club station DL0KWH is situated in the area of the old transmitting site (it will be shown on the QSL card). The club station plans to be busy giving out the SDOK callsign between October 1-31st on all bands and modes. The SDOK callsign is good for the DARC's "DLD Award". Additionally, there is an award called "Sender Konigs Wusterhausen" and it also counts for this club activity. The club station's Web page is at: http://www.qsl.net/dl0kwh

SPECIAL EVENT. A team of SP4KSY club members will be active again as HF650O to celebrate 650 years of Olsztyn City. The station will be active from October 1st to December 31st, on CW, SSB, RTTY and PSK. QSL via SQ4NR, bureau or direct to: Grzegorz Gawel, ul. Herdera 16/14, 10-691 Olsztyn, POLAND. Their Web page is at: http://www.hf650o.prv.pl

SPECIAL EVENT. During the month of October, look for special event station, SN25JP, to be active to celebrate the 25 years of Pope John Paul II pontificate. The station will be active on 160-2 meters CW/SSB/FM and RTTY. A special QSL will be available via SP4GFG (direct or via the bureau).

SPECIAL EVENT. The Polish club station, SP6KFA, will use special event callsign SR25JP to commemorate 25th anniversary of Pope John Paul II pontificate. Also, on October 16th, 1978, Cardinal Karol Wojtyla was elected as the Bishop of Rome. This October 16th, he will have completed 25 years of service. Look for SR25JP on all HF bands (CW, SSB, PSK31, RTTY) between October 1-31st. ADDED NOTE: The prefix "SR" is a very rare prefix. QSL direct (using address on QRZ.com) or via the PZK bureau to SP6KFA.

SPECIAL EVENT. Look for 20 operators from the F5KCC ARS to activate the special callsign TM9AF, from October 12-26th, to celebrate the 25th anniversary of Ham Expo (October 18-19th), and the memory of Pierre Michel, F9AF (creater of Ham Expo and the long time (only) ham gear builder (Mics Radio products) in France. Activities are planned for 160-6 meters on CW, PSK, RTTY, SSB, SSTV and from 144 to 1.2 GHz on CW, FM, RTTY, SSB, ATV. They will also enter the CQ WW SSB Contest. The QSL route is via F5SM (Pierre's daughter), through the REF Bureau or direct to: Christiane MICHEL, F5SM, 1 rue de l'Ocrerie, Les PillTs, F89240 PARLY, France. (SAE + postage). There will be NO e-QSL. For more info about HAM-Expo, please visit the Web page at: http://www.ref-union.org

V26, ANTIGUA AND BARBUDA. Doug, W3CF, informs OPDX that he "blew a callsign" of one of the V26DX operators in last week's announcement and he apologies to all for the blown call. The correct callsign for Thomas is DF2BO, not DL2BO. Again, look for operators W3CF, WX0B, N5CK, KD3TB, KD3RF, DF2BO and KM9M to activate the Royal Antiguan Radio Club Station, V26DX, as a Multi/2/Low Power entry in the CQWW Phone Contest. QSL all

V26DX QSOs via KU9C with appropriate return postage and SAE or via the bureau. QSL individual ops via their on air instructions.

V51, NAMIBIA. Operators Vlado/ZS6MG and Emil/ZS6EGB will be active as V5/ZS6MG and V5/ZS6EGB from Outjo, between October 23-27th. The two operators will also be active in the CQWW SSB Contest as V51E (QSL via ZS6MG, contest only). Activity outside of the contest will be on most HF bands CW/SSB/RTTY and PSK.

V8, BRUNEI. Kato, JO1RUR, is now here and was active as V8A during the past weekend's RTTY Contest. Outside of the contest, he will sign as V85RH. He was spotted on 40/15 meters RTTY outside of the contest (Thursday/Friday). His length of stay is unknown. QSL via JH7FQK.

VK9C & VK9X, COCOS KEELING AND CHRISTMAS ISLAND (Reminder). Gwen, VK3DYL, informs OPDX that there seems to be some confusion about the dates of the YLs' upcoming VK9XYL and VK9CYL DXpedition. They will be on Christmas Island (OC-002) as VK9XYL, October 13-27th, and on Cocos Keeling Islands (OC-003) as VK9CYL, October 27th to November 10th. QSL via VK3DYL:
Gwen Tilson, 3 Gould Court, Mt. Waverley, Victoria, 3149 Australia.
For direct cards, if you enclose old style IRCs, insufficient postage or no SAE, your cards will be returned via the Bureau. No e-QSLs will be accepted.

VP5, TURKS AND CAICOS ISLANDS. Operators Ken/K2WB, John/N2VW and Frank/WA2VYA will be active from Providenciales (NA-002), October 21-28th, and will be active as VP5T during the CQ World Wide DX SSB Contest (October 25-26th) as Multi/Multi entry. QSL via N2VW. The team will be active before and after the contest signing VP5/homecall on CW and the WARC bands. QSL VP5/homecalls via their home callsigns to their CBA. Bureau is OK.

WP3, PUERTO RICO. Alfredo, WP3C, is expected to be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/Low Power entry. QSL via W3HNK.

XU, CAMBODIA. Shirow, JF6DEA/KE1EO, will be back on the air from Cambodia signing XU7ACD from October 3-6th (Local time). Activity will be on 40-10 meters and also 6 meters. There is further infomation at his web site, "JA 6m Companion", at: http://www.ham-net.net/vu-dx/
QSL via direct to JH6QIL with SASE to: Shin-Ichi KUSUMOTO, 1777-289, Nishi-Mochida, Aira-cho, KAGOSHIMA, 899-5431 JAPAN.

YI, IRAQ. Stefan, OM3JW, father and QSL Manager for Mike, YI/OM2DX, informs OPDX that last week his son received a new callsign, YI9X. You should have heard his first activity with his new callsign during the RTTY Contest this past weekend. QSL via OM3JW.

YJ0, VANUATU (Possibly H40). Early last week we received word that Mike, KM9D, and his girlfriend Jan, KF4TUG, were anchored at Tegua Island in the Torres Island Group (OC-110), northern Vanuatu. Mike was expected to be active as YJ0AMY with no mention of his planned bands of activity. However, there were no QSNs reported over past week. Also, Vanikolo Island

(OC-163) in the Solomon Islands, Santa Cruz Group (H40 - Temotu Province) which is only about 100km north of their position was also mentioned. Be listening. You never know. QSL via OM2SA.

ZONE 2. An international team of thirty operators will activate VB2C (Zone 2, Camp Rupert, James Bay, Northern Quebec, Canada) between October 21-27th. Activity will include the CQWW SSB Contest as a Multi/Multi entry. "Team Zone 2" with its 30 op effort will be active before the contest on 160-6 meters. For QSL info, see the Web site at: http://www.qsl.net/teamzone2

Please delete rec.radio.amateur.policy from future posting to this thread.
Nobody from this newsgroup has participated in this thread recently. Cross
posting is not a good idea anyway, so you might also want to consider
deleting the other newsgroups as well.

Not a lecture - just a simple request.

I'm curious to know if anyone out there has a spare
Barlow-Wadley XCR-30 portable for sale. These were
shortwave receivers made in the 1970s.

It is with extreme sadness and with a Heavy Heart that I report the
Passing of Jim Goddard W8RYA of St Louis, Michigan. Jim was a regular
on 3.976 Mhz, I never had the pleasure of meeting him. But I always
enjoyed talking with him on the radio.

Jim had his problems and we didn't always agree on everything... But
He was good guy...

There is no funeral and he'll be cremeated and his ashes will be
spread at the boy scout camp were he volunteered his services for..

Rest in Peace, Jim.

Signed,

-Chuck K8CPA and the Gang on 3.976 Khz

Greetings:

I am interested in finding a source for schematics and/or a kit for constructing a battery recharing unit.

I'm new to "homebrew". So kits and/or schematics with explicit directions is appreciated.

The battery pack I am looking to recharge is a collection of approx 40 1.5v NiMH cells for about 28V overall. In fact, any kits/plans/suggestion on making the battery pack itself would also be appreciated.

Thanks!!

http://www.angelfire.com/freak2/lardass_lloyd has been nuked.
Furthermore, Lycos is now tracking the repeat offender down through
the various servers he attempted to hide behind. Repeat offenders
cause Lycos to make a special project out of tracking them down, and
this guy has become one of those projects.

Really, really brilliant, Nimrod.

In the meantime, keep on putting the libel pages back up. That'll
help get you busted that much sooner.

LOL!!! Another is already up and running.

I would bet you have more difficulty finding this one, but 43 people have
already found it.

I've come across a shortwave transceiver at a local Hamfest manufactured by Trans World Communications in Escondido, California. The unit has a general coverage transceiver (2-30Mhz), built in power supply and antenna tuner.
It is fine working condition. I'd like to get some more information than the short (not original) usage notice that cam with it. Schematics and maintenance information would be great !

However, I'm unable to find anything about it or the Trans World Communications company on the Web.

Any hints or bits of information ?

Thank you very much indeed, Christy!

I am in the process of getting a shoutcast network started. I know that these buffons will try to destroy it, like they destroy anything I start for my peace and enjoyment. Would you give me some pointers as what to do?

e-mail me at lloyd_vfp@msn.com

Thanks again! We are winning!

Having that many cells in series is a bit of a challenge. By my math, it's about 2 dozen cells to get to 28 volts, so if you're looking for a tad more capacity then maybe 48 cells, 2 sets of 24. (NiMH cells are about 1.2 volts fully charged.)

In principle, it's pretty simple business to charge NiMH cells, just put a little more voltage on them than they normally produce, and limit the current. If you want to charge them fast, you need to monitor the temperature of the cells and manage that temperature. If you are patient, though, just charge them slowly and no need to watch the temperature.

However, when you get cells in series, slight differences between the cells will cause one cell to take more of the charge than others. Eventually, this leads to the failure of the battery, but for small numbers of cells, it's typically not a problem. With your 24 cells in a line that could be a problem, but again., if you charge them really slowly there's less need to be concerned.

In use, you need to have the 24 cells in series, but for charging, you might consider some sort of a scheme where there are fewer cells in series and more in parallel. When charging the cells in parallel keep in mind current limiting on each parallel branch individually, but that could allow you to use something a little more common as a voltage source, say the station supply or a 15 volt wall-wart. Older cell phone batteries used to use this sort of scheme, where the connector was arranged so that the batteries were connected to the charging connector differently than to the discharging connector.

..

After the GIGANTIC clue was given, the flunking student failed to get
it, probably due to having a very low IQ.

What I said about being impressed: I take it back. Right now I'm
impressed that you can find your penis (that is your "happy stick" that
you spend most waking hours working into the sliver that it is).

> If you insist.....Boss Hogg....looks like there are 5 Bushoggs listed.
>
> [work not shown, but familiarity with Dukes of Hazzard illustrated]

Of course, since this is a ham radio group, any clueless freshman could
have gone to www.qrz.com and looked up my name, or my callsign, and
gotten my home address. And you got... um... nothing? Nice work. You
must be a scholar. Oh, wait - you still have one hand busy.

At first I thought you were a loser, but since you tried so hard to find
my address, you are not a loser.

You are a failure.

How sad for you.

> So either you are still living at home or you have
> an unpublished directory listing. What were you saying about cowardice?

I'm still waiting for an answer to any of my questions.

As I said, you are a boring, 17-year-old who has never had the shit
beaten out of him. Go look up my address, and please come to visit.
We'll have coffee.

As far as the newbie comment, why not look me up on google, and see what I was doing on the internet when you were being conceived by your crack whore mother, looking for her next 25 cents, wanting a refund when you came out, ass first.

So, bottom line, here is my prediction. You will post my address (how inventive!) and have some more fun with my last name (gee, I've heard those for 50 years, but I'll listen to you, high-school sophomore! You're so inventive). And then you will say something about my last name again. And probably something about my mother, I guess. Who could have guessed that anyone would do that?

When you post the followup to this message, and you will, it will be the end of this thread, and you will have the satisfaction of knowing that you are a totally, confirmed loser (no, sorry, I mean "failure") and you should ask yourself, "do I really want to start puberty this way?"

FOAD.

By the way, you should post your upcoming lame reply anonymously. I'd hate for something awful to happen to you and have it blamed on me. Regardless of your mom's problems. I don't want to be a suspect if your mom goes the way of your dad. I really hope you all stay healthy and live a long boring life as a failure.

Dave

Be careful, NiMH batteries are more difficult to charge than this. There exists a charging algorithm for NiMH that is rather complex. You basically charge it as you stated, but when the current draw changes a certain way, you must detect it then charge at a different rate for a predetermined time. There are some IC controllers aware of this algorithm, so your homebrew charger may be best to employ one of these IC's...otherwise I suppose you could roll your own with a PIC or BASIC STAMP and the right monitoring hardware. WARNING: YOU CANNOT TRICKLE-CHARGE NIMH CELLS!

Good Luck.

The best thing to do is check the Texas Instruments (www.ti.com) AND Maxim (www.maxim-ic.com) websites. They have application notes with complete schematics and their chips incorporate the proper charging algorithm.

After buying a receiver, having been off ham radio for several years, I started listening to 20 meters. Low and behold all the bootleggers and cat callers and filthy mouthed unidentified scumbags now have gone. But one voice I heard, that voice I remember was especially nasty and crude. He used to stay on 20 meters all day and yell for Polly and cuss people. I couldn't believe this guy was still on. But, what I could't believe is that he was carrying on a conversation. But what I really couldn't believe was that he has a call. KD4OLA. This guy was a radio criminal from hell and now he talks on the bands like nothing ever happened. How long has he had a call? Does anyone else remember this? The voice is unmistakable. Maybe he's had a call all along but he never identified while doing his thing years ago.

I have a water cooled 25 KW TV broadcasting tube just red hot ready to fry your rig. I have a 40 ft tower in the back yard that should load up really nice. You behave yourself or I will fry your big ass. I will blow up the front end of all rigs. That phalic symbol of yours will become a limp noodle.

Why are you so concerned with another man's penis, BossHogg...are you a homosexual?

>(that is your "happy stick" that
> you spend most waking hours working into the sliver that it is).

Looks like you are homosexual. At least I can still see mine, unlike you who would have to fold back the flab with a utility fork to see that atrophied vienna sausage of yours.

Of course you can! I suspect you left off the word
"indefinitely".

I've been trickle charging NiMh's successfully for years.
A properly designed, time limited trickle charger works just
fine on NiMh. What you should not do is leave NiMh's on trickle
charge indefinitely. Some manufacturers claim you can leave NiMh's
on trickle charge for up to a year! See the following quotes:

"Charge your batteries fully, and then leave them in the charger
to maintain a continued full charge condition and your batteries
will always be ready for use. (Nexcell or GP brand NiMH batteries
can be left on trickle charge for up to a year with no damage to
the cells!)"
from: http://www.mahaenergy.com/download/mhc204freview.pdf

"Star Batteries sells only the highest quality NiMH rechargeable
batteries available. All of our batteries:

Meet or exceed their labeled mAh ratings.
Have a "button" top to fit perfectly into your device
Are compatible with "fast" chargers
Will accept a "trickle" charge without damaging your batteries"
from:http://shop.store.yahoo.com/starbattery/ne21mahaanir.html

"Fast Charging: All our NiMH series can be fast charged at rates
from 0.5C to 1C. Fast charge termination measures should be
employed. These include: Temperature Cut-Off (TCO), Rate-of-
temperature rise (dT/dt), negative Delta V (-dV). A timer
control set at 105% of nominal capacity can be used as an
additional protection.
For maximum capacity, a trickle charge can be applied after
fast charging. We recommend top-off trickle charging at 0.1C
for 2 hours or 0.2C for 1 hour."
from: http://www.thomas-distributing.com/nimhbattery-faq.htm

>(www.maxim-ic.com) websites. They have application notes with complete
>schematics and their chips incorporate the proper charging algorithm.

Indeed they do, but xpyttl's caution about "long" serires trings
remains just as valid a concern with decent controller chips. They
generally have no way to sense the individual cell SOC differences,
and therefore treat the whole string in terms of per-cell-average
voltage etc.

Additionally, any attempt at charge termination using temperature
sensing (absolute temp limit or rate of change) is VERY difficult to
implement on long strings simply because you need to sense at several
points and theses controllers are invariably designed for a single
temp sensing input. Been there, done that in a string >10, and we
gave up. The only other feasible option is to use MULTIPLE charge
controllers, each treating (and sensing) a small part of the total
string. This is often not a cost-effective approach. Sometimes,
redefining/rethinking the requirement leads to alternative approaches,
such as shorter strings feeding switchmode DC-DC boost converters.

Oh yes indeed KD0LA is still around. Talking mainly to Donnie Dumbass,
W4JYZ. Vanity call of course. Now that is another story...Yeah....thas
right...yeah. Just listen to that guy for a while.

Jim bo is famous for his 'Herby number one' on phone and CW. I don't know
how he survived the Herpsters leaving. It must have been very traumatic.
Maybe that explains why Jimbo talks to Donnie....nah

You'll have to pass the test on your own, twat.

> oh well, I fail to see where it's my problem anyway.

You fail to see quite a lot of things, no-code technician twat.

Gee, that's funny! - I can't imagine why any ham worthy of the name would run down another ham because of his liscense level.

I personally know a tech who was riding on a convoy from Kuwait to Bagdhad a week or so ago, and within a few hours of entering Iraq, ended up in a firefight and saved several of his comerads while sending a couple of those crapulent terrorist dudes they have over there to their final rewards.

Hey, he'll be back from his tour over there in a year or so... Maybe I can get the two of you together so that you can talk trash about techs to his face. - If you think you are up to it.

Oh, but I forgot... You are another one of those no-callsign "anonymous" mother's mistakes who get on here from time to time to bash hams and ham radio. Another anti-ham Troll.

Never mind.

But that's not what the context is. The intent of the original
statement is clear that he is referring to his (Rich's) supporters.

"Rich is not missed save by a few of his malingerers."

Malingerers is clearly a noun. In the case you try to make, it would
be descriptive of his, what? supporters? apologists? In other words,
more like an adjective. Then what is it modifying? Nothing.

In other words, you are trying to convince us that the original poster
was saying that "Rich is not missed save by a few [people who feign
illness or inability]." Sorry, no sale.

I will concede that I've never heard promulgate used in that fashion.
Sue me. I will not concede, however, that given the whole text of the

definition (which refers to publishing laws or proclamations) that the original poster's use was appropriate, particularly in the context of the original post.

>In fact, "perpetuate" is another perfectly good synonym, contrary to the
>erroneous statement by "master language butcher" LRod.

Interesting propaganda technique there; citing a source and using actual material from it, then adding one's own thoughts in the same paragraph to give the impression one's own ideas are also from that source. Please cite any source in which "perpetuate" is a synonym to "promulgate." It's certainly not in the ones you used.

>Perhaps "LRod" would do well to consult a dictionary himself before
>attempting to correct someone else.

Just one? Why, you used at least two, neither of them mainstream, to try and make your point. Something wrong with http://www.m-w.com ?

>Instead of the intended result, LRod, you now have your foot firmly planted
>in your own mouth.

I know you'd like to think so, but, I refer you to Mark Twain's essay "Fenimore Cooper's Literary Offenses" in which he describes, with a musical metaphor, Cooper's misuse of words as "sharping and flatting" his way along. The vocabulary use in the original poster's message fell short in substantially the same way.

Are you an Al wannabe? Too late for that because 94.5 is dead and ham
radio will be too when the code is done away with and people like
Lloyd become HF ops. 2 meters is already a CB wonderland. HF has gone
downhill since 5 wpm started. Also, how in the hell did you get 10816
lookups on QRZ? Set your computer up to do that? You must have one
hell of an ego. I thought only W8CH was stupid enough to pad his own
lookup on QTH. One last thing, only an idiot would put a link to his
sucking up to Herb Schoenbohm. If he's a "a positive role model." so
was Big Al. How much did Herbie Baby pay you to say that in the
courtroom? You have a grasp of logic that is rivalled only by lunatics
and those with a propensity to drill holes in the side of their heads.

LRod, Lee's made these same inaccurate statements before, when he used the word "too" for what should've been "two." It is a part of a post in which he was replying to two different posters, but he must've been on one of his drinking binges that day, so he didn't notice. He quickly made apologies and excuses for it citing the same online sources as he did above:

IGNORAMUS "Stagger Lee" <SLee@houston-hunks.com> demonstrated
his English skills and later tried to backpedal out of his use of "too" instead of "two"
in message <too.two_or_also@houston-hunks.com>:
"You too need to get a newsreader which generates a References header."

Here's another one where he falls flat on his sloped foreheaded face:
Stagger Lee, the "Pulitzer prize award-winning writer" slobbered
the following Ebonics in <9a56ue$hi0$0@dosa.alt.net>:
"I hope yourself takes the advice you are giving to yourself."

2507. Racist druggie Rush runs from the media

Newsgroup: rec.radio.amateur.misc

2511. Taking apart an Icom IC-V8

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-02 16:00:01 UTC
From: achilles03@hotmail.com
Message-ID: <fef44ceb.0310020800.779295f3@posting.google.com>
Source record: 63181

I'm trying to open the case of my IC-V8 in order to solder leads on the PTT button to control the TX via a remote switch, but I can't get the dang thing open. There's no more visible screws to remove, and it appears that it is attached via some unknown mechanism at the top (epoxy, snap features, etc?) Does anyone have experience opening one of these up?

Thanks in advance!
Dave

2512. Icom SM-20

Newsgroup: rec.radio.amateur.misc

Hi all

I need a copy of the manual for my Icom SM-20 microphone. Can't find mine. I have searched on the net but can't find a copy.Can anyone e-mail me a copy please?
dx90@blueyonder.co.uk

Many Thanks

Andy

Andy,

It's not listed there, but have a look at the Icom web page listed
below:

http://www.icom.co.jp/world/support/download/menu.html

At the bottom of the page are instructions for having an instruction
manual not listed there uploaded for you!

73, Leo

I've always looked to Rush for
guidance, now I find he's another
fucking drug addict.

Breaks my heart!

Yep. They are perfectly OK with a lying, war mongering President who dances to the tunes played by Big Business, who has ruined the country's economy, and invaded a sovereign nation for oil. They'll find a way to rationalize this.

Righto...I believe this maid....the one with a lawyer on retainer. Uh hu.....anyone see anything strange about that?

Betch Hillary is behind it. She hasn't cared for the Rush man since he had 'womb to tomb' on it. Then the 'feminazi' stuff really did it.

What ya wanna bet that the maid is a newly paid Democratic voter, that is a illegal, and is moving to California to get a drivers license, so she can vote in the election for Davis. Wouldn't surprise me a bit...

That is almost correct, except that it is the advertisers who are
running the show. The great fear was that they'd leave ESPN, and now
it's probably pretty certain that they will leave the radio program.

Once the advertisers leave, the radio show runs out of cash and then
it folds.

Dr. Laura knows how *that* works.

Rush has a hugh listener base which includes yours truly. I doubt that he'll be going away anytime soon. This is just more propaganda from the Democratic party to silence him. Nothing more.

There are two Americans that I love the most.

President Bush, and Rush Limbaugh. I pray for them both every day. They are proud of America, and love it for what it is and what it stands for.

There are plenty of citizens in this country that HATE what America is and what it stands for, which is their right. I have always wondered why some of the anti-Americans don't go off and try another country to live in if they hate our American way ? Who knows, huh ?

God Bless America, President Bush (4 more years), and Rush Limbaugh !!!!!!!!!!!!!!

What say ye ???

TL,

Rush opened his mouth and paid the price [.]
- - - He spoke 'honestly' as a white man (folks) about the condescending Media bias toward black folks in the USofA.

Al Sharpton recently criticized the 'other' democrat presidential candidates about only talking about "RACE" to black folks and not talking to white folks about "RACE".

But the 'reality' in today's USofA is that any white folks who 'honestly' talk to other white folks about "RACE" and today's relationship between whites and blacks in the USofA are instantly 'labeled' as "RACIST" and Bigoted by the Media.

The Media and black folks do not want to hear anything from white folks other then the 'politically correct' mantras:
* Were Are Sorry for Slavery! * Your Need Help - Because You Are Black!
* You Can Not Get An Education and Jobs - Because You Are Black!
This All Translates to: Black folks can not accomplish anything with out the Help of a select few 'enlighten' white folks. (Pure Liberal Racism)

BUT - Any "RACIST" thing that a black person (folks) says is automatically excusable because they have suffer a lifetime of abuse by simply living in the white racist USofA.
http://www.usatoday.com/sports/baseball/nl/cubs/2003-07-07-baker_x.htm
- - - a la Chicago Cubs manager Dusty Baker.

The Dialog concerning Race in the USofA is One-Way and Totally Phony [.]
+ + + Black folks can speak freely and with impunity about race, racism and the white man.
- - - White folks are 'force' into Silence. In fear of being labeled a racist.

It is better to 'let' a White Red Neck "Cracker" be honest about his feelings:
- Black folks - Discover and Recognize Your True Enemies.
- - Then to Silence them and not know the danger in your mist.
- - - Learn to recognize: The Lies, The True, and Yes Simple Honesty.
Most white folks do not know their true feelings on "RACE" because the are afraid of saying them openly and thus do not know how biased, bigoted, and racist they are. When white folks are liberated of the

Code of Silence on "RACE" in the USofA. They will then hear
themselves and gain some insight into their inner being. Then and
only then will any change occur with in their souls.

Let Us All Speak Freely and Honestly - Brother to Brother ~ RHF

Yes if they behave like Rush Limbaugh.

Limbaugh routinely insults those he disagrees with. He gives them nasty nicknames; he mocks them, besmirches them and makes fun of them far more adeptly than his current attackers. This is how he makes his millions. It is ludicrous for him, and for his defenders, to claim he is being treated unfairly. Others are simply doing unto him what he does unto others. That?s justice in my book

California Recall

or Create your own

Manage alerts | What is this?

SAN DIEGO (CNN) -- Facing allegations of sexual impropriety in the final stretch of California's gubernatorial recall campaign, Republican front-runner Arnold Schwarzenegger said Thursday he had "behaved badly" in the past and apologized to anyone he offended.
"Yes, it is true that I was on rowdy movie sets, and I have done things that were not right, which I thought then was playful," he said. "But now I recognize that I have offended people, and to those people that I have offended, I want to say to them I am deeply sorry about that, and I apologize, because this is not what I tried to do.
"When I am governor, I want to prove to the women that I will be ... a champion of the women," he said. "And I hope that you will give me the chance to prove that."
The allegations were published Thursday in a front-page article in the Los Angeles Time and come just five days before the October 7 recall election. Voters will decide whether to toss Democratic Gov. Gray Davis out of office and, in a second part of the ballot, pick a replacement from 135 names in case the recall is approved.
Asked about the allegations against Schwarzenegger during an appearance in Santa Monica, Davis refused to give his personal reaction. He said he would leave it up to the voters of California to decide how much weight to give

the allegations.
"Anything I would say would be superfluous," said Davis, who in recent days has cast the recall race as a battle between himself and Schwarzenegger.
But Democratic Lt. Gov. Cruz Bustamante, slipping behind Schwarzenegger in recent polls, was much less reticent in embracing the controversy. Speaking to reporters, he even read aloud the California Penal Code's definition of sexual battery.
"It is more than just boorish behavior," he said. "These multiple allegations by these women, I believe, will dog Arnold and make him less effective in dealing with the issues that are confronting California. ...
"Women cannot be approached like that in the workplace. It's absolutely wrong," he said. "If there are women who are coming forward with these allegations, they should be resolved."
Despite his apology, Schwarzenegger characterized the charges as an effort to derail his campaign, which is leading in the polls.
"As you know, this morning, they have begun with the tearing down," he said. "But I know that the people of California can see through this trash politics."
Earlier in the day, Schwarzenegger said some of the accusations made against him were not true, but he was not specific. His campaign issued a statement saying the story represented "a desperate attempt by Democrats so close to the election" to smear him.
However, the Los Angeles Times said its report was not prompted by information from rival campaigns. ABC's Good Morning America also reported Thursday that it had learned similar information without the help of any campaign operatives.
When asked if Davis would make use of the allegations against Schwarzenegger in the final stretch of the campaign, spokesman Peter Ragone said, "It's not something that we are talking about. It's something for the voters to decide about."
Six women alleged that Schwarzenegger touched them in a sexual manner without their consent, according to the newspaper. The alleged acts date back to the 1970s, and the latest was in 2000. The newspaper contacted the women in the course of a seven-week investigation; none of them approached the newspaper, the Times said.
Schwarzenegger has been dogged throughout the campaign by allegations that he mistreats women, prompting some women's groups to protest at his appearances. He has denied being a misogynist, and his wife, TV newswoman Maria Shriver, also has defended him against charges that he treats women badly.
A spokeswoman for Shriver said she would not comment on the latest allegations. She planned to continue campaigning for her husband, though she was not planning to join him on a four-day bus tour that started Thursday, the spokeswoman said.
Earlier comments
Fueling the controversy were comments Schwarzenegger made in a 1977 magazine article describing a sexual encounter that he and other bodybuilders had with a woman in a gym, as well as a comments he made in a book published the same year about treating women as sex objects.
Schwarzenegger now says his comments back then were exaggerations --

deliberately designed to be "outrageous" to draw attention to the fledgling sport of bodybuilding.
Schwarzenegger's apology was made in front of supporters in San Diego, at the kick-off of his bus tour, which will take him up and down the state to rally voters in the campaign's final days.
He left the hall smiling and waving from the steps of a bus festooned with a huge portrait of himself, christened the "California Comeback Express." The song, "We're Not Going to Take It," from the heavy metal band Twisted Sister, played in the background as the bus rolled slowly outside.
"We are now in the last few days. It is hand-to-hand combat. We are in the trenches now. We have to fight every inch of the way until we get there," he said.
Two of the six women in the Times report were identified; the other four spoke on the condition of anonymity, saying they feared retaliation. None of the six has filed legal action against Schwarzenegger. None alleged that they were raped.
Three of the women said Schwarzenegger grabbed their breasts; another said he reached under her skirt and grabbed her buttocks. The fifth woman said he groped her and tried to remove her bathing suit in an elevator, and the sixth charged that he pulled her on his lap and asked whether anyone had performed a certain sexual act on her.
"I was just shocked -- shocked to the point where I almost didn't how to react, because it was so out of the blue and so unexpected," said E. Laine Stockton, who told the Times that Schwarzenegger reached under her T-shirt and touched her breast at the famed Gold's Gym in Santa Monica in 1975.
One of the unidentified women told the newspaper that after Schwarzenegger touched her breast on a Santa Monica street in 1980, she made it clear that she didn't consider it playful.
She told the Times that she told him, "If I was a man, I would bust your jaw." Schwarzenegger, she said, just laughed.

LONDON (Reuters) -- Captive carnivores such as lions, polar bears, tigers and cheetahs have difficulty adapting to life in zoos because they miss the variety of the wide ranges they roamed in the wild, scientists said.
Animal behaviorists at the University of Oxford in England had thought that carnivores fared less well in zoos and paced back and forth because they missed the thrill of the hunt.
But after analyzing data on 35 species of carnivores zoologist Dr Georgia Mason and her colleagues discovered that depriving the animals of their naturally large territories was an important factor in predicting how well they would adapt to captivity.
"We thought it would be something to do with hunting but we found instead that home-range size and the daily distance they travelled naturally was the predictor," Mason said in an interview Wednesday.
The most wide-ranging carnivores were prone to the worst problems in zoos, she added, and had high infant mortality rates, while those who stayed closer to home in the wild adapted best.
But Mason, who reported the findings in the science journal Nature, said the animal's body size was not a primary factor. Some large animals such as the grizzly bear, which has a home range of about 0.5 square km (0.2 square miles), do well in zoos, have a low infant mortality rate in captivity and spend about 11 percent of their day on average pacing.
Tigers and cheetahs, which normally cover much larger distances in the wild, spend more of their time pacing and have higher infant mortality rates in captivity.
The grizzly bear, Eurasian lynx, American mink, red fox and arctic fox, which are more stay-at-home types, adapt best to zoos, according to the researchers.
The study, which was partly funded by zoos and animal welfare and veterinary groups, has important implications for zoos eager to improve the welfare of carnivores in captivity.
The Federation of Zoos in Britain welcomed the results, although it said they could be open to misinterpretation.

"Nevertheless such research is invaluable in helping to ensure we continue to strive for the highest standards of animal welfare in keeping large endangered carnivores in zoos and wildlife parks," Dr Miranda Stevenson, the director of the federation, said in a statement.
Mason added that it was not just a matter of space for carnivores because in some cases the animals travelled a greater distance pacing than they would have in the wild.
"They can put the miles in, even in captivity, which makes us think that it is not just space and enclosure size but something more subtle, perhaps to do with day-to-day variety," she said.

Austrian Cardinal Says Pope Nearing Death

Reuters
Thursday, October 2, 2003; 1:39 PM
By Crispian Balmer
VATICAN CITY (Reuters) - A senior European cardinal said on Thursday Pope John Paul was nearing death -- the latest top churchman to ring alarm bells about the state of the 83-year old pontiff's health.

Austrian Cardinal Christoph Schoenborn made his comments on the same day the pope's private secretary was trying to play down concerns about the pope's evident frailty.
Pope John Paul, who suffers from Parkinson's Disease and can no longer walk without help, has appeared weaker than normal in recent public appearances and has struggled to speak at times.
"The whole world is experiencing a pope who is sick, handicapped and dying -- I don't know how close to death he is -- who is approaching the last days and months of his life," Schoenborn told Austrian radio.
Later Schoenborn's spokesman, Erich Leitenberger, said the comment was meant "to be seen philosophically" and should not be interpreted literally.
Schoenborn, head of the Catholic Church in Austria and archbishop of Vienna, is seen as a possible successor to the pope, who celebrates the 25th anniversary of his pontificate later this month.
Earlier on Thursday, Archbishop Stanislaw Dziwisz, the pope's long-term personal secretary, said recent comments by another senior cardinal about the pope's condition had been taken out of context.
Cardinal Joseph Ratzinger, an influential German prelate who heads the Vatican's Congregation for the Doctrine of the Faith, was quoted as saying by German magazine Bunte that the pope was "in a bad way." He called on the faithful to pray for the pope.
CARDINAL DISTRESS
However, Dziwisz said Ratzinger wept when he saw that comments made in the street had been reported in the press.
"Cardinal Ratzinger was crying yesterday," Dziwisz told reporters attending a meeting between the pope and the president of Lithuania at the Vatican.
"He didn't give anyone an interview, but when he was stopped by a journalist on the street he went as far as saying: 'If the pope is ill, pray for him,"' he said.
The Vatican has insisted that the pope intends to push ahead with a hectic program of events this month, including the 25th anniversary celebrations, the beatification of Mother Teresa and a ceremony to invest some 30 new cardinals named last Sunday.
The pope told pilgrims at a general audience on Wednesday that "God willing" he would make a brief trip to the southern Italian city of Pompeii next Tuesday to visit a sanctuary there.

At one point in the audience he briefly stopped speaking and a clear look of frustration passed over his face. Seeing him struggling, the large crowd broke into applause to cheer him on and after a pause he continued in his flutey, breathless voice.
The pope had to skip last week's general audience because of an intestinal disorder.
Earlier this week, French Archbishop Philippe Barbarin, who was among the batch of newly appointed cardinals, told French radio: "The pope is in really bad shape."
Dziwisz urged reporters on Thursday not to overdramatise John Paul's frailty. He said much that had been written over the years had ultimately proved false, and with a smile added:
"Some journalists who in recent years have spoken and written a lot about the pope's health are already in heaven."
(Additional reporting by Luke Baker in Rome, Francois Murphy and Louis Charbonneau in Vienna)

Just what did he say that was racist? I read his statement, there was nothing racist there at all. Please tell me what was racist about it.

As for his ALLEGED drug use... innocent until proven guilty. At the same time, there are lots of folks out there who get hooked on pain killers, nothing new about that.

Addictions can be cured, and in many instances have little to do with whether a person is 'good' or 'bad'.

> > blistering heat wave was nearly 15,000 . . . .

==========

It must not be forgotten the health of French nation has considerable improved since August. The undoubted evidence for this is a much reduced death rate amongst the elderly which will last for several years.

The same sort of statistics apply to other countries which suffered from the heatwave but didn't bother to publish them, ie., for political reasons they kept it secret.

The French government should be congratulated on its honesty as it should be on other matters of international interest and importance.

Vive la France ! Vive l'Europe !

And we all know what Rush has said about movie stars over the years who abused drugs. At least most of them admitted they had a problem publicly and went to the Betty Ford clinic under full media glare. If this turns out to be true Limbaugh is a total hypocrite of the worst sort, dumping publicly on addicts and the homeless for years for what he's been doing for years privately.

Besides, Rush is a Noble Republican, and therefore
exempt from most laws.

Right? Republican hypocrites.

Ya, I guess Al Frankin does this too.

But I am definately describing Rush Limbaugh in this case.

Okay I guess every time Rush Limbaugh is metioned, Al Frankin also has to be metioned.

I forgot since Rush wasn't on today, The Rush-bots go back to the default answer of AL Frankin or Bill Clinton, until has able to tell them what to think.

At any rate, Rush rakes in over $40 million a year.
If he's forced into retirement, he'll never have to
work another day in his life, and conservatives will
have a new martyr. Whatever happens, I'm sure he'll
land on his feet.

Ah yes. Evil conservatives are always juxtaposed with those loving,
caring liberals. So loving and caring. Sometimes, it is just so
overwhelming that it brings tears to one's eyes.

Clinton defiantly hooked Rush on drug.
We just have to figure out how.

Then again maybe Al Frankin hooked Rush on drugs.

One thing we know for certain it's not Rush's fault.

Rush isn't a noble Republican, he's an entertainer. If their was more money in being a liberal, He would be a liberal. One thing for sure he got rich playing this I'm a draft dodging conservative game.

Didn't Clinton's Dick do a lot of drugs?

I understand Clinton's Dick introduced the Noble Rush
Limbaugh to drugs and got him hooked..

But, of course, Al Franken isn't a liar, propagandist, hypocrite,
coward, draft dodger, druggie, racist and general sack of human shit
like Limbaugh.

Get busy defending that piece of human dung Limbaugh!

Hello, Reg

Well, I'm sure you'll get some flames on that comment, but it sure is nice to hear some honesty once in a while. I've read comments carried in news organizations some years ago. A number of Europeans were appalled by the number of homeless in the United States. Oh, some of the "conservatives" have broadcast a lot of hot air and some folks will call anyone disagreeing with their position "card - carrying - liberals", but the fact is there has to be some reasonable compromise to keep as many folks happy as possible. Also, it is necessary for any civilized nation to provide some level of support for those citizens unable to take care of themselves. Mind me, I am not saying that we are or are not doing that toady. However, it is fortunate that we have a very powerful weapon here. It is called the vote. If enough folks get upset, it will show despite the 30 second sound bites and handshaking LOL :)

I might inquire if you believe that the administration has been totally honest in its' appraisal of Iraq's weapons of mass destruction. Hmmm ... it may indeed be honest; it may not. All of the information is not in and I doubt it ever will be.

Maybe Rush should go live in a country where recreational drugs are legal.
What the hell does one have to do with the other?

Of course, this is where all right-wingers go when their messiahs
are crucified:

"You just hate America!"

BFD!

What the fuck does that have to do with anything?

Limbaugh is a goddam LIAR in addition to being a druggie
and racist pig. His books are pure right wing fantasy
horseshit.

Franken backs his claims with FACTS.

Poor fucking Limbaugh, all he had was a ghost writer.

Well, Limbaugh being a liar and racist pig as well as
a druggie is certainly offset by his making a lot of bucks.

Republicans worship money! No matter how goddam slimy the
guy "making" it - look at them sucking Limbaugh's ass boil!

Yeh - Like Robert Downey Jr.

Hollywood's excuse was that he was "Oh So Naturally Talented"
- - - That Drugs were just a Minor problem that should be overlooked.
After all he was a creative and elightened being.

I doubt Rush is a racist.

He frequently has black guest hosts when he's on vacation.

When he had his syndicated TV show a significant part of the crew were "non whites". (the whole crew was on camera for the Christmas shows.)

I'm not a football fan, so I have no idea if his comment was accurate regarding the QB, but in the past, I've heard Rush say something along the lines of: People who pander based on race are racist because they presume certain races have limited ability
and need preferential treatment to succeed.

I think sports fans often have a different sort of prejudice - "players on the team I like are great, players on the other team are lousy". Perhaps this was a factor - I have no clue what team(s) Rush roots for.

We'll see what Rush has to say about the drugs - my guess is there is at least some truth to it because his initial comment about it was he didn't know of any investigation but will cooperate.

Unless legal problems get in the way, I expect he'll retain most of his audience.

N8KDV,

It's no longer - what he said that is important [.]

Its what the Media "News Makers" say that he said.
- - - For They All Know What He Really Meant !

It's not the Law or Right or Wrong.
- - - The Concept of Innocent Until Proven Guilty is Out of Date.

It the Simple Fact of the Charges.
- - - The Seriousness of these Charges that is Paramount.

These Serious Charges must Be Investigated
- - - and Given a Full Public Hearing.
- - - The Facts and The Truth are Secondary.

The Seriousness of the Charges are All Important.
- - - The Facts be Dammed
- - - The Truth be Dammed

We Must Extract Our Pound of Flesh !
- - - For the Media "News Makers" have
- - - Educated each of us to understand.
- - - For We Now All Know What He Really Meant !

What worries me is that in almost every country people are getting more and more anti-american.
Only 15 years ago most there was a normal mixture of positive and negative opinions, but it has become more and more negative, and since Bush 1 and 2 mentioning the word america to a non-US person generates a flood of negativity.
For most people that is, exeptions here and there, but what would be the reasons for that?
Personally I don't have such a primitive opinion, which is usualy just based on black and white thinking, but the situation as a whole worries me, I cannot see anything good coming out of it.

-Jeroen.

Hello,

I seem to have misplaced the manual for my HW24 dual band mobile rig.
Does anyone have a copy of it, perhaps in a digital format, or a copy
they could either photo copy and mail or scan? I'd be willing to pay
for your shipping charges if you need to mail it.

This is a radio that definatly needs its manual.

Thanks in advance,
David

PS: Please reply via email as I don't check these groups very often.

> thanks?

Dear Sir:

Thank you for inquiring about ham repeater operation and its cost.
Repeater operation is a special privilege as there are only a handful
of frequencies available for any particular area. Repeaters, as you
will see, use TWO assigned frequencies so the cost to operate them
is somewhat higher than "regular" radio operation.

The FCC assigns call signs and verifies operators have the technical
competence to run a repeater. Actual collection of fees associated
with repeater operation are left to local amateur radio management
offices. The office assigned to your area is run by me, Dave Bushong.

Yearly fees for operating a two channel repeater (one input frequency
and one output frequency) are $2400 per year payable in full each June
1st. Repeaters that begin operation in months before June 1st pay a
prorated $200 per month for those months prior to the first of June.

It is common for repeater operators to pass along the cost of
operation to members of a ham radio club. You may have wondered why
there are so many local ham radio organizations. This is why: to
defray the costs of this yearly repeater fee. It is also easy to
tell what the costs are to each member by looking at the TONE setting
needed to use the repeater. Tones of 74.4, for example, charge $74.40
per user per year. Repeaters with no tones are donated to their
communities by their operators. Operators who are kindhearted enough
to donate their repeater to the community just pay the yearly fee
and never mention that fee to anybody (to keep folks from feeling
uncomfortable about such a generous gift).

You can get started with your repeater by sending me your first
annual payment of $2400 (or the prorated portion thereof). This
money is used to help orphans and cripples in third world

countries so we need the money in CASH please. That helps us get the money to the needy children quickly.

I look forward to helping you get started. Remember: CASH.

Thanks again.

Dave

We are pretty bad at marketing ourselves. One of the other problems
is that in many areas of the world, people expect their politicians to
never be truthful, and to always have a secret agenda, where for the
most part, we consider this to be the abnormal state. Then end
result being, we tend to look at situations from a "best case scenario"
and the peoples of other countries tend to look at us from a "worst
case scenario".

Maybe it's something to do with posts like the original in this thread, congratulating the death of 14000 non-Americans. I assume the post was by an American?

Many if not all of the agreements are from Americans.

The thread has a very "We and them" nature to it.

Is this typical of American feeling?

I think the general view of America and Americans by many non-Americans is that of a nation full of (or least run by) selfish, arrogant people. I wonder why?

(I am not the type of person to cast judgement on an entire nation by my experiences of a few from that nation - this is the general feeling I have picked up from others)

Ben

Entirely predictable, I'm afraid. It's the same here in England.
People tend to ascribe the national character of the people to that of
their leader. Most unfortunate. I personally think the American people
are great, but there's no doubt that W's foreign policy stance has
been outstandingly disastrous in all manner of areas, virtually right
from day 1. From a personal PoV., I'm sick of years of being
associated with Thatcher, Bliar etc. This may be a democracy, but that
only results in the least-worst choice of candidate being chosen to
'serve' (themselves, usually). Even Churchill admitted this.

Certainly British people at any rate are at greater risk from
terrorist attack than we ever were before this recent debacle. And
what was it for? A war fought on an entirely false premise. Our
so-called security services need shooting for their incompetence.

You've certainly failed to find any weapons of mass destruction.

It sounds as if you were suckered by the anti-Saddam exiles - the same crowd that you are now assembling into an unelected government, so that you can hand over to them the fruits of an expensive invasion that you were frightened into paying for by their misinformation.

Who is going to nominate Dubbya for this year's Nobel Prize for Gullibility?

Bill Sloman, Nijmegen

Ongoing programs had been found, active weaponized botulism
cultures and allegations (from the Iraqi scientists) that
some weapons had been moved to Syria, Iran, and even Jordan.

The sluggish and reticient behavior of the UN (caused by
the lack of real back-up for the 12yrs of UN edicts) gave
Saddam the opportunity to hide his programs. There is
even some indication that Saddam's people was even misleading
Saddam himself (alas, you probably don't get all of the
information about the weapons search.)

The entire world believed in the WMD issue (including even
the evil French regime), but didn't see the WMDs as a threat
(because they would be directed towards the US and Israel.)
The Islamist constitutency in France (and Germany), the
stronger and stronger anti-Jewish attitudes and the fear
from old Europe due to their own impotency has indeed caused
serious problems.

Just because Saddam didn't like America doesn't make him
your friend. You seem to assume that anything anti-america
is good. Remember: it is Europe who had drifted far far
left, while IKE/JFK arent' that policy-wise very different
from Clinton/GWB. It is leftist, socialist Europe that
has lost its way.

I think the world view of Britain and US will change if the people replace the current gov in their next election to show the world that it is not the view of most people in those countries.

Otherwise, it is hard to blame the world for beleiving the people of the two country are reflected by their leaders.

Actually, it would be good to see a change in government in France
to show that it isn't so anti-America. The slowdown of commerce
with France has been partially indicative of the American attitude.

Most of the truly egregious things that are ascribed to the
American government are either untrue or very dishonestly biased.

Nonsense. If someone offered me a vacation in either of those countries, I'd be packed and ready to go in an hour. You criticize Germany, yet we're the ones (the United States & Allies, after WWII) that put constitutional restrictions on that country's military and its participation in foreign conflicts. France, when it dropped out of NATO decades ago, also swore off any participation in NATO and U.S. foreign conflicts. Both of those countries now have a several decade tradition of this, yet you seem surprised, even outraged, when they maintained that same tradition during our invasion of Iraq. Unlike some countries, they mean what they say. If you now want to punish them for that, go right ahead. But don't expect everyone else to be a party to it. I, for one, will never punish a country for choosing peace over war.

On September 12, 2001, after 3000 Americans were butchered by religious fanatics, thousands of French spontaneously, with heartfelt tears in their eyes, marched with American flags in sympathy. At France's urging, NATO immediately invoked, for the first time in its history, the clause of common defense.

Almost two years later, over 14,000 French, mostly aged and infirm, are felled by one of the worst extended summer heat waves of the last hundred years. Our glorious right wingnuts laughed and said it served 'em right.

I know this is off-topic, folks (my first, I think), but there was a time when you could be a conservative and a patriotic American without spouting dittohead trash or playing Newtball with foreign policy. The country would be better off if the real conservative, patriotic Americans left the John Bircher wingnuts in the gutter where they belong, and take their rightful place running the country and guiding America through some difficult times. If nothing else, after we're done alienating every potential customer in the world, who will we design for or sell to?

Both the pro-Rush and the anti-Rush crowds would be funny, if they were
not so predictable.

Two dissimilar hard-core ideological groups with a single common
denominator: both sides allow Rush Limbaugh to live *rent-free* in their
heads - albeit for different reasons.

Why they would allow themselves to get so hopped-up over an entertainer
is beyond my comprehension. However, it does speak glowingly of
Limbaugh's ability to draw (and forever hold) a crowd's attention.

-=jd=-
..
By the same token, makes one wonder why anybody, male or female, would allow
themselves to become so intrigued with the lives and times of the Hollywood
druggies....why lend them any credence?
Maybe it is because so many have so little to do with so much time.

Personally? I'd rather listen to Limbaugh than Ted Turner....I prefer the ideology of the former to the ideology of the latter.
This debate will live on for years and the twain are likely to never quite meet.
I have purposely left out the documented tales of drug abuse by ex President Clinton....I will savor that for later.

> (because they would be directed towards the US and Israel.)

The entire world believed that the UN inspectors hadn't found any
weapons of mass destruction, and didn't believe that an invasion would
be justified until somebody found hard evidence of such weapons.
Saddam was seen as a threat not just to Israel and the U.S. - Kuwait
and Iran had every reason to be nervous on the basis of their
experience, and there was a wide-spread feeling that the man was
something of a bull in a china shop - but an invasion based on mere
suspicion was felt to be much too dangerous a precedent to be
sactioned.

> The Islamist constitutency in France (and Germany), the
> stronger and stronger anti-Jewish attitudes and the fear
> from old Europe due to their own impotency has indeed caused
> serious problems.

Deep dark suspicions about American neo-colonialist behaviour also
seems to have played a part.

> Just because Saddam didn't like America doesn't make him
> your friend.

Just because Saddam didn't like the Iranians, you adopted him as your friend, back in the 1980's. Bad move. Saddam didn't like any non-Arabs, and even with in the Arab world nobody seems to have regarded him as an attractive ally. His oil did have some fans though.

> You seem to assume that anything anti-american is good.

Why on earth do you think that?
Being against the ill-justified and premature invasion of Irak is not an anti-American attitude, nor a pro-Saddam attitude, no matter how much Dubbya would like to make these false associations.

Trotting around saying that those who aren't for us are against us is the tactic of a simple-minded bully. The real world is a little more complex - not that you seem to be equipped to appreciate this.

> Remember: it is Europe who had drifted far far
> left, while IKE/JFK arent' that policy-wise very different
> from Clinton/GWB. It is leftist, socialist Europe that
> has lost its way.

Yes, John - anything you say, John. Since your ideas of what constitutes leftist and socialist seem to be drawn from the texts of the John Birch Society, your opinions on the subject are difficult to relate to other people's.

There is still LOTS of indication that weapons are on other
sovereign territory. They might even be hiding in the
Saddamite countries of France or Germany!!! You make
the claim of 'no weapons', but you make that claim without
enough information. Your own media is well known to be anti
US biased and incomplete regarding the US and the Iraq issues.

This says that the US AND THE REST OF THE WORLD intelligence
agencies MIGHT have had erroneous conclusions. In the US, the CIA is
led by a Clinton appointee (for example.) There are SEVERAL
anecdotes of the CIA director RECENTLY being asked by BOTH
Gopers and Dems that Saddam has the weapons, and he said yes.
These acks had been made in PUBLIC. In the US, the CIA isn't
directly controlled or managed by the president, and is
well known to be center-leftist. This is a GOOD EXAMPLE of
incompetency on the left (and in numerous other intelligence
agencies in the world) that might have led us astray. Perhaps
we were having to rely on the intelligence assets from other
countries... (The current furor about the mistaken leak of the
name of an operative is obviously a smoke screen to hide the
possibility of additional CIA incompetency.)

Here in the US, it is our LEFTISTS who have weakened the human
intelligence assets, trying to rely almost 100% on electronic
means. It was the GOP-types who had preferred to keep a
traditional and more reliable intelligence establishment. (Refer
to the actions of the Church commission, Jimmuh Cartuh and
BJ Clinton.)

If we didn't find weapons, it is possible that France had helped Saddam hide them (either directly or indirectly.) Just like Usama residing in Pakistan, we cannot intrude far into Iran, Syria, France or Germany to find Saddam's assets. (There were significant indications prior to the war that France had been complicit in helping Saddam.) The ongoing supply of such assets from Germany, France and Russia shows a lack of honesty and consistency with diplomatic position. At least, the US had eventually learned that Saddam wasn't a good guy, but France selling highly enriched Uranium to Saddam was STUPID. (Yes, Chiraq and Saddam were REALLY good friends. This isn't the same as the diplomatic relationship that US had with Saddam.)

There is OBVIOUSLY a case of old, worn-out Europe choosing Saddam over the US, and the US populace is well aware of that matter.

>
> The entire world believed that the UN inspectors hadn't found any

Most of the entire world had believed that there were WMDs in Iraq. Perhaps France knows that Iraq had WMDs, because they are still probably storing them :-).

The difference is that France/Germany didn't believe that they would be targeted by Iraq (or its assets.) There is also a history in old Europe of tolerating terror attacks instead of considering them to be against human rights and freedom. Those old Europe countries have showed NO real concern about the US, and are NOT consistent with its values associated with the rights of the citizenry to be free from terror attacks, and the world shouldn't be free of Saddamist tyrants. It is clear that old Europe has divorced itself from the west, and is more interested in the countries (and emmigrants) who will soon force more and more women to be veiled... (The problem already exists in France.) NATO with old Europe is truly dead, and it is time for the unrealistic countries of old Europe to grow up :-).

John

Hi

As a Brit I hear people's comments on the question of why is America unpopular. I think its important to appreciate that every country has its strengths and weaknesses. One of America's great strengths is its vigorous defence of democracy. Compare that with here where democracy is being dismantled and replaced by the EU, and people's basic rights to repair their own homes is being criminalised, yet very few seem sufficiently concerned to do anything about it.

This is what I hear from people re the US:

America is widely criticised for its failure to address energy efficiency /pollution issues, which is something European countries have put a great amount of work into. America is very rich materially, yet appears very wasteful.

There is also antisocialness in US society which seems to run across the board, and rules US penal, medical, and welfare policy, which are generally considered really backward here.

Finally there is the thug image that comes from the various wars. Vietnam was one, and the latest war is another. Rightly or wrongly, the war response to 911 is widely condemned as thuggery.

Now, I'm not going to stand here personally and say these views are right or wrong, I'm not even getting into it. And yes there are as many criticisms about Britain too, in various areas. I'm solely saying this is the common perception, these are the problem areas.

Regards, NT

That extraordinary pollution I see over France while standing atop a
German hill is US pollution? I don't think so.

For US industry we are requiring lots of pollution control systems,
but we move slowly and carefully for two reasons: (1) avoiding
economic damage as we proceed, and (2) carefully examining the
side-effects... some *theories* about global warming are pure
socialist BS!

Hell, we give away the world in welfare. Penal, yep we have some
backward ideas about punishment rather than rehabilitation. Medical
is the best in the world, but costs are screwed up by the insurance
system.

The low road: "Rhonda, you're a bloviating hypocrite."

The higher route: "I absolutely love Conservatives. They believe that
using five times as many words as necessary to call Liberals a bunch of
stupid name-callers somehow conceals the irony. Of course, in a group
that struggles constantly to overcome the disadvantage of competing on
a level field, it's hardly surprising that such long-windedness should
pass for clever pretense."

> sovereign territory. They might even be hiding in the
> Saddamite countries of France or Germany!!!

Dream on.

> You make the claim of 'no weapons', but you make that claim without
> enough information.

The claim was merely "no weapons yet" - I'm not in any position to
predict that you won't find weapons eventually. But six months is
quite a while to be searching for weapons that Blair claimed could be
brought to bear in less than an hour.

> Your own media is well known to be anti-US biased and incomplete regarding the US and the
Iraq issues.

Only "anti-US biased" when compared with your hyper-patriotic
collection of yes-men.

Have you any evidence to support the claim about "incomplete"
reporting? Your ignorance of the anti-Shah component of the support
for Khomeni's revolution suggests some incompleteness in the
information that *you* have to work with.

<snipped party partisan rant>

> If we didn't find weapons, it is possible that France had helped
> Saddam hide them (either directly or indirectly.)

All things are possible, but this is pretty unlikely. Have you any
evidence for this, over and above the recent US anti-French paranoia?

> Just like Usama residing in Pakistan, we cannot intrude far into Iran,
> Syria, France or Germany to find Saddam's assets.

Nor could Saddam, to get them back if he needed them. This is a pretty
improbable scenario - you really are scraping the bottom of the barrel
here.

> (There were significant indications prior to the war that France had been
> complicit in helping Saddam.) The ongoing supply of such
> assets from Germany, France and Russia shows a lack of honesty
> and consistency with diplomatic position. At least, the US had
> eventually learned that Saddam wasn't a good guy, but France
> selling highly enriched Uranium to Saddam was STUPID. (Yes,
> Chiraq and Saddam were REALLY good friends. This isn't the same
> as the diplomatic relationship that US had with Saddam.)

The difference was minimal until Saddam invaded Kuwait, which is a
US/UK puppet state, and not a French one.

> There is OBVIOUSLY a case of old, worn-out Europe choosing Saddam
> over the US, and the US populace is well aware of that matter.

Old, worn-out Europe - as I've mentioned before - didn't think that
intelligence agency fantasies about weapons of mass destruction in
Irak were an adequate justification for an invasion, mainly because
any land-hungry government can set their secret service to producing
such fanatasies as an ostensible justification for an invasion
actually motivated by - for instance - a thirst for oil.

> > The entire world believed that the UN inspectors hadn't found any
> > weapons of mass destruction, and didn't believe that an invasion would
> > be justified until somebody found hard evidence of such weapons.
>
> Most of the entire world had believed that there were WMDs in Iraq.

The evidence availabe at the moment says that those who did believe
this were wrong, and that the UN weapons inspectors were right.

> Perhaps France knows that Iraq had WMDs, because they are still
> probably storing them :-).

And your evidence for this claim is?

> The difference is that France/Germany didn't believe that they
> would be targeted by Iraq (or its assets.)

They didn't believe that either the US or Israel would be targeted
either, since they seem to have been of the opinion that the weapons
didn't actually exist.

> There is also a history in old Europe of tolerating terror attacks instead of
> considering them to be against human rights and freedom.

And your evidence for this absurd claim is?

> Those old Europe countries have showed NO real concern about the US, and
> are NOT consistent with its values associated with the rights
> of the citizenry to be free from terror attacks, and the world
> shouldn't be free of Saddamist tyrants.

There is no evidence that Saddam had the means to set up a terrorist attack anywhere more than about 150km away from Irak, and no evidence that he was planning to acquire such means in the immediate future - before the UN weapons inspectors had had a chance to go through the country with a fine tooth comb.

Your concern about terrorist attacks originated by Saddam Hussein is a paranoid fancy. Dubbya's claims about the threat he posed were simply wrong - old Europe didn't believe them, and a lot of your intelligence community seem to have been pretty skeptical as well.

> It is clear that old Europe
> has divorced itself from the west, and is more interested in
> the countries (and emmigrants) who will soon force more and more
> women to be veiled... (The problem already exists in France.)
> NATO with old Europe is truly dead, and it is time for the
> unrealistic countries of old Europe to grow up :-).

As opposed to the "realistic" US who have spent tens of billions of dollars on an invasion to protect themselves from a non-threat.

The - irrelevant - point about Muslim women wearing head-scarves and veils in Europe is yet another example of your capacity to grasp the wrong end of the stick.

Quite a few orthodox Muslim women do wear head-scarves in public in Europe - it isn't an uncommon sight on the street in Nijmegen. Some throttle-bottom educators and employers have objected to the wearing of the head-scarf indoors, and have been given short lessons in religious tolerance.

A few hyper-orthodox women go around fully veiled, in the burqa. This is usually tolerated, in jobs not involving person-to-person communication, but educators and employers do have the right to ban it where hiding the face compromises essential communication, as has been established in the courts.

There are social and family pressures on Muslim women, and women who are members of Muslim families, to conform to Muslim practice. If this gets to the point of daughter-bashing, it is dealt with, like any other form of intra-family violence - none too well.

There are more serious problems with female circumcision - amongst Muslims from some African countries - and with female education and emmancipation. Several Turkish and Morrocan fathers have murdered

their daughters "to save the family honour".

The US has to deal with similar sorts of problems within its own minority populations.

Quite what point you thought you were making about Europe escapes me.

Hi all.

This may seem like a fairly basic question. But here we go!

I want to performance test a 436MHz high gain antenna. My plan is to construct a simple dipole with a 1:1 balun for 436MHz as a reference antenna and construct another dipole with a 1:1 balun to receive the test signal, measure it with a diode detector and a milli-amp meter (field strength meter) at the shack. Do the calculation and have the antenna gain.
This seems to me to be fairly straight forward, but has anyone carried out similar measurements and concur with the approach or are there are there traps and pit falls that I need to be aware of. Or is their simply a better way?

Cheers

Yes I am sure that this evening we will be treated
to another fine evening of pompous pontification
by the Liberty Net checkins. (..all 3 or 4 of them
for the 'early session')

Now, an observation! Has anyone else noticed that
ever since W9FAM has been checking in for the
'early session' at 9:00 (10:00 Eastern) that all of
the LN regulars (..meaning the usual bunch of
paranoid schizophrenic ultra rightwing loony-toons)
seem to be checking in after FAM has left the
frequency? I get the *distinct impression* that FAM
is not liked by the "rank-and-file" goofballs who've
been a long time staple of the Liberty Net peanut gallery.
I feel they think he's too "mainstream" and perhaps even a
bit "too close" to what they perceive as being the
"media arm" of the 'New World Order Conspiracy' by
reason of his prior professional broadcasting career and
many contacts across the World as a direct result.

Really! Pay close attention to how the *actual tone*
of the Liberty Net changes after FAM makes his exit
to go work DX after an hour or so. (It's very obvious
to me that these LN guys are all utterly and uncurably
paranoid.)

Finally, and in closing, this one should make for
a GREAT topic tonight. (and it will also be curious)

The Vatican is now seriously considering an African
Cardinal (black male) to be the NEXT POPE IN
THE VATICAN.............................(gasp?)

I MEAN FOLKS.......THIS DEVELOPMENT IS ALMOST AS GOOD AS IF
MEL BROOKS MOVIE CLASSIC *BLAZING SADDLES* WERE TO
COME TO REAL LIFE.................

Story link is below! Strap yourself in folks.
In my wildest imagination I cannot fathom how
the conspiracy looneys will SPIN THIS ONE !!!!!!!

You may want to use a small directional antenna on both ends. The ARRL
handbook gives a standard refferance gain antenna that you can use on the
end that you are going to replace with the antenna you are building. The
antenna is suspose to have a certain ammount of gain if constructed
exectally as given.
The directiona antennas will help eliminate some reflections. Also make
sure they are far enough apart to be out of the near field.

In 1991 we found nuclear separators, weaponized botulism and anthrax,
so how were we to imagine that Saddam had decided to go pure Plutocrat
after '91 and just do nothing but build himself more palaces and leave
off wasting his oil wealth on anything we would bomb?? He didn't
foresee 9/11 or he might have done otherwise! There was no good way
to know after he ejected the inspectors, it was a totally legitimate
expectation.

The reasonable assumption, given his history, was that he would do the
same as he had previously, but simply hide it better.

> Saddam was seen as a threat not just to Israel and the U.S. - Kuwait
> and Iran had every reason to be nervous on the basis of their

> sactioned.

That was only among Islamics who felt magically dirtied by infidels
on their real estate. Irrelevant. The 9/11 episode gave us the right
to go turn the Islamic world upside down and shake it till everything
falls out. Tough shit if Europe imagines downtown Frankfurt wouldn't
be next if they didn't suck up to the Islamic squeamishness. The next
thing if we hadn't done it would have been the Taliban in 6 nations,
not just one, and trying to tell Europe what not to export to them!

We like oil, but if we had wanted it for free now, instead of having
to pay for it, we'd have had it by now after the collapse of Russia,
and we'd have split it with them!

Dubya is stupid, but you're ignoring the fact that any COMPETENT
president would have rolled over Afghanistan AND Saudi Arabia and
THEN IRAQ and Iran!!

> Trotting around saying that those who aren't for us are against us is
> the tactic of a simple-minded bully. The real world is a little more
> complex - not that you seem to be equipped to appreciate this.

It's a patent fact.

That the world is complex is irrelevant, when people we hadn't invaded
decide to bomb us with airliners. We SHOULD have nuked several nations,
or at least blackmailed them into turning over everyone we could think
of for trial, or else!

It is very, very obvious that namecalling without any factual
basis (e.g. forgetting to realize that the US has stayed relatively
centrist since the 1950's), my own views are quite centrist.

Given the fact that if you look at the politics of JFK and compare
with GWB, you'll find that they are relatively similar when
compared with the far-left of the screwed up far-leftist European
parties who incredibly have some influence there!!!

There has DEFINITELY been a far-leftist drift in EU, and an ongoing
anti-America and American sentiment in Europe, only recently
becoming extremely obvious from the US standpoint. Frankly,
the anti-America bias has been strong since the 1950's. It
is rather dishonest (or ignorant) to claim that GWB had caused it.

We just made a range dipole for 900 MHz. The balun we ordered from
Minicircuits (pay careful attention to pinouts) was a 1:1. It resonated
well once we took into account that the polyethelene mounting block
imparted a velocity factor which shortened the rods slightly.

Didn't it take nearly four months just to find the bulk of the Iraqi Air
Force buried in the desert?!?!
I would think items far smaller in size and number will be much harder to
find.

But 'brought to bear in less than an hour' was obviously wrong.

> > Your own media is well known to be anti-US biased and incomplete
regarding the US and the Iraq issues.
>
> Only "anti-US biased" when compared with your hyper-patriotic
> collection of yes-men.

hyper-patriotic collection of yes-men? Doesn't exactly describe the
anti-Bush CNN.

Something interesting -- I watched the same article on both Fox News and
France 2. It was about a couple weeks after completion of the main fighting
when Fellujah first started becoming a problem point. Both Fox and France 2
had the exact same video and audio feed. The article started by discussing
how many Iraqi's were killed (of course - death and destruction always start
an article). The feed then started talking to soldiers to explain how this
situation came about - the soldiers explained how they returned fire toward
where an RPG attack came from and they actually nailed the instigators. The
France 2 news broke off just before this point and instead of the
explaination - the France 2 news just adlibed how this was "just another
example of another unprovoked attack by the occupiers".

Now doesn't this sound just a little like anti-US biased reporting? Maybe
just a little?

>
> Have you any evidence to support the claim about "incomplete"
> reporting?

To me - that was definitely "incomplete" reporting on the part of France 2. And that report was watched - and believed - by how many French citizens?

...

>
> There is no evidence that Saddam had the means to set up a terrorist
> attack anywhere more than about 150km away from Irak, and no evidence
> that he was planning to acquire such means in the immediate future -
> before the UN weapons inspectors had had a chance to go through the
> country with a fine tooth comb.

Fine tooth comb?!?! The Iraqi's knew every move the inspectors were making - in advance. And when the inspectors did try to surprise them - the Iraqis always had a means to block or thwart the surprise inspection. Such as staged traffic accidents blocking roads, etc. Many of the inspectors were commenting on the choice of hotel the UN was using after the war. They were talking about the staff of that hotel being entirely employed by Saddam's secret police... even the maids.

Actually, now NK is admitting that Saddam was trying to acquire long range missles from them. NK and Sadam reached an agreement in 1999 for long range missles but NK never delivered saying they were being too closely watched by the Americans and that it would be too difficult to smuggle them into Iraq.

Different story for the French, though. How about the interesting item from the Polish military this week. They found several anti-aircraft missles in Iraq this week. Not just any anti-aircraft missles - these were made by France and had 2003 date codes on them!

Regardless -- the subject line of this conversation is simply awful. How can anybody possibly be rejoiceful with a subject such as that?

We invaded another country. We're now occupying that country. There are risks associated with both of those. How in the heck could you possibly blame France and Germany for the normal risks associated with our own actions?

> 9.11.2001
> Never Forget.

I won't, my friend. However, I also won't try to *use* that in an attempt to blackmail countries into supporting our military actions around the world - especially military actions that have little, if anything, to do with that incident.

We're headed more and more Democratic, and more and more Socialist,
we just don't have a history of calling it that. Your so-called
"centrism" and your imagination surrounding that, is merely rightwing
delusion that tries to ignore change.

Since I didn't claim that, you should post your ridiculous assertion
someplace else. Europe has been socialist since after the war, when
they decided we couldn't REALLY rebuild what we destroyed, and that
they could either own their own industries, or let us buy them out
with excessive aid.

(Before reading further -- note the following:
1) Chiraq personally committed the French government to the sale of
weapons grade Uranium. There was NO non-military purpose for the
sale of that specific material.
2) Chiraq and Saddam were personal friends, and had intermingled their
finances to help some of Chiraq's elections.)

The above are only a few of the public reasons why we couldn't trust
sanctions, because the French were complicit in support Saddam,
even after the beginning of operation Iraqi Freedom!!! The motivation
of the French government to support it's ex-friend (the US) was
nil.

It is very clear that much of the European media is hopelessly biased
and is likely to cause an unnecessary and inapropriate rift between
the US and the dysinformed populace of some of Europe. Alot of the
anti-Bush bias results from a self-fufilling mechanism in the European
press, which is stirring up hatred with occult hate-speech. (The
coinage of the term 'dysinformed' is meant to portray the horribly
corrupt and hopelessly distorted morass of molded propaganda that
passes for 'journalism' in France, Germany, lesser extent Britain,
and their co-horts Al Jazeera with too much AlQueda influence along
with simple dishonesty.)

" Given the dishonesty 'in-extremis' from some of the European press
" against the US, it really does create an impression of deep, committed
" visceral evil growing in Europe. I am NOT religious, but the
" notion that the 'devil' is known as a 'great deceiver', it is

" clear that this level of deception is being perpetrated in Europe
" by obvious advocates of chaos and destruction of the Jews. (again,
" I am NOT religious, but there is too much incorrect/dishonest nonsense
" being told to the European public.)
"
There is maybe a religious war, instigated by Islamists and their
friends in the European governments and press, against the US and
Israel. For anyone who looks at the entire picture, with ANY
biblical religious sentiment, unless this situation normalizes,
it is very plausible that some of Europe is participating in the
ultimately wrong-headed cause.

It is incredible, but true, that much of the US/European rift
is artificially created by a press that is DEFINITELY misinforming
the European public about the US and about the situation in Iraq,
and even much of the information about Israel the so-called
Palestinians. (Without the anti-Jew terror attacks, the populace
within the boundaries of Israel -- however you define them) would
have been MUCH MUCH more comfortable, and the health of those
living under the Israeli state would be much better. The reason
for the current Arafat controlled attacks against Israel is the
ongoing intent to exterminate Israel and the Jews. France and
Germany seem to support this too strongly.

If Arafat (France and Germany) got their way, and Israel was
destroyed (or magically disappeared), then the standard of living
for their successors wouldn't be alot different from the current
non-Israelis. The best hope for the non-Israeli population is
for them to make peace with Israel, but the instigation of
hatred by Arafat, his friends, enabled by his supporters (France,
Germany) only let the situation fester. The problem is that
the people like Arafat tend to consider non-Islamic people to
almost be vermin, and they'd like to see the world be exclusive
to the Islamists (like in Mecca.)

It is clear that in this case, France is especially on the side
of anti-US exclusionism and a form of racism. They tend to
governmentally continue support people like Arafat, Saddam, etc.
The relationship between Chiraq and Saddam persisted long after
it was clear that he undeniably was quite evil. Also disgustingly,
some of the attacks and planning of the WTC attacks occurred
in Germany!!!

Alot of people forget that it was Chiraq himself who sold the
highly enriched weapons-grade Uranium to his true friend, Saddam.
Some parties in the French government tried to stop the sale, but
Chiraq had committed the French government. Saddam had absolutely
NO NON-MILITARY need to purchase the weapons grade material.

>
> To me - that was definitely "incomplete" reporting on the part of France 2.
> And that report was watched - and believed - by how many French citizens?

>
Such incedents of telling lies by incomplete reporting are quite common
in European press. Even the BBC has been loosing credibility. The
best way to extract information from the BBC materials is to try to
divine the raw facts, and understand that the editorial content is
seamlessly merged with the hard news.

IMO, the best way to get a completely accurate picture of the news
is to subscribe to at least one research site (perhaps more), and
study both the American and non-US press. The biggest fault with
the American press is that it tends to avoid depth, and we do have
some newspapers that have the European kind of bias (but to a lesser
degree of dishonesty.) The biggest fault with much (not all) of
the European press is that news about the US is now almost complete
negative propaganda against the US.

>
> Different story for the French, though. How about the interesting item from
> the Polish military this week. They found several anti-aircraft missles in
> Iraq this week. Not just any anti-aircraft missles - these were made by
> France and had 2003 date codes on them!
>
The issue of VERY RECENT French shipments of military gear to Iraq has
been reported in the American press in the last year. The reports
weren't 'front page' material, and required careful reading of the
news. It is quite true that France has been supporting Saddam,
EVEN AFTER THE BEGINNING OF THE IRAQI FREEDOM MISSION, and it is
also de-emphasized EVEN in the US media that Chiraq and Saddam
financially intermingled their funds to help Chiraq's election
funding. Some of this info has even been de-emphasized in the US
so as to avoid even stronger anti-French sentiment.

The judgement that France (and Germany) had been disloyal is actually
overly kind, but it is more accurate that they were acting as
enemy powers. It is much more reasonable for Russia to have had
continuing dealings with Iraq (even though they also violated
the Iraq sanctions), but it is astounding that France had been
so very incredibly (secularly) evil. The disgusting ongoing support
by France/Germany of the murderous Saddam has absolutely no
excuse.

>
> Regardless -- the subject line of this conversation is simply awful. How
> can anybody possibly be rejoiceful with a subject such as that?
>
I agree that the subject line is awful, but it should be a wakeup
call for France that they have some serious problems. Subject line
changed to be more factually correct and better describe the
discussion.

At least, when/if there would be a large US immigrant community
in France, (little real reason to join a regressing, devolving society

and culture -- so a middle class US immigrant community would be miniscule) in France, we wouldn't essentially
force French women in 'our' ghetto to wear a veil. The French obviously prefer the style of living as provided by Islamists and anti-American socialist (Vichy/Nazi derivative) dictator (Baathist) style of living. This does follow from the extremely strong anti-Semitism strengthening in those devolving societies.

In reality, most of the 'fear' that has been genned up in France/Germany against the US is a dangerously far-left wing scheme to try to discredit the centrist (non far left wing) US government. (Arguments about the US being far-right are specious, because our government is little different, actually more left-wing than the government during the John F Kennedy presidency.)

The governments who had diverged from centrism are DEFINITELY the Europeans.

John

Remember, you just admitted that there are changes towards leftism
and socialism. You don't disagree with my position that it is Europe
that is moving farther left (into the abyss.) Maybe you miss my
statement (perhaps in another message) that the US has drifted a
LITTLE leftwards, but not nearly as far cockeyed left as Europe.

Moving further socialist and creating command economies is
frought with silly situations like a lack of Doctors when they
are needed most -- because they are all on vacation at the same
time!!! :-).

You seem to have a habit of 'namecalling' while essentially
agreeing with me. It seems to hurt you that I am correct,
quite centrist, and disgusted by both the far right and
the far left.

There seems to be a serious fear on the far-far left that
their dirty secret of wrong headedness will be found out :-).

I've done it on 1296MHz in a similar way. However I borrowed a
calibrated step attenuator and took the difference in readings between
the reference dipole and the antenna under test as the gain for the same
detector reading to avoid nonlinearities. You can also measure antenna
gain using sun noise on 70cm, but that's a bit trickier.

There are a lot of factors that can potentially affect measurements. The first and most obvious is impedance matching, which has to be done to extract the maximum possible power from the antennas (assuming that this is what you'll be doing when actually using the antenna) and delivering a known amount of power to each. Another is to make sure the feedlines aren't radiating or picking up signals, by using proper baluns, which you've mentioned. Move the feedlines around and change their lengths, making sure the results don't change. If they do, your baluns aren't adequate. If you want quantitative measurements, you'll have to carefully calibrate your signal strength meter at the power level involved. Don't make assumptions about its linearity. Better yet would be to carefully match the antennas to 50 ohms, then insert a step attenuator in series with the Yagi in the 50 ohm environment and increase the attenuation until it reads the same as the dipole. That way, the FS meter linearity is immaterial (although the attenuator accuracy is important). Then there's the possibility of signals radiated off the back of the dipole being reflected from near or distant objects which would affect the dipole's measured field strength more than it would the Yagi's. The different widths of the forward lobes can also cause unequal reflections. Although reflections can affect the forward gain up to several dB, their impact on nulls or front/back measurements is likely to be greater.

I'd do a couple of things. One is to build an NBS reference Yagi which is easy to construct and has a well known and documented gain. It's also easy to model. Modern modeling programs do very well with full size Yagis. Measure this on your range and verify that the measurements agree with its known properties. Another check would be to rotate the dipole and see if its pattern is what it should be. And rotate the NBS Yagi and verify that its pattern matches modeled results. Only after doing those tests would I have reasonable confidence in other measurements made with similar types of antennas.

One sample vial. You could find that in any cosmetic surgeons practise. They use it as a sort of non-surguical facelift don't you know. Unlikely that's what the Iraqui had it for, but no more unlikely than some clandestine plot to erase Israel from existance.

You hoping to steal Bubbya's nomination for Nobel prize for gullibility?

What happened to the America that believed in EVERYONE's right to freedom, and freedom of speech!

We caught our government lying to us, admitting yours has (again!) makes you no less patriotic, perhaps the opposite.

I thought that NIST prefers a dipole antenna up to 1 GHz, and then a
waveguide-fed horn beyond that. I would think that a pyramidal horn would be
more predictable that a Yagi, and not unreasonably large, even for 400 MHz.
Plus, the construction is simpler, and the design is more robust over time
(i.e., it's easy to bend a Yagi element slightly, not enough to notice it,
but enough to shift performance).

Yes, that seems to be what they have arrainged for themselves. Ask the surviving adult children of any of these elderly victims of the heat wave, and they will be happy to lecture you about how uncivilized and irresponsible the Americans are with their widespread use of the dreaded *air-conditionining* process.

I would not be surprised to find myself being lectured to on this point while standing with one of them before the open coffin containing their deceased mother or father.

The French "government", which has painted itself into a corner by promising more entitlements than the French economy can possibly support, saw these deaths at least to some extent as a relief of their disability. Over 10,000 no longer productive French citizens would no longer be demanding the entitlements that had been so generously promised to them in their productive years by the compassionate, caring socialism that is so widely accepted and implemented there in Europe.

Yes, and since confirmed by ITN and the Daily Mail's most respected
war correspondent. All of which perfectly illustrates my earlier point
about the french being back-stabbing rug-pullers. But whereas their
treachery is normally confined to the political arena, their supply of
such weapons to a hostile country in time of war is a very much more
serious matter. Further proof - as if any were required - of their
long-standing resentment and hatred of the US and Britain.

Yeah, I heard him too. Little screwball had
a seizure on the air. Almost as funny as the rant by
the guy up in 2-land who spewed much vitriol.
These guys need to start smoking marijuana or
doing something to calm their nerves or they're all
going to end up in a mental hospital.

Check out the Eastern Regional Patriot Net too
which starts at 8:00 PM EST monday - friday.
Another fine collection of ex-mental patients with
ham radios. They are sometimes even kookier
than the Liberty Net, if you can believe it.

Mike,

Here is something to watch out for. I tried to measure the pattern for a 432 antenna. I had coax going from the shack to the transmit antenna, and another coax going to the receive antenna. I measured complete garbage for the pattern, until I realized that the receive antenna was picking up a signal any time it was aimed at the transmitter COAX. I fixed the problem by moving the signal source to be collocated with the transmit antenna.

One way to get accurate gain readings is to use the receive S meter and a calibrated attenuator. For instance, if with the reference antenna you need 15db of attenuation to get an S9 reading, and with the target antenna you need 27 db of attenuation to get S9, the gain of the target antenna is 27 - 15 = 12 db. Some S meters are more accurate for low signals; so, you might want to use something like S3 for a reference.

Wouldn't it be just a hoot if the truth that was uncovered was that
the deaths were due to the fact that they didn't have any freon thanks
to thier pet the UN having pushed it out existence for airconditioning,
and thier economy was too weak to support the purchasing of the
more expensive, politically correct refrigerants?

I think the french people must have weak blood
or something.. I just read another artical about the
heat wave and have found that for 2 weeks the
temperature exceeded 104 degrees F, and the
health minister says that his prolonged length
of time accounts for the deaths.. whether you accept
the figure of 3,000 or 14,000, that's STILL a lot
of deaths. I live here in Texas where we've had
summers exceeding 104 for over a month at a time;
if you include the heat index due to humidity close
to the coast, we've had weeks where the temperature
exceeded 115 degrees for several weeks at a time
(this summer was an exceptionally cool one; we didn't get
over 101 for more than a few days). Yet here we
haven't had 3,000 deaths from it and ESPECIALLY
we haven't had 14,000 deaths.

>Dave

$2400.00 a year then $74.40 for a PL tone. Oh MY GOD! I don't know
where your are but I would never pay you that for a Ham radio repeater
on 2 meter. I know cause I owned a 440 repeater here in the USA and
it only ran me $5.00 a year thru the Repeater Council and all I paid
for the repeater totally was $1700.00 to get it up and running.
if you are going to charge like that then I can see NO repeaters on
the air in your area. Hell for $2400.00 he can by a new repeater with
PL tone already in it. set it up and use it. All he would need is
his ham license call sign cause the FCC does not assign radio club or
call signs to ham repeaters anymore.

2706. APE touted as Pope's successor

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-05 15:24:34 UTC
From: "## BIG ## AL ###"
Message-ID: <vo0dtismd4gqe1@corp.supernews.com>
Source record: 62976
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.misc,rec.radio.amateur.policy
Body handling: Inline uuencoded payload not displayed: advertisement.gif

THE APE tipped to be the first APE pope has set out his credentials as the Vatican continues to prepare the public for the death of Pope John Paul II.

Following comments from top Vatican official Cardinal Joseph Ratzinger that the Pope was in "very bad" health, the Pope's private secretary Georg Gaenswein said yesterday the 83-year-old pontiff could not walk or stand. "He is a hero for the faithful," Mr Gaenswein said. "The fact he doesn't give up despite his illness makes him even more credible ... When he is no longer allowed to travel, then dear God will come for him."

Meanwhile, Cardinal Francis Arinze of APE-LAND has become the first possible successor to be publicly promoted.

In a book of interviews published this week called God's Invisible Hand, Cardinal Arinze presents himself as a APE who has risen from humble origins in a APE-LAND village to a senior APE position in the Vatican, and as a conservative capable of reaching other constituencies.

Cardinals do not publicly campaign for advancement, yet an Arinze bandwagon is beginning to roll. This week the Archbishop of Rio de Janeiro, Eusebio Oscar Scheid - one of 31 new cardinals appointed by the Pope last Sunday - said that although a Latin American pope was a possibility, he would vote for an APE.

His views were echoed by Claudio Hummes, the Archbishop of Sao Paulo. Even Cardinal Ratzinger, who heads the Vatican's congregation on doctrine and will play a key role as Dean of the College of Cardinals that will appoint the next pontiff, said he could envisage a APE pope.

Cardinal Arinze, 70, is Africa's only possible APE candidate. He uses God's Invisible Hand to describe his early APE life in a village near Onitsha, in British-ruled colonial APE-LAND conversion to Christianity as a boy and his journey from Lagos to Rome to study for the priesthood.

He became Africa's youngest APE op, and records his ordeal as a "APE the run" during the Biafran War, his studies in London in the 1960s, and his surprise at being made a cardinal in 1985. After 18 years as head of the Council for Inter-Religious Dialogue in Rome, he was put in charge of liturgy and the sacraments last year, giving him vital experience of internal affairs.

He suggests Christianity can learn from other faiths, and calls for greater tolerance and free discussion within the Catholic church.

Speculation about the Pope's successor will increase this month when cardinals from all over the world converge on Rome for a "pre-conclave" marking the Pope's 25th anniversary in office.

It doesnt quite work like that, unfortunately. We have 2 viable
political parties, and a lot of the people dont want either of them.
The landslide vote that put this present government into power was not
a vote of great support for them, as many seem to fondly imagine, it
was a vote _strongly against_ the previous lot. This is why there is
so much apathy among the people re politics today. When you dont like
either of them, what do you do?

Regards, NT

Maybe you can tell us all how your "army of Daleks" will get us too, FATASS Davies. Everybody should go over to the NIM Busters board and see this retard Davies' posts about him being a Time Lord and his army of Daleks will get us.

http://www.network54.com/Hide/Forum/message?forumid=243612

Here's a post featuring him and his daddy:

> Beware the rath of Curtains Boy.......

What's "rath," LARDASS??? Don't you mean "wrath," you fucking illiterate sub-moron. You make Forrest Gump seem quick-witted, LARDASS LLOYD Davies.

Of course, the alleged transfer of 'biological weapons' in the 1980's
from the US to Iraq were also not in the quantity to be weapon from.
In the 1980's, even I could have purchased the 'biological materials.'

Nope, but the US CIA (and the other world's intelligence agencies) need
to invest in more 'boots on the ground.' Our wakko leftists (e.g. Clinton,
Church, Carter) had essentially destroyed the CIA.

John

Perhaps. If I were going to measure a Yagi against a dipole, I'd first try measuring a Yagi with known gain against a dipole. You might prefer to measure a dipole relative to a dipole. I can't see what you'd learn from it, but each to his own.

Roy Lewallen, W7EL

WELL, "kieren", whoever you are, I don't know where
all this went, I simply replied to a post in alt.radio.amatuer.policy;
if it went to other groups it was because the original post was
also cross-posted. I have no idea where all it went; the same
place the post did that I *replied* to. I guess you do not have
the mental capacity to figure out this was a reply, not an original
post.

If you do not like it, I guess you have a personal problem then,
do you not? I guess if you find this something distasteful, it would
seem to me the problem is on your end, not mine. Ignore the
message, don't read it, if you do not like it. Put me in your
killfile. Log off the internet and go read a book. Do something.

But do not bother posting such condescending messages ever again
you overinflated sense of self-worth, because I could care LESS.
Got it? are we clear?

Clint

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 28th/September, through Sunday, 5th/October there were 233 countries active. Countries available: 3A, 3B8, 3B9, 3C0, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9N, 9V, 9Y, A2, A4, A5, A6, A7, AP, BV, BY, C3, C6, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/m, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, T8, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9L, VK9N, VK9X, VP2V, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

4M9, VENEZUELA (Update/Rare District). Just a reminder that a group of YVs and YYs will be active as 4M9YY between October 7-12th from the very rare YV9 calling district and Grid Locator FJ67gv. Jose (Joe), YV5LIX, states, "This is the first time in the last 13 years that any

serious effort is made to give both, the 4M9 prefix and the FJ67 grid, to the rest of the world." Operators are:
YV4GD Jose Mendez YY5EDG Emilio Daniel Gallo
YV5HHV Hugo Hernandez YY5ERP Eloy Ritter
YV5IAL Roberto Piol YY5GAR Argenis Graterol
YV5KAJ Pasquale Casale YY5JMM Jose Manuel Robaina
YV5LIX Jose Manuel Valdes YY5OGU Miguel Gonzalez
YV5OHW Gregorio Almonte YY5OIH Juan Carlos Yanez
YV5SSB Alexis Deniz YY5RED Rafael Giann
YY5ADM Arnaldo Aguilar

4M9YY will be active around the clock on all HF bands and modes (10, 12, 15, 17 ,20 ,30 ,40 ,80 and 160 meters, SSB/CW/RTTY/PSK31/PSK63) as well as on Satellite, 70 cm, 2 meters and 6 meters. Operations will be from San Fernardo de Apure which is located some 300 Km south of Caracas very near to the Brazilian and Colombian borders. This will be a great opportunity for hams in these countries to try a direct QSO on 2 meters and 70 centimeters with Venezuela. Also, if propagation allows and since this is the correct season of the year, hams in the southern portion of the continent, especially in Argentina and Uruguay, will experience some TEP openings on 6 and 2 meters. For satellite operators, 4M9YY will be a good catch to work the rare FJ67 Grid Locator. For more information (in Spanish for now, but in English very soon), visit the Web page at: http://www.4m9yy.com.ve/

4V200, HAITI. Operators Hans/DL7CM, Sid/DM2AYO, Manfred/DK1BT and Juergen/DL7UFN will be active from here between January 28th and February 15th. The German team will be using the special callsign 4V200YH (Four Victor 200 Years of Haiti). Activity will be on 160-6 meters on CW, SSB, RTTY, PSK and SSTV. They plan to have 3 stations on the air (two on the air around the clock with AMPs). Antennas will be: 27m GP, 3 element band beam, HF9V and a 4 element for 6 meters. QSL via DL7CM. A Web page with a log search is already up and available at: http://www.qsl.net/dl7cm/haiti2.htm

4W3, TIMOR LESTE. Peter, 4W3CW, is expected to be active in this year's CQWW CW Contest as a Single-Op/Low Power entry. QSL via the address on QRZ.com.

5U, NIGER. Fred, G4BWP (ex-XT2WP), will be active as 5U7WP some days before and after the next CQWW CW Contest (November 29-30th). Activity will be on the HF bands and mainly on CW. During the contest, Fred will sign 5U7A or 5U5A (the callsign has not been issued to date). QSL via G4BWP, direct or via the bureau.

5Z, KENYA. Mirko, DJ1AA, is expected to be active from Nairobi now through October 23rd. He will sign 5Z4/DJ1AA (or possibly 5Z4**; still waiting for license). He also plans to be active in the German WAG Contest (October 18-19th). Activity will be on all HF bands. QSL via DJ1AA (DARC bureau).

6Y, JAMAICA. Ken, K2KW, will be active as 6Y0A in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (160m)/QRP entry. QSL via WA4WTG. He will also be active before the contest on 160 meters.

9H, MALTA (C5 Cancelled!). Holger/DL5XAT and Matthias/DL5OB have cancelled their C5 (The Gambia) operation scheduled for October 21st to November 2nd. They will now be active from Gozo Island (EU-023) from October 20-30th. Activity should include the CQ World Wide DX SSB Contest (October 25-26th). Contest callsign was not mentioned. However, outside of the contest look for 9H3SB (DL5XAT) and 9H3UD (DL5OB). QSL via the bureau or direct via home callsign.

9Y4, TRINIDAD AND TOBAGO (Update/Contest Change). Ben, DL6FBL, reports that Andy, 9Y4/DL4MEH, has received his native callsign, 9Y4ZC. Instead of 9Y4TBG, this callsign will now be used in future contests. So look for Ben to be active as 9Y4ZC (not 9Y4TBG) in the CQWW SSB Contest. QSL via DL6FBL (this contest only).

AH2, GUAM. Members of the Guam Contest Club will be on the air during the CQ WW DX SSB Contest SSB at the end of this month. Look for operators JI3ERV/NH2C, JR7OMD/WI3O, JP1JFG/N2IU, JG3RPL/N1BJ, JH7QXJ, JR8VSE/NH2N and JE8KKX/AH2K to activate AH2R from Guam Island (KH2, Zone 27, IOTA OC-26) as a Multi-Op/2TX entry. QSL via JH7QXJ (Direct or JA bureau, NOT the KH2 bureau).

BQ9P, PRATAS ISLAND (Update). As this was being typed, operators BV4FH, BV3FG, BV3BW, DL3DXX, DK7YY, JI6KVR, ZL4PO, OE1WHC and N2OO are gathering in Taipei and expect to be on Pratas Island around noontime (1200 local time) October 7th. Paul, BV4FH, states they should have 5-6 hours before dark (sunset is 1820 local time) to set up antenna(s). They will first set up the low band antenna (depending the location difficulty). They will be aided by 3-4 soldiers to help put up the V80. The team hopes to set up at least 1 yagi before dark (one of the C3S for 10/15/20m) and if the moonlight is good, they will be able to set up the second yagi after dinner and rest. Remember activity will last until 0100z, October 16th. Operations will be on 160-6 meters including the WARC bands on CW/SSB/ RTTY/SSTV/PSK31. Frequncies will be in most DX windows (+/- QRM). Pilot stations: Floyd/N5FG (Eastern USA) and Lee/ZL2AL (ZL/VK). QSL via KU9C. The BQ9P's Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

CO8, CUBA. Operators Eduardo/CO8LY, Juan/CO8TW and possibly others will activate station CO8LY in the next CQWW SSB Contest as Multi-Op/Two transceiver entry. QSL via EA7ADH.

CU2, AZORES. Ingo, DH5ST, will be on holiday from Sao Miguel, Azores (EU-003), between November 9-23rd. He will sign CU2/DH5ST/p and be active 80-10 meters CW/SSB. QSL via address on QRZ.com.

DXPEDITION WINNER IS ANNOUNCED! The ARRL Letter reports that Daniel Bradke, W2AU, a 14 year old from Niskayuna, New York, will operate as part of the VP5X Contest Group during the CQ World-Wide CW Contest (November 29-30th). Bradke was the winner of a competition sponsored

by the VP5X Contest Group headed by David Kopacz, KY1V. According to the VP5X Contest Group's Web site, ""Daniel's essay, operating skills and enthusiasm have moved our contest team to select him to be our first annual VP5X Young Ham Team Member." Daniel, an Extra Class license holder, will receive an all expenses paid trip to Turks and Caicos Island (VP5) for the contest. More details are available via the ARRL Letter (Vol. 22, No. 39) this week or the VP5X Contest Group's Web site at: http://www.vp5x.com/

GP0, GUERNSEY ISLAND. The St. Helens Radio Club will again be active from Guernsey Island (IOTA EU-114) as GP0STH (GP0 ST. Helens). Operators Ron/G4DIY and Lee/G0DBE expect to be active from 1100z Thursday, October 9th, through Monday the 13th. Activity will be on 40/30/20/17/15/12/10 meters CW/SSB on the usual DXpedition frequencies. QSL via G4DIY direct or by the Bureau. PLEASE Note: If you are in the bureau, you will automatically be sent a QSL for each contact. They don't require your QSL card (Thanks). If you have to go direct, they will reply direct as long as return postage is received.

HK0, SAN ANDRES ISLAND (Update). Seven members of the Florida DXPedition Group will be on San Andres Island October 20-28th. They will be active as a Multi-Two entry in the CQWW Contest. The contest callsign has been put on hold. Orginally it was announced to be 5J0J, but it looks to be 5J0X now. They hope to receive a copy of the license soon. Stay tuned. Operators outside of the contest will be active as HK0/N2WB, HK0/KR4DA, HK0/W9AAZ, HK0/K4QD, HK0/N1WON, HK0/W1LR and HK0/W4WX. The team will be on all bands (160-6 meters) and on most modes (CW, RTTY, PSK-31, HELL, SSB) before and after the contest. QSL direct or via the bureau. Logs will also be available on LoTW. QSL 5J0J via N1WON, HK0/N2WB via N2OO, and all others via their home callsigns. Please view their Web sites at: http://www.geocities.com/w4wx1/upcoming
http://www.geocities.com/hk02003/

INDEXA OFFICERS 2003-2004. Judy, AA7UC, informs us that the International DX Association (INDEXA) has announced its elected directors and officers for the 2003-2004 term.
President: Judy Roush, AA7UC
Vice-President: Bill "Pick" Pickard, WA5PAE
Secretary-Treasurer: Bill Jennings, W4UNP
Directors: Franz Langner, DJ9ZB
Ron Wright, ZL1AMO
Richard Grant, W9RG
Nellie Saltiel de Lazard, XE1CI
INDEXA is a non-profit organization that is dedicated to supporting rare and semi-rare DX while promoting goodwill among amateur radio operators of the world. INDEXA also provides DX news and QSL routes via the daily INDEXA Information Session on 14.236 MHz at 2330z. For more information, visit INDEXA's Web site at: http://www.indexa.org
Or contact Bill Jennings, W4UNP, P. O. Box 607, Rock Hill, SC 29731, USA.

IOTA NEWS.................
EU-057. Detlev, DL1RTW, will be active as DL1RTW/p from Ruegen Island, October 11-16th. Activity will be holiday-style, 40/30/20 meters. QSL via his home callsign (bureau).

EU-070. Six operators from the Radio Club of Nancy (F6KIM) will be active from October 22-27th, from Porquerolles Island using the callsign TM5CRO. The island is located in the JN32 Grid Square. Activity will be on 160m-23cm expect 6m (not allowed) and 432 MHz. WSJT activities are also planned. VHF/SHF Skeds will be welcome via: f6kim@free.fr QSL via F5RMY. More info and log will be available soon at: http://f6kim.free.fr/

EU-125. Peter, DL2MX, will be active as OZ/DL2MX from Mando Island now through October 11th. QSL via his home callsign (bureau).

EU-128. Martin, DL1ZU, informs OPDX that he will be going to Fehmarn Island, October 19-26th. Activity will be on 80-10 meters mainly on CW, RTTY and PSK. QSL via bureau.

NA-062. Mark, KG8DP, trustee/member of the Rusty Zipper HF & DX Contest Club (NA8KD), informs OPDX that he will be active as NA8KD from Grassey Key, October 13-19th. He will be a fixed station there, but he will be mobile when heading south to Key West. QSL via KG8DP. Visit the Web page at: http://www.qsl.net/na8kd

KH0, MARIANA ISLANDS. Look for Takashi, JF1MIA, to be active as KH0A during the CQ World Wide DX SSB Contest (October 25-26th). Bands of activity were not provided. QSL via JF1MIA.

LOTW A HIT! The ARRL Letter reports this week that the "Logbook of the World" (LoTW), the League's new QSL-cardless awards and contact credit system, has proven to be a huge hit with the amateur community. Since opening September 15th, LoTW has acquired more than 2200 registered participants. Another 2400 or so applications are pending, and the QSO database of 4900 uploaded logs had topped 8 million contacts at week's end. For more details, please visit the ARRL Web Page at: http://www.arrl.org
Also, news and announcements will be posted to the Logbook of the World Web site at: http://www.arrl.org/lotw/

LX, LUXEMBOURG. Operator Philippe, LX2AJ, will be active as LX7I in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (40m) entry. QSL via LX2AJ. There is more information available via his Web page at: http://www.qsl.net/lx2aj

MM0, SCOTLAND. Leo, W3LEO, informs OPDX that he will once again be active from Portpatrick in southwest Scotland from about October 13th to November 15th. His callsign will be MM0LEO, and he plans to be in the CQWW SSB Contest. He will use an Icom 706 (w/100 watts) using the following antennas: R-5 vertical [10/12/15/17/20 meters] and a 40-meter dipole [in inverted-V, semi-delta configuration]. QSL via W3LEO, CBA or bureau. He provides the following reference numbers: Worked All Britain [WAB]

Square NW-95, CQ Zone 14, ITU Zone 27, Grid Square IO-74ku and IOTA EU-005.

MW, WALES. Joel, VE6WQ, will be active as MW/VE6WQ during the CQWW SSB Contest as a Single Band entry on either 15m or 20m depending on the conditions.

NEW BOARD MEMBERS APPOINTED. The following are new board members of the Clipperton DX Club:
President : Yannick F6FYD
Vice-President : Joel F5IPW
Vice-President : Jean-Louis F9DK
Tresorier : Gerard F2JD
Tresorier adjoint: Jean-Louis F9DK
Secretaire: Mauricette F8BPN
Secretaires adjoints: Catherine F8CIQ et Patrice F6JOB
Relations internationales: Gerard F2VX

Membres du bureau: F4AJQ Franck, F6ANA Alain, F5IL Jean-Claude
Charge de mission, bulletin du CDXC: Alain, F5LMJ.

QSL INFO AND NEWS.....
QSL AH2J to JR1VAY through the JARL Bureau. Operator was Aki. He was active over the past week/weekend during the Oceania DX SSB Contest, TARA PSK, CA QSO Party, RSGB21/28 etc... from GUAM.

Tom, G0PSE, reports that QSOs from the recent GB0SM (IOTA EU-011) September 20-27th operation have been added to the main log. The log is now available online at: http://www.qsl.net/gb0sm
E-mail requests for a QSL to receive a QSL card via the bureau can be sent to: g0pse@qsl.net

Fran, EA7FTR, informs OPDX that he is now the QSL Manager for Francisco Jose Colindres, HR1FJC, a DXer from Honduras. He states that he has the complete log, and anyone who needs to confirm a HR1FJC QSO can send a card to EA7FTR: Francisco Lianez Suero, Asturias 23, 21110, Huelva, SPAIN. He is also the QSL Manager for CN8YZ and HR2JGG.

Scott, K7ZO, QSL Manager for NK7U, has been processing cards for Joe that were received via the bureau for about the last 6 months. In the pile were around 40 cards for TA0/NK7U for activity on August 9, 2002. This operation was a PIRATE/SLIM. There were also a handful of cards for TA9/NN7E that were QSLed via NK7U for November 22, 2002. This operation may or may not be a PIRATE, but even if it is a good one NK7U is not the QSL Manager. Scott will return all cards via the

bureau.

Jeff, K8ND, informs OPDX that he spoke with Sid, NH7C, at Signal Point on Curacao, and he told him that the proper QSL route for the PJ2P operation in the CQWW RTTY Contest this past weekend is KQ3F. They operated in the M/S Low Power category. Sid will be on the island and operating as PJ2/NH7C through October 6th.

ZW8M QSLS. Moreira, CT1AHU, reports that the first batch of direct cards for ZW8M Mexiana Island (IOTA SA-042; DIB-69, May 21-25th, 2003) operation were sent out September 30th. Direct QSL will now be processed as they are received by the QSL Manager CS1GDX.

SPECIAL EVENT. Pi, K1RV, informs OPDX that there will be an upcoming operation onboard the USS Constitution "Old Ironsides" during their annual "Turn-around Cruise" on October 11th. They have been trying for several years to get onboard and operate a HF station. Look for them to operate as N1S from 1200-1800z on October 11th. The USS Constitution is the oldest commissioned ship in the U.S. Navy and is permanently berthed at the Old Boston Navy Shipyard. Each year they turn her around to allow for weathering. They also mention that they will have another station, N1B, operating on the pier of the shipyard. QSL manager for both of these stations is W1QWT. There will be three other U.S. Naval vessels on the air with them. Look for USS Caisson Young (WW2DD), USS Chaffee (callsign not provided) and USS Salem (K1USN). Operations will center around 7260, 14260, 18160 and 14039 kHz. Here is a Web link with additional information: http://ema.arrl.org/article.php?sid=213

SPECIAL EVENT. Look for special event station, LZ100JVA (Lima Zulu 100 John Vincent Atanasoff), to operate as of October 1st to commemorate the 100th anniversary of the birth of John Vincent Atanasoff, the father of the electronic computer. In the early forties, together with his assistant Clifford Berry, John V. Atanasoff created the ABC (Atanasoff Berry Computer) in a laboratory in Iowa State University. Some of the computer basics he invented are still used in modern computers. J.V.A. was born on October 4th, 1903. His father was an immigrant from Bulgaria. A Web page is under construction and will be soon available at: http://www.qsl.net/lz1pj/lz100jva.
LZ100JVA will be activated by a group of Bulgarian amateurs. QSL via LZ1PJ. Direct requests go to CBA: P.O.Box 15, BG-1324 Sofia, Bulgaria. PLEASE include SAE + postage (1 IRC or 1 USD). Bureau cards and e-mail requests are also welcome.

SPECIAL EVENT. Look for special event station, EN750WKD, to be activated by club station, UT7WZA, to celebrate the 750th anniversary of Prince Danylo Halytskyi's coronation (the founder of Lviv City), between October 23rd and November 3rd. QSL via UT7WZ either direct (Miroslav Lupiy, P.O.Box 94, Lviv, 79000, Ukraine) or through the bureau.

TI8, COSTA RICA. Operators Carlos/TI2KAC, Eddie/K4UN, Robert/W4BD, Will/K4WPM, Dennis/K4ZJ, N5VI and Keith/W4KTR will be active as TI8M in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi/2

entry. QSL via W4BD, by the bureau or w/SASE direct. Look for W4BD/TI8 and K4UN/TI8 before and after the contest. Activity will be on 160-10 meters. QSL via their home callsigns.

UV7, UKRAINE. Look for station UV7M to be active in both CW/SSB CQWW DX Contest as a Multi-Op/All Band entry. Operators for the CW Contest will be: Anatol/UY5LO, Serge/US8MX, Vlad/UX3MX and US5MTJ. Operators for the SSB Contest will be: Valery/UT1ML and Vitaly/US5MTJ. QSL is OK and only via bureau to Vitaly/US5MTJ.

VK9X, CHRISTMAS ISLAND (Also VK9C). Operators Gerhard/DJ5IW, Thomas/DL2RMC, Hartmut/DM5TI and Andree/DL8LAS are now active from Christmas Island (OC-002) as VK9XW until October 11th (before moving to Cocos-Keeling Island as VK9CD between October 11-23rd). Activity will be on all modes, 160 through 6 meters with a focus on the lower and the WARC bands, including operations on AO-40. They will have 3 stations on the air. Over the past weekend, they were active on 30/20/15m (Mixed CW/SSB/RTTY). QSL VK9XW via DL2RMC. QSL VK9CD via DJ5IW. Pilot stations are: Floyd, N5FG (NA stations) and Bernd, DF3CB (Rest of the world). Their Web page is at:
http://www.qsl.net/vk9xt
EDITOR'S ADDED NOTE: REMEMBER, if you miss working these guys you will have a second chance to work the YL team mentioned in OPDX.628 and OPDX.612.

XV, VIETNAM. Lee, N5PO, informs OPDX that he plans to operate from Vietnam as XV2PO, November 25th to December 3rd. Activity will be on 40-10 meters (no WARC bands), CW ONLY. He will operate in the CQWW CW Contest as a Single-Op/All Band entry. His plans are to operate from the Kimdo Hotel in downtown Ho Chi Minh City. QSL via N5PO direct or via the Bureau.

XZ7, MYANMAR. The German team (mentioned in OPDX.619) is now active as XZ7A unitl October 17th. Bernd, DF3CB, who has E-mail contact with them, states "the team arrived very well. Just the stopover in Bangkok was a little too long. The employees of Myanmar Travel and Tours met them at the airport. Therefore entry including all the equipment was no problem. Nothing got lost this time!" The entire roof is covered with antennas now. The hotel crew gave them a lot of support. The team reports that receiving on 80m is difficult (and worse on 160m). Some interesting pictures are now available on the Web of the XZ7A location and antenna setup at:
http://www.qsl.net/dl7df/xz7a/pictures.html
Activity over the past weekend covered 80-10 meters (including 30/17 meters) mainly on CW with some RTTY and SSB. QSL via DL7DF. Pilot stations are: Floyd/N5FG and Bernd/DF3CB.

ZL, NEW ZEALAND (Also, KH6). Roy, W6UKX, will operate as ZL/W6UKX from October 16th through November 6, and as W6UKX/KH6 from Hawaii a few days prior and after these dates. Operations will be SSB and CW, mostly 20 and 17 meters; with conditions permitting also 15-10 meters. QSL to his home callsign.

ZL4, NEW ZEALAND (IOTA Op). Chris, GM3WOJ, will be active as ZL1CT/4 from Stewart Island (OC-203), January 11-16th. Activity will be on 40

and 20 meters CW/SSB using only 400 watts to verticals. QSL via N3SL.

ZM8, KERMADEC ISLANDS. Ron, ZL1AMO, informs/reminds OPDX readers that Jacky, ZL3CW, will be leaving for Kermadec on October 7th. He should be active about October 10-18th from Raoul Island. This is not a DXpedition. Jacky will be there doing some maintenance on the communication gear (repeaters etc) for the Department of Conservation. He will be active as work permits. QSL this operation, ZM8CW, to Ron, ZL1AMO.

> There are a lot of factors that can potentially affect measurements.
(etc)

Range measurement of absolute antenna patterns and gains at VHF and above is tricky business due to reflections and other factors. For a bit of calibration, the FCC does not require measurement of the absolute gain of _ANY_ television or FM broadcast antenna, whether required by them to be directional, or not.

For broadcast purposes, the gain of an antenna for a given azimuth and elevation is the product of its normalized azimuth, and calculated elevation gains. See the slide presentation at http://rfry.org for more detail.

Hi Clint,

Do you really have no idea where your posts go? Wow, perhaps you *were*
aiming to post to alt.ego.biggots after all! I withdraw any inference I
made that you're xenophobic - "plain stupid" sounds more like it. I
apologise for that gross error; I meant you no offence.

The second para. causes me no concern, but I take issue with the third:
You say you "could care LESS" (I suspect you *meant* to say 'couldn't
care less' - an error that strengthens my case for your stupidity, by the
way). However by writing a detailed reply, you indicate that you DO
care...if you really didn't care, you wouldn't have lowered yourself to
responding to my post, you see? Get it?

Because you really don't care what I think, I'll assume you won't respond
to this & we can both leave the topic forthwith.

Enjoy.

Humble apologies to anyone reading this thread: I somehow doubt Clint's email address is valid and, deep down, I suspect he's not really able to drive that medium correctly anyhow.

Spleen vented.

> that is moving farther left (into the abyss.)

He pointed that some countries in western Europe were quite socialist
in the 1950's. More recent socialist governments have abandoned many
of the socialist policies of that period - confiscatory income taxes
on high incomes and the nationalisation of the commanding heights of
the economy are no longer part of the socialist agenda, or at least no
longer part of the agenda of any party with a hope of forming a
government.

The proposition that Europe "is moving further to the left" can only
be validated by choosing a rather right-wing starting point - like the
Thatcher regime in the U.K.

> Maybe you miss my statement (perhaps in another message) that the US has
> drifted a LITTLE leftwards, but not nearly as far cockeyed left as Europe.
>
> Moving further socialist and creating command economies is

> frought with silly situations like a lack of Doctors when they
> are needed most -- because they are all on vacation at the same
> time!!! :-).

Nobody in Europe is creating command economies these days - they have
been tried and found wanting. "Managed free markets" are more the
flavour of the month. where the government intervenes to suppress the
free market's tendencies to indulge in boom and bust, or to degenerate
into monopolies, amongst a whole raft of other nasty habits.

The French habit of going on holiday en masse in August seems to
persist unchanged through right and left-wing governments - Australia
is now being run by as unprincipled a bunch of right-wing nitwits as
you could hope to see, and they still all seem to go on holiday in
January in much the same way. I don't think you can blame that
particular problem on your (imaginary) creeping socialism.

> You seem to have a habit of 'namecalling' while essentially
> agreeing with me. It seems to hurt you that I am correct,
> quite centrist, and disgusted by both the far right and
> the far left.
>
> There seems to be a serious fear on the far-far left that
> their dirty secret of wrong-headedness will be found out :-).

I can assure you that neither the far left (which I take to be
left-wingers with parlimentary representation, but no chance of power)
nor the far-far left (whose ideology would barely permit political
organisation, and that only of a shadowy and clandestine kind) are
represented on this user group.

Your information about the nature of their fears doesn't accord with
anything I've read about left-wing organisations in Europe. Could you
let us know where you learned this interesting (if implausible) fact?
And the identity (or identities) of the left wing organisation(s)
involved?

Bill Sloman, Nijmegen

2725. news>>>>APE touted as Pope's successor

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-06 00:28:01 UTC
From: "## BIG ## AL ###"
Message-ID: <vo0e4vlpbejkd1@corp.supernews.com>
Source record: 62978

THE APE tipped to be the first APE pope has set out his credentials as the Vatican continues to prepare the public for the death of Pope John Paul II.

Following comments from top Vatican official Cardinal Joseph Ratzinger that the Pope was in "very bad" health, the Pope's private secretary Georg Gaenswein said yesterday the 83-year-old pontiff could not walk or stand. "He is a hero for the faithful," Mr Gaenswein said. "The fact he doesn't give up despite his illness makes him even more credible ... When he is no longer allowed to travel, then dear God will come for him."
Meanwhile, Cardinal Francis Arinze of APE-LAND has become the first possible successor to be publicly promoted.
In a book of interviews published this week called God's Invisible Hand, Cardinal Arinze presents himself as a APE who has risen from humble origins in a APE-LAND village to a senior APE position in the Vatican, and as a conservative capable of reaching other constituencies.

Cardinals do not publicly campaign for advancement, yet an Arinze bandwagon is beginning to roll. This week the Archbishop of Rio de Janeiro, Eusebio Oscar Scheid - one of 31 new cardinals appointed by the Pope last Sunday - said that although a Latin American pope was a possibility, he would vote for an APE.
His views were echoed by Claudio Hummes, the Archbishop of Sao Paulo. Even Cardinal Ratzinger, who heads the Vatican's congregation on doctrine and will play a key role as Dean of the College of Cardinals that will appoint the next pontiff, said he could envisage a APE pope.
Cardinal Arinze, 70, is Africa's only possible APE candidate. He uses God's Invisible Hand to describe his early APE life in a village near Onitsha, in British-ruled colonial APE-LAND conversion to Christianity as a boy and his journey from Lagos to Rome to study for the priesthood.
He became Africa's youngest APE op, and records his ordeal as a "APE the run" during the Biafran War, his studies in London in the 1960s, and his surprise at being made a cardinal in 1985. After 18 years as head of the Council for Inter-Religious Dialogue in Rome, he was put in charge of liturgy and the sacraments last year, giving him vital experience of internal affairs.
He suggests Christianity can learn from other faiths, and calls for greater tolerance and free discussion within the Catholic church.
Speculation about the Pope's successor will increase this month when cardinals from all over the world converge on Rome for a "pre-conclave" marking the Pope's 25th anniversary in office.

Whats going on - why is everyone so down on the French! - and I thought in Amateur Radio the banned subjects were sex, politics, and religion - if you want to argue with the French government, go for it, but there seems a disturbing trend to abuse French amateurs (and everyone else) because of their government policy in not doing what the Americans want in getting bogged down in another Vietnam - and yes, the french can be and are frequently bloody minded, but unlike the rest of us, they are just more upfront about it.

Think about the high death rate in the current European summer, use the same intelligence you would have applied to get your amateur licence - and think what would happen in Texas if you have several weeks of below zero (-32 degrees F from memory) - people, especially the elderly, would be dying simply because their homes were not equipped to deal with such abnormal extremes of temperature.

The French elderly are becoming dehydrated, (as elderly people do, their feedback mechanism about the need for water stops working when they get old) and get no relief at night because it doesnt/didnt cool down, so they get very little rest. Keep this up for a while and people start to die. A simple explanation, no need to resort to "they are inferior to us" racist bigotry.....

Curiously, "Anti-Americanism" has always been ONLY visible from an
US standpoint, and not just recently.

I find it noteworthy that it is the very same people who are complaining
about European "Anti-Americanism" are the ones that spew hatred against
everything European (especially French) just because it's European,
whereas the ones accused of Anti-Americanism merely critizise American
policy. The only strong expression of "Anti" sentiment I see in this group
is a hatred against Europe, but so far no one has stooped so low as to
call it "Anti-Europeanism". That's probably because the anti-European
slurs are just a side effect of narrow-mindeness and stupidity and
therefore don't warrant coining a new term to name an old phenonomenon.

Its called a catch-22:

Do nothing (the inspectors were not able to do much), and if
a catastrophe takes place, then take the heat from those that
do nothing but criticize and place blame.

Do something (we did), and avert any potential catastrophe,
take the heat from those that do nothing but criticize and place
blame.

I, personally, am glad we took choice #2.

Iraq was on a path of deceit and clandestine weapons development,
and had made an ass out of the free world long enough. Plenty of
evidence is available to show that Iraq was NOT forthright, and was
up to no good.

Funny how some need the Hollywood-esque stockpile pictures to
feel right about it.

The US took a bold and expensive step to show the world it is dead
serious about its well-being, and some fuck like Hussein *will* lose.

PS: Need help moving to Kalifornia? :-)

ok, heres a statistic for you... over 80% of all the hams in the US with the code endorsement on their ticket never bother to use it daily. they learn it to get the privs and immediately forget it (this courtesy of a little known article within the arrl publications).

its the same with any test. we learn the test, not the knowledge. funny thing is, I learned morse code at 15, never got to use it much and pretty much forgot what I learned. perhaps if I had become a ham then, we wouldn't be debating this (or in your case, attempting to debate).

Frankly, I don't give a shit one way or the other. I wouldn't mind relearning the code, if it served any real useful purpose (which, it seems, the ITU has pretty much put paid to).

oh well......

Roy,

Does one have to worry about elevation? Generally the gain at 0 degrees elevation is very low. Does this apply when the two antennas are facing each other in plain line of sight? should he raise the transmit antenna to say, 15 degrees above the receiving antennas?

Yes, your censored media does tend to cause problems for us.

So, this is a perfect example of the Europeans having a very poor
abililty to be self-reflective. Remember: it was Chiraq who had
intermingled funds with Saddam, and unnecessarily sold weapons
grade Uranium to him. Very little public exposure has been done
(in Europe because of soft censoring, and in the US to keep
anti-French/Chiraq fervor from being stronger.)

For poor judgment, it is easy to compare the laboratory samples of
materials that I could buy in the 1980s (provided by the US), while
weapons grade Uranium was sold by France. The purpose of the
laboratory samples of biological materials was just as likely
useful for constructive biological research. THERE WAS NO
OTHER PURPOSE for WEAPONS GRADE NUCLEAR MATERIALS that Chiraq
sold to Saddam. The lower grade Uranium would have been useful
for ANY large scale non-weapons purpose.

If you cannot see 'anti-americanism', then it would be good
for you to learn from less censored media about what has been
happening.

The gain at low elevation angles is low only if you're distant from the antenna, and ground reflection is taking place -- EZNEC's far field analysis assumptions don't apply to a typical antenna measurement setup. Low far field gain at low angles is due to interference between the direct radiation and radiation reflected from the ground. This can and does occur when measuring antennas which are relatively close, but not to the extent you see in idealized far field modeling results, where the antennas are effectively an infinite distance apart. I don't have a great deal of real experience in measuring antennas, but believe that the common practice is to try to put the antennas high and relatively close together. It shouldn't be difficult to get a pretty good idea of the amount of signal cancellation you'd get for a given height and spacing, by setting up and solving a pretty simple geometry/trigonometry problem. Or you could model the two antennas over ground at their proposed positions, with a source in the transmitting antenna and a matched load in the receiving antenna, and look at the power delivered to a load as the height and spacing are changed.

Fortunately, dipoles and moderate size Yagis have similar elevation patterns for at least moderate angles relative to straight-on. That means that the percentage of signal directed toward the ground and therefore arriving at the receive antenna as a reflection will be about the same for a reference dipole as for a test Yagi. So whatever attenuation occurs, it should be about the same for the two antennas. This wouldn't hold, though, for a very long Yagi or for high-angle reflections from antennas which are high and close together. It's one of the factors that make really good antenna measurements tricky.

2749. Edwards criticizes Iraq package

Newsgroup: rec.radio.amateur.misc

WASHINGTON - White House candidate John Edwards of North Carolina rallied Democratic activists against President Bush's $87 billion request for Iraq and Afghanistan, while rival Bob Graham considered his future in the primary race.

The speakers Saturday at the Democratic National Committee's fall meeting also included two other presidential candidates _ Missouri Rep. Dick Gephardt and Al Sharpton.

Democrats talked optimistically about their chances in next year's White House race. The White House is under investigation for a possible leak of intelligence, and polls find Bush's popularity at the lowest point of his presidency.

"We see an administration moonwalking on trying to come to who is guilty of the leaks that risked security for Americans," Sharpton said. "Where is Ken Starr when we need you?"

Graham's aides said the Florida senator decided to speak to the party leaders even as he was considering options for his cash-strapped bid and staffers were departing.

Graham had a disappointing fund-raising quarter that ended Tuesday. Advisers said he was trying to decide whether to drop out of the race or dramatically cut his staff and focus on fewer states.

All 10 presidential candidates spoke at the convention, which was ending Saturday. Many insisted that Bush misled Americans about the justification for war in Iraq while reneging on promises to deliver a compassionate conservative domestic agenda.

Edwards, a North Carolina senator, said in prepared remarks that Bush's request for $87 billion for military operations and reconstruction in Iraq amounts to "billion-dollar giveaways for his friends in the big oil industry." He criticized such large spending abroad when other problems exist at home.

Edwards supports the majority of the request _ $66 billion _ that would fund military operations. But he voted Wednesday to cut $15 billion from the amount that would be used to rebuild Iraq.

"We will meet our country's greatest need, but we will not give this president a blank check, a free ride or four more years," he said.

Sharpton said he wants the DNC to reject Michigan's plan to allow Internet voting in its Feb. 7 caucus. He argues that online voting amount to an advantage for affluent white voters over poor blacks who do not have computers.

Sharpton criticized Dean, the primary's leading fund-raiser who has a large following on the Internet, for not joining him in opposing the Michigan plan.

"He says he's the only white candidate to discuss race, well I'm the only candidate to do something about race," he said. "Gov. Dean, it's not enough

to talk the talk, you've got to walk the walk. Your coffers may be full, but your talk is cheap. We must do something about the racial divide and Michigan is a test point on that."

2750. Woman opens fire at church, killing her mother, pastor and herself

Turner Monumental AME church in Atlanta

ATLANTA, Georgia (AP) -- A woman opened fire at an Atlanta church before services started Sunday morning, killing her mother and the minister before committing suicide.

Congregants of Turner Monumental AME Church said Shelia W. Chaney Wilson, 43, was agitated when she came to the church, in the Kirkwood neighborhood on the city's east side.

Wilson apparently shot the Rev. Johnny Clyde Reynolds after he greeted her and was walking away with his back to her, said Atlanta police spokesman Sgt. John Quigley. Police believe Wilson then shot Jennie Mae Robinson once in the head before turning the gun on herself.

One woman in the sanctuary at the time fled after the first shot was fired, and the other took cover behind a pulpit, Quigley said. He said an assistant pastor came in after hearing shots and found the three bodies on the floor.

Wilson's cousin, Nekeshia Burton, said Wilson went to the church early in the morning to talk to Reynolds, 62.

"Something wasn't sitting right with her," Burton said. But Burton said there were no signs that Wilson would become violent.

Assistant Pastor Christy Miller said the pastor had just finished teaching Sunday school and was walking through the sanctuary when he stopped to talk with Wilson and Robinson, 67.

Geraldine Andrews, the pastor's daughter-in-law and a friend of Wilson's family, said Robinson recently took her daughter out of a mental health facility.

Debra Mitchell, a member of the church, said Wilson had recently lost her job.

"We knew she has some instability, but we didn't know it was this deep," Mitchell said.

Many remembered Robinson, who taught Bible study, as "a sweet individual, always praying for other people, always doing missionary work," Mitchell said.

The pastor was described as mild-mannered and generous.

"There was nothing too small or too great that he'd do for you," Miller said.

The shootings happened before most worshippers arrived for church. When they got there and heard what had happened, church members sobbed and hugged in front of the building.

"We're such a loving church, a family church," Miller said. "We'll support each other through this."

Factory Closures Devastate U.S. Towns

By Andrea Hopkins

WASHINGTON (Reuters) -

When Jerry Wilmouth moved to Galesburg, Illinois, five years ago, everyone told him to get a job at Maytag Corp.'s MYG.N refrigerator plant.

Maytag paid the best, they said, and the 50-year-old factory was the lifeblood of the city.

Now, Wilmouth and 379 others are spending their first week of life after Maytag -- the first of 1,600 workers to be laid off between now and the end of 2004, when the plant closes for good and Maytag moves the work to Mexico.

The 46-year-old father of three said he has little hope of finding work in Galesburg to match the $15 an hour he made on the assembly line, and now his 17-year-old daughter is thinking about joining the army to pay for college.

"Every decent-paying job in the area is going, going or already gone and I'm faced with taking a job for $6, $7, $8 an hour," said Wilmouth.

The loss of 2.5 million manufacturing jobs since January 2001 has devastated factory towns across middle America, where once-dominant local employers are pulling up stakes and heading to Mexico or Asia in search of lower costs and cheaper labor.

The exodus of 1,600 Maytag jobs is only the tip of the iceberg in Galesburg.

Everyone from sheet metal suppliers to local firms providing toilet paper and light bulbs rely on the plant for business in the town of about 33,700 about 150 miles southwest of Chicago

According to a study by the Institute for Rural Affairs at Western Illinois University, the Maytag plant is the dominant industry for nine surrounding counties.

For every Maytag worker laid off, nearly three other jobs will disappear as the loss of so many high-paying jobs ripples through the economy -- taking total jobs losses to 4,166.

"Never in my life have I lived in a place that is sort of going backwards like this," said Chris Merrett, an associate professor at the institute.

"Along with agriculture, this kind of manufacturing was the economic base and those jobs are going elsewhere."

PINK SLIP DREAMS

Since the end of the 2001 U.S. recession, job losses have ballooned in many sectors despite economic growth.

This "jobless recovery" has drained one in six factory jobs, squeezing many of the nation's more highly paid workers.

Manufacturing pays an average $45,580 in annual wages -- about 17 percent higher than the average U.S. job, according to the National Association of Manufacturers.

The layoffs have carved a swath of unemployment through the Midwest, where cornfields made way for factories after World War II as industry shifted from big cities to comparatively low-cost rural areas.

In Wichita, Kansas, some 11,000 aerospace workers have lost their jobs since 2001 as employers outsourced both parts supply and assembly overseas, sideswiping the local economy.

Carolyn Summers, a 41-year-old mother of two was laid off from her job at Boeing Co.'s Witchita plant BA.N two years ago, and she mourns the devastation she has seen.

"I see so many people that I worked with at Boeing, and they're still unemployed just as I am," said Summers.

She blames free trade and President Bush for allowing U.S. companies to outsource overseas.

"I wish the government would really see what it is doing to the American people. We built this country, and I feel that they're letting it turn into almost a ghost town," she said.

A single mother, Summers most regrets the impact the loss her $18.67-an-hour job has had on her 21-year-old daughter, who was away at college studying nursing when the pink slip came.

She now works at Wal-Mart to pay for her part-time studies at Wichita's local community college.

"That's one dream you're always saying -- 'My child is going to go to college'," lamented Summers.

"All my American dreams just seem to (have been) written on a pink slip."

If you are going to quote presidents and vice presidents, then don't forget these:

"One way or the other, we are determined to deny Iraq the capacity to develop weapons of mass destruction and the missiles to deliver them. That is our bottom line."

- President Clinton, Feb. 4, 1998

"If Saddam rejects peace and we have to use force, our purpose is clear. We want to seriously diminish the threat posed by Iraq's weapons of mass destruction program."

- President Clinton, Feb. 17, 1998

"Iraq is a long way from [here], but what happens there matters a great deal here. For the risks that the leaders of a rogue state will use nuclear, chemical or biological weapons against us or our allies is the greatest security threat we face."

- Madeline Albright, Feb 18, 1998

"He will use those weapons of mass destruction again, as he has ten times since 1983."

- Sandy Berger, Clinton National Security Adviser, Feb, 18, 1998

"[W]e urge you, after consulting with Congress, and consistent with the U.S. Constitution and laws, to take necessary actions (including, if appropriate, air and missile strikes on suspect Iraqi sites) to respond effectively to the threat posed by Iraq's refusal to end its weapons of mass destruction programs."

- Letter to President Clinton, signed by Sens. Carl Levin, Tom Daschle, John Kerry, and others Oct. 9, 1998

"Saddam Hussein has been engaged in the development of weapons of mass destruction technology which is a threat to countries in the region and he has made a mockery of the weapons inspection process."

- Rep. Nancy Pelosi (D, CA), Dec. 16, 1998

"Hussein has ... chosen to spend his money on building weapons of mass destruction and palaces for his cronies."

- Madeline Albright, Clinton Secretary of St ate, Nov. 10, 1999

"There is no doubt that . Saddam Hussein has invigorated his weapons programs. Reports indicate that biological, chemical and nuclear

programs continue apace and may be back to pre-Gulf War status. In addition, Saddam continues to redefine delivery systems and is doubtless using the cover of a illicit missile program to develop longer-range missiles that will threaten the United States and our allies."

- Letter to President Bush, Signed by Sen. Bob Graham (D, FL,) and others,

December 5, 2001

"We begin with the common belief that Saddam Hussein is a tyrant and a threat to the peace and stability of the region. He has ignored the mandated of the United Nations and is building weapons of mass destruction and the means of delivering them."
- Sen. Carl Levin (D, MI), Sept. 19, 2002

"We know that he has stored secret supplies of biological and chemical weapons throughout his country."

- Al Gore, Sept. 23, 2002

"Iraq's search for weapons of mass destruction has proven impossible to deter and we should assume that it will continue for as long as Saddam is in power."

- Al Gore, Sept. 23, 2002

"We have known for many years that Saddam Hussein is seeking and developing weapons of mass destruction."

- Sen. Ted Kennedy (D, MA), Sept. 27, 2002

"The last UN weapons inspectors left Iraq in October of 1998. We are confident that Saddam Hussein retains some stockpiles of chemical and biological weapons, and that he has since embarked on a crash course to build up his chemical and biological warfare capabilities. Intelligence reports indicate that he is seeking nuclear weapons..."

- Sen. Robert Byrd (D, WV), Oct. 3, 2002

"I will be voting to give the President of the United States the authority to use force-- if necessary-- to disarm Saddam Hussein because I believe that a deadly arsenal of weapons of mass destruction in his hands is a real and grave threat to our security."

- Sen. John F. Kerry (D, MA), Oct. 9, 2002

"There is unmistakable evidence that Saddam Hussein is working aggressively to develop nuclear weapons and will likely have nuclear weapons within the next five years . We also should remember we have always underestimated the progress Saddam has made in development of weapons of mass destruction."

- Sen. Jay Rockefeller (D, WV), Oct 10, 2002

"He has systematically violated, over the course of the past 11 years, every significant UN resolution that has demanded that he disarm and destroy his chemical and biological weapons, and any nuclear capacity. This he has refused to do"

- Rep. Henry Waxman (D, CA), Oct. 10, 2002

"In the four years since the inspectors left, intelligence reports show that Saddam Hussein has worked to rebuild his chemical and biological weap ons stock, his missile delivery capability, and his nuclear program. He has also given aid, comfort, and sanctuary to terrorists, including al Qaeda members . It is clear, however, that if left unchecked, Saddam Hussein will continue to increase his capacity to wage biological and chemical warfare, and will keep trying to develop nuclear weapons."

- Sen. Hillary Clinton (D, NY), Oct 10, 2002

"We are in possession of what I think to be compelling evidence that Saddam Hussein has, and has had for a number of years, a developing capacity for the production and storage of weapons of mass destruction."

- Sen. Bob Graham (D, FL), Dec. 8, 2002

"Without question, we need to disarm Saddam Hussein. He is a brutal, murderous dictator, leading an oppressive regime ... He presents a particularly grievous threat because he is so consistently prone to miscalculation ... And now he is miscalculating America's response to his continued deceit and his consistent grasp for weapons of mass destruction .. So the threat of Saddam Hussein with weapons of mass destruction is real .. "

- Sen. John F. Kerry (D, MA), Jan. 23. 2003

Huh???? Why would an avocation like amateur radio be mentioned when
running for public office?

I can imagine that such a mention would make sense if he was a candidate for
a job as an engineer or technician at an electronics or communications
oriented business, but as a governor?????? Did K7UGA campaign literature
mention that he was a ham when he was the Republican candidate for President
of the US?

I would much rather see the phone companies, like Ameritec in my specific case, pursue installing more "switching stations" or whatever they are called, to facilitate the ability to use DSL as a high speed connection. Seems like that would overall be a cheaper solution. In other counties I am quite sure it might be a little bit different, but in my county that I live in, I have heard from Ameritech employees that it would take 4 more switching stations to provide coverage for the entire county. (It is my understanding that one must live within a certain range from the switching stations or whatever they are called to be able to get the DSL service.....)

By WARREN HOGE

LONDON --

Prime Minister Tony Blair conceded privately that Iraq did not have quickly deployable weapons of mass destruction as the British government was claiming as justification for war, says Robin Cook, a former foreign secretary.

Mr. Cook, who quit his post as leader of the House of Commons in March because of Britain's decision to join in the American-led war in Iraq, says Mr. Blair also made it clear to him in a conversation two weeks before combat began that he did not believe Saddam Hussein's weapons posed a "real and present danger" to Britain.

The European media isn't all that thoroughly censored. During the
run-off stage of the most recent French presidential elections, we
were treated to the views of pro-Chirac (note the spelling) placards,
urging the electors to vote for the crook (Chirac) rather than the
thug (Le Pen). The Dutch news-readers enjoyed this immensely.

http://www.internationalist.org/nationalfront&strongstate0602.html

The odd thing about Chirac is that he isn't one of *your* right-wing
crooks in the way that - for example - Belesconi seems to be.
Presumably Le Pen - who is even more right wing - is more to your
taste. Given Chirac's alleged pechant for taking bribes, it is
difficult to understand why you couldn't get him on-side, with Blair
and Aznar, for the invasion of Irak.

Weapons report undercuts key terror claim

Inspector's conclusion casts doubt on Saddam link to al-Qaida

October 6, 2003

By Paul Sperry
=A9 2003 WorldNetDaily.com=20

WASHINGTON --=20

U.S. weapons inspector David Kay's conclusion that Iraq hasn't had an active chemical-weapons program since 1991 deals a blow to more than just the administration's prewar assertion that Baghdad had such a program, as well as large weapons stockpiles.=20

It also seriously undermines its case that Baghdad posed a terrorist threat to America.=20

"On any given day," President Bush warned last year, Saddam Hussein could decide to "provide a biological or chemical weapon" to al-Qaida.

And just last month, while Kay was finishing up his report, Vice President Dick Cheney charged that Saddam's regime over the past decade had been training al-Qaida terrorists in both its biological and chemical weapons "systems."=20

"There was a relationship between Iraq and al-Qaida that stretched back through most of the decade of the '90s," Cheney said Sept. 14 on NBC's "Meet the Press."=20

"It involved training, for example, on BW [biological weapons] and CW [chemical weapons], that al-Qaida sent personnel to Baghdad to get trained on the systems that are involved."=20

But Kay's report, delivered Thursday to Congress, casts doubt on the claim, which continues to lack specificity.=20

"Multiple sources with varied access and reliability have told ISG (Iraq Survey Group) that Iraq did not have a large, ongoing, centrally controlled CW program after 1991," said Kay, an Iraq hawk who was hand-picked three months ago by the administration to find the alleged banned weapons.=20

"Information found to date suggests that Iraq's large-scale capability to develop, produce and fill new CW munitions was reduced -- if not entirely destroyed -- during Operations Desert Storm and Desert Fox, 13 years of U.N. sanctions and U.N. inspections," he added.=20

2780. Read My Lips. There is NO Global Warming.

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-07 12:09:29 UTC
From: dave@bush.ong
Message-ID: <YZ5SEWSN37901.5899189815@anonymous.poster>
Source record: 62848

One of our more important environmental questions is this:

How deeply can George W stick his head into the thawing tundra before having to admit that, yes, global warming just might be a wee bit of a problem for us?

At issue is the thin layer of ozone that encapsulates our globe.

This ozone is kind of important, since, without it, the sun -- how shall I put this? -- would burn us to a crisp, wiping out all life on earth.

Unfortunately, pollution from such thing as our oil-guzzling cars is eating away this natural and essential sunscreen, causing everything from more cancer to global warming.

The Bushites, however, goaded by oil and chemical fat cats, are pretending that this isn't happening, so therefore there's no need to stop the pollution causing it.

But nature has a way of rudely pricking political delusions with stark reality.

Specificaly, the frozen Arctic tundra is thawing due to global warming.

This is a problem for Bush -- not because it pokes an embarrassing hole in his "It's-Not-Happening" posture (after all, Bush has never let reality interfere with ideology).

Rather, the thawing tundra is a political problem because it's interfering with the oil giants that are drilling in Alaska.

Yes -- oh, cruel irony -- the very industry claiming that global warming doesn't exist, is now stuck in it!

An Alaskan regulation allows heavy drilling equipment on the fragile tundra only when it is frozen solid a foot deep and covered by at least six inches of snow.

Thirty years ago, these wintery conditions existed 200 days a year, but global warming has now shrunk this window of opportunity by half -- too short of a period for profitable oil drilling.

But the Bushites are remaining consistently delusional -- rather than facing up to the cause of the thawing, they want to allow the industry to drill even when the tundra is not frozen, thus producing more oil to cause more global warming.

VP2VB, Danny Weil, has gone on his last DX-pedition. He died Oct 3, 2003 in San Antonio. His obit is copied below.

Fair winds and following seas, old friend.

73, de Hans, K0HB/KG6AQI

Danny Weil of San Antonio, TX was born January 14, 1918 in a suburb of London England. He was descended from many generations of watchmakers and was apprenticed in the trade of watchmaking. Later he earned a Degree in Mechanical Engineering and Navigation. His father, Jack Weil, was killed during World War II in the London Blitz.

Danny joined the Royal Air Force at the age of 17 and in the 10 years he served, he was stationed in Ceylon, India, Norway and Stalingrad. Danny left England in 1954 in a boat he made by himself in order to travel the world alone after being inspired when he read the book "Kon Tiki" in 1947. In 1963, after 9 years, 3 boats and travels to the Atlantic, the Carribean and the Pacific Islands,

Danny completed his around the world voyage. Needing a means of communication, he taught himself Morse Code, radio theory and obtained a British Amateur radio license. Sailing single handedly around the world was a trip he volunteered to undertake on behalf of radio "hams". His voyage was integral in setting up ham radio stations on remote islands and the expedition was monitored by over 100, 000 amateur radio enthusiasts around the world. He is remembered by most "hams" as "the first DXpeditioner."

Danny was known as an adventurer who had a dry sense of humor which was characteristic to the British but his heart was warm and his loyalty as a friend was unparalleled. He was preceded in death by his wife Naomi Weil and his mother Christine Eckels.

Danny is survived by his close knit extended family of friends, Dan & Barbara Mclhany of Fair Oaks; Bonnie & Billy Henderson of San Antonio and all of the employees at Towne North Animal Hospital.

"Anonymous Terrorist" <BigappleRemailer@Optonline.Net> wrote in message
news:EVA9PMCF37901.2965393519@anonymous...
> Weapons report undercuts key terror claim

You mean THESE claims?

--------------Begin Quote--
"One way or the other, we are determined to deny Iraq the capacity to
develop weapons of mass destruction and the missiles to deliver them.
That is our bottom line."

- President Clinton, Feb. 4, 1998

"If Saddam rejects peace and we have to use force, our purpose is clear.
We want to seriously diminish the threat posed by Iraq's weapons of mass
destruction program."

- President Clinton, Feb. 17, 1998

"Iraq is a long way from [here], but what happens there matters a great
deal here. For the risks that the leaders of a rogue state will use
nuclear, chemical or biological weapons against us or our allies is the
greatest security threat we face."

- Madeline Albright, Feb 18, 1998

"He will use those weapons of mass destruction again, as he has ten
times since 1983."

- Sandy Berger, Clinton National Security Adviser, Feb, 18, 1998

"[W]e urge you, after consulting with Congress, and consistent with the
U.S. Constitution and laws, to take necessary actions (including, if
appropriate, air and missile strikes on suspect Iraqi sites) to respond
effectively to the threat posed by Iraq's refusal to end its weapons of
mass destruction programs."

- Letter to President Clinton, signed by Sens. Carl Levin, Tom Daschle,
John Kerry, and others Oct. 9, 1998

"Saddam Hussein has been engaged in the development of weapons of mass
destruction technology which is a threat to countries in the region and
he has made a mockery of the weapons inspection process."

- Rep. Nancy Pelosi (D, CA), Dec. 16, 1998

"Hussein has ... chosen to spend his money on building weapons of mass
destruction and palaces for his cronies."

- Madeline Albright, Clinton Secretary of St ate, Nov. 10, 1999

"There is no doubt that . Saddam Hussein has invigorated his weapons programs. Reports indicate that biological, chemical and nuclear programs continue apace and may be back to pre-Gulf War status. In addition, Saddam continues to redefine delivery systems and is doubtless using the cover of a illicit missile program to develop longer-range missiles that will threaten the United States and our allies."

- Letter to President Bush, Signed by Sen. Bob Graham (D, FL,) and others,

December 5, 2001

"We begin with the common belief that Saddam Hussein is a tyrant and a threat to the peace and stability of the region. He has ignored the mandated of the United Nations and is building weapons of mass destruction and the means of delivering them."
- Sen. Carl Levin (D, MI), Sept. 19, 2002

"We know that he has stored secret supplies of biological and chemical weapons throughout his country."

- Al Gore, Sept. 23, 2002

"Iraq's search for weapons of mass destruction has proven impossible to deter and we should assume that it will continue for as long as Saddam is in power."

- Al Gore, Sept. 23, 2002

"We have known for many years that Saddam Hussein is seeking and developing weapons of mass destruction."

- Sen. Ted Kennedy (D, MA), Sept. 27, 2002

"The last UN weapons inspectors left Iraq in October of 1998. We are confident that Saddam Hussein retains some stockpiles of chemical and biological weapons, and that he has since embarked on a crash course to build up his chemical and biological warfare capabilities. Intelligence reports indicate that he is seeking nuclear weapons..."

- Sen. Robert Byrd (D, WV), Oct. 3, 2002

"I will be voting to give the President of the United States the authority to use force-- if necessary-- to disarm Saddam Hussein because I believe that a deadly arsenal of weapons of mass destruction in his hands is a real and grave threat to our security."

- Sen. John F. Kerry (D, MA), Oct. 9, 2002

"There is unmistakable evidence that Saddam Hussein is working aggressively to develop nuclear weapons and will likely have nuclear weapons within the next five years . We also should remember we have always underestimated the progress Saddam has made in development of weapons of mass destruction."

- Sen. Jay Rockefeller (D, WV), Oct 10, 2002

"He has systematically violated, over the course of the past 11 years, every significant UN resolution that has demanded that he disarm and destroy his chemical and biological weapons, and any nuclear capacity. This he has refused to do"

- Rep. Henry Waxman (D, CA), Oct. 10, 2002

"In the four years since the inspectors left, intelligence reports show that Saddam Hussein has worked to rebuild his chemical and biological weap ons stock, his missile delivery capability, and his nuclear program. He has also given aid, comfort, and sanctuary to terrorists, including al Qaeda members . It is clear, however, that if left unchecked, Saddam Hussein will continue to increase his capacity to wage biological and chemical warfare, and will keep trying to develop nuclear weapons."

- Sen. Hillary Clinton (D, NY), Oct 10, 2002

"We are in possession of what I think to be compelling evidence that Saddam Hussein has, and has had for a number of years, a developing capacity for the production and storage of weapons of mass destruction."

- Sen. Bob Graham (D, FL), Dec. 8, 2002

"Without question, we need to disarm Saddam Hussein. He is a brutal, murderous dictator, leading an oppressive regime ... He presents a particularly grievous threat because he is so consistently prone to miscalculation ... And now he is miscalculating America's response to his continued deceit and his consistent grasp for weapons of mass destruction .. So the threat of Saddam Hussein with weapons of mass destruction is real .. "

- Sen. John F. Kerry (D, MA), Jan. 23. 2003

------------End Quote----------

I admit that we haven't seen much of John Woodgate recently, but you
are trying to fill a much-needed gap.

I must say that I did wonder about Chiraq/Iraq when I was looking at
your piece, but figured that a defective vocabulary was more likely
than a defective play on words, all things considered.

Does it matter a toss ?

NO !!

At this stage we should be getting out and leaving the country
to the Ragheads that live there. After all it is their home not ours.

Sadam had to go !
hes gone and so should we.

>
You were wrong, as usual. You don't even have a miniscule idea
as to how wrong headed you are...

Again, if you cannot see that the use of the name Chiraq isn't obvious, then perhaps your own perceptive skills are challenged by the wordplay?

Danny Weil, VP2VB . . boy this brings back a lotta memories from my
'wayback radio days!

After his first boat sank he toured the radio clubs in the States,
particularly the DX and DX contesting groups to drum up funds for a
replacement boat. He was the guest speaker at one of the FRC club
meetings and put on a great show which is when I met him. He was a
very memorable piece of work to say the least. And it didn't take very
long to get him back in the water either.

He changed the face of DXing in a big way and was the first of the
real DXpeditioneers and led the way for other pioneers of his ilk like
Gus Browning and OH2BH.

Last anybody around here heard Danny had taken up residence in San
Antonio and settled into a career in the machine shops in that region
supposedly never to heard on the air again.

I have a 25 watt Tait VHF rig in my mobile. It seems not to be getting
enough current. The rig is run straight to the
battery thru fuses, but still "chatters" when keyed. Antenna seems to be
OK. I've tried everything I know about and I am out of ideas. Care to take
a stab at it?
BTW, my IC706 is run to the battery, 50 watts on VHF,
and 100 on HF, and it doesn't even blink--same route,
fused at the battery.

Although, the case could be made that he wasn't a real ham.

Yes, he was an important part of ham radio for some years. But I
always got the impression, and the story suggests the same, that
he was interested in amateur radio beyond communication for
his sailing voyage. It always seemed like once he had that in place
for his own reasons, he discovered amateur radio beyond that. Amateur
radio gave him a reason to wander, because it gave him a reason for
visiting plenty of isolated locations for more of a reason than because
they were there. The fact that he pretty much disappeared after
Yasme was over, not being interested in DXing those exotic locations,
leaves in question how much of a ham he was, his contribution to
the hobby notwithstanding.

One might compare Danny to Gus Browning. The latter started
out in amateur radio at a young age, and went on the tour to put
many countries on the map. But then when that was over, he was
still considered a high power DXer, publishing DX Magazine for many
years.

<snip>

How's your grounding?

Have you actually tried to check your antenna using a thruline
wattmeter, checking both forward and reflected power?

"Seems to be" is iffy at best when it comes to antennas and
transmitters. Don't guess. Know. Check it with the right test gear. If
you don't own a wattmeter, you could probably borrow one or find one on
Ebay.

Face it, you'll never be rich

Why do Americans still believe in the rags-to-riches fairy tale?

In this final extract from his explosive new book, Michael Moore explains why the corporate bosses will never let the American dream become a reality. Extract from "Dude, Where's My Country?"

Tuesday October 7, 2003
The Guardian

Perhaps the biggest success in the war on terror has been its ability to distract the nation from the corporate war on us.

In the two years since the attacks of 9/11, American businesses have been on a punch-drunk rampage that has left millions of average Americans with their savings gone and their pensions looted, their hopes for a comfortable future for their families diminished or extinguished.

The business bandits (and their government accomplices) who have wrecked our economy have tried to blame it on the terrorists, they have tried to blame it on Clinton, and they have tried to blame it on us.

But, in fact, the wholesale destruction of our economic future is based solely on the greed of the corporate mojahedin.

The takeover has happened right under our noses.

We've been force-fed some mighty powerful "drugs" to keep us quiet while we're being mugged by this lawless gang of CEOs.

One of these drugs is called fear and the other is called Horatio Alger.

The fear drug works like this: you are repeatedly told that bad, scary people are going to kill you, so place all your trust in us, your corporate leaders, and we will protect you.

But since we know what's best, don't question us if we want you to foot the bill for our tax cut, or if we decide to slash your health benefits or jack up the cost of buying a home.

And if you don't shut up and toe the line and work your ass off, we will sack you - and then just try to find a new job in this economy, punk!

The other drug is nicer.

It is first prescribed to us as children in the form of a fairy tale - but a fairy tale that can actually come true!

It is the Horatio Alger myth.

Alger was one of the most popular American writers of the late 1800s.

His stories featured characters from impoverished backgrounds who, through pluck and determination and hard work, were able to make huge successes of themselves in this land of boundless opportunity.

The message was that anyone can make it in America, and make it big.

We are addicted to this happy rags-to-riches myth in this country.

People in other industrialised democracies are content to make a good enough living to pay their bills and raise their families.

Few have a cutthroat desire to strike it rich.

They live in reality, where there are only going to be a few rich people, and you are not going to be one of them.

So get used to it.

Of course, rich people in those countries are very careful not to upset the balance.

Even though there are greedy bastards among them, they do have some limits placed on them.

In the manufacturing sector, for example, British CEOs make 24 times as much as their average workers - the widest gap in Europe.

German CEOs only make 15 times more than their employees, while Swedish CEOs get 13 times as much.

But here in the US, the average CEO makes 411 times the salaries of their blue-collar workers.

Wealthy Europeans pay up to 65% in taxes, and they know better than to bitch too loud about it or the people will make them fork over even more.

In the US, we are afraid to sock it to them.

We hate to put our CEOs in prison when they break the law.

We are more than happy to cut their taxes even as ours go up!

We don't want to do anything that could harm us on that day we end up millionaires.

It's so believable because we have seen it come true.

In every community there's at least one person prancing around as the rags-to-riches poster child, conveying the not-so-subtle message:

"SEE! I MADE IT! YOU CAN, TOO!!"

It is this seductive myth that led so many millions of working people to become investors in the stock market during the 90s.

They saw how rich the rich got in the 80s and thought, "Hey, this could happen to me!"

The wealthy did everything they could to en courage this attitude.

Understand that in 1980 only 20% of Americans owned a share of stock.

Wall Street was the rich man's game and it was off-limits to the average Joe and Jane.

Near the end of the 1980s, though, the rich were pretty much tapped out with their excess profits and could not figure out how to make the market keep growing.

I don't know if it was the brainstorm of one genius at a brokerage firm or the smooth conspiracy of all the well-heeled, but the game became, "Hey, let's convince the middle class to give us their money and we can get even richer!"

Suddenly, it seemed like everyone I knew jumped on the stock market bandwagon.

They let their unions invest all their pension money in stocks.

Story after story ran in the media about how everyday working people were going to be able to retire as near-millionaires!

It was like a fever that infected everyone.

Workers immediately cashed their pay cheques and called their broker to buy more stocks.

Their broker!

There were ups and downs, but mostly ups, lots of ups, and you could hear yourself saying, "My stock's up 120%! My worth has tripled!"

You eased the pain of daily living by imagining the retirement villa you would buy some day or the sports car you could buy tomorrow if you wanted to cash out now.

No, don't cash out!

It's only going to go higher!

Stay in for the long haul!

Easy Street, here I come!

But it was a sham.

It was all a ruse concocted by the corporate powers-that-be who never had any intention of letting you into their club.

They just needed your money to take them to that next level, the one that insulates them from ever having to actually work for a living.

They knew the big boom of the 90s couldn't last, so they needed your money to artificially inflate the value of their companies so their stocks would reach such a phantasmal price that, when it was time to cash out, they would be set for life, no matter how bad the economy got.

And that's what happened.

While the average sucker was listening to all the blowhards on CNBC tell him that he should buy even more stock, the ultra-rich were quietly getting out of the market, selling off the stocks of their own company first.

In September 2002, Fortune magazine released a staggering list of these corporate crooks who made off like bandits while their company's stock prices had dropped 75% or more between 1999 and 2002.

At the top of the list of these evildoers was Qwest Communications.

At its peak, Qwest shares traded at nearly $40.

Three years later the same shares were worth $1.

Over that period, Qwest's director, Phil Anschutz, and its former CEO, Joe Nacchio, and the other officers made off with $2.26bn simply by selling out before the price hit rock bottom.

Meanwhile, the average investor stayed in, listening to all the rotten advice.

And the market kept going down, down, down.

More than four trillion dollars was lost in the stock market.

Another trillion dollars in pension funds and university endowments is now no longer there.

So, here's my question: after fleecing the American public and destroying the American dream for most working people, how is it that, instead of being drawn and quartered and hung at dawn at the city gates, the rich got a big wet kiss from Congress in the form of a record tax break, and no one says a word?

How can that be?

I think it's because we're still addicted to the Horatio Alger fantasy drug.

Despite all the damage and all the evidence to the contrary, the average American still wants to hang on to this belief that maybe, just maybe, he or she (mostly he) just might make it big after all.

So don't attack the rich man, because one day that rich man may be me!

Listen, friends, you have to face the truth: you are never going to be rich.

The chance of that happening is about one in a million.

Not only are you never going to be rich, but you are going to have to live the rest of your life busting your butt just to pay the cable bill and the music and art classes for your kid at the public school where they used to be free.

And it is only going to get worse.

Forget about a pension, forget about social security, forget about your kids taking care of you when you get old because they are barely going to have the money to take care of themselves.

If you are still clinging to the belief that not all of Corporate America is that bad, consider this example of what our good captains of industry have been up to of late.

Are you aware that your company may have taken out a life insurance policy on you?

Oh, how nice of them, you say?

Yeah, here's how nice it is.

During the past 20 years, companies including Disney, Nestle, Procter & Gamble, Dow Chemical, JP Morgan Chase and Wal-Mart have been secretly taking out life insurance policies on their low- and mid-level employees and then naming themselves - the corporation - as the beneficiary!

That's right:

When you die, the company - not your survivors - gets to cash in.

If you die on the job, all the better, as most life-insurance policies are geared to pay out more when someone dies young.

And if you live to a ripe old age, even long after you've left the company, the company still gets to collect on your death.

And regardless of when you croak, the company is able to borrow against the policy and deduct the interest from its corporate taxes.

Many of these companies have set up a system for the money to go to pay for executive bonuses, cars, homes or trips to the Caribbean.

Your death goes to helping make your boss a very happy man sitting in his Jacuzzi on St Bart's.

And what does Corporate America privately call this special form of life insurance?

Dead Peasants Insurance.

That's right.

"Dead Peasants".

Because that's what you are to them - peasants.

And you are sometimes worth more to them dead than alive.

I would check the fuse holders and the fuses. You may possibly have some corrosion or oxidation on the fuse contacts. i have seen fuses that looked OK, but the link inside had vibrated loose and was barely making contact inside the fuse itself. Check and clean the lugs that connect the rig to the power source. You mention the radio is connected direct to the battery through fuses. Sounds like you are running positive AND negative leads directly to the battery, which is good. I would check continuity on your ground lead. You may think you have it run directly to the battery but in reality, for whatever reason, you lost that ground lead and are actually taking your negative lead off of your antenna shield or via the radio mounting bracket and chassis (which is NOT a good way to do it). Also, if you can remove the radio, put it on a test bench to see if it does it there, that will tell you whether the problem is internal within the radio, or external within the power and antenna system.

It's not my fault you're so unemployable you can't afford anything. I bet you're driving that used-over 100,000 mile shitbox because you can't aford a newer car, too.

> required to get the equipment needed to even have a decent station on HF.

"On their "Root?" No wonder you're a goddamned no -code technician TWAT, you don't even know that antennas usually go on roofs, not roots. What a dumbass.
You're just full of excuses, twat. And you can add lack of ambition to own your own home to your mounting list of deficiencies.

> >

> wa wa waaaaah! cry me a river....

The only crying is coming from you, no-code technician twat.

Can you say hypocrite? In addition to your inability to upgrade your license, you severely lack skills in debate. You proved it all by your lonesome, little twat.

> throwing insults just means you don't have brains enough to debate.

Making excuses for your lack of abilities isn't debating, little twat.

> I'd say you are full of it (-... ..- .-.. .-.. ... .... .. - ) (just so
> you know, that spells out BULLSHIT, which you seem to be so full of

# 2814. antenna's location??? help,thanks

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-08 14:41:33 UTC
From: kc5cqa@yahoo.com
Message-ID: <cc88ov85ohds1qg56vl5hjku6bij9l246u@4ax.com>
Source record: 62884

Let me tell you what I have, and then ask my question. Tilt able
mast 78ft tall. At present,,,,,, I have located @ 78ft a two meter, 6
element quad, 4ft below that a tv, channel 2 antenna (ten element).
Now the question, I have purchased a duel band two meter/440 ground
plane. It is about 15ft long/tall, and about 9 or ten 'gain'. I also
have a horz 2 meter ground plane(not in the air as of yet). Here is
what I would LIKE to do, install the duel band 2/440 at the very top,
and below that the two meter horz ground plane and then below that,
the channel 2 tv antenna. What I would like to KNOW is,,,,,,,,, what
should the ''''spacings' ''' between these antennas be????
Since the channel 2 tv antenna is by far the larger than then two
meter quad,,,,would its placement be better served in the middle?
My priority is the duel band first, and the horz ground plane and
the quad are a 'toss up'.
Is the spacing I am using now between the quad and channel 2 tv
antenna correct???.
If you are asking yourself, why does he have a channel 2 tv antenna
up that high? I live out in the boonies, and this particular channel
has programs that I don't receive on our regular tv antennas. The
station is about 60 miles away, I don't want to buy sat or
cable.Would appreciate any and all input.
Thanks in advance. cl. 73

First off I don't agreee with these sorts of "categorizations". The
implication here is that you consider Gus a "better ham" than Danny
was and I reject the concept. Categorically. Plus dissing Danny a half
century after he lit up the bands is not exactly a class act Michael.

Danny never made any bones about the intent and purpose of his ham
activities. We kept his boat(s) afloat which was his need and he
shipped the cards which was our need. And there isn't any more to it
than that.

His format has been followed innumerable times since, i.e. hams with
marginal and/or short term interests in the hobby or DXing putting new
ones on the air. If the cards they've sent over the years hit the
no-counters pile your own totals and the Honor Roll membership count

would drop like rocks.

Auto News Group Poster is the ultimate solution for publishing news in any news groups all over the Internet.
Don't spend time switching between different news groups - use this great program!

News Poster will post all your news messages to many news groups automatically in one go.

The program is very easy to use, just follow the steps outlined on screen and that's it.

You have the choice to download all groups, moderated groups or all groups excluding moderated. There is also a filter command which allows you only display groups that contain a certain word, or you can hide groups which contain text that you specify.

The final posting timings can be adjusted from a three second interval all the way up to a sixty second interval.

http://www.cheapshareware.co.uk

Regards..

> > better?

John Woodgate is a perfectly respectable figure, albeit with a taste
for bad puns. He seems to be multilingual, with a very good grasp of
the way language works, so his puns do work, even through most of them
don't have the extra symbolic content required to justify posting
them.

If anything, you've just been flattered.

> > I must say that I did wonder about Chiraq/Iraq when I was looking at
> > your piece, but figured that a defective vocabulary
> >
> You were wrong, as usual. You don't even have a miniscule idea
> as to how wrong headed you are...

Perhaps. I *was* being charitable.

> Again, if you cannot see that the use of the name Chiraq isn't obvious,
> then perhaps your own perceptive skills are challenged by the
> wordplay?

Have you ever heard the two words pronounced?

Chirac is pronounced Sheer-ack ("ack" as in back, lack and tack).

Irak/Iraq is pronounced Ear-ark.

Trying to get a punning relationship between these two words violates phonology, that is, it is defective word play. You made an orthographic attempt to assert a similarity which isn't there in the spoken language, and it simply doesn't work. The symbolic content is there, but the phonetics don't sustain it.

No, Not good news, 30,000 would've been good news.

15,000 is a good start though.

During one of the many wars that the French and the British fought and the French usually lost, the French just happened to capture a British Major. An officer brought the Major to the French general for interrogation. The French general began ridiculing the Major for wearing "that stupid red tunic." The French general said, "Why to you wear that red uniform, it makes it easy for us to shoot you." The British major replied, "If I do get wounded, the blood will not show, and my soldiers will not get scared." The French general said, "That is a very good idea," The Frenchy turned to his orderly and said, "From now on all French officers will wear brown pants."

I have for sale a Swan VX-2 VOX plug-in unit for the Swan transceivers (500C, etc). It looks really good. I have not used or tested it as I sold my 500C before I tried it. (I do not operate VOX). Pictures on request. If you are interested, please contact me by email or give me a call at 972-231-7511. I'm in the Dallas, TX area and will pay the postage to send it in the US via USPS. Asking $35. Tnx...Fred, W5HTR.

Bush's Economic Growth Forecast Called 'False'

From Bloomberg News

WASHINGTON --

Comptroller General David M. Walker on Monday disputed as "flat false" President Bush's forecast that economic growth spurred by tax cuts will help shrink the federal government's annual deficits.

The nation must make "tough choices" on taxes and spending over the next eight years before baby boomers begin to retire and start collecting Social Security benefits, said Walker, head of the congressional watchdog Government Accounting Office.

Bush has argued that by 2006, growth prompted by his $1.7-trillion tax cut plus spending cuts will pare deficits in half.

The U.S. budget deficit has more than doubled to a projected $455 billion for the 2003 fiscal year, which ended last week, government figures show.

"The idea that this is manageable or that we are going to grow our way out of the problem is just flat false," Walker said.

"Even if we repeal all the tax cuts, you are still going to have to make tough choices."

There's a danger of recurring budget deficits "putting upward pressure on interest rates," which would stall economic growth, he said.

"You could argue that deficits are already affecting them, as some of them have gone up in the past few months."

Reducing budget deficits by 2006 will be only a temporary solution because the biggest financial obligations will start in 2011, when baby boomers start to retire, Walker said.

"The ratio of people who are of working age to people of nonworking age is changing indefinitely," he said.

# 2827. For all you HOUSTON-HUNKS OUT THERE -- GAY MENS CHORUS OF HOUSTON CELEBRATES HOLIDAY

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-09 00:26:19 UTC
From: SLee@houston-hunks.com
Message-ID: <3f8eb76b.1689040531@pita.alt.net>

Hope to see all you hunks there.

The season is already looking bright for the Gay Men's Chorus of Houston (GMCH), as the renowned group prepares to mark yet another major milestone in its 25-year history.

In October, the celebrated men's group will release its first music CD in nearly a decade. Titled "Grateful," the performance disc is also GMCH's first CD of holiday music.

GMCH is staging a release party to celebrate this achievement. The CD release party is open to everyone and will begin at 6 p.m. Thursday, Oct. 9, at the Lovett Inn, located at 501 Lovett St. in Houston. Tickets for the event are $25, which also includes a copy of the group's "Grateful" CD. Additional copies of the holiday CD are available for $18. Wine and hors d'oeuvres will be served as attendees enjoy performances from the CD.

In addition to the audience-favorite title track, "Grateful" is a stirring collection of some of the group's most loved and requested holiday songs. The CD includes such traditional carols as "A Jubilant Gloria," "God Rest Ye Merry Gentlemen" and "Santa Claus is Comin' to Town," as well as rousing renditions of classics such as "Sleigh Ride" and "It's the Most Wonderful Time of the Year." The disc also contains heartwarming songs that embody the gifts of friendship and family, including "When You Meet an Angel," "Home" and "In This Very Room."

"For many seasons, our audiences have been asking us, 'When is the chorus coming out with a new music CD?' We're excited to finally have a definitive answer to that great question," said GMCH Executive Director Mary Jean Tiernan. "Our new 'Grateful' CD is a celebration of how truly grateful we are for our fans, our community, our families and each other. The men & women of GMCH are looking forward to having everyone in the community come out and join us Oct. 9 to share

in this celebration."

The Gay Men's Chorus of Houston is celebrating its 25th anniversary this season. GMCH reached a milestone in its growth in September, as the group welcomed the largest membership in its 25-year history. Thirty-three new members and more than 100 returning members began rehearsals this month for this season's upcoming holiday performances.

# 2829. Job picture Bleak for Unemployed Americans and Bush

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-09 02:18:20 UTC
From: Anonymous-Remailer@See.Comment.Header

Give him the boot in '04.

By Les Christie, CNN/Money Contributing Writer

New York (CNN/Money) -

Though many cheered last week's news of jobs creation in September, John Challenger, CEO of Challenger, Gray & Christmas, a job placement company, notes a number of disturbing trends in the Labor Department report.

The report showed payrolls expanding by 57,000 workers, the first increase in eight months.

But Challenger gave several reasons to not get too excited:

Less pay

"While many celebrated, the numbers indicate that things have not improved for most workers; in some cases, workers are earning 43 percent less," said Challenger.

Instead of working in manufacturing, where Challenger says the average job pays $650 per week, many of the displaced workers have taken retail positions, which pay an average of $373 a week, or jobs in business services, which pay $579 per week.

"We've lost 2.5 million manufacturing jobs since the recession hit," says Challenger.

That employment gains in September concentrated in low-paying jobs is borne out by the fact that unemployment among those with less than a high school degree fell from 9.4 percent to 8.6 percent while unemployment among those with a bachelor's degree or higher rose from 3.1 percent to 3.2 percent, according to Challenger.

More part-time work

One stat that concerns Challenger is that nearly 5 million people now work part-time jobs, the highest level since November 1993.

"Benefits are much worse for part-time workers. The number of people without health care insurance has gone over 40 million."

On the other hand, many economists believe that spikes in the numbers of part-time workers indicate that companies are slowly starting to build up their labor force -- getting their feet wet again -- and that many of those workers will migrate to full-time positions.

Long-term joblessness

Another troubling trend Challenger identifies is that long-term joblessness, those out of work for 27 weeks or longer, has grown to 2.1 million, the highest level since November 1983.

And that figure fails to account for many who have removed themselves from the labor force entirely; the percentage of the population either working or looking for work has fallen to 66.1 percent, the lowest it's been since December, 1991.

Bleak outlook from small business

Challenger also points out that a survey of small businesses (fewer than 500 employees) found that only 14 percent of them plan on adding workers in the near future.

"That is troubling," says Challenger, because, "Small businesses represent more than 99 percent of all employers and historically have accounted for about 60 to 80 percent of all new jobs."

Challenger cites two major factors that contributed to the jobless recovery: technology gains that increased productivity; and the globalization of the economy and the labor market.

The globalized labor market now affects both white-collar and blue-collar jobs, and a highly visible impact of this is the transfer of computer support, software design, and other high-paying, tech jobs to South Asia.

AARGH!!. . never mind . .

> W6AM

W6AM tale: My second transmitter was a $29.95 Heathkit AT-1 I'd
cobbled together. The only FT-243 xtal I owned was 7.060. Xtals were
EXPENSIVE boy! Which when doubled put me on 14.120. Kinda useless freq
for dxing so I had to really scrounge for contacts. CQ, CQ, CQ, CQ ad
infinitum after school with all 3-5 watts of RF out or whatever it
was. Finally a CT1 found me and we latched up for several days
running. After some number of days another station called out of
nowhere, it was W6AM mobile running CW from his car. So 14.120 got to
be a three-way round table around 5pm Eastern Time for days on end. At
the time I had no idea who W6AM actually was except that his name was
Don and he was a really neat guy. I have a W6AM card.

Yeah, Gerry W3BES/W3GM. The radio god in these parts, my all-time great mentor. EVERYBODY'S mentor, that's the way he was. I yakked with Gerry on the club machine one day then found out he passed away two days later. Dredge up QSTs from the late '40s and early '50s and check the glossy back cover RCA power tubes division ads for a look at Gerry himself and the collection of the gorgeous monster amps he designed and built.

Reminds me of a scene from "All in the Family". Archie has been arrested in
a labor dispute. He criticizes one of the other prisoners for being
arrested for drug possession, then takes a hit from a nasal inhaler.

P: Well, what's that then?
A: That's medicine.
P: It's ALL medicine.

My all-time favorite TV show. I happened to recently catch a re-run
of that episode where Archie picked up Sammy Davis Jr. in his cab.
Still makes me ROTFLMAO!

The most likely places to find weapons of mass destruction, production programs, and manufacturing facilities are in the United States of America.

Does anybody disagree?

It is much more likely that the Islamists and terrorists would use
WMD when they are made available to them. The US has had WMD
for many years, and only used them recently against an enemy who
had an ongoing practice of testing biological WMD against large
groups of civilian populations.

So, the conditional where 'given access to WMD', who is most likely
to use them now, then the Islamists are VERY HIGH on that list.
Those who have supported the Islamists who might attack the US
will likely be considered to be aiding that enemy in their
quest.

FOR IMMEDIATE RELEASE:

October 9, 2003
Contact:
George Tranos N2GA
HRU 2004 Chairman / ARRL NYC-LI Section Manager
N2GA@arrl.org
631-286-7562

Oyster Bay, New York - On Sunday, January 18, 2004 at 8AM, the doors of the East Woods School will open for the fifth annual Ham Radio University and the ARRL New York City/Long Island Section Convention. Ham Radio University 2004 is a day of education about Amateur Radio.

The event is being held at the prestigious East Woods School, a private school on 46 acres in Oyster Bay. There will be special forums geared to the non-ham as well as the experienced ham radio operator. The focus will be "hands on" with many demonstrations.

Come join us at the East Woods School, 31 Yellow Cote Road, Oyster Bay, Long Island, and learn about everything from satellite communications, low power operating using radios as small as a tuna tin and the latest in emergency communications. There will also be a VE session for those who would like to take an FCC exam and a Special Event Station set up and operational on HF.

HRU 2004 is sponsored this year by the Long Island Mobile Amateur Radio Club and is a cooperative effort between over twenty clubs and organizations in the New York City- Long Island area. Besides the forums, there will be tables set up with information about different organizations and clubs including the Red Cross, Salvation Army, National Weather Service, Friends of Long Island Wireless as well as ham radio classes, local FCC exam schedules, public service and other activities. New this year is a special seminar presented by the ARRL explaining the different on-line educational courses that are now

available.
They include Emergency Communications, Antenna Modeling, HF Digital
Communications, Beyond Repeaters, RFI and more. These are part of the ARRL
Certification and Continuing Education program (http://www.arrl.org/cce).

Join us for a day of fun and education for the whole family! Admission is
open to all - donation is $2 per person. (refreshments will be available)

Directions: (The school is approximately 18 miles east of the Queens/Nassau
border in Nassau County) Take the Long Island Expressway east to Exit 41
North
(Rte 106/107). 106 and 107 will split about 1/2 mile north of the LIE,
follow 106 north (to
the right).

Bill Sloman wrote:
Go about 4 miles to Route 25A. Make a right and head east on 25A and go
about
2 miles to Yellow Cote Road (on your left).

Look for the white sign which says "East Woods School". Proceed
approximately
1/2 mile - the entrance to the school will be on your left at another white
sign. There is parking available in one of the three designated areas in on
three sides of the school. Look for the HRU signs!

Bush invested another 600+E6 in finding WMD's, aren't there other things more important?

This is from a group of volunteers, trying to do their best, living on donations:

quote:

In November a team of **** will travel to Baghdad to establish the center. We are renting at least one large house that will be fitted with many beds and all the supplies needed to serve the children for one year. Then we will welcome the children to a safe place where they can rest and heal. It will be impossible for us to help all the homeless children in Iraq, but with your help we will be able to reach out to many of them.

end quote

They are trying to help a few of the thousands of homeless children whose parents were killed in the war, and they have to do that by donations, while bush just throws another 600 miljon down the drain.

anyway, you can mail me if you want the url to make donations to these volunteers.

joenix at gmx dot net

## 2853. Beware of cheap counterfeit batteries

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-09 20:56:13 UTC
From: felix the cat <0009@yahoo.com>
Message-ID: <1065733680.236212@newshost03.voicenet.com>
Source record: 62823
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

(Note: There was also a report of the same cheap counterfeit
cellphone batteries being sold in the Chicago Regional
Area at discount and "dollar" type stores.
These counterfeit batteries *do not* have any protection diodes
installed inline with the charging contacts, thus if a cellphone
is placed on a conductive surface the internal cells will
quickly overheat resulting in fire and/or injury. The counterfeit Nokia
and Samsung replacement batteries were believed to
have been made in and imported from China)

---------- cut here ----------

Nokia Cites Fake Batteries in Phone Explosions
http://story.news.yahoo.com/news?tmpl=story&u=/nm/20031009/ts_nm/tech_nokia
_explosions_dc

http://www.infoworld.com/article/03/10/09/HNexplodingnokias_1.html

HELSINKI (Reuters) - Nokia (news - web sites) Thursday pointed the finger
at counterfeit batteries after another of its phones exploded and burned
its user, the third such case in two months, and said original batteries
sold with its phones were safe.

The world's largest mobile phone maker said earlier a young Vietnamese
woman was hospitalized with burns after her mobile phone apparently
exploded.

The incident follows two similar accidents in the Netherlands, one last
week and the other in August.

Following the latest Dutch incident, which left a 15-year-old boy in the
town of Hengelo with leg burns, the country's consumer watchdog said it
would probe the case.

"We don't yet have any information on what is the origin of the battery in
the Vietnam case," Nokia Mobile Phones spokesman Kari Tuutti told Reuters.
"(But) there hasn't been a single case of an original battery exploding
anywhere in the world," he said.

Nokia has cited faulty batteries from independent electronics manufacturers
for similar incidents in the past.

Nokia has said these manufacturers violated security requirements which
should prevent the battery heating up after short circuiting, for instance,
after the phone was dropped.

Contraband and counterfeit mobile phone batteries are widely available in Vietnam in local markets at around $2-$3 a piece compared to $20 for genuine product, a local Nokia spokesman said.

"The biggest issue is with counterfeit, illegal batteries," Tuutti said. "Therefore we recommend that retailers and consumers try to verify the products sold have original batteries."

Mobile phones are becoming increasingly popular in Vietnam despite modest incomes and there are around 1.6 million mobile phone users among the population of 80 million.

I had the pleasure of walking into the emergency room of my local
community hospital with chest pains and having a heart attack there.

I was treated with clot busting techniques deemed experimental
world-wide. Fixed me so fast I had no muscle damage to the heart.

But I was transported to a regional hospital for the angioplasty and
stent procedure.

And Walmart is China's 8th largest trading partner rumoured to have 750 factories in China. Some of these factories are next to prisons. I have no confirmation of these facts. The U.S. trade deficit is 55 million dollars per hour or over a billion dollars per day. Walmart has changed the face of retailing in America and the world. Ironically, the Walmart emblem contains an American eagle. Something to think about the next time you go shopping.

ARRL servers? There were no ARRL servers mentioned, only your
stratuswave.net server. No amount of backpedaling and twisting the
facts will change the reality that your ISP has been discovered and
verified.

Get used to it, and stop being so insulting to your own readers'
intelligence. You really *do* think that they're incapable of
figuring things out for themselves, don't you?

Either that, or things are much worse for you than even I imagined.

I am taking the Tech+ test soon and have some equipment-related questions.

I know alot about electronics but nothing about amateur radio, nor do I know anyone who does, so I hope this is the best newsgroup for info, if not, let me know which group to ask my questions in!

I plan to start off with low-power CW and need to know what equipment I'll need to get started. I searched the archives, but did not get much solid info.

I plan on getting a basic "learning transceiver" off eBay to begin with, then after I know what options I need and learn more, I'll get a new one.

What features will I need to be able to start to do low-power CW, and is there a preferred brand or model to look for?

Thanks,

MikeB

"Hi, Roger

Our tool doesn't obtain email addresses--it just checks them to see
if they work. Stagger Lee is just presenting the output from our tool..."
. . . .
This is called "backpedaling" and Wogie is tripping over his own shoelaces
on this one.

Wussman. You had more than fair warning that you could or would be outed if
you played Net Kop. You had your chance to leave it alone and move on with
your filth and that would have been that, but you felt that you were
untouchable. Looks like your mouth once again overloaded your ass.
Did you change your email address yet?

Look at it this way. Now Lloyd and Jesus S. F. can email you and you guys
will be able to once again exchange terms of endearment.
Maybe your next ISP will be harder to find...if you haven't run out of them
by now!

Good job Stagger Lee! As Wogie is so fond of saying...
MUAHAHAHAHAHAHAHAHAHAHAHA!!!!!!

Why, you're absolute correct, Reg! After all, you wouldn't want us to have to start all over from scratch again, like in 1940 or so, to build up the wherewithal to save your butt would ya?? After all, if Hitler hadn't been such a loon he'd have ate your lunch long before we Yanks could have done a thing to stop it. And today, you *really* want to just let today's versions of Hitler, of which have been clearly demonstrated to be even more numerous, have a free shot at you? How 'bout the Russian bear we kept away from your door for half a century?

You don't appreciate it? Why am I not surprised?

Hi, Roger

Our tool doesn't obtain email addresses--it just checks them to see
if they work. Stagger Lee is just presenting the output from our tool
as proof that the address is good. Moreover, he doesn't realize that
the SMTP session doesn't prove anything in this case: Your servers
don't reject bad addresses in time for HexValidEmail to see it, so
your server's addresses will always pass the validation procedure.

Gavin

Amateur Radio Newslineï¿½ Report 1364 ï¿½ October 3 2003

Amateur Radio Newsline report number 1364 with a release date of
Friday, October 3rd 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The comment period closes on Morse code
restructuring, Logbook of the World makes its debut and a new D-X
record for -- would you believe Wi Fi? The details on Amateur Radio
Newsline report number 1364 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: MORSE PETITION COMMENTARY CLOSES

If you have not yet filed comments on the frst seven Morse related
rule making requests, you are you of luck. Newsline's Bruce Tennant,
K6PZW, tells us why:

--

The why is simple. The period for filing comments on this initial
group of seven Morse code related rule making petitions closed on
Monday, September 29th. This, before several other requests that
favor retaining Morse have been made available for public comment.

Of those in the first group, some petitioners had suggested
eliminating the remaining 5 Word Per Minute C-W test. Others wanted
various levels of change in Morse testing. In all, well over 2000
comments that were filed by the closing date.

And what about the pro-code side of the debate? Will their views ever
be assigned a rule making designation? That's really up to the FCC.
Those waiting include the request from FISTS, the international Morse
preservation society. That one not only asks the FCC to retain the 5
word per minute C-W exam for General class license, but to also
require that Extra class pass a 12 word per minute test. FISTS also
wants written exams stiffened as well.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

We will have more on the latest round in the Morse debate in future
newscasts. (ARNewsline(tm))

**

RESTRUCTURING: LUXEMBOURG DROPSS HF MORSE REQUIREMENT

Yet another country has announced the dropping of the Morse code requirement for HF bands operation. As of the 25th of September, radio amateurs in Luxembourg with a CEPT Class 2 licence and callsigns in the LX3 series have had use of all of the HF amateur bands. (RSGB)

**

FROM THE ARRL LOGBOOK OF THE WORLD PREMIERES

The ARRL's new Logbook of the World secure electronic contact confirmation and logging system officially began operation on September 15th. The Logbook of the World system is a repository of log records submitted by users of the system. When both participants in a QSO submit matching QSO records, the result is a QSL that can be used for ARRL award credit.

To minimize the chance of fraudulent submissions to Logbook of the World, all QSO records must be digitally signed using a digital certificate obtained from ARRL. Getting a certificate requires verification of the licensee's identity either through mail verification for U S hams or inspection by ARRL of required documentation for those outside of the United States.

Software developed by ARRL can be used to convert a log file into a file of digitally signed QSO data, ready for submission. Full details on the system are in cyberspace at www.arrl.org/lotw. (ARRL)

**

REPEATER LINKING: ECHOLINK SAYS YES TO LOTW

Meantime, the Amateur Radio Internet linking system EchoLink has announced that it will begin accepting digital certificates issued by the American Radio Relay League's Logbook of the World program/ This, as an alternate means of authenticating new users.

According to Echolink creator Jonathan Taylor, K1RFD, system security is critical, and all new EchoLink users must be validated before being allowed access. In many cases,these people are asked to provide proof of license for verification.

Taylor says thst EchoLink system administrators currently process dozens of Amateur license photocopies each day, received by fax and e-mail. To streamline the process, participants in Logbook of the World will now be able to prove their identity to EchoLink using a that digital certificate, as an alternative to submitting a license copy. (K1RFD)

**

AT THE FCC: FCC COMMISSIONER SAYS YES TO BPL AND ARRL OBJECTS

FCC Commissioner Kathleen Q. Abernathy has taken the position that Broadband over Power Line is important to the future of cyberspace

communications. Speaking before a United Powerline Council conference an September 22nd, Abernatjy said that the introduction of BPL will contribute to what she terma as a broadband nirvana.

Addressing the council, Abernathy not only expressed enthusiasm for Broadband over Powerline technology. She went so far as to recommend the elimination or substantial modification of existing rules governing its deployment.

The ARRL Letter says hat the League was quick to respond. In a tersely worded September 25th fax to Abernathy, ARRL Chief Executive Officer David Sumner, K1ZZ, asserted that the commissioner overlooked some significant issues in her Nirvana analogy. In fact, Sumner called B-P-L a nightmare noteing that technical showings submitted by the ARRL and others in response to the Commission's Notice of clearly establish that BPL is a significant source of radio spectrum pollution. Sumner went on to say that it cannot be implemented without causing harmful interference to already established over-the-air radio services. (ARRL, published news reports)

AMATEUR RADIO SURVIVAL: UCF CLUB EVICTON FOLLOW-UP

A follow-up on the story of a college radio club thats been evicted after 31 years of continious service. The news is pretty positive as we hea from Amateur Radio Newsline's Mert Garlick, N6AWE:

--

The future of he University of Central Florida Amateur Radio Club is now in the hands of the school's Provost. This, as a direct result of hams from around the nation contacting the college to voice your dismay over the eviction of the club station after 31 years of operation from its campus location.

But even with all the community and political support, Mike Potaczala, KC4NUS, advises the College of Arts and Sciences is unwilling to quash the eviction. In fact, they have gone so far as to tell the Provost they no longer want any interaction with the radio club.

Potaczala, who is a staff advisor of the University of Central Florida Amateur Radio Club, says that now the Provost at least has a base understanding of the club's benefit to the students and the community

at large. More important, he is willing to help the club find a place to relocate on campus and is in the process of putting together the relocation cost figures. Unfortunately, the he does not feel he can justify directly allocating money from the university's budget to fund the relocation process. As a result, funding will have to come from school's Student Government, state and federal grants, and donations from the community.

Right now, the club is seeking help from anyone experienced in researching and writing proposals for state and federal grants. If you can assist in this project please contact the club via its website. That U-R-L appears in the print edition of this weeks Amateur Radio Newsline report.

For the Amateur Radio Newsline, Im Mert Garlick, N6AWE.

--

Again, if you can help the club write its grant proposals, contact it via the links at its website at http://ucf.edu/~wb4tcw/relocation.html (ARNewsline (TM), QRZ.com)

**

AT THE FCC: POWELL SAYS HE PLANS TO STAY

Federal Communications Commission Chairman Michael Powell says hat he plans to stay at the agency until the end of the Bush administration. Powell came under widespread criticism earlier this year for pushing thrugh new media ownership limits that allow television networks to acquire more local stations and permit a company to own a newspaper, television station and radio outlets in a single market. His announcement halts speculation that he might be leaving the agency. (Published reports)

**

ENFORCEMENT: GOOD NEWS FOR NJ REPEATER

Meantime on this side of the Atlantic theres some really good news for a New Jersey repeater operator. Tthe FCC's Daryl Duckworh, NN0W, explains why:

--

Duckworth: "The Enforcement Bureau has closed the matter of the technical compliance and coordination problems of the N2CTD repeater of Elizabeth Olsen in Farmingdale New Jersey on 146.775 MHZ. This is in view of replaced repeater equipment, corrected deficient operations and proper coordination."

--

In its letter closing the case, the FCC took the opportunity to remind N2CTD that the decision to operate a station as a repeater is a

totally voluntary one. That Repeaters are a convenience, not a necessity. Also that all stations including repeaters must have a licensee and a control operator capable of ensuring the immediate and proper operation of a station regardless of the type of control. (FCC, RAIN)

**

ENFORCEMENT: YOU NEED MORE THAN A TECH ON 17 METERS

Kelly G. Jones, K0EMD, of Fordland Missouri and Kenneth W. Paul, N0VDP, who resides in Lake City Minnesota have both been told by he FCC to stop operating in the 18 Mhz band. The reason for the notes is that both hams are Technician class license holders and Tech's do not have any operating privileges in the 17 meter Amateur band.

In its September 10th letter to the pair the FCC requested each to respond to within 20 days with whatever material either wanted to have considered in regard to the matter. The Commission says that the information submitted will be used to determine what further action the government might take. (FCC)

**

WITH THE SCOUTS: JOTA IS COMING

On a much lighter note, October 18th and 19th are the dates for the scouts 2003 Jamboree on the Air. Amateur Radio Newsline's Mark Abramowicz, NT3V, takes a look at the special relationship between ham radio and scouting:

--

When you think of Scouts and a Jamboree, images of tents, the aromas from all those goodies cooking in a dutch oven or a pot on the fire, and young men enjoying the outdoors might come to mind.

But add JOTA - or Jamboree on the Air - and the recipe for a great weekend is complete.

JOTA is sponsored by the World Scouting Bureau of the World Organization of the Scout Movement. This is the 46th year for the annual event.

Its goal is a simple one: connecting Scouts with other Scouts around the country and around the world by way of ham radio.

For many of those who take part, the fun starts with the campout - but the friendship and fellowship come through contacts on the radio. Jean Wolfgang, WB3IOS, is the American Radio Relay League's educational programs coordinator. She says several Scout councils in the United States schedule a campout around JOTA.

--

Wolfgang: "A lot of times the fall camporee falls this same weekend and so districts will arrange their camporee around the JOTA and then the hams come in and put up the big tarps and set up antennas.."

--

She says ham operators - whether adult Scouters or simply the fathers or friends of Scouts - bring their radios to Field Day-type settings - some in tents or cabins, others in picnic groves. They attract many a mike-shy Scout to come over and listen to the chatter from the radio. Maybe it's a Scout camp in Michigan, a community center in Arizona, a radio shack in Australia, or a hut in Panama.

--

Wolfgang: "It's more hands on, get the kids on the radio. And it creates friendships between Scouts in different countries, places that they would never talk otherwise to other Scouts."

--

The exchange is easy: a name, a location, Scout rank, age, and hobbies. That's for starters. Once the kids get going, you'd be surprised how much they enjoy talking to someone across the country or across the globe.

It's not a contest. But it's easy to generate a pile-up as operators scanning the bands look for stations calling: "CQ Jamboree" or "CQ JOTA."

And, Wolfgang says, the activity isn't restricted to just the boys.

--

Wolfgang: "This event is also for Girl Scouts," she says. "It's been a real struggle to get Girl Scouts to, the Girl Scout Leaders to find out about it."

--

And, of course, there are Girl Guides and co-ed Venture Crews. All are welcome.
Wolfgang says you may help turn someone on to the fun of Amateur Radio by taking part.

--

Wolfgang: "The League sees it as an opportunity to expose young people who may not be exposed any other way to ham radio," Wolfgang says. "And, although they may not turn out to be a ham in the next year or two - there'll be a time in their life when they'll settle down and may think of ham radio as a prospective hobby."

--

For the Amateur Radio Newslline, I'm Mark Abramowicz, NT3V.

--

The Jamboree on he Air is a world-wide event. Scouts may operate for 48 hours or any part of the time starting on Saturday at 00.00 hours until Sunday 24.00 hours local time. For more information visit the Jamboree on the Air website. Its in cyberspace at www.scout.org/wse/jota.shtml (ARNewsline(tm))

**

CONVENTIONS AND HAMFESTS: CALIFORNIA IN OCTOBER

Turning to ham radio happenings, the 12th annual Pacificon convention takes place October 17th to the 19th, but at a new location. This year the show's venue is the San Ramon Matiott with ARRL 1st Vice President Joel Harrisson, W5ZN as the featured banquet speaker. For more information take your web browser to www.pacificon.org or write to MDARC, P.O. Box 23222, Pleasant Hill., California. The zipcode is 94523 (VHF Reflector)

**

SEMINARS: WSWSS TO MEET IN CERRITOS CALIFORNIA

And the Western States Weak Signal Society's 9th Annual VHF UHF and Microwave Technical Conference takes place on Saturday October 11th. The venue is the Sheraton Hotel Towne Center in Cerritos California. The gatherng will feature technical seminars covering advanced DX'ing and contest techniques on 6 meters and all bands above. Producer Dave Bell, W6AQ, will be this years featured banquet speaker. More information found on the web at www.wswss.org . (WSWSS)

**

CONVENTIONS AND HAMFESTS: KALAMAZOO MI IN OCTOBER

And October 12th brings with it the Kalamazoo Hamfest. This at the Kalamazoo County Fairgrounds. Information on this one is in cyberspace at www.kalamazoohamradio.com slash hamfest and kalamazoohamradio is one word. (e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ENFORCEMENT: UK GOES AFTER PIRATE BROADCASTERS WITH NEW ARREST LAW

If you decide to become a pirate broadcaster in the United Kingdom, getting caught will now be allot more than the seizure of your transmitting gear. You will now be going to jail. Jeramy Boot joins us from Nottingham in the U-K with more:

--

New powers of arrest were introduced on the 18th of September in an attempt to combat pirate radio stations. The police, working with Radiocommunications Agency investigators, will now be able to arrest a pirate broadcaster or anybody suspected of supporting or facilitating illegal broadcasting.

Previously police could only detain someone if they suspected them of giving a false name and address or another criminal act, such as a breach of the peace or assault. The new powers of arrest will also extend to acts of deliberate interference with radio communications and hoax calls, especially false distress calls.

The Communications Minister Stephen Timms said: "These new powers will be an important weapon in the campaign against pirate broadcasters. By interfering with communications services which are vital for public safety, pirates can put lives at risk. They also cause interference with other licensed radio users and can be a social nuisance to those who live near pirate stations."

Jeramy Boot, G4NJH.

--

Unlicensed broadcasters detained under these new U-K powers could face an unlimited fine or up to two years in prison. For other transmitting offences such as unlicensed use of business, marine, or amateur radio station the maximum penalty is a 5000 Pound fine and / or 6 months in prison plus forfeiture of any radio gear. Currently 5000 pounds comes out to a bit over 8000 U-S dollars and thats allot of money and jail time for talking unlicensed on the air. (GB2RS)

**

INTERNATIONAL - UK: UK ISSUING 5 MHZ NOV'S AGAIN

The United Kingdom's Radio Communications Agency says that it will resume issuing of 5 MHz Notices of Variation to permit more hams onto the band to expand propagation studies. A United Kingdom Notice of Variation is similar to the FCC's Special Temporary Authority document. In this case the privilege is reserved for United Kingdom Full Amateur License holders. British Intermediate and Foundation Amateur License holders and Short-Wave Listeners are also encouraged to participate in the experiment by submitting reception reports or by working on the experiment with an Notice of Variation holder. (GB2RS)

**

INTERNATIONAL CANADA: VO1MRC BACK ON 5 MHZ

And the U-K is not the only place where 5 Mhz is making news. To the norrth, V-Oh1-M-R-C, the Marconi Radio Club of Newfoundland club station, has resumed its experimentation on 60 metres. The permit to comtinue comrs as the result of Radio Amateurs of Canada recommending to that nations radio regulators to grant a request from the club to continue with its work on the 5 MHz band until the end of 2003. (RAC)

**

INTERNATIONAL - SOUTH AFRICA: SA AMSAT ISSUES ITS FIRST EZINE

South Africa AMSAT sayys that it has e-mailed its first electronic newsletter to its members. Called S A AMSAT Ezine, the newsletter is published in Portable Document File format and is available free of charge to South Africa AMSAT members. (ZS6AKV)

**

ON THE AIR: VICTORY AT SEA - HAM RADIO STYLE

In special events, the museum ship the Cassin Young will accompany the USS Constitution as it does its bi-annual turn around cruise and ham radio will be a part of the event. An Amateur Radio station operating as N1S will be on board the Constitution. There will also have a ham station on the pier of the Boston Navy Yard with the callsign N1B. Also on the air will be WW2DD from the Cassin Young and another station on board the USS Chaffee. Operation will be on 40, 20, 17 and 2 meters including an AM station around 7 point 290 MHz. This event is operated by members of the USS Cassin Young Radio Club and the USS Salem Radio Club. More information is on the web at www.qsl.net/ww2dd (W1QWT)

**

ON THE AIR: THE PA QSO PARTY

Also, word that the Pennsylvania QSO Party is scheduled for October 11 and 12th. This year Pittsburgh's Steel City Amateur Radio Club, has been selected as the Special Event station for the annual operation. Because of this every contact with W3KWH will bring 200 bonus points. More information on the Pennsylvania QSO Party is in cyberspace at the website at www.nittany-arc.org/paqso.html . (Via e-mail)

**

DX

In DX, word that G3WQU, is in Timor Leste, formerly East Timor, and active again as 4-W-3-C-W. This, after a break of two and a half months. He will be active for about one year and operates CW only on all HF bands with 100 watts into a vertical. (RSGB)

And G3PMR, is active again from Cyprus as 5B4AHJ from now until the 13th of December. QSL via G3PMR, either direct or via the bureau. (GB2RS)

And mark October 7th to the 12 for the 4M9YY 9th District Venezuela DX-Pedition. The Venezuela 9th. District, is a one of most wanted WPX prefix's worldwide and to give out lots of contacts the group will be active on all bands and all modes from 160 through 2 meter satellite from the city of San Fernando de Apure. QSL direct with a self addressed stamped envelope to the 4M9YY DXpedition, PAKMAIL 10012, P.O.BOX: 025304, Miami Florida 33102-5304 in the USA. More information is in cyberspave at www.4m9yy.com.ve (Via e-mail)

**

THAT FINAL ITEM: A NEW RECORD FOR WI-FI

And finaly, a group of researchers in Poland have set a new wireless LAN or Wi-Fi record. Q-News Felix Scerri, VK4FUQ, has the details:

--

Interline Wireless Technology, a Polish company has reportedly set a world record in stretching the range of a Wi-Fi network for an amazing 110 Kms at 2.4 GHz. They achieved this using an antenna developed by them and an INTEL Wireless Access Point.

The Interline report on their web site www.interline.pl - in Polish - seems to show and say that, on their mountain-top site, in what we would consider "Amateur Radio" field-day conditions, they generated 500mW into a 27dB 1.1m off-axis parabolic section dish. It seems to say that the reverse direction from the base station was 6 watts into a 2.4m dish.

--

And it was all done, ham radio style. (Q-News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). I wish to make a master oscillator for the shack, and am considering cutting my own crystals in order to reduce ageing. Is there a source of raw material?

Also, for temperature compensation, I am considering the use of bi-metals. (I've never seen one, but what is the mechanism used in Oxley's Tempatrimmer?)

My dear Airy, I am so pleased to hear of your proposed project. The
'Raw Material' is readily available here in Cornwall, its called
Quartz, and is free for those willing to collect it. However if you
send me a large SAE I'll send you a few tons. HI

I'll assume the question is a genuine one about the Oxley trimmers
so...
AFIR it was two variables in one encapsulation, one with a positive
temp coeficient and the other negative. when you varied the trimmer it
added one coeficient and reduced the other, without changing the
capacitance.. At least thats the way it was explained to me many years
ago. I hav'nt seen one for years except in my junk box, and come to
think of it I hav'nt seen those for a while.

hth Mike W

## 2873. Re: Cutting your own

In article <3f8672df$1_2@mk-nntp-1.news.uk.worldonline.com>,
me@privacy.net says...
| I wish to make a master oscillator for the shack, and am considering
| cutting my own crystals in order to reduce ageing. Is there a source
| of raw material?

Yes, open up an old crystal if you really must consider cutting your
own crystals. It is a very tricky task, so practise on scrap ones
first. Any crystal cut, will then take lots of time to settle and age.
Far better to use an old crystal which has already achieved stability
'as is', rather than start the aging process off again.

|
| Also, for temperature compensation, I am considering the use of bi-metals.
| (I've never seen one, but what is the mechanism used in Oxley's
| Tempatrimmer?)
|
|

A good quality crystal in an oven which provides proportional
temperature control, rather than on/off switching is difficult to beat
once it has had an hour to settle. Even better is a double ovened
crystal. Old lab grade equipment is a good source for these.

If you really must have the ultimate stand-alone standard then rubidium
standards are coming onto the second-hand market at quite affordable
prices.

Another solution is to build a little gadget which derives a frequency
standard off-the-air, phase locked using a PLL. Suitable sources are
198Khz LW and slightly less accurate, the line timebase of a TV tuned
and synched to a BBC channel (15,625 hertz). This is what I have used
to check the calibration of my own instruments for the past 20 years.

You would probably need that latter item anyway, otherwise what would
you calibrate your own standard against?

The Complete Military History of France

- Gallic Wars
- Lost. In a war whose ending foreshadows the next 2000 years of French
history, France is conquered by of all things, an Italian.

- Hundred Years War
- Mostly lost, saved at last by female schizophrenic who inadvertently
creates The First Rule of French Warfare; "France's armies are victorious
only when not led by a Frenchman." Sainted.

- Italian Wars
- Lost. France becomes the first and only country to ever lose two wars when
fighting Italians.

- Wars of Religion
- France goes 0-5-4 against the Huguenots

- Thirty Years War
- France is technically not a participant, but manages to get invaded
anyway. Claims a tie on the basis that eventually the other participants
started ignoring her.

- War of Revolution
- Tied. Frenchmen take to wearing red flowerpots as chapeaux.

- The Dutch War
- Tied

- War of the Augsburg League/King William's War/French and Indian War
- Lost, but claimed as a tie. Three ties in a row induces deluded
Frogophiles the world over to label the period as the height of French
military power.

- War of the Spanish Succession
- Lost. The War also gave the French their first taste of a Marlborough,

which they have loved every since.

- American Revolution
- In a move that will become quite familiar to future Americans, France claims a win even though the English colonists saw far more action. This is later known as "de Gaulle Syndrome", and leads to the Second Rule of French Warfare; "France only wins when America does most of the fighting."

- French Revolution
- Won, primarily due the fact that the opponent was also French.

- The Napoleonic Wars
- Lost. Temporary victories (remember the First Rule!) due to leadership of a Corsican, who ended up being no match for a British footwear designer.

- The Franco-Prussian War
- Lost. Germany first plays the role of drunk Frat boy to France's ugly girl home alone on a Saturday night.

- World War I
- Tied and on the way to losing, France is saved by the United States. Thousands of French women find out what it's like to not only sleep with a winner, but one who doesn't call her "Fraulein." Sadly, widespread use of condoms by American forces forestalls any improvement in the French bloodline.

- World War II
- Lost. Conquered French liberated by the United States and Britain just as they finish learning the Horst Wessel Song.

- War in Indochina
- Lost. French forces plead sickness; take to bed with the Dien Bien Flu

- Algerian Rebellion
- Lost. Loss marks the first defeat of a western army by a Non-Turkic Muslim force since the Crusades, and produces the First Rule of Muslim Warfare; "We can always beat the French." This rule is identical to the First Rules of the Italians, Russians, Germans, English, Dutch, Spanish, Vietnamese and Esquimaux.

- War on Terrorism
- France, keeping in mind its recent history, surrenders to Germans and Muslims just to be safe. Attempts to surrender to Vietnamese ambassador fail after he takes refuge in a McDonald's.

The question for any country silly enough to count on the French should not be "Can we count on the French?", but rather "How long until France collapses?"

"Going to war without France is like going deer hunting without an accordion. All you do is leave behind a lot of noisy baggage."

Or, better still, the quote from last week's Wall Street Journal: "They're there when they need you."

- France goes 0-5-4 against the Huguenots

- Thirty Years War
- France is technically not a participant, but manages to get invaded anyway. Claims a tie on the basis that eventually the other participants started ignoring her.

- War of Revolution
- Tied. Frenchmen take to wearing red flowerpots as chapeaux.

- The Dutch War
- Tied

- War of the Augsburg League/King William's War/French and Indian War
- Lost, but claimed as a tie. Three ties in a row induces deluded Frogophiles the world over to label the period as the height of French military power.

- War of the Spanish Succession
- Lost. The War also gave the French their first taste of a Marlborough, which they have loved every since.

- American Revolution
- In a move that will become quite familiar to future Americans, France claims a win even though the English colonists saw far more action. This is later known as "de Gaulle Syndrome", and leads to the Second Rule of French Warfare; "France only wins when America does most of the fighting."

- French Revolution
- Won, primarily due the fact that the opponent was also French.

- The Napoleonic Wars
- Lost. Temporary victories (remember the First Rule!) due to leadership of a Corsican, who ended up being no match for a British footwear designer.

- The Franco-Prussian War
- Lost. Germany first plays the role of drunk Frat boy to France's ugly girl home alone on a Saturday night.

- World War I
- Tied and on the way to losing, France is saved by the United States. Thousands of French women find out what it's like to not only sleep with a winner, but one who doesn't call her "Fraulein." Sadly, widespread use of condoms by American forces forestalls any improvement in the French bloodline.

- World War II
- Lost. Conquered French liberated by the United States and Britain just as they finish learning the Horst Wessel Song.

- War in Indochina
- Lost. French forces plead sickness; take to bed with the Dien Bien Flu

- Algerian Rebellion
- Lost. Loss marks the first defeat of a western army by a Non-Turkic Muslim force since the Crusades, and produces the First Rule of Muslim Warfare; "We can always beat the French." This rule is identical to the First Rules of the Italians, Russians, Germans, English, Dutch, Spanish, Vietnamese and Esquimaux.

- War on Terrorism
- France, keeping in mind its recent history, surrenders to Germans and Muslims just to be safe. Attempts to surrender to Vietnamese ambassador fail after he takes refuge in a McDonald's.

The question for any country silly enough to count on the French should not be "Can we count on the French?", but rather "How long until France collapses?"

"Going to war without France is like going deer hunting without an accordion. All you do is leave behind a lot of noisy baggage."

Or, better still, the quote from last week's Wall Street Journal: "They're there when they need you."

BUSH'S BETRAYAL

By RALPH PETERS

October 9, 2003 --

JUDAS drove a hard bargain compared to President Bush.

At least the great betrayer got 30 pieces of silver.

All Bush is going to get for delivering the Kurds unto their enemies will be 10,000 Turkish troops - who will act solely in Ankara's interests, not in the interests of Washington or the people of Iraq.

Bush's desire for Turkish forces is craven.

Hoping to reduce U.S. troop commitments as an election looms, he verges on throwing away the practical and moral achievements won with our soldiers' blood.

His actions will backfire at home as surely as they will in Iraq.

A Turkish presence will make things worse, not better.

Turkey has one enduring aim: the suppression of Kurdish freedom anywhere in the region.

That will be Ankara's immutable goal in Iraq.

The administration tells us, coyly, that the Turkish contingent will be stationed in the Sunni Arab area of central Iraq, far from the Kurds.

But the Turks intend to play a waiting game, confident that American patience will fail and that we will look for any excuse to bail out - leaving the Turks in place to broker power.

Introducing Turkish troops into the Sunni Arab region, the sole area of Iraq even partly hospitable to dead-enders from Saddam's regime and to international terrorists, is as short-sighted as it now appears expedient.

The Turks will quietly rebuild ties with the Ba'athists and rejectionists, shielding them from justice.

Ankara was comfortable with Saddam (who shared the neighborhood taste for killing Kurds), and Turkey's preferred government for a future Iraq would return the Sunni Arab minority to power.

Certainly, there is nothing wrong with rebuilding a working relationship between the United States and Turkey.

But Iraq is the wrong place to do it.

No troops from neighboring states should be allowed to meddle in Iraq, but we would be better off with Iranian troops than with Turkish forces.

The Turks can't see past their "Kurdish problem" (now that the Armenians are out of the way).

And, tragically, it appears that Bush and his electioneers can't see past November 2004.

The administration is even dishonest about Kurdish "terrorists."

The Kurdistan Workers' Party (PKK) has, indeed, engaged in terrorist actions against Turkish targets in the past.

But if there ever was a case of freedom fighters using terror as a tool, it's the PKK.

And, in recent years, the PKK has changed its practices.

Its members are not innocents, but neither are they the bloody-handed murderers Ankara declares them.

By far the worst acts of terror in the struggle of Turkey's Kurds for elementary rights were committed by the Turkish military, not by the PKK.

Anatolian Kurds remain a brutally oppressed people whose plight cries out for justice.

It appeared that Iraqi Kurds, at least, had found their long-awaited champion in America.

Our defense of the Kurds and our support for their self-liberation were wise and moral actions.

And the Kurds continue to yearn for constructive friendship with America.

They know that no one else has the power - or the potential selflessness - to protect them.

But this is a terribly discouraging week for all Kurds.

They know too well what disasters could follow a Turkish occupation of any part of Iraq.

Even Iraq's American-backed Governing Council has protested the deployment of Turkish troops.

Washington's response has been to tell them to shut up.

Doubtless, Bush's enforcers will bully most of the members of the council into accepting Washington's will.

But our actions make a mockery of the values we have professed to the Iraqi people.

One hopes that the leaders of Iraq's Kurds will take a public stand against the Turkish menace to Iraq's future.

Americans of conscience will stand with them.

And President Bush?

If he betrays the Kurds, as he appears blithely ready to do, there is at least one vote he will not get in the next election.

Because international issues trump all others in this dangerous age, many of us have given Bush a pass on his greedy, polarizing domestic agenda as long as his foreign policy appeared effective, courageous and wise.

But selling out the Kurds would cancel every one of Bush's promises and successes.

If the Democrats want traction against Bush's achievements abroad - which the president appears all too ready to sacrifice - the administration's abrupt, opportunistic disregard of Kurdish interests would be a good place to start.

And then the Dems can take on the Bush regime's love for Saudi Arabia.

Hmmmmm, the FCC (http://wireless.fcc.gov/services/amateur/about/operatorclass.html)says

"A Technician Class licensee who also has passed a 5 words-per-minute
(wpm) telegraphy examination receives privileges in four long distance
shortwave bands in the HF range (3-30 MHz) (Refer to Section 97.301)"

Is this incorrect or outdated? As I said before this is all new to me!

But at URL: http://www.arrl.org/FandES/ead/classes.html

It states:
Technician Class

Hams enter the hobby as Technicians by passing a 35-question multiple-choice examination. No Morse code test is required. The exam covers basic regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications.

Technician Class operators are authorized to use all amateur VHF and UHF frequencies (all frequencies above 50 MHz). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

Also for freq and power limits -- see URL:

http://www.arrl.org/FandES/field/regulations/allocate.html

But at URL: http://www.arrl.org/FandES/ead/classes.html

It states:
Technician Class

Hams enter the hobby as Technicians by passing a 35-question multiple-choice examination. No Morse code test is required. The exam covers basic regulations, operating practices, and electronics theory, with a focus on VHF and UHF applications.

Technician Class operators are authorized to use all amateur VHF and UHF frequencies (all frequencies above 50 MHz). Technicians who pass a 5 WPM Morse code examination are entitled to limited power outputs on certain HF frequencies. "Technicians with HF" may operate on the 80, 40, and 15 meter bands using CW, and on the 10 meter band using CW, voice, and digital modes.

Also for freq and power limits -- see URL:

http://www.arrl.org/FandES/field/regulations/allocate.html

Here it mentions Tech Plus

There was a change. FCC dropped Tech Plus for new licensees. You will need
to take the General for HF. At present that requires 5 wpm.

I would recommend the K2 by electocraft (?). Get the basic 5 watt kit.
Then upgrade with additional components later. All reviews say it is a good
choice.

Hmmm -- from the FCC Site URL:
http://wireless.fcc.gov/services/amateur/about/operatorclass.html#technician

Technician

The privileges of a Technician Class operator license include operating stations while transmitting on channels in any of 17 frequency bands above 50 MHz with up to 1,500 watts of power. To pass the Technician Class examination, at least 26 questions from a 35 question written examination must be answered correctly. A Technician Class licensee who also has passed a 5 words-per-minute (wpm) telegraphy examination receives privileges in four long distance shortwave bands in the HF range (3-30 MHz) (Refer to Section 97.301).

Need to ask a local VEC or VE if they are still administering a tech exam with 5 wpm code. I thought they were. But will report back.

Our local VE sez:

Hi All

Technician = All privileges above 30 MHz

Technician with CSCE for 5 WPM code = All privileges above 30 MHz plus code
on
10, 15, 40, and 80 meters in the Novice sub-bands and voice privileges on 10
meters from 28.3 to 28.5 MHz.

Cautionary note = For the purpose of upgrading, the CSCE expires in one
year, although the Tech with code privileges will continue.

It's the government. Go Figure.

73, Harry

Incorrect and Outdated. Prior to the FCC restructuring of the Amateur
Bands, Tech Plus's could operate on HF. However, with the new rules in
place, you need to be a General class or higher in order to operate on HF.

"Let's all admit something.

"There's nothing good about drug use, we know it.

"It destroys individuals. It destroys families. Drug use destroys societies. Drug use, some might say, is destroying this country. And we have laws against selling drugs, pushing drugs, using drugs, importing drugs. And the laws are good because we know what happens to people in societies and neighborhoods which become consumed by them.

"And so if people are violating the law by doing drugs, they ought to be accused and they ought to be convicted and they ought to be sent up."

I haven't read it yet, but the National Enquirer is running a story in this week's edition that says it has hundreds of emails and answering machine tapes of Rush's drug dealing with his housekeeper. Apparently he encouraged his pushers to contact him by email during the show, saying that "emails aren't a distraction." How many employers would retain you after they found out you used their network to procure illegal narcotics? How much guts does it take to admit to what has already been published? Guts would have been going to rehab four years ago and then return to the air and being honest. Rush has only done the minimum required based on the information about him in the public domain. I would say that had Rush flailed himself with the same whip used against other in this position, I would have given him credit and had some hope that he would get beyond this. However I'm not hearing him say that he is a scumbag druggie who is responsible for the downfall of society who should be tired and set to jail. Now THAT would take guts.

He said a lot more than I would have ever guessed. Being the loud mouth that he is, I can't see him being done talking about it. From the recap I heard, he is claiming the authorities, do not want him to discuss details due to an on going investigation. Which sounds about right. True his drug abuse is hypocritical, but he's not looking for sympathy.

He didn't have to say a word, or he could have lied. I don't like the guy but he handled this a hunderred times better than someone like Bill Clinton would have.

What makes me LOL is people still defend Bill Clinton. LOL.

Or comments like this:

"Too many whites are getting away with drug use. Too many whites are
getting away with drug sales. Too many whites are getting away with
trafficking in this stuff. The answer to this disparity is not to start
letting [black] people out of jail because we're not putting others in
jail who are breaking the law.

"The answer is to go out and find the ones who are getting away with it,
convict them and send them up the river, too."

Including zillionaire radio hosts? Well, maybe no.

Or maybe you are referring to comments such as this:

"When you strip it all away, Jerry Garcia destroyed his life on drugs.

"And yet he's being honored, like some godlike figure. Our priorities
are out of whack, folks."

Listen Loser,

I don't even listen to the guy, yes he's a junkie, yes he's a hypocrite, he may
even be a criminal, but all I saying is he didn't hide or lie about.

Even though Morons like you have a difficulty understanding anything other than

Bill Clinton is hero.
And Limbaugh is a zero.

Morons like yourself have far less ability to critically think
that DittoHeads.

It too your mind is biased with hatred.

Take about a nazi - liberal.

Even though he's a hypocrite, drug abuse is not funny.
I hope he gets clean, and faces the same legal consequences anyone else would,
nothing more, nothing less.

I don't defend Clinton. Hubris was his downfall, just as Rush's will be. He lied about his consensual involvement with Lewinski under a suspect investigation. Clinton lied and was punished accordingly, severely by the right wing and the press. In fact, it still goes on today, as you prove so well.

Clearly, Rush learned from how Clinton mis-handled being caught.

Rush was caught. Just like Clinton. He did not admit this at all when he had the chance. Why? Because he obviously didn't want to admit that he was as capable of the very human sins that he accuses so many others of.

Clinton was not guilty of attacking others of having poor character and values 15 hours a week on the radio. Rush lied by omission. On top of that, he said things like:

"If people are violating the law by doing drugs, they ought to be accused and they ought to be convicted and they ought to be sent up."

You may be able to persuade the fans, but those of us who find this kind of behavior abhorrent on both sides of the fence will see through the nonsense.

Yes, especially since Rush was responding to the fact that "black
druggies go to prison far more often than white druggies do." But to the
liberal-bashing host, this was no reason to ease up on blacks.

> And, do you have a problem with this quote?

Again, only if Rush demands it be applied to him.

If he broke the law he should get the same treatment as anyone else.
I don't listen to him, but I heard his statement and he didn't pull a Jimmy
Swaggart or Bill Clinton. He's taking responsibility for his actions and not
looking for sympathy. what more do you want from him?

I don't have a problem with any of these quotes.

I posted them to show you that you are supporting a hypocrite.
Because Rush's show is fundamentally based on character, this is a
serious flaw.

Unless, of course, Rush demands that these statements be applied to
himself. If he does that, I will publicly retract the previous statement.

oh for pete's sake, it takes zero integrity to fess up when they have
the goods on you --he obviously sees his only way out is to curry
sympathy and go for 'treatment' something he has always ridiculed for
others

it is like the 'integrity' of Arnold admitting what is incontestable

I am not a fan, and I still won't listen to his show.
All this reminds me of the Clinton attacks.

Just remember Clinton didn't inhale.

Come on "I didn't inhale". and he still can come clean.

If? LOL.

"He said: "If people are violating the law by doing drugs, they ought
to be accused and they ought to be convicted and they ought to be sent up."

Rush has already admitted to millions of people that he has been,
"doing drugs." He may have violated his own law further by purchasing
them illegally as well.

Rush is guilty of the very behavior that he accuses the liberals of
15 hours a week. This clearly makes him as morally corrupt as the
targets he has made a fortune attacking.

I have not given you any answer to my position on this. Only Rush's.
If he is to be believed from here on out, he will have to insist that
his views be applied to him as well.

>>>And, do you have a problem with this quote?

You said it, I didn't. Again, you are fighting a loosing battle. Rush
didn't say that only dealers and trafficers should be "sent up."

Rush said: "If people are violating the law by DOING DRUGS, they
ought to be accused and they ought to be convicted and they ought to be
sent up."

[emphasis added as a courtesy for your difficulty with memory]

Uhm, don't celebrate yet DPD. It's not Christmas morning. Rush admitted he was addicted to "pain medication" - Not the type that hippy dippy libs are smoking in San Francisco. So he may not be convicted of anything illegal yet. He might be in the future, who knows. If he is, I'm sure he'll pay the price. Then you guys can really get off.

It didn't take any guts it took an investigation. Rush knew the truth
would come out sooner or later. Already his woman pusher was saying Rush
bought enough pills to "Kill and elephant." I like that analogy. But the
truth is those drugs may have killed an elephant and here's a link to the
elephant in question.

http://www.rnc.org/

> I don't know how Clinton supports can even comment on this.

How can Rush comment on Clinton's sexual life when Rush has been married
five times and cheated on some of them with young women.

No, integrity would have been Rush coming out six months ago before
the investigation was made public. That would have shown guts. What Rush is
doing now is throwing himself on the mercy of the court of public opinion.
It's an ass saving move to get sympathy. Rush is no better than any other
drug addict, he's just famous.

John

I think it was still based on a lie. I know people with herniated disks who have gone through back surgery. Yes, they have ongoing pain. They don't however run around swinging golf clubs. They can hardly manage to take out the trash or do dishes. Rush brags about his golf outings and his game. Even with a big dose of narcotic onboard, he wouldn't be able to play golf, certainly not with any skill, power, or control. Excruciating back pain subsequent to "failed" surgery precludes playing golf. Let's face it, he lied again and rehab is unlikely to work.

Even if you have a prescription (which he didn't) it is illegal to take
drugs in a manner that they weren't prescribed. Drug abuse in itself is
illegal, not just the trafficking in drugs. One can not even posses
controlled substances if they are obtained illegally. The first sentence
says: "Too many whites are getting away with drug use." Rush knows that use
is illegal when it is outside scope of legitimate medical practice.

Nice try. However, trying to deflect Rush's actions by trying to
make this about me is futile. It may be sweet, in a naive kind of way,
but it doesn't change the fact that Rush has proven himself to be
capable of the very things he attacks others of. Nor does it change the
fact that you immediately deflected Rush's actions but attacking
possible responses to Rush's admission.

I know you'd like me to be a liberal, then you could write off the
facts as something about my character. I have as much distaste for
liberal hypocrisy as Rush's.

I think entertainment, like that of Limbaugh and Franken, which
masquerades as political/social discourse is morally wrong. Franken may
get a point or two for claiming to be entertainment, but there are
plenty of liberals who like to keep the line more blurred.

Ahhhh, you've unearthed the philosopher's stone.
Any left-over scraps to spare for me?
I'm in great need and will collect.
Are you in the Call Book?

Yep, takes a lot of guts to admit something the cops are about to nab you
for. Yep lots of guts. Wonder where those guts were for the last five
years? What a bunch of hippocritters you folks are and Rush was the head
hippo.

Oxycotin is an opiate far stronger than heroin.

I'm sure Rush wished he had smoked hippy dippy dope
instead of getting addicted to "hillbilly heroin".

They had his maid on a wire and he was caught big time. Lying wouldn't work
or he would have done it. It's not like he has any problems lying.

Trafficing charges are due to possession of large volume.
Above a certain volume, you are classified as a trafficer not a user.
```

I'm not saying he is a hero, far from it, he's a criminal. I just didn't think he would come clean. I thought he would just keep dancing around the subject. He easily could have. His listeners would have believed anything, same as Clinton's supporters believe anything.

Not really. I mean, did he really have a choice??? He's being investigated
for drug crimes. He broke the law! What other choice does he have but to
come clean before investigators do it for him. Geez, some of you are really
out there in your logic.

No he doesn't have any problem lying. This is precisely why I'm so shocked. He is very good at putting a spin on anything and everything. He had the option to remain silent ,this is why I feel it took guts. I was sure he would simply pull a Clinton knowing the supporters would believe anything.

Screw Rush. I hope he suffers through withdrawal and relapses once he gets out. I hope drugs mess his life up totally. That hate-monger and hypocrite deserves no less.

Where are the 20 million idiots that listened to a druggie talk crap on the radio all these years? They must feel like absolute fools having believed someone under the influence of a chemical substance.

Yes, that would have bought a half-decent ham shack. Or a fairly nice used automobile. New paint for the house. But after a year, five, or ten, what was purchased would be old and shabby.

In ten years, I'll still be able to say that I fought the good fight, got some people to hear what I was saying, and 2100 residents of California thought enough of me and my words to elect me Governor. That will never go away or get dingy.

I came in 30th behind the Governor-elect. That's in the top quartile of those who ran. And 35 million ahead of those who didn't.

Next month I can work a few more hours and buy that ham shack, car, or paint. But I'll never again in my lifetime get a chance at running for Governor.

Bless you all for your kind thoughts...

Jim

It's one thing to be a 'druggie' who takes pills for recreational use and becomes addicted and one who has become addicted by taking a prescription medication that was originally prescribed for oneself.

It happens to a lot of people every year, and there should be no social stigma attached for that happening.

Unfortunately Rush is in a high profile position, and there will certainly be those who will attack him.

The fact is that he's just an ordinary human being who became hooked on a doctor prescribed medication that was supposed to help him.

All I can say is: Good luck Rush, and best wishes.

Did you happen to listen to his whole statement?
He said a lot more that I'm an addict.
He had a lot of choices. I'm not saying he's a saint.
He's a criminal , but he laid his cards on the table for all to see.
and didn't whine about it. I'm not a fan of Limbaughs, and he should be punished
for his crimes, but I feel he handled it well,far better than Bill Clinton did,
and he was our President.

He never offered any prayers to those he trashed everyday, he'd be the first one to say, "They made their decision, no one forced them" Or "Everyone should be responsible for their own actions and pay the price". In other words he "should have just said no".

My doctor once precribed hydrocodone for me for pain. I went to the pharmacy, presented my prescription and my insurance card, and paid my deductible. That is the legal way to obtain prescription drugs. Picking them up in an Exxon parking lot, or a Denny's parking lot is not the legal way to obtain prescription drugs. Obtaining prescription drugs without a prescription is illegal, plain and simple. It is in no way morally superior to illegally obtaining marijuana, crack or any other drug. Remember what the Bush administration taught us. Buying illegal drugs supports terrorism. Rush supported ALOT of terrorism over the last several years. If reports are anywhere near accurate (and they have been so far) he's spent more than enough money to pay for 19 plane tickets. Put that in your hippy dippy pipe, smoke it, and see if it gets you high.

He did hide it for years and only admitted it when he was caught and it hit the papers. I could care less about Clinton, if he'd had any brains he should have told them consensual sex between adults was none of their damn business.

What's the difference? They're both addicted. They both know the dangers of addictive drugs. They both didn't know when to say when. They both succumbed to human weakness.

With the amounts he is alleged to have he would be considered to be trafficking in drugs. That's what you or I would be charged with if caught with those amounts.

Yeah Mega Dittos.... ROTFLAMO.. I had to wipe a tear from my eye.

I think the air-waves should be junkie free ALL the time. Well it might be
for 15 years if the fat windbag gets what he deserves

I am thinking of starting a campaign to make it illegal to allow drug
abusers access to the air waves.

I expect all you "conservatives" will want to join in?

B.

Comparing Grass to Narcotics use is a joke. The stuff Rush is on is like heroin,
which make him something even marijuana users look down on, a junkie.
They stopped being "pain medication" when he purchased them without a
prescription.

Guts !!! the fat windbag has been lying for 5 years, it took the Enquirer
to out the junkie hypocrite otherwise he would STILL be lying.

And he hasn't confessed to ANYTHING yet... he didn't admit to illegally
obtaining the drugs etc.

This is all just a move by his excellent Attorney to help in the plea
bargain...

Guts !!! ROTFLMAO.....

I'm not trying to attack you (even though ignoring the nazi-liberal shot is
hard), BUT his lawyers most likely said if you don't get in front of this
issue by putting your into detox the law WILL fall on you like a ton of
bricks.
I cannot call his act noble -- just the path of least resistance.......

Just wait to the withdrawal kicks in, I worked in rehab and it is not pretty.
he'll wish he'd "just said no".

Didn't hide or lie?... so what has he been doing for the last 5 years you
incredibly stupid boy, you are only hearing what you are hearing because he
was OUTED ..

He has yet to acknowledge he illegally bought drugs? Why?

Because he is doing his best to keep his own ass out of jail just like the
complete hypocrite we always knew he was.

He knows that the feds aren't going to take him out of some county club-like rehab facility. This give his legal team 30 days to do damage control.

Well if he 'fessed up to the rest of it, it would be a good start and he
only "confessed" AFTER he was outed.

Amazing all these people who "don't listen to him" are popping up eh?

They couldn't be ditto-monkeys is disguise? Naw.... but they do have the
ditto-monkey habit of screeching "clinton" in answer to every conceivable
subject so you have to wonder :)

Shit I wouldn't want you to wait :)

Yeah I'll be pulling for him too... pulling for him to get the same
"compassion" and the same "understanding" he has given others over the
years.

I think that is fair... don't you?

A "druggie" is someone who habitually uses drugs - look it up in the
dictionary. Rush is, by his own admission, a druggie. Help me out here.
Which other laws is it OK to break? Why do some people stick to the
prescription and not get addicted? Rush went out and bought this stuff on
the streets, from drug trafficers, illegally.

"It's so important for Americans to know that the traffic in drugs finances
the work of terror, sustaining terrorists, that terrorists use drug profits
to fund their cells to commit acts of murder. If you quit drugs, you join
the fight against terror in America."

President George W. Bush

> It happens to a lot of people every year, and there should be no social
stigma
> attached for that happening.

Alot of people commit murder every year.
Alot of people rape every year.
Alot of people molest children every year.

All of it is against the law, and none of it is acceptable. Either you live
by the rule or law, or you do not. It is as simple as that.

> Unfortunately Rush is in a high profile position, and there will certainly
be
> those who will attack him.

Not the least because he is a hypocrite and has spoken publicly on this
topic.

> The fact is that he's just an ordinary human being who became hooked on a
> doctor prescribed medication that was supposed to help him.

Rush is no ordinary human being - he is the master of hate radio. For that
reason, I could not care less what happens to him.

Oh I see so the limbot was getting spaced on a much BETTER class of
drugs... yeah I see your point... like it's not like he's a REAL junkie
or anything not like those junkie libs... ROTFLMAO.....

This gets the award for the stupidest "limbot excuse" so far....

But I have no doubt there will be ones to beat it.

"And the laws are good because we know what happens to people in societies and neighborhoods which become consumed by them. And so if people are violating the law by doing drugs, they ought to be accused and they ought to be convicted and they ought to be sent up."
RUSH LIMBAUGH

"When you strip it all away," Rush had said of the Grateful Dead guitarist, "Jerry Garcia destroyed his life on drugs. And yet he's being honored, like some godlike figure. Our priorities are out of whack, folks."

---

As if Garcia was honored for his drug addiction rather than his music. Can we now say that Rush is honored for his drug addiction. Hypocrisy rules the day from partisan elites like Limbaugh and his ditto brains.

-JC

What do you want to bet that the fat hypocrite cops a sweetheart plea?

This "confession" is only part 1 of a scripted play.

Unfortunately the lying junkie will never do the time he was SO adamant
everybody else do.

Doesn't matter, the brain-dead ditto-monkeys will find a way to blame it
all on the liberals and clinton. Just so long as the sponsors don't mind
their products hawked by a convicted drug dealer he will be back ranting
and raving... the difference is that anybody not brain washed will know
him for the lying hypocrite he is.

Yeah I have no doubt that Garcia's family appreciated his "compassion" and
"understanding"...

But remember he was likely high when he said that so we can't REALLY hold
him accountable... can we?

Excellent. The more self-induced pain for pigboy, the better. Only he is to
blame for his drug abuse. Maybe he'll learn a little sympathy for other
people with real problems.

Not looking for sympathy? Ah ... ok... lol...

And it's BS about the authorities it's his frigging liberal lawyer
telling him to keep his fat yap shut. He only did what he did because he
knew that the editor of the Enquirer was going to be on MSNBC this
evening displaying some VERY interesting emails.

He is a coward, a liar and a hypocrite... everything has to be squeezed
out of him.

another hater did!!!

# 3001. 73 Magazine Says "73 and QRT"

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-10 23:32:49 UTC
From: janorfolk@yahoo.com
Message-ID: <c6a70d55.0310101532.63b491f3@posting.google.com>
Source record: 62671

From the ARRL Letter October 10:

73 MAGAZINE SAYS "73 AND QRT"

After completing 43 years of publication, 73 Amateur Radio Today magazine is calling it quits. Plans to publish a joint October/November issue fell through this week, and the September 2003 issue was the magazine's last. According to self-proclaimed "El Supremo and Founder" Wayne S. Green II, W2NSD, it was a simple matter of economics.

"After failing a last minute effort to collect on some larger accounts receivable we decided yesterday to throw in the towel--that the September issue will have to be the last," Green told ARRL October 9. "SK after 43 years of publishing."

The first issue of 73 was published in October 1960 from what Green --a former editor of CQ--once described as "a small, dingy apartment" in Brooklyn, New York. Since the summer of 1962, 73 has been based in Peterborough, New Hampshire--Green's home state. The magazine was a pioneer promoter of SSB, FM, solid-state, easy construction projects and the marriage of personal computing and Amateur Radio. His interest in microcomputing led Green in 1975 to found Byte, a magazine devoted to the then-nascent and largely do-it-yourself computer hobby.

At the peak of its popularity in the 1970s and 1980s, individual issues of 73 totaled more than 300 pages of ads, articles and commentary. Heading each issue was Green's inimitable "Never Say Die"--some would say never-ending--editorial, in which he rarely missed an opportunity to tweak the ARRL and his magazine competitors for their perceived shortcomings.

QST Editor Steve Ford, WB8IMY, says 73 published his first article in the 1970s. "I was saddened to hear that 73 has ceased publishing," Ford said. "Wayne's excitement about the growing amateur FM repeater phenomenon at the time was infectious."

Green's 73 editorials and regular round of personal appearances originally concentrated on Amateur Radio and his ideas to improve, advance and grow it. In recent years, however, they've veered into conspiracy theories, cures for cancer, AIDS and other ailments and Green's proliferation of book titles on those topics.

Green says he'll continue his essays on his Web site http://www.waynegreen.com/ "for those subscribers who mainly bought the magazine for them." He told ARRL that no definite

arrangements have been made yet about how to handle outstanding 73 subscriptions.

CQ Publisher Dick Ross, K2MGA, said he takes no joy from the passing of 73. "The loss of any publication serving Amateur Radio leaves all of us a bit poorer," he said. "Thank you, Wayne, for 43 entertaining, informative, sometimes infuriating, and always interesting years of 73. We'll genuinely miss it."

He HAS been lying for 5 years... you obviously meant to say "could have
kept on lying" didn't you?

Amazing ANOTHER defender who doesn't "like the guy" and he even got the
obligatory "clinton" reference in.

Go away little ditto-monkey at LEAST you could try and be honest unlike
your lying hypocrite junkie hero. But I guess as a ditto-monkey you can
only do as the "great man" has done... sad.

B.

Another one who is "not a fan" just a "independent observer" eh? . This
is amazing ... ROTFLMAO

It appears that limbot had "no fans" and nobody "listened to him" isn't
that a hoot.

But the ditto-monkeys are so stupid that they can't even lie convincingly
because they just can't stop themselves with the "clinton" obsession.

Thank God. This magazine was boring anyway. I think I only bought one.
I also cancelled my subscribtion to QST because I got tired of them
always talking about the ``Good ole Days" and nothing really else seemed
to interest me that much.

Hopefully there is enough evidence to implicate him for drug trafficing.
Hopefully the violation falls under MMS laws, then there is nothing
his lawyer, or judge can do about his sentence. It will be mandatory
federal prison term.

It's OK; Jim is a Democrat, and thus wants his hatred (and that of the
Democrat Party) to be as widely broadcast as possible, Frank.

Which is why Jim's Democrat Party keeps losing the elections, BTW.....

I'm not much of a partisan, but if "hate radio" were a Federally controlled narcotic, Rush Limbaugh's show wouldn't even look like half an aspirin compared to some of the shortwave broadcasters.

He has stated that half of his listeners hate him.
Look at Howard Stern. They did a poll once a few years back and
discovered the average Howard Stern FAN listened for 1/2 to 1 hour a
day. The average Howard Stern Hater listens to him for 2 to 4 hours
LOL.
Hey, it works for Pro Wrestling.

It going to be ugly, I don't think his ditto-cam will be broadcast this one.
30 days is very optimistic, almost impossible if he had that large of a habit.
He will probably be on methadone for a quite a while.

Not fer nuthin' but the majority of people that I know that have gone into drug treatment programs have come out more screwed up than they were when they went in. They came out drug free but were really screwed up in the head in general. The ones I know that just decided they must quit had a rougher time dealing with it initially but seemed to have better sense afterwards than the ones on methadone.

It a good point. I think he was probably more concerned about getting busted while still using, I doubt he flushed his whole stash when the story hit, if he's an addict He wouldn't be able to function without his fix . If I knew he was going to make a statement, I would have bet all he would said is "under the advise of my legal counsel and the authorities, I can not talk about this until the investigation is complete", and nothing else.

However, there is a Tech with HF privileges even though the license only
says Technician.

Any Technician who passes the 5wpm Morse code test DOES have HF privileges
on 10meters, 15 meters, 40 meters, and 80 meters. Just check the FCC rules.

If you pass the 5wpm test you DO get some HF privileges. A handy reference
is the ARRL Publication "Now You're Talking" or the Gordon West study guide
for Technician. Either one will show you exactly what privileges you will
have on HF after passing the Technician and 5wpm tests.

That is incorrect. Even though the Tech Plus license does not exist as a class, Technicians who pass a 5wpm code test receive the same privileges as the Tech Plus licensees did. I.e. Voice, CW, and data on 10 meters, CW on 15meters, 40 meters, and 80 meters. This is explicitly stated in the latest FCC rules.

You make a great point. All these people banging on him seem to have an obsession with him. The guy is an entertainer. I can't listen to him, it not my style of entertainment, but I say one thing in his favor and these wackos jumping all over me. I guess Limbaugh has the Anti-Ditto Monkeys trained better that the real Ditto Monkeys.

The VE teams must be prepared to administer the 5wpm code test at the exam.
It is up to the applicant whether they will take the written exam and codes
test at the same or different sessions.

Dee D. Flint, N8UZE
VE for ARRL and W5YI

WRONG. Go read the rules. Any Tech who passes the 5wpm gets the same HF privileges as the old Tech Plus and Novice classes.

I am a VE and also teach license classes for prospective licensees. Just read the latest copy of ARRL's "Now You're Talking" or the Gordon West study guide.

Just as many times as I must tell you that you are WRONG, WRONG, WRONG.
Techs who pass 5wpm get the old Tech Plus/Novice HF privileges. Says so
right in the FCC rules and all the up to date study guides.

Dee D. Flint, N8UZE

I didn't want to get into this, One of my best friend was forced into rehab, by his parents in our freshman year in college. In rehab he met several hard core addicts, one who ended up becoming his girlfriend. He went down hill quick within two years he killed himself. Over twenty years later it still bothers me.

I know, it is difficult to see your hero become human. So, in all
fairness, you can find it on the Lexis/Nexis search. Just put in 'Rush
Limbaugh,' 'drugs' and 'addict.'

That should do the trick.

Well, Mojamba, there is one source. Like I said, to avoid confusion
you can look it up in Lexis Nexis.

Do you think that Clear Channel will make him pee in a cup everyday? Even
Home Depot doesn't hire druggies.

I left out a not

"Because I'm not trying to say he's not a junkie" is what I was trying to say.

Thanks for correcting me, I should have read it before sending it.

If you're an authorized VE, they should revoke your VE status for
telling NEW Techs that they can operate on HF.

And after restructuring. Since I am teaching a class, I have read the current FCC rules and the current ARRL "Now You're Talking." Technicians who pass a 5wpm code test get the old Tech+/Novice HF privileges.

I choose to stay up to date on rules and regulations so that I can effectively teach and administer the licensing tests in accordance with FCC requirements. If you choose to continue to hold to a position that is clearly incorrect as shown by the FCC rules, that is your problem.

Please list the paragraph in Part 97 that states Technicians who pass 5wpm
no longer have HF privileges. Paragraph 97.301(e) clearly states they DO
have HF privileges in the 10 meter, 15 meter, 40 meter, and 80 meter bands.

Paragraph 97.301(e) clearly lists the HF privileges for any Technician who
has passed the 5wpm code test.

So the brick wall is you and you have yet to state where you get your source
of information. It certainly is not the FCC rules.

## 3051. France, keeping in mind its recent history

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-11 03:19:16 UTC
From: BIG********AL*********
Message-ID: <vod1ut6mjm0205@corp.supernews.com>
Source record: 62745

The Complete Military History of France

- Gallic Wars
- Lost. In a war whose ending foreshadows the next 2000 years of French history, France is conquered by of all things, an Italian.

- Hundred Years War
- Mostly lost, saved at last by female schizophrenic who inadvertently creates The First Rule of French Warfare; "France's armies are victorious only when not led by a Frenchman." Sainted.

- Italian Wars
- Lost. France becomes the first and only country to ever lose two wars when fighting Italians.

- Wars of Religion
- France goes 0-5-4 against the Huguenots

- Thirty Years War
- France is technically not a participant, but manages to get invaded anyway. Claims a tie on the basis that eventually the other participants started ignoring her.

- War of Revolution
- Tied. Frenchmen take to wearing red flowerpots as chapeaux.

- The Dutch War
- Tied

- War of the Augsburg League/King William's War/French and Indian War
- Lost, but claimed as a tie. Three ties in a row induces deluded Frogophiles the world over to label the period as the height of French military power.

- War of the Spanish Succession
- Lost. The War also gave the French their first taste of a Marlborough, which they have loved every since.

- American Revolution
- In a move that will become quite familiar to future Americans, France claims a win even though the English colonists saw far more action. This is later known as "de Gaulle Syndrome", and leads to the Second Rule of French Warfare; "France only wins when America does most of the fighting."

- French Revolution
- Won, primarily due the fact that the opponent was also French.

- The Napoleonic Wars
- Lost. Temporary victories (remember the First Rule!) due to leadership of a Corsican, who ended up being no match for a British footwear designer.

- The Franco-Prussian War
- Lost. Germany first plays the role of drunk Frat boy to France's ugly girl home alone on a Saturday night.

- World War I
- Tied and on the way to losing, France is saved by the United States. Thousands of French women find out what it's like to not only sleep with a winner, but one who doesn't call her "Fraulein." Sadly, widespread use of condoms by American forces forestalls any improvement in the French bloodline.

- World War II
- Lost. Conquered French liberated by the United States and Britain just as they finish learning the Horst Wessel Song.

- War in Indochina
- Lost. French forces plead sickness; take to bed with the Dien Bien Flu

- Algerian Rebellion
- Lost. Loss marks the first defeat of a western army by a Non-Turkic Muslim force since the Crusades, and produces the First Rule of Muslim Warfare; "We can always beat the French." This rule is identical to the First Rules of the Italians, Russians, Germans, English, Dutch, Spanish, Vietnamese and Esquimaux.

- War on Terrorism
- France, keeping in mind its recent history, surrenders to Germans and Muslims just to be safe. Attempts to surrender to Vietnamese ambassador fail after he takes refuge in a McDonald's.

The question for any country silly enough to count on the French should not be "Can we count on the French?", but rather "How long until France collapses?"

"Going to war without France is like going deer hunting without an accordion. All you do is leave behind a lot of noisy baggage."

Or, better still, the quote from last week's Wall Street Journal: "They're there when they need you."

This is from the W5YI website.

http://www.w5yi.org/AmRadio.htm#TECHNICIAN

TECHNICIAN

Almost all radioamateurs begin their ham career as a "Tech." The
privileges of a Technician Class operator license include operating
stations while transmitting on channels in any of 17 frequency bands
above 50 MHz with up to 1,500 watts power. It also allows access to

the two most popular ham bands, 2 meters and 70 cm ...otherwise known as "450" (MHz.). To pass the Technician Class examination, at least 26 multiple choice questions from a 35 question written examination must be answered correctly.

There are a total of 384 possible questions in the pool from which these 35 questions are drawn. All questions in the various question banks are known and widely published. There are no secret questions. The Technician Class is the most popular license with about one-third of all radioamateurs holding this license class. You will find Technician study materials here and here.

TECH PLUS
The next step used to be called the "Technician Plus" class. This level
was eliminated as a separate operator class on April 15, 2000 -- but not
the privileges. A Technician Class operator who passes the 5
words-per-minute Morse code (Element 1) exam still gets CW (telegraphy)
and 10-meter voice privileges in four long distance short-wave bands in
the HF range (3-30 MHz), the same as the Tech Plus operator did
previously but they do not get issued another license. Their
authorization to operate on four CW bands below 30 MHz is conferred by
the Certificate of Successful Completion of Examination (CSCE) issued by
the VE (examining) team.

And like the Novice and Advanced Class, operators who held a Tech Plus
license on April 15, 2000 may modify their license (change their
address, call sign or name) indefinitely. Their new modified Tech Plus
license will still show the Tech Plus Class when it arrives.

But (unlike Novice and Advanced Class operators) Tech Plus licensees who
renew their licenses will be issued a Technician Class license. Again,
it still authorizes HF privileges just as the Tech Plus license did
previously. Their authorization to operate on four CW bands below 30
MHz and 10-meter voice segment is conferred by the (1.) Certificate of
Successful Completion of Examination (CSCE) previously issued by the VE
(examining) team or (2.) a previous copy of your Tech Plus license.

Wayne and his magazine was without doubt ham radio's most
amusing read. His Editorials were always right on target - often
his prognostications were YEARS ahead of their time.

I hope he makes an appearance on Art Bell's show to discuss
the 73 Magazine demise and other commentary soon!

This page is out of date as it is obviously pre-restructuring. It discusses the three license classes that are no longer tested for or issued as new licenses (i.e. Novice, Tech Plus, and Advanced). That information is superseded by the FCC rules. So go buy yourself the latest rulebook or the latest study guide published by W5YI (i.e. the Gordon West book).

"A Technician Class operator who passes the 5 words-per-minute Morse code
(Element 1) exam still gets CW (telegraphy) and 10-meter voice privileges
in four long distance short-wave bands in the HF range (3-30 MHz), the same
as the Tech Plus operator did previously but they do not get issued another
license."

Which is what I have been stating and the FCC rules say. Techs who pass
5wpm do get some HF privilieges.

I have for sale a Swan VX-2 VOX plug-in unit for the Swan transceivers (500C, etc). It looks really good. I have not used or tested it as I sold my 500C before I tried it. (I do not operate VOX). Pictures on request. If you are interested, please contact me by email or give me a call at 972-231-7511. I'm in the Dallas, TX area and will pay the postage to send it in the US via USPS. Asking $35. Tnx...Fred, W5HTR.

> Was intended for alt.horology, a reference to pallet stones.

A most unconvincing attempt to cover up a major faux pas.

Your original post said:

"I wish to make a master oscillator for the shack, and am considering
cutting my own crystals in order to reduce ageing. Is there a source
of raw material?

Also, for temperature compensation, I am considering the use of bi-metals.
(I've never seen one, but what is the mechanism used in Oxley's
Tempatrimmer?)"

Let us examine this a little:

"make a master oscillator for the shack". Well that could be a construed as
referring to the 'balance wheel' in a clock (or watch) escapment but only by
a leap beyond the credible.

"own crystals in order to reduce ageing" The "crystals" used in the pallet
of an escapement are using usually synthethtic ruby and, while the changing
of their profile can contribute to a loss of accuracy, the 'ageing problem'
is wear on the escape wheel and, while this is related to the 'cut' of the
pallet stones, other aspects of the system accuracy determine the various
profiles in this area (in particular the need for the escape lever to
provide the impetus to the 'balance' wheel).

"I am considering the use of bi-metals." The escape mechanism in a clock (or
watch) is often temperature compensated but the mechanism is either on the
"balance" wheel (the radius is changed to vary the angular momentum) or the
balance spring (the tension being varied). Neither of these align with the
mechanism of a tempratrimmer.

As regards accuracy, the limits for a certified chronometer are -0 +5s per
day, if memory serves me correctly. There are far more practical ways to
achieve better than this without resorting to cutting pallet stones.

No Gareth, you were just trying to start another thread where you didn't
understand the topic. Having realised your error you are now trying to
divert the thread- as it happens into an area where your knowledge seems
equally challenged.

Sorry about the diversion! However it is quite important that a person be
rock solid on knowing what they do and do not have as privileges.

However to your questions.

> [snip]
> I know alot about electronics but nothing about amateur radio, nor do
> I know anyone who does, so I hope this is the best newsgroup for info,

I strongly recommend joining a local club and getting involved with them.
There should be plenty of people willing to help and even let you try out
their gear to get a feel for it. Also it is kind of nice to have someone
mentor you through your initial CW contacts. You should be able to find a
club by checking the ARRL website. If there appears to be nothing there,
use an internet search machine and type in the name of your nearest medium
to large city with the words amateur radio. For example, when I moved into
this area, I typed in Detroit area amateur radio and found a club in
the nearest suburb to where I lived.

> I plan to start off with low-power CW and need to know what equipment
> I'll need to get started. I searched the archives, but did not get
> much solid info.
>

Minimum:
Radio, antenna, and straight key. The antenna will need to be matched
to the frequency on which you will be operating.

Optional
Multiband antenna with an antenna tuner, electronic keyer and paddle.

> I plan on getting a basic "learning transceiver" off eBay to begin
> with, then after I know what options I need and learn more, I'll get a
> new one.
>

Unless you are an experienced eBay user, I would recommend joining a local
club and buying of a local club member or getting one of them to advise you

and buying at a local hamfest.

I've gotten good stuff off there BUT "It worked the last time I turned it on" can also mean "before I dropped it down the basement stairs". eBay is very much a buyer beware situation.

> What features will I need to be able to start to do low-power CW, and
> is there a preferred brand or model to look for?

Low power CW transceivers are often only single band with almost no additional features. But they are simple and easy to use. I hear that MFJ makes some good ones.

Actually, I recommend getting a used standard HF transceiver. You will have a decent selection of features to try out and it will be ready to go as you get more experience and when/if you decide to upgrade. It can be used for the 10 meter voice & data modes that you will be eligible for as well as the 15m, 40m, and 80m CW privileges that you will have. Kenwood, Icom, and Yeasu are all good brands. I would personally recommend something new enough that it doesn't use vacuum tube finals as they require that you tune up the radio itself before transmitting plus if you don't follow proper procedures, you can easily damage those tubes. On the other hand, many new people have started successfully with older tube type radios.

I can recommend the Kenwood TS-130 series, TS-140 series, TS-430 series, TS-440 series among the older, out of production radios. Also a nice current production radio that you should be able to easily find used at a reasonable price is the Kenwood TS-50 mobile transceiver. These should all be available at reasonable prices. I'm not as familiar with Icom or Yeasu but they made similar radios. There was a Yeasu 757 series (I think) and a 767 series that were both well thought of.

Again I recommend finding a club and getting the help of an experienced ham. Plus in a club there will be different people personally experienced with radios from different makers and you will have the opportunity to try some of them out. Most hams are friendly people and will gladly help you learn about equipment (and show off their own!).

Perhaps we should call him Nero, with everything burning up around him he
just keeps on fiddling about.
Alternatively we could call him Thomas as in Crapper; a tribute to the
quality of his posts.

I have to disagree with John. The loss of 73 magazine is a very minor
event in the history of amateur radio. On the other hand, the loss of
"Ham Radio Magazine" 10+ years ago was truly a tragic loss to amateur
radio. Compared to "Ham Radio Magazine", 73's technical articles were
generally trivial and often didn't follow good engineering practice.
Often, the construction articles would not work as described and most
mistakes were never corrected.
Although some were entertaining, I found Wayne Greens editorials to be
sensational and they contributed nothing to the community or the radio
art.
I'm sorry to see any amateur radio publication fail but I don't think
the loss of 73 will amount to much in the total scheme of things.

I remember when Wayne was trying to get rid of the top two megs of 2 meters.
146 to 148 Mhz. Because it wasn't being used and served no purpose.

Shortly thereafter FM came along and the 'rest is history'.

I dropped his rag years ago.

Re: 73 MAGAZINE SAYS "73 AND QRT"

Sad, in a way. But how much of 73's problems were caused by the shrinking world of hamdom in the U.S., and how much was caused by the reduced segment of ham subscribers caused by the narrowness of the self-proclaimed "El Supremo and Founder" Wayne S. Green II, W2NSD?

Over the years, I subscribed and had two articles published in 73 - an honor that paid. But Wayne didn't like us brain-damaged extras and berated CW operators at every opportunity. Hey, I could take that. But, then he didn't like contests either, so Wayne refused to publish contest information in his magazine. Those of us that wanted to know what contests were on, or at least what exchange was expected on contest weekends, had to take another publication to find out. By the time I stopped subscribing to 73, it had become a mostly no-code VHF enthusiast's publication - with the downbeat editorials of Wayne Green providing much of its contents. I still hate seeing
73 Magazine go down for good, even though I also wonder how it managed to stay in print as long as it did.

Hang in there CQ. You too, QST.

In this case, we are compassionate. Just like Bush, and Rush. See? We are being compassionately conservative.

Personally, I have compassion for those Rush used in order to get rich. I don't have compassion for people who make money from attacking others with half truths and distortions.

I don't think the events are comparable really, but Rush is certainly a pro.
I would have never expected him to break down. But we know inside this guy
is a wreck. I have problem with him getting a light sentence or no
sentence. I should think that he and his followers should address the
double standard that exists on the right regarding the drug issue. Poor
black people get addicted to drugs with far less resources to overcome the
problem. Yet we put them in jail in large numbers instead of

rehabilitation. It's a hypocrisy that I hope Rush comes clean on.

Yes. I do. All of these squawking heads who make money off of
inflaming peoples prejudices and fears are a cancer to a thriving democracy.

They are simply because they are entertainment disguised as political
analysis. In many ways our mainstream media does the same thing.

"Editorials"...?!?! You mean acidic rants, perhaps?

Many of his "prognostications" were echos of professional
engineering journals, presented in such a way as to wow and awe the
Amateur community that otherwise was unaware of those writings.

> I hope he makes an appearance on Art Bell's show to discuss
> the 73 Magazine demise and other commentary soon!

They'd go well together.

I don't think it was Wayne that wanted to recycle the top of 2 meters,
though I think Popular Electronics proposed it in the late sixties.

In the early seventies, Wayne proposed a license that used the top portion
of 220MHz. He proposed that it be an amateur license, but with little or
no exam, but it didn't have much connection with ham radio. He did
claim that 220MHz was underused, and it was a the time, which is why
the EIA wanted the same slice of the spectrum for the "Class E Citizen
Band".

Decent people actually feel sorry for the guy, and the hatred from the
Left that continues may cause a backlash among better people, leading
many who wouldn't ordinarily care for Limbaugh to be sympathetic and
to despite the little left-wing scum and their continued hatred.

As Dollars Come In, So Goes Iraq

Vital Currency Deliveries Present Logistical Challenges

By Bradley Graham
Washington Post Staff Writer

Friday, October 10, 2003; Page A23

Once or twice a month, several armored vehicles loaded with crisp $100 bills and smaller denominations leave a New Jersey vault for Andrews Air Force Base.

There, the currency, shrink-wrapped in bricks and stacked on pallets, is transferred to a military cargo plane.

It is flown directly to Baghdad, where it is used primarily to pay Iraqi government salaries and pensions.

A single flight has carried as much as $550 million.

Although the Pentagon is accustomed to sending sizable amounts of cash overseas for various expenses, U.S. officials said the shipment of funds to Iraq since April constitutes the largest physical movement of U.S. currency abroad.

"We've never done anything of this magnitude," said a senior Pentagon official, who spoke on condition of anonymity.

I find it interesting that when right wingers say something about a person or subject, it is seen as the absolute truth. Some will admit that statements may be frank, even harsh, but they are justified. There is no intent to vilify. Right-wingers are just speaking the truth in an effort to help those who are headed down the wrong path. However, when the same hash truths are applied to them, it is suddenly hate. The words are venomous and hurtful.

Dr. Laura calls women in need of help "whores" and "sluts." Their transgression might be marrying a much older man, sleeping with a married man, or sleeping with a man while the woman is still married. No excuses are accepted - none. However, when her nude pictures hit the internet and people found (though court records and other public documents) that she did these things, it was evil to call her a whore. She said that she was a victim of the feminist movement and had no moral compass. So, her calling someone a whore is tough love and therapeutic. It wasn't judgmental. When the same words are used to describe the same behavior in her, they are heartless and cruel.

The same thing is happening here. When Rush condemns drug users, he is just being honest. When Rush's words are used to describe his drug abuse, they are simply hate filled attacks. Go figure.

Well, you have to admit there have been a few. Namely those where the
poster says "I hate him". Hell man pick a public figure. Depending
on their politics you'll find folks on both sides of the line that
"hate" them.
And the cycle will go on. All of the current statements regarding
Limbaugh will be thrown back in the same faces whenever the next high
profile leftist trips or stumbles then when the next high profile
conservative trips up etc etc etc.

Your desperation to score points has blinded you.....

WRONG! The ageing problem when NOT using pallet
stones is wear on the pallets themselves, a problem in the
two clocks that I have restored recently. The NEGATIVE NERDS
who seem to be my cataloguers will tell you what they were.

Hence it is better to use pallet stones than not at all, and so
my query for a source of them.

WRONG! Your comments relating to loss of accuracy are
WRONG in your assumption because I am considerng the
use of a gravity escapement.

73 Mag published my one and only article (in the 80s). While it's a
shame to see any ham-related business fail, it's not surprising in
this case. I had a subscription to 73 this past year (it was actually
a mistake. I subscribed to CQ via a subscirption service, and they
sent me 73 in error). The articles were of little content and the
editorials were pure fantasy and the rants of a madman off his
Thorazine.

Your desperation to score points has blinded you.....

WRONG! once again. The mechanism is NOT on the balance wheel, 'cos there won't be one, and neither will there be a balance spring - a little knowledge is dangerous, and the combination of an OU degree (6 'O' levels at best) and M3/CB licence show your knowledge and understanding up for what they are worth.

Do all your pronouncements result from 5 minutes on the Web?

The temperature compensation I am considering is John "Longitude" Harrison's Grid Iron.

Tempatrimmer? All part of the joke, but I doubt that your apparent emotional imbalance demonstrated by your sneering tirade gives you any scope to recognise humour.

The underlying problem is the same. Whatever the oscillating element (balance wheel, pendulum etc) there is a problem with maintaining the oscillation (by an impetus from the spring or weights via the drive chain) and using energy from the oscillating element to release the escapement.

The former can be affected by spring tension (hence the use of the fusee in older watches, automatic winding in newer ones, and even the relative success of the cylinder escapement) and the search over many years to maximise the free swing portion of the oscillation (ie minimising the energy taken from the oscillating element to release the escapement.

It was Wayne Green. It was in the early sixties. At least that is where I
read it. I took 73 for two years. Must have been 62-64 or so.

By the time I got back from Asia, 146.94 was 'the' FM spot on the 2 meter
band. About 79 or so.

I don't know if that will happen, Hans. I remember 73 (and Hot CoCo) from the early 80s and they were *huge* magazines. Unfortunately, I feel that amateur radio (and cb) are slowly going the way of these newsgroups. More bickering (and nastier) every day. I've had many a chuckle over Wayne's editorials and did subscribe a few years back. 73 had shrunk tremendously and I remember QST as being a bit more rounded back a few decades ago too.

I think I'll agree with you on hoping that Wayne figures a way to start up again. You can bet he isn't gonna roll over and play dead :)

It's not going to happen, this has nothing to do with money.

Maybe Wayne frittered it away, but twice he sold off magazines and
got a lot for them. Twenty years ago, he sold the computer magazines
and 73 to IDG, and became a millionare. He later sold his CD magazine.
Unless it was all spent, some late payments would not stop the magazine.

Wayne is over eighty. The magazine has been in decline for some years.
They cut back circulation some years back, too. I enjoyed reading what
Wayne had to say, until the past decade or so, when he was repeating
himself and getting into weird areas, like "the moon landing was a hoax"
and all the junk medicine stuff. I think that sent a fair number of readers
away, when his previous "muckraking" did not. The last time I saw the
magazine, it was arriving on the newsstand sporadically, it had
gotten pretty thin, there were a lot of blatant errors, a lot of the old
authors were no longer around, and there wasn't much of interest there.

If the magazine had been in good shape, he wouldn't have made the decision
to stop publishing. A little glitch, and he's had them over the years,
would not stop Wayne Green. But there isn't anything there to salvage.

Amateur Radio Newsline™ Report 1365 – October 10 2003

Amateur Radio Newsline report number 1365 with a release date of Friday, October 10th 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Deciding the future of ham radio was not an easy task in Geneva and the problem of Broadband over Powelines continues to grow world-wide. Find out the details on Amateur Radio Newsline report number 1365 coming your way right now.

(Billboard Cart Here)

**

IARU: HOW RADIO REVISIONS CAME TO PASS

The word is out. Some of those who attended last springs World Radiocommunications Conference in Geneva Switzerland are now saying it was not all that easy to reach decisions. Q-News Graham Kemp, VK4BB, has the rest of the story:

--

Just now some of the background work done at WRC-03 is coming to light. The work was intensive. The main conference hall had over 1500 seats, simultaneous translation in 7 languages often more than 10 meetings going on at the same time, distributed in three adjacent buildings.

Some meetings went on till the wee hours of the morning and resumed at the usual time the next morning!

The growing number of completely new radio services clamouring for spectrum allocation, such as for example space borne radars for terrestrial observation, high altitude platforms together with the ever increasing number of new ITU Member States with active participation made the deliberations that much more difficult.

For Q-News Australia, I’m Graham Kemp. VK4BB, reporting for the Amateur Radio Newsline.

--

It was the decisions made at this conference that lead some nations to abandon C-W testing of radio amateurs and also spur the ongoing, world-wide Morse code debate. (Q-News)

**

RADIO LAW: BPL BECOMMING A HOT ISSUE WORLD-WIDE

Meantime, down here in Kiwi-Land as well as around the world, the debate is heating up over Broadband Over Powerline or BPL as its called in North America. This is the technology that claims to provide broadband high-speed Internet services using domestic power lines for system wide transmission and Internet connectivity.

For those not aware, BPL works by injecting the data signal into the powerline near the electricic substation and it travels along the line to the user. In some proposed systems, it interconnects cities using existing long distance power distribution grids.

The problem, of course, is that powerlines are not radio frequency cables. They are not shielded and leak RF energy causing a level of wideband noise in the vicinity of the cable. And as tests conducted by the ARRL have graphically proven, powerlines radiate for long distances.

AC powerlines are a very noisy transmission medium, with spikes and other noise. To make it work, BPL operators have to use higher injection powers to get their data signals to propagate along the cable. Higher injection power mean higher emissions, and this is bad news for all High Frequency radio operators.

By way of example, current proposals in Europe would raise the level of the background noise level on H-F by some 60-70 dB within 3 meters of the cable. Further away, the rise would be less, but still considerable.

Because of this, Broadband Over Powerlines poses a threat not only to amateur radio. Users of many low power devices such as security systems that tag products in shops are very concerned. And High Frequency broadcasters world-wide are fighting to support sensible emission limits for powerline breoadband communications.

But that’s not where it ends. In many places security services are worried. Unfortunately, in some countries, government departments involved in security have been told to not object to BPL as the government policy is to support it.

Civil Aviation communication and aero-navigation can be threatened by BPL. There are reports of an air accident in Canada being directly attributable to interference from broadband cable systems.

And this is only the beginning. New plans for BPL will attempt to use much higher frequencies which could immediately pose a threat to some nations emergency service communications. This is an extremely serious issue for amateur radio world-wide and for other users of the High Frequency spectrum as well. (NZART)

**

RADIO AIDS: NOAA PROPAGATION SERVICE TO GO QRT

Amateurs around the globe may soon loose the propagation information system operated by the United States National Oceanic and Atmospheric Administration. This includes real time data on the state of the interaction of the earth's

magnetosphere with the solar wind and state of the earth's magnetic field.

These tools have been invaluable to ham radio operators world-wide for many years. The reasons it may be going away? Budgetary cutbacks and lack of future funding. (Published news reports)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Xerox Amateur Radio Clubs WD6CZH repeater serving Los Angeles from El Segundo California.

(5 sec pause here)

**

ENFORCENMENT: HAM REPEATERS ARE NOT FOR BUSINESS

Back in the United States, the FCC has written to a Lakewood New Jersey to ask him why a repeater bearing his his call sign is being used as an adjunct to a business band radio system. The FCC’s Daryl Duckworth, NN0W explains:

--

Duckworth: “Martin Gross, N2DCG, of Lakewod New Jersey, has 20 days to reply to an inquirey about a repeater on 448.825/443.825 MHz and is used as an adjunct to WNVF 627, a business radio system for the Hatzolah Emergency Medical Services, rather than for Amateur Radio purposes as set forth in Section 97.1 of the Commission’s rules.”

--

In a September 11th letter, the FCC notes that Gross’s repeater is not coordinated. (FCC)

**

AT THE FCC: THE FCC's MASTER SEARCH ENGINE

The CGC Communicator reports that there is an obscure but very important search engine at the FCC website. One that allows you to comb through most of the Commission's licensing systems for specific information.

According to CGC, member databases include Universal Licensing System, Experimental, Cable Operations, Mass Media and International Bureau. Queries can be set up by frequency range, state, county, location call sign and licensee name. More information is in the cyperspace address found at http://gullfoss2.fcc.gov/reports/index.cfm or the backup site at http://svartifoss2.fcc.gov/reports/index.cfm (CGC)

**

RADIO LAW: CABLE TOLD TO SOLVE ITS OWN PROBLEMS

FCC Chairman Michael Powell has told the cable industry that it needs to work out its own problems before appealing to regulators for remedies. At a recent appearance at the annual cable sector conference Powell highlighted issues that have driven a wedge between cable companies and local broadcasters. Specifically, the rules that dictate what over the air channels cable outlets must carry on their systems.

Currently, cable companies are required by law to carry local broadcast channels. But broadcasters are also hoping regulators will eventually force cable companies to carry both digital and analog signals during the broadcasters' transition period to all digital transmission. But cable companies argue that if they were forced to carry both a broadcaster's regular analog signal and digital signals, it would significantly deplete their capacity to air other channels. (Published reports)

**

RESCUE RADIO: ORGANIZING 60 METERS IN VA

Bringing emergency communications to 60 meters is the theme of a new net organized by Virginia RACES, Inc. This, by providing a twice monthly opportunity for equipment tests in the new spectrum asllocation.

The Mid-Atlantic Emergency Net began opeeration on October 1st. It now takes place the first and third Wednesdays of every month at 2000 hours Eastern Time on 5330.5 using upper sideband.

All ARES, RACES and other emergency communications organizations within reliable communication range of the net are encouraged to participate. Liaisons are also invited with similar groups in neighboring states. (Via e-mail)

**

GETTING YOUR E-MAIL: AOL BLOCKS QRZ.COM

If you use America Online as an internet service provider and are waiting for e-mail or a password from QRZ.com, this is for you. A-O-L has decided to unilaterally block delivery QRZ.com e-mails unless a specific A-O-L user goes to the trouble of unblocking his or her own account.

According to QRZ, they have been getting up to 50 emails a week from America Online users who have not received their QRZ passwords or Links. QRZ advises that it is A-O-L and not them that has placed spam filters on incoming e-mail. To fix the problem, users must log onto A-O-L, go to “SPAM CONTROL” and set it so that e-mail from QRZ.com as an allowable e-mail address.

QRZ adds that it has no other way of sending America Online users a password or log on information as A-O-L has QRZ e-mail filtered out. (qrz.com)

**

HAMVENTION 2004: YOUR IDEAS ARE SOLICITED

Turning to the convention scene, the planners of Hamvention 2004 are putting out a call to the world-wide ham radio community. They say give us your input

and we will listen.

According to the Hamvention website, those in charge of next years gathering have implemented what they call a new "open door policy.” In other words, they want to hear your suggestions or comments on how to improve their show. They also promise to consider your ideas, discuss them, and implement them if possible.

If you want to help make Hamvention even bigger and better, now’s your chance. Sit down at your keyboard and write the 2004 Hamvention team directly at w-mail to info@hamvention.org. And yes, they promise a personal response to every e-note that’s received. (Hamvention)

**

CONVENTIONS AND HAMFESTS: DENVER COLORADO IN OCTOBER

Still with hamfets and conventions, the Rocky Mountain Radio League welcomes everyone to the 2003 R-M-R-L Hamfest slated for October 18th at the Jefferson County Fairgrounds in Golden Colorado. For more information e-mail Ron Rose to N0MQJ@rose3.com. (Press release)

**

CONVENTIONS AND HAMFESTS: SOCORRO N.M. ON OCT 25

Also, mark down Saturday October 25th for New Mexico’s Socorro Hamfest. Socorro is about 80 miles South of Albuquerque. This year the venue is the Firefighters Training Academy with R-V parking available. For information by e-mail please write to ac5bx@arrl.net. (e-mail)

**

WITH THE SCOUTS: A SPECIAL ON JOTA

Last reporter Mark Abramovich, NT3V, told you that the 46th annual Boy Scouts of America Jamboree on the Air will take place on October 18th and 19th. Now Mark has prepared a special report that details the Jamboree on the Air and the very unique relationship between scouting and ham radio.

--
AUDIO HERE
--

Mark’s report is our September Newsline Extra. It can be downloaded as an M P 3 file from our website at www.arnewsline.org/quincy. Just scroll down to the bottom of the page, click on ARNewsline Extra, turn your speakers up and enjoy. (ARNewsline(tm))

**

PROMOTING HAM RADIO: JOTA VIDEO NEEDED

Are if you are planning to take part in this years scouting Jamboree on the Air and own a good quality home video camera, your help is needed. As you know,

Dave Bell W6AQ, Alan Kaul W6RCL and Bill Pasternak, WA6ITF, are always looking for good video of ham radio happenings that they might be able to incorporate into a presentation about the hobby. As scouting and ham radio enjoy a very unique relationship, this is an event that is sure to make it into one of their shows, but only if they have the pictures and sound.

Since the Jamboree on the Air happens only once a year, that's where you come in. What's needed are volunteer camera people to take their gear to where the scouts are holding their JOTA gatherings and videotape them in action. Pictures and sound of them setting up their JOTA campsites, ham stations and their on-the-air operations. Also wanted is video of licensed scout hams introducing non-ham scouts to our very special new world of Amateur Radio.

If you can help in this project, or want more information, e-mail the production team to hamvideo@juno.com. (The Producers)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: DANNY WEIL, EX-VP2VP - S.K.

The changing of the guard in ham radio continues. This with word from the San Antonio Radio Club that Danny Weil, the former VP2VP, has passed away October 3rd at age 86.

Weil is best known for his post World War 2 DX operations. During the 1950's and 1960's Weil took to the ham radio airwaves from numerous exotic locations that he sailed to in a boat named the YASME.

Born in the UK in 1918, Weil had been living in a managed care facility in Texas since suffering a stroke in 2001. But during his lifetime his voyages lead to the setting up ham radio stations on remote islands around the world and contacts with over 100,000 amateur radio enthusiasts. His exploits are credited with giving birth to the terms D-X'er and D-Xpedition.

Weil's adventures and those of the Colvin's -- Lloyd W6KG-and Iris W6QL -- lead to the formation of the famed YASME Foundation that assists DX operations world wide. Services for Weil were held in San Antonio Texas on Wednesday, October 8th.

More about the life and death of Danny Weil is on-liner at http://obit.porterloring.com/obit_display.cgi?id=82269&clientid=porterloring (San Antonio Radio Club, Paul Guido)

**

RADIO TRAGEDY: HAM KILLED TRYING TO ACTIVATE DX STATION

A ham radio operator has died while trying to put a rare location on the air. RSGB News Reader Jeramy Boot, G4NJH, has the tragic details:

--

We are sad to have to report the death of Richard Baker, M3RWB, who died as the result of injuries sustained while climbing Aran Fawddwy in North Wales. He was intending to activate the summit for the Summits on the Air, or SOTA, award programme.

The Summits on the Air management team has released a statement which says, "Richard was an experienced hillwalker who saw SOTA as a good opportunity to re-ascend many summits that he had climbed in the past. His death is an untimely reminder that while accidents can happen anywhere, the mountains can present special dangers to those who are experienced as well as those new to mountain travel."

Jeramy Boot, G4NJH

--

The Summits on the Air management team went on to stress that in all cases, the safety of those travelling must come above the desire to ascend to the mountain. (GB2RSO)

**

RADIO RECORDS: US TO CZECH REPUBLIC ON 24 GHZ

Shooting for the moon has provided two hams the first-ever United States to Czech Republic E-M-E contact on 24-Ghz. The ARRL Letter reports that Amateur Radio moonbounce and microwave history was made September 24 at 1400 U-T-C when Josef Sveceny, OK1UWA, and Al Ward, W5LUA, completed the 24-GHz EME QSO between the two nations.

Sveceny used a 3-meter Prime Focus dish with 35 watts at the feed, vertically polarized. Ward’s station also utilized a 3-meter Prime Focus dish with but with 70 Watts at the feed. Ward was horizontally polarized to account for the spatial offset between North America and Europe. Previous international 24 GHz EME QSO’s have taken place between the US and Canada, the US and Russia and Canada and Russia. (ARRL)

**

INTERNATIONAL - INDIA: ECHOLINK COMES TO VU

News out of India is that a new EchoLink VHF Repeater has been installed at the Indian National Institute of Amateur Radio. The new system allows local hams in Hyderabad to contact Amateur stations all over the world twenty-four hours a day. According to Jose Jacob, VU2JOS of the National Institute of Amateur Radio, this is the second such repeater to go into service in India. (GB2RS)

**

INTERNATIONAL - UK: RAYNET AT 50

The Radio Society of Great Britain is hosting RAYNET’s 50th Annniversary Emergency Communications Convention in Birmingham, England on Saturday the 25th of October. RAYNET is the U-K equivlant to our RACES an d ARES combined. Paul Gaskell, G4MWO, tells Newsline that in addition to the convention, a special event station will be taking to the airwaves as GB50RAEN. It will be on the air from October 20th till the 31st. QSL’s go via RSGB Bureau. Further information is in cyberspace at www.rsgb.org/emergency (GB2RS)

**

ON THE AIR

On the air, HE2GR is a special event call for the USKA club station HB9GR. It’s on the air to celebrate the 200th anniversary of the Swiss Cantons of St Gallen and Graubuenden. HE2GR will be active on CW, SSB and digital modes until the 30th of December. QSL as directed on the air. (VHF Reflector)

**

DX

In DX, ZL3CW will be active as ZM8CW from Raoul Island in the Kermadecs through the 18th of October. Jack says that he will be there doing maintenance work for the Department of Conservation and hopes to be active in his spare time. This is actually not a DXpedition, but ZL3CW is considered to be one of the better Morse operators and enjoys the challenge of the pile-ups. (Modern DX’er)

And a D-Xpadition to Annobon Island was forced to shut down prematurely. This after authorities ordered operations curtailed on October 4th local time. According to the various D-X remailers, no reason was given for ordering the 3CZ0V ham radio operation off the air. (Via Internet)

**

THAT FINAL ITEM: HAM RADIO AT THE NYC MARATHON

For this weeks final story we turn the ham radio sports page and one of the biggest events of the year thats about to take place. And its Amateur Radio that makes it happen. We have the details in this report:

--

If you want to see a shining example of how valuable amateur radio can be as a public service, look no further than New York City the first week in November. Providing communications for the marathon is no small job. Just ask Communications Director Steve Mendelsohn, W2ML. When the marathon was run back in 1976, 26 hams provided communications assistance. This year, 425 hams will help, and they'll do it using 9 repeaters on 2 meters and 440. Mendelson says it's a source of pride for the ham volunteers who come from across the country:
--
Mendelsohn: “Just like Disney's fantasy land, once you hav e been there you want to come back over, over and over again.”
--

The marathon isn't just for New York area hams. Mendelsohn says amateur radio operators show up from more than half a dozen states to help:

--
Mendelsohn: “We have people coming back from Colorado, coming back from Vermont, from florida. They come in from all over. Seven states, twenty-six miles, no waiting.”
--

New York's boroughs will be flooded with over 30-thousand runners this year. The hams helping will be part of more than 9-thousand people volunteering. How you manage that many people could be a massive challenge -- but Mendelsohn says race organizers figured out how to do it:

--
Mendelsohn: “You break the nets up into sizable chunks. You name a Mile Captain for each of the miles, and the Mile Captain manages a staff of anywhere from 3 to 15 people. Oncve you get further along in the race where there is more of a chance of the runners falling and dropping out because thery are tired, you increase your manpower.”
--

18 net controllers with 2 standby operators will be on duty. Communications start at 3 a.m. race day and go until 6 o'clock that evening. 35 hams will be on hand at the starting line alone. Once the race is done, Mendelsohn says the hams' work doesn't end. For this many runners and their family members to reunite takes up an area of more than five blocks.

Hams help there, too. And they'll tag along not just with race organizers, but with translators who will need amateur radio operators by their side, too. It's a huge undertaking that takes a lot of planning and makes for a very long day. But the hams helping out with New York City's marathon wouldn't trade it, because Mendelsohn says, it's just plain fun.

From Birmingham Alabama, I’m David Black, KB4KCH, for the Amateur Radio Newsline.

--

For those of you in North America who might want to grab a glimpse of ham radio in action, NBC Sports will broadcast a one hour New York City Marathon highlights show nationwide beginning at 2:00 p.m. EST on November 2nd. Check your local listings for details.

Also, the full interview with Steve Mendelsohn, W2ML, can be heard on this weeks RAIN Report. Its as close as your telephone at 847-827-7246 or on-line at www.rainreport.com. You can find more information on the race in cyberspace at www.ingnycmarathon.org. (ARNewsline(tm))

Your 5 minutes web search has not revealed the theory
behind the gravity escapement, a form of remontoire,
a means to decouple the pendulum from the going train

The impulse to the pendulum is dependent upon two
locally invariant properties, the acceleration due to
gravity, and the mass of the Impulse Arms
(Dennison/Grimethorpe version) and pendulum.
The pendulum is not impulsed by the (weight driven
not spring driven) Going Train.

The turnip-brain of the M3/CB licensee and his sneer?

Your shameful support for the gangrenous degeneration that
is the M3/CB licence seems to have you proposing that because
you find fault, in YOUR opinion, with the technical viewpoint of those
who aspire to be _REAL_ Radio Hams, then that is full
justification for admitting the M3/CB licensees with no technical
viewpoint whatsoever. If that is your argument, then I disagree with you.

The _REAL_ Radio Ham will discuss technical issues, for example,
the dB, but the turnip brained will sneer at the age of a text-book without
actually citing or quoting the international conference in which his
falsely-believed redefinition took place.

Let us consider each sneer of the turnip-brained M3.....
1. I do not attack M3/CBers. I may defend myself
against the gratuitous insults habitually emitted by such
licensees, but otherwise I speak out against the
gangrenous degeneration that is the M3/CB license. Such
degeneration is well illustrated in this NG by those having such
a toy licence sneering at all technical matters without
understanding and without discussion. Consider the
remarks quoted below from M3OSN.....
2. The joke did not require any research, I have been for
some time now a clock maker and restorer.
3. Nuclear emissions? Remind me of that one. Did I make
a rare mistake?
4. dB - defined as the base-10 logarithm of the ratio of
two powers. I have been consistent in my assertion of this. There
has never been any error on my part, save for when I repeated
someone else's figures without checking them.
5. DSP - You sneered (as does a turnip-brained M3/CBer) at my
tentative proposal of "Big K", but were incapable of answering
my challenge to your sneer.
6. The time of owning an 830 did not coincide with the phase in
my life when I experienced a severe loss of self confidence. I explained
the typo in this respect; an intelligent person with the gentlemanly
traditions
of Ham Radio would have taken this on, but someone with the turnip-brain
of an M3/CBer would just carry on sneering regardless.
7. Slope Detection - I was discussing the use of 25kHz channel-spacing, Xtal
controlled ex-PMR gear to receive NBFM. My assertion was that the wide
bandwidth (remember the Pye hermetically sealed blue boxes?) would result
in no detectable demodulation of an on-channel NBFM signal. Did you
discuss this technically as might be expected from a _REAL_ Radio Ham,
or did you just sneer ignorantly as is to be expected from a turnip-brained
M3/CBer?
8. Next joke? From the above it would seem to be Mr.Reay.

>

One of the fundamental problems in time pieces is the decoupling of the escapement from the oscillating element- not from the going train. The issue is ensuring that the oscillation period is not changed by the two functions of the escapement a) to provide the impulse b) to allow the going train to advance at a rate controlled by the oscillator (eg the pendulum). If you think about it, there is an analogy to Q here. In (a) I include the added complications of ensuring an impulse largely constant despite variations in the state of the spring (if used).

Over the years many approaches have been tried - verge, deadbeat, cylinder, duplex, and (of course) the lever are the ones that spring to mind from my watch repairing days. I suggest you get hold of deCarl(e)s book on the escapement- I forget the title as it must be 25 years since I read it.

Incidently, for a 'joke' you seem to be putting in a lot of effort.

> The impulse to the pendulum is dependent upon two

> The pendulum is not impulsed by the (weight driven
> not spring driven) Going Train.

Regardless of where the energy comes from, and this is about energy, the fundamental issues are the same:

1. Getting energy 'into' the pendulum to maintain the oscillation.

2. Minimising the interference of the escapement on the pendulum (or other timing element) - also an energy matter.
(This could be helped by increasing the 'swing' but that then brings into play other errors due to pendulum length variation with temperature.)

The above is true regardless of where the energy for the impulse comes from.

You said it was a posting error.

Memory going?

(I notice you haven't posted it yet in alt.horology, by the way.)

> 3. Nuclear emissions? Remind me of that one. Did I make
> a rare mistake?

Try 'Google'.

It could have been a typo I suppose- most of what you emit is unclear
(unclear emissions).

> 4. dB - defined as the base-10 logarithm of the ratio of

I remember it well- in fact I retuned several of the 'blue boxes' to narrow the bandwidth. I may still have the drilling pattern somewhere.
In those days slope detect was a common as cat muck on these very radios, as quick temporary step to get on air before building a FM detector. So it must have worked.

Gareth, you do get even more ratty when caught out. Why not just crawl away and lick your wounds. Continue like this and you will end up turning to drink.

I should have added that the later is the problem addressed by the
"remontoire" (and more crudely by a fusee). Neither address the issue of
the interference with the free oscillation of the pendulum or balance.

If your clock is weight driven, why have a "remontoire"?

Actually, sun dials are an interesting topic in their own right. There is a
"sundial society"- not sure of the correct name but a local SK was a member
and made sundials to plans he got from them.

When the prime motivation, as in your case, is to sneer
and find fault, then you will achieve your goal.

I am putting a lot of effort, not into a joke, but into
defending myself against your silly outbursts.

Let us not lose sight of the issue here....the M3/CB licence
is a gangrenous degeneration that threatens the health of Ham Radio.
You have made a fool of yourself both by your support for it,
and also by "upgrading" to one. You have become surprised by the
hostility of the established body of Radio Hams against
the M3/CB licence, and you seek to salve your wounds by
making repeated personal attacks on your opponents.

It was not so long ago that you said that you would not
indulge in such personal attacks, but it seems that even you
did not anticipate the strength of your underlying motivation.

Synthetic narcotics are purer than naturally produced ones such as
heroin. They therefore have the potential for greater addiction when
taken in comparable amounts.

Mebbe. But don't equivocate - the issue was whether AM Xtal controlled rigs would detect FM modulation from an on-channel transmission, and not tuned to the side.

I haven't been caught out. I have no wounds to lick.

You seem unable to answer the challenges that dispute
your (rather childish) outbursts.

You seem to be more and more desperate to score points.

Just face up to the fact that you have made a complete fool
of yourself by, and lost a lot of face from, your support for
the gangrenous degeneration that is the M3/CB licence.

You seem to want to make a great deal of capital out of the
occasional errors (in YOUR opinion) that technically interested
people make; and to use that capital to justify the M3/CB licence.

If it is your assertion that the occasional error by others justifies
the M3/CB licence with no technical basis; then I disagree with you.

Not at all, two quite different solutions to two quite different problems.

remontoire: A mechanism that compensates for the variation in the force exerted by the mainspring as it "unwinds". Harrison's solution was to have another' secondary, spring that was kept in a (very near) constant state of wind by the main spring. This secondary spring provided a near constant impetus to the oscillating element. An automatic watch achieves much the same but more simply- it keeps the mainspring under (near) constant tension.

tourbillion: a mechanism to prevent changes in local gravity (due to movement) from changing the period of oscillation. Not generally required in a stationary clock and, even in watches, usually avoided by setting an average rate in six positions.

Yes, several.

Also cylinder, lever, and detent escapements which, in my view, are more complex. My favourite watch was a 1883 cylinder escapement- late for a cylinder- that cost me £20 (in 1976 or so) in a junk pile. It cleaned up a treat and was later valued at £450. Some scroat stole it, along with a 1920s gold full hunter, about 10 years back.

I used to live in Woolwich in the late 1970s at there was a market trader who sold movements from watches where the cases had gone for melting down. A small shop in Plumstead sold 'non goers'- a combination of the two often produced some quite nice watches.

To be fair, few repairs are that complex. Usually just a cleaning job, lubrication and reassembly. Occasionally a replacement part was required which, for relatively modern watches (20th century) I could get from a shop in Goldhawk Rd. Anything older I used to use a local watchmaker to turn up- most damage was broken pivots- or adapt parts.

I've done a few clocks but my main interest was always watches. In fact I think it was partly the history of the 'longitude problem' that led me toward working in navigation systems.

Let us analyse the situation. My original joke fell on stony ground and apart from the NEGATIVE NERDS who were apparently present from their headers, only Reg Edwards responded. I replied to him with a simple polite apology and withdrawal. That should have been the end of the matter.

You then let rip with a gratuitous tirade with an emotional style that was out of context and several pages long; the spitefulness and spleen-venting of your post was all too apparent.

In your, rather childish, outbursts, you referred to several previous misunderstandings (whether mendacious or not I cannot determine) and I corrected you. This has brought forth more silly and infantile jibes from you.

What can be the reason for this apparent emotional disturbance that you have? There was no interaction between us until I took a stance against the gangrenous degeneration that is the M3/CB licence, and ever since then you have perpetuated personal attacks.

You may deceive yourself into thinking that your recent contributions are about clocks and watches, but their style is a simple continuation of your silly and childish campaign lasting over several months in which you persistently originate unnecessary gratuitous remarks. These remarks alone would suggest that you are a CBer, or an M3/CBer at best.

To produce evidence of the undesirability of the M3/CB licence, one only has to quote your own outbursts. That you find such outbursts to be "too easy" says so much about your habitual rudeness.

I am not digging. I am prepared to discuss the technicalities of timepieces with you, if you so desire, but it will require an assurance from you that you will behave in a manner more befitting a father of three children rather than in the manner of an escapee from the school playground that you have favoured recently.

You are unlikely to regain your lost face as the result of your support for the gangrenous degeneration that is the M3/CB licence.

Was it not the case that the direction of swing was
unaffected by the earth's rotation, and so it's line
of oscillation seemed to swing around in a circle?

I found an interesting article on the web about sundials, and one particular
manufacturer who claimed that, provided you followed their installation
instructions precisely, their sundial could be read to an accuracy of one
minute!
ISTR they calculated the rotation and tilt from your latitude / longitude.
No Summer Time correction, of course, and not much use at night, unless you
use a torch!

It is funny how these things 'come around'.

I learned about "tourbillions" and the like as a hobby / pastime while studying for my first degree and due to an interest in 'nice' watches (Rolex et al) I never expected it to be useful in the 'real world'. However, similar issues came along when working on gyro based navigation systems- finding ways to compensate for "g terms" and "g^2 terms" in gyro drift models, using maths and calibration procedures ( some systems rotate the gyros on a tourbillion like mechanism but these defeat one of the objects of a 'strapdown' system).

I never expected to use it again and along comes Gareth with his spade ;-)

A 'severe loss of self confidence' could also be described as an inferiority
complex. In your case Airy, you do not have an inferiority complex, you
simply ARE inferior.

The issue, other than use at night ;-), once you have it correctly installed
is more one of the precision with which you can read the scale. The actual
'time keeping' part (the relevant movements of the sun & earth) are quite
stable.

The whole solution to the 'longitude problem' was based on this stabliity
and required an accurate time piece to utilise it.

>No Summer Time correction, of course,

Well, Summer time is an artificial concept- as I suppose is GMT but one step
less so.

>and not much use at night, unless you

Iraqi Shiite Anger Raises New Fears for U.S. Soldiers

By IAN FISHER

BAGHDAD, Iraq --

Shiite Muslim anger against Americans spilled into Friday Prayers in Sadr City, the poor Baghdad district where two Iraqis and two American soldiers were killed Thursday night.

The violence and subsequent public outrage raised fears of new dangers to United States troops from the followers of Moktada al-Sadr, a young anti-American Shiite cleric.

Up to now, the main threat to American forces has come from loyalists to Saddam Hussein.

A seething throng of perhaps 10,000 people gathered on Friday to pay respects to the two men they believe were killed by American forces the night before.

"No, no, to America!" they chanted as wooden coffins holding the remains of the men were paraded along a main street in this impoverished neighborhood of some two million people, once called Saddam City and now renamed Sadr City in part for Mr. Sadr's father, a popular cleric who was assassinated in 1999 on what many believe were Mr. Hussein's orders.

Sheik Abdel Hadi al-Daraji, an aide to the younger Mr. Sadr, delivered the sermon at Friday Prayers and issued a defiant demand: no American soldiers should be allowed inside Sadr City.

"America, which calls itself the supporter of democracy, is nothing but a big terrorist organization that is leading the world with its terrorism and arrogance," Mr. Daraji said.

For the last six months, the greatest threat to United States soldiers has come from common criminals or loyalists to Mr. Hussein, who belongs to the Sunni branch of Islam, a minority in Iraq.

The Shiites, who were repressed under Mr. Hussein, have been more supportive and have rarely been thought responsible for attacks on

American soldiers.

But tensions have been growing for several days between American troops and Mr. Sadr's followers, who represent only a fraction of Iraq's majority Shiite population.

Situation in Iraq is "a lot better than you probably think."

George W. Bush, Manchester, N.H., 10/9/03

But Wayne was out of Byte by the third issue, at a time when it did not amount to much. He only lost the potential for when it did get big.

He then turned around and started Kilobaud, which was pretty good for some years, and then launching the very successful magazine for the Radio Shack computer, titled something like "TRS-80 Microcomputing", and a number of other computer specific titles. It's those he sold to IDG, which brought in quite a bit of money at the time. Ironically, by the time he did sell them, they were past their peak because the computer world had moved on. I can't remember the year of the sale, but I thought it was just as a lot of computer magazines were folding, because too many had entered the field.

And since your wording can be read two ways, it's worth throwing in that Wayne was divoriced from Virginia Londner Green by the time Byte had started up. They had broken up about 1967 or 68, and from an editorial at the time, it seemed to be the indirect cause of his later tax problems.

By the time Byte was started, he was married to his second wife, Lynn.

It was never clear why Byte was put under the name of is his ex-wife, though years later he did say it had to do with the tax problems and the problems with Bell over those telephone articles, so he put it under someone else's name so it couldn't be grabbed. That still does not explain why it was his ex-wife. Three issues into the magazine, Wayne's name was gone from the masthead. Nothing was said at the time. And it was amusing how childish it got, with no mention of Wayne or 73 for about ten years. Even when there was an article in Byte about teletype machines, and the bibliography mentioned QST, CQ and Ham Radio, 73 was significantly absent.

I used to enjoy reading 73. Nobody could ever agree 100% with Wayne Green, but I liked to read his editorials.

I suppose all of us that didn't renew are to blame. Certainly the combination of falling ham numbers and hard times haven't helped. Magazine subscriptions have dropped right off the bottom of my list of financial priorities, for instance.

Oh well, I still have my 73 hat. I actually ordered an entirely different free gift, but they ran out of whatever it was. I will miss 73, though.

Well since the number of licensed hams in the US is at or close to an all
time high, I don't think "falling ham numbers" had a thing to do with it.

With the ten-year license, many "official" hams are actually SK or totally inactive. Also, while the no-code VHF hams do buy equipment, it's often not the more expensive gear that many of the HF operators buy - in addition to their VHF and UHF gear. I know Larry (the "L" in R&L electronics) supported the no-code change to not only keep customers at his business doors, but also to keep ham manufacturers in business. He noted the drastic reduction of suppliers he now has available. For my two cents worth, the FCC should seek to maintain CW as an effective, efficient, low cost option in amateur radio by offering a CW certification (maybe 15 wpm) to any amateur license. Especially, if they drop the lowly 5 wpm requirement. That certification would allow the use of a 20 KHz , or the present 25 KHz now reserved for Extra Class, at the bottom section the 10/15/20/40/80 meter US band segments. It would not provide any special SSB incentives.

Ah the good old "Carousel". That was the model of INS that had ovens for the
rate gyros that ran at 69 degrees F. I think Concorde may be the last
British Airways aircraft to use these, all the rest use IRS with laser
gyros.

Plundering the world in typical US fashion.

By Shankar Vedantam
Washington Post Staff Writer

Saturday, October 11, 2003; Page A01

The Bush administration is proposing far-reaching changes to conservation policies that would allow hunters, circuses and the pet industry to kill, capture and import animals on the brink of extinction in other countries.

Giving Americans access to endangered animals, officials said, would feed the gigantic U.S. demand for live animals, skins, parts and trophies, and generate profits that would allow poor nations to pay for conservation of the remaining animals and their habitat.

This and other proposals that pursue conservation through trade would, for example, open the door for American trophy hunters to kill the endangered straight-horned markhor in Pakistan; license the pet industry to import the blue fronted Amazon parrot from Argentina; permit the capture of endangered Asian elephants for U.S. circuses and zoos; and partially resume the trade in African ivory.

My gut feeling is that a lot of mags have or will drop. Yes, there will (likely) always be antenna construction articles, articles on safety, DXing, and a (very) limited amount of homebrewing. Do you remember the construction articles of the 50s and 60s? Back then, there were a lot of home brew projects. Even Heathkit threw in the towel a couple of decades ago. How much did anyone learn dropping in an integrated circuit that contained the whole if amplifier? That plus postal rates going threw the roof hasn't made it any easier for magazines. I've dropped all magazine subscriptions except tv guide (sign of the times LOL). Even when I assembled my first computer (a Heathkit H-8, which I still have), there were modifications to be performed. I had to chuckle when Kilobaud had an article on increasing the transfer rate from the tape deck to/from the computer from 1200 baud to 2400 baud. I was already running 4800 baud (and could get it to sync, but not transfer, at 9600 baud. I think the cheap cassette deck had something to do with it.).

Those days are long gone; today we have satellite tv and BPL (hopefully, not for long on the BPL!!!).

Watch your S/N ratio deteriorate as the noisy sun tracks through your satellite dish's beamwidth.

A company I used to work for used one of the Eutelsat birds for data distribution, and twice a year we saw our Es/N drop by 10dB for about four minutes. It was at 11.20-ish on the 11,12 or 13th October and again in April. And ,surprisingly, it happened even on cloudy days. :-)

Chris

I'm not familiar with that particular INS but the technique was (quite)
widely used. My background isn't on the civil a/c side but I'd be very
surprised if many civil a/c were not using a LINS these days- often as not
with a coupled GPS. The big US companies (Litton, Honeywell, etc) saw the
potential and threw $ at the problems. The base cost of a LINS tumbled and
the low maintained cost did the rest. I had a tour of LINS manufacturing
facility back in 1986 and they were already starting to treat LINS systems
as a commodity product (ie built to stock not order)- almost unheard of at
the time.

Prior to this there were some amazing techniques used to make gyros- my
favourite (although I never worked on them) had a solid 'ball bearing' which
was held electrostatically and rotated at high speed. I forget the details
now but, when I learned of it (in the early 80s I would think) it seemed
almost too clever to be true.

The advent of the 'cheap' RLG (ring laser gyro) saw off some interesting
techniques which were replaced by things 'without eye brows' ;-)

If memory serves, Heath didn't throw in the towel, per se.

Zenith bought them out for their computer(s) and terminals and then Zenith tossed out nearly all of Heath except those items.

About two years ago, I was in a Home Depot and came across some sensory-motion fictures that were labeled as "Zenith-Heath". What that is (or was) about, I have no idea.

My first kit was a Heath Q-1. I was ten or eleven years old and had bought an used S-38B with my paper route money.

I used ,y Dad's 350-watt soldering iron and cold soldered (what else?) every connection.

A friendly ham helped me out.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th/October, through Sunday, 12th/October there were 225 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, AP, BV, BV9P, BY, C3, C5, C9, CE, CE0Z, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PY, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9N, VK9X, VP2M, VP2V, VP5, VP8/o, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YJ, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZK1/s, ZK2, ZL, ZL8, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

3C0, ANNOBON ISLAND. The 3C0V operation ended prematurely last weekend (October 4th) when the operators were told by local authorities to stop operating. Some operators left the island and some were held. Details were very thin, but OPDX was told the last operator has left the island

on October 10th.

4L6, GEORGIA. Shota, 4L6AM, will be active in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/Single Band (20m)/High Power entry. QSL direct to address on Buck.com.

4M5, VENEZUELA. Scott, W4SO, will be active as 4M5X in the CQWW CW Contest as a Single Band (20m) entry. Activity will be from the QTH of Ramon, YV5EED. QSL via W4SO.

4U1UN, UNITED NATIONS HEADQUARTERS. Pedro, HK3JJH, was active Sunday, October 12th, on 14260 kHz starting just before 1300z. This was to be a one day operation only. HOWEVER, as this was being typed, Carl, N4AA, Editor of "QRZ DX", informs OPDX that Pedro may be able to go back and operate the station again next Monday or Wednesday, but that is uncertain at this time.

4W, TIMOR LESTE. A well equipped team lead by Yuu, JR2KDN (also known as VP6DIA), will be going to Timor Leste between October 22-28th. The team consists of three good DX operators: Yuu/JR2KDN, Yasu/JI1NJC (also known as ZK1NJC from North Cook) and Shu/JH1SWD. They will operate on all HF bands from 160-6 meters on CW/SSB/RTTY. They will also be active on AO-40 Satellite. Yuu hopes to participate in the CQ WWDX SSB Contest as 4W2A. For 6m and AO-40 activity, the following information was provided:
* A 6m beacon will be transmitted on 50.095 MHz with following message: CQ CQ DE 4W4W 4W4W K
* AO-40, look for them around the main beacon + 30 kHz.
QSL 4W1SW via JI1NJC, 4W2A via JR2KDN and 4W4W via JI1NJC.
JH1SWD - Shuichi Matumoto: 2-15-16 Nakanaru, Hitachi, 316-0007 JAPAN
JI1NJC - Yasuyuki Iizuka: P.O.Box 3, Naka, 311-0100 JAPAN
JR2KDN - Yuichi Yoshida: 4th Floor, Kato Building, 529 Rokugaike, Nagoya, 462-0002 JAPAN

8P1, BARBADOS. Look for Tom, W2SC, to be active as 8P1A in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry. QSL via NT1N. He will arrive the Monday before the contest and be active on the non-WARC bands each day just to test out the equipment.

9N, NEPAL. Tohru/JA0UMV (a member of JA0-DX-GANG) and his friend Koji/JI1LET, will be on their first ever DXpedition from Katmandu, Nepal, between October 20-29th. Tohru applied for 9N7MV and Koji applied for 9N7ET. They will be active on 40-10 meters, including WARC bands, and participate in the CQ WWDX SSB Contest. Before the contest they will be active on CW and RTTY. QSL via their home callsign direct or by the JARL bureau.
JA0UMV, Tohru Kataoka: 15-9 Sakae, Kamo, 959-1382 JAPAN
JI1LET, Koji Iijima: 7-12 Tenma, Gyoda, 361-0076 JAPAN

BQ9P, PRATAS ISLAND (Update). Due to a typhoon, the BQ9P was delayed in reaching the island until October 9th . Operators BV4FH, BV3FG, BV3BW, DL3DXX, DK7YY, JI6KVR, ZL4PO, OE1WHC and N2OO had to go back to Kaohshung

and take a commercial charter plane to Pratas. Activity is all over the bands. They are expected to stay until October 16th. QSL via KU9C.
The BQ9P's Web site is at: http://www3.ocn.ne.jp/~iota/newpage64.htm

BW3, TAIWAN. Tatsuhiko, JD1BKQ, will be active as BW3/JD1BKQ in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band entry. QSL via JR3PZW.

C6, BAHAMAS. Magnolia DX Association member Terry, W8JE, will be active as W8JE/C6A from Treasure Cay, Abaco Island (NA-080) in the Bahamas, October 20-27th. Activity will be on 80-10 meters SSB, CW and possibly RTTY. He will also participate in the CQ WW DX SSB Contest as W8JE/C6A (Single Op). QSL direct or Bureau to W8JE. Floyd, N5FG, will act as his pilot station.

CARIBBEAN OPERATION. Look for Pete, VE3IKV, to be active from Sint Maarten (PJ7), Saba (PJ6) and Saint Martin (FS) between November 8-15th. He will use the callsign PJ7/VA3RA/m, FS/VA3RA/m and PJ6/VA3RA/m. Activity will be mainly 10 and 6 meters, CW/SSB. QSL via VE3 bureau (slow) or direct (fast). The following times were mentioned: Asia 1100z; Europe 1200-1700z, North/South America and TEP 2200-0000z.

CT3, MADEIRA. Ben, OZ5AAH, will be active as CT3/OZ5IPA from October 21st to November 2nd. Activity will be only CW/SSB mostly on the WARC bands. Also, Ben will be active in the International Police Association Contest (info at: http://ipa-rc.de ). QSL direct to:
Ben Jakobsen, Gjethus parken 25, DK-3300 Frederiksvaerk (Denmark).

CT9, MADEIRA. Operators DH1TW, DK2PH, DK5TX, DK8FS, DJ6QT, LX1NO, OH4XX and OH6RX will be active as CT9L in the CQ World Wide DX SSB Contest (October 25-26th) as a Multi-2 entry. QSL via DJ6QT. Before and after the contest, operators will use their own call/CT3. QSL via their home callsign.

CT9, MADEIRA. Operators DL1EFD, DL1QW, DL1YD, DJ6QT, I2VXJ, IK2QEI, SM2EKM and W8LU will be active as CT9L in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via DJ6QT. Before and after the contest, operators will use their own call/CT3. QSL via their home callsign.

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, reports that the following operations are approved for DXCC credit:
Chesterfield Island - TX0AT (October, 2002 operation)
Timor-Leste - 4W2DN
Afghanistan - YA1D, YA0J and YA1RS
Iraq - YI/KV4EB

E21, THAILAND. Champ, E21EIC, will be active in the CQWW SSB Contest as a Single-Op/Single Band (15m) entry. He states that he will use a mobile antenna on a door up 20m and 100W. QSL ok via direct or Bureau.

HK0, SAN ANDRES (Update). It is official now! The seven members of the Florida DXPedition Group will be using the callsign 5J0X in the CQWW

SSB Contest. Outside of the contest they will sign HK0/N2WB, HK0/KR4DA, HK0/W9AAZ, HK0/K4QD, HK0/N1WON, HK0/W1LR, and HK0/W4WX. You may QSL direct or via the bureau. Logs will also be available on LoTW. QSL 5J0X via N1WON, HK0/N2WB via N2OO, and all others via their home callsigns.

IOTA NEWS.....
AF-018. Members of "Tikirriki Contest Club" will be active again during the next CQWW DX SSB Contest as IH9P from Pantelleria Island (African Italy - CQ Zone:33, IIA:TP-01, WAIP:TP). It will be the first Multi/Two operation ever from African Italy. Operators (JA3USA, OL5Y, I2IFT, I8QLS, IK2ANI, IK2CIO, IK2HKT, IK2RZP, IK7JWY, IK8ETA, IN3QGY, IT9BLB and IT9ZMX) are expected to arrive on the island October 18th. Some CW and RTTY activity will be possible before the contest using personal callsigns /IH9. Operations are widely supported again by "Sezione A.R.I. di Bergamo" and "I.T.C. Industria Tecnica Cavi". Their Web page is at: http://www.ih9p.com/ (to be updated)

EU-052. Operators SV8CS, SV2DCD, IK2QEI, IK4MTF, IK2SGC and IZ2AAJ will use the special callsign SY8A in the CQWW SSB Contest as a Multi-Single. The QTH is Zante Island, from the house of Spiros, SV8CS. NOTE: This is NOT Mount Athos.

NA-069. The North Port ARC will do a six hour DXpedition to Cayo Costa (USI FL-464S, Lee county), Florida, (accessible only via boat), on October 18th, operating under Field Day conditions. The team will consist of Carl/K1ARL, Al/WD4A, Mike/KA9WIE and possibly others. They will try to have at least two bands on at all times. Activity will be on 40 meters and up. QSL via operator's instructions.

NA-151. Birger, OZ1GER, will be active as OX3UB during the CQ World Wide DX SSB Contest (October 25-26th) from Christian IV Island or Prins Christian Island which is listed in the IOTA Directory. QSL via OZ1GER.

SA-086. Marco, CE6TBN, informs OPDX that due to some personal problems by several team members, the team had to change the dates of their 3G2D expedition to Damas Island to November 25-28th.

JOTA INFORMATION. Malcolm, G4CXT, informs OPDX that a full list of UK stations participating in the World Scout event Jamboree on the Air (JOTA) on October 18-19th can be found at this Web site:
http://www.radio-scouting.org.uk
Also, this list has details of location, operating schedules, JOTA weekend E-mail addresses and websites etc.....

KH0, MARIANA ISLANDS. Yoichi Sakurada, JP1NWZ, Editor of JA CQ Ham Radio Magazine, informs OPDX that Satoshi/JE1JKL (NH6J), Seiichiro/JF1SQC (KH0DQ), Nob/JH1EAQ, Yoichi/JP1NWZ (AH7X) and Tom/JA5OVU (K1RJ) will be active as KH0AA from Saipan, October 23-27th, CQ WW DX Phone Contest included. They will be as a Multi-Two entry. Outside of the contest they

will be on SSB, CW and the WARC bands as well. QSL via JA5DQH (bureau or direct to: Akito Nagi, P.O. Box 88, Tokushima, 770-8691 JAPAN).

LIGHTHOUSE ACTIVITY. Members of the Kettering Amateur Radio Club will be operating from the old lighthouse on Lundy Island from October 14-20th. Their callsign will be GB4LI. Activity will be on all HF bands. Operators are G0NFL, G4VID, G0AQP and G4TTX.

LT1, ARGENTINA. The "BAD POWER Team" will be active as LT1F during the CQWW SSB Contest as Multi-Multi entry. The operators are LU1FAM, LU1FKR, LU1FGE, LU1FMO, LU2DLKT, LU3FZW, LU4DX, LU5DX, LU5HM, LU9HS, LU8VCC, LU7VCH, LU1FJ, LU1FT, LU6ETB, LU8EKC, LU3CQ and LU8ADX. QSL via AC7DX. The "BAD POWER Team's" Web page is at: http://www.badpower.com.ar

MD4, ISLE OF MAN. Once again, operators G0HSS, G1GEY, G3NKC, G4XUM and M0BEW will be active in the CQWW SSB Contest. For additional interest, they will be operating from the Point of Ayre Lighthouse (Reference number - IOM013). There is a possibility of some activity before the contest with operators using their own callsigns (especially 160m!). QSL to G3NKC; or Bureau request through their Web page at: http://www.md4k.com

PZ, SURINAME. A reminder that Randy (W5UE/PZ5UE), Darryl (KD5CQT/PZ5CQ), and Glenn (K2FF/PZ5FF) of the Magnolia DX Association (MDXA) will join forces with Ramon (PZ5RA) to operate from Suriname during the period October 20-28th. Look for PZ5UE, PZ5CQ, and PZ5FF to be very active on all bands/modes outside the CQWW SSB Contest, and be sure to work PZ5A (Multi-Two) during the contest. Their Web page has complete information regarding the operation. QSL via W5UE for PZ5A and home callsigns for pre-contest operation. Web page is: http://www.mdxa.org/pz_2003.html

QSL INFO AND NEWS.....
Tex, 9M2TO, informs OPDX that he is having a problem with cards being sent direct to Penang QTH. Over the last few months, Tex has received many direct QSLs without RETURN POSTAGE. He thinks someone is opening and taking the IRCs out of the envelopes. So, he is requesting to please send DIRECT QSL to JA0DMV: Tex Izumo, 827 Nakanojyou UEDA, Nagano 386-0034, JAPAN. 9M2TO's QSL status is still 100% automatically through the JARL bureau. He has already sent out 150,000 QSLs through the BUREAU.

NEW MANAGER. Effective immediately, N4QB is not the QSL Manager for A61AJ.

Joe, DF6IC, wants to remind everyone that if you want to get your QSL cards direct via airmail or land for his recent FO/DL6IC Austral DXpedition the postcards from Germany the cost: 1.50 € or 1.76 USD.

Special event station VI3BVS was active this past Sunday to commemorate the 200th anniversary of Victoria's first European settlement. The operators were Ron/VK3AFW, Jim/VK3PC and Barry/VK3JBR. A commemorative QSL card will be available. QSL via VK3WI or through the bureau.

NEW QSL MANAGER for VB2R and VB2V. James Davidson, VE3TPZ, who is currently QSL Manager for VC2C Canadian and International, has taken on the additional duties for the callsigns VB2R and VB2V. James has started working on clearing out the backlog bureau cards that he has recently received. If you are awaiting a QSL card you, may E-mail him to check the logbook and see if your request is in the current batch of cards received recently from the bureau. His E-mail address is: ve3tpz@sympatico.ca
There will be a large shipment of cards shipped out in the next few days for VB2R,VB2V and VC2C.

The VK9XW operation is now QRT. The Germans logged 13000 QSOs. The log (along with pictures of the DXpedition) is now available at the following Web site: http://www.qsl.net/vk9xt

YI9X QSLS. Steve, OM3JW, informs OPDX that after the R/J RTTY Contest he received some direct QSLs for Mike's activity as YI9X. He reports that he is having basic QSL cards printed and will get them around the end of October. Full colored YI9X QSL will be printed and ready later at the end of year (because he is still waiting for photos from Baghdad). Communication between Steve and his son Mike, OM2DX, is only via radio or satellite phone. There is no Internet hookup at the Slovak Embassy yet. Please be patient, and don't send duplicate QSL. "Thanks! 73!", Steve, OM3JW.

SILENT KEY. Several sources are reporting that the YASME legend Danny Weil, VP2VB, has become a Silent Key on October 3rd in San Antonio. Danny sailed/traveled the Atlantic, Pacific and Carribean, plus was active from many DXCC entities (30 were mentioned). OPDX and its readers would like to send out our deepest sympathy to Danny's family and friends. For more on the life of Danny Weil, please go to the following Web site and read the obituary at:
http://obits.mysanantonio.com//index.cfm?id=28006&fuseaction=viewobit

SILENT KEY. Jack Haden, VK2GJH (ex-T20JH), informs OPDX: "It's with much sadness that I wish to report the passing of Ian T. Anderson T20AA, of Funafuti, Tuvalu. Ian passed on last Friday, October 3rd, from a heart attack, aged 79 years. Ian was much travelled and formerly signed as GM4JAB, ZD9BT, VP8GZ, J87BD and T2ITA. A former commercial band operator, Ian enjoyed his amateur radio and was well known for his Scottish wit and humour. From Tuvalu he was very active on HF and six meters, mostly CW, before sickness prevented him operating further. Ian is survived by his wife Fipe, five children and three grandchildren. The Pacific has lost one of its more colourful radio amateurs." OPDX and its readers would like to send out our deepest sympathy to Ian's family and friends.

UK, UZBEKISTAN. Naoki, JE7RJZ, will be visiting Tashkent, Uzbekistan, as a member of a TV crew between October 24-29th. He hopes to be active in his spaer time plus participate in the CQWW DX SSB Contest as UK/JE7RJZ. Naoki has not decided what entry yet. QSL via JE7IDA by the JARL bureau or direct to: Kunihiko Nanao, 2-5-4, Mitsuwari, Morioka, 020-0011 JAPAN.

USI NEWS. The Sandusky Radio Club, W8LBZ, will be active November 7-9th from Kelley's Island (OH-001L) located in Lake Erie, Erie county, Ohio, for the United States Island Award (USI). Activity will be on 40 and 20 meters, mostly SSB, using the club call. QSL direct, with SASE, to W8LBZ (Sandusky Radio Experimental League, Inc., 2909 West Perkins Ave., Sandusky, Ohio 44870, USA), or via the bureau for DX.

VK9C, COCOS-KEELING ISLAND. The German team is now active as VK9CD. Their activity will last until October 23rd. The first night there they worked via satellite AO-40, and Hartmut, DM5TI, worked more than 100 stations. As this was been written, their activity was mostly on 20 and 15 meters CW/SSB/RTTY. REMEMBER: QSL this activity only to DJ5IW.

VK9X, CHRISTMAS ISLAND. This DXCC entity has become very active lately. The German team active as VK9XW went QRT over the past weekend and is now on Cocos-Keeling Island (active as VK9CD). By the time you read this, the YL group should be active as VK9XYL until October 27th. Also (and just a reminder), look for Charlie, W0YG, to be active as VK9XG between October 26th and November 8th. Charlie informs OPDX that he will concentrate on the low bands and RTTY for the States. He mentioned that he has already shipped some of the equipment there and that David Burger, VK2CZ, who is going to the island about a week before him, will unpack and set up his station. David is also bringing antennas and will install them as well (antennas from Force 12). Charlie states, "While I cannot operate 24 hours a day, I will be on as much as practical considering I want to explore sights on the island a bit. My present intentions are to operate mostly when there are common periods of darkness between Christmas Island and the States which will also mean many other areas of the world will also have propagation and can work me then too." Please QSL direct only to W0YG. No bureau cards please.

VP2E, ANGUILLA. Operators Ray/KC5EA, Sheila/N5HGB, Gordon/N5AU, Robert/ N5KO, Jeff/N5TJ and John/K5MR will be active as VP2E for the CQWW SSB Contest as a Multi-Single class. They are going to try for a new North American record score. QSL via N5AU.

VP5, TURKS AND CAICOS ISLANDS. Members of the North Florida DX Association will activate Middle Caicos (NA-002) as VP5DX in the CQWW DX SSB Contest. Operators are William/K4UTE, Ron/N4KE, Jim/NU4Y, Mike/NF4L, Mike/N4EPD, David/WA4ET and Steve/AB4UF. QSL VP5DX via NU4Y, all operators will use homecall/VP5 before and after the contest; QSL to their home calls. The first guys will arrive October 16th, and everyone will leave by October 30th.

ZK1, SOUTH COOK ISALNDS (Update). Don, K6IPV, informs OPDX that he and Dave, W6AQ, will arrive on Rarotonga about 9:00 PM (local time) on October 20th. After a decent nights sleep, they will start assembling the antennas. They will have N6FF's 40/75/160 vertical set up right at the high-water line, and Dave's SteppIR 3-element Yagi up at least 18 feet (maybe as much as 36 feet). The rig will be a K2/100 driving an ACOM amp. They hope to be on the air by the afternoon of the 21st. They are going to operate mostly SSB with some CW and, they hope, RTTY and PSK-31. Licenses are in hand. Don is ZK1IPV, Dave is ZK1AQT, and they will use ZK1SSB for the CQ

WW SSB Contest. QSL Manager is W6ORD. They will not have a Web page. Don mentions that they will be next door to Victor, ZK1CG, who has been a tremendous help to them with their living and operating arrangements. They look forward to meeting him and Jim, ZK1JD, who has the mast sections they will use for the beam. Victor has offered his shack and antennas if they run into any trouble. Their wives will be with them, so they will not be on the air constantly before and after the contest. They will probably operate a lot of late afternoons and nights, getting tuned up for the contest. They will tear everything down on the afternoon of October 28th.

ZONE 2. Operators Raphael/VE2CVI, Paul/VE2PGI and Sebastien/VE2GTZ will be active from ZONE 2 as VE2CVI during the CQ World Wide DX SSB Contest (October 25-26th). For more details, watch the Web page at: http://www.qsl.net/ve2cvi

ZONE 2. Fred, VE3JM, will be active from CQ ZONE 2 as VO2WL in the CQ World Wide DX SSB Contest (October 25-26th) as a Single-Op/All Band/High Power entry. He will be in Zone 2 between October 22-26th. QSL via VE3JM.

ZONE 2 (Update/More). Team-Zone 2 will activate "CQ Zone 2" (Grid Square FO11) for CQ World Wide DX SSB Contest (October 25-26th). During the contest, look for the special event callsign VB2C to be used to commemorate the 400th anniversary of the first voyage of Samuel de Champlain to Canada in 1603. For more information, please visit the Web page at: http://www.blupete.com/Hist/BiosNS/1600-00/Champlain.htm
Their operating plan during the contest will be 160-10 meters, SSB only. There are two specific QSL routes for VB2C:

USA/International Direct Canada/International Direct
and Bureau: and Bureau:
Dennis Egan, NB1B James Davidson, VE3TPZ
3 Keith Rd, Wayland 65 Youngs St, Stratford
MA 01778-4517 USA ON N5A 1J5 Canada

For sked requests and any additional information, send E-mail to: TeamZone2@qsl.net
TEAM-ZONE 2 DXPEDITION Web page is: http://www.qsl.net/teamzone2

ZW0, ST. PETER AND ST. PAUL ROCKS. Joaquim, PS7JN, informs OPDX that he is planning a DXpedition to PY0S again, possibly March or April of 2004. He will probably sign ZW0S again. However, he is looking for a sponsor. He states that his radio equipment is old and the salt from past operations has taken their toll on the radio and accesories. If interested in helping, E-mail Joaquim at: dasvirgens@yahoo.com.br
Also, visit his Web pages at: http://www.qsl.net/ps7jn
http://www.qsl.net/ps7jn/zw0s

Didn't Shlumberger get into the picture before Zenith, or was it
after Zenith?

>My first kit was a Heath Q-1.

My first Heathkit was their VTVM (Vacuum-Tube Voltmeter for those
who never played with one). One of the best test instruments of its
time (1950s). I had built one from EICO before that, and there was
no comparison.

That is right, Zenith did not believe Heath was profitable except for the early PC stuff.

Many companies that once were the cutting edge technology now are just a trademark that brings in revenue to the new parent company, like the Heath and Zenith names. Another brand that had a large following is Westinghouse, now under license to Angelo Bros. Lighting in Phil. PA for all lighting and ceiling fan products.

F.C.C. Ruling Could Allow Use Of "F-word" On T.V.
By Jon Hanian BOISE -

In broadcasting, dropping the so called "F-bomb" goes over like an H-bomb. But the FCC has now ruled that the use of the "F-word" by U-2 frontman "Bono" at the Golden Globe awards **did not** violate federal indecency rules.

The FCC rules say the use of the word must be "patently offensive" to be considered indecent. But the FCC ruled that when Bono received a Golden Globe award on television and said, "this is really f * * * * * * brilliant," he did not violate FCC rules. They ruled that the word was used as an adjective instead of a verb and therefore, while it may have been crude, it was not "patently offensive."

If that FCC decision confuses you, think about how those of us in the media are trying to to interpret it.

Dr. Rick Moore of the Boise State University Communications Department believes this decision will muddy the already muddy waters for broadcasters who struggle with what is acceptable and unacceptable speech. "I think it might give some people a sense of greater license to not be quite so tight on that bleep button as they have been in the past," said Moore.

At Idaho 2 News, General Manager Jeff Anderson says while the ruling may make an already murky situation murkier, KBCI TV will not air the F-word in any context. "We have an obligation to program in the public interest, and in my opinion broadcasting programming with that kind of language is inappropriate and we won't do it," he said.

---

(Story 2)

FCC relaxes TV rules on use of f-word
By Chris Baker
THE WASHINGTON TIMES

Remember comedian George Carlin's list of the seven dirty words you can't say on television?

It just got a little shorter.

The Federal Communications Commission ruled this month that Irish rocker Bono did not violate federal indecency rules when he used the f-word during an acceptance speech at the Golden Globe Awards, which NBC broadcast in January.

"This is really, really [expletive] brilliant," Bono said during the ceremony, using the f-word as an adjective. The speech aired live on the East Coast. The FCC said it received 234 complaints, all but 17 of them from individuals associated with the Parents Television Council, a nonprofit group that monitors programs for adult content.

The FCC rejected the complaints Oct. 3 in a written statement that used the f-word far more often than Bono did on the air. David H. Solomon, chief of the FCC's enforcement bureau, said the word "may be crude and offensive, but, in the context presented here, did not describe sexual or excretory organs and activities."

That distinction is a key to test whether a statement meets a federal standard for broadcast indecency, according to FCC staffers. Mr. Solomon said in the ruling that Bono used the vulgarity as an adjective or to emphasize an exclamation and that "the use of specific words, including expletives or other 'four-letter words' does not render material obscene."

Laura Mahaney, director of corporate and entertainment affairs for the Parents Television Council, has vowed an appeal. "The ruling is outrageous. It's splitting hairs," she said.

Activists said they fear the FCC's ruling will allow the f-word and other vulgarities to become more common in prime-time television. "We're gradually getting to the point where nothing will be off-limits," said Jim O'Connor, president of the Cuss Control Academy, a Lake Forest, Ill., group that advises individuals on ways to limit cursing. Spokesmen for NBC and the other major broadcast networks rejected the suggestion that the ruling will lead to more salty language in prime time.

However, they acknowledge they face heavy competition from cable networks such as HBO and FX, which have more freedom to air edgy shows because they do not deliver programs over the FCC-regulated airwaves.

The FCC's Enforcement Bureau issued the ruling on Bono's language. The five-member FCC panel did not vote on the matter. Commissioner Michael J. Copps, one of two Democrats on the panel, said he has not reviewed the case, but if it had come before him, he may not have dismissed the complaints.

"I do believe under the right circumstances that a word in
and of itself can be indecent without having to fit in
with a wider context," he said.

Six years ago, activists and the Clinton administration pushed the
networks to adopt a content-ratings system that would enable V-chips
to block programs parents deemed inappropriate.
At the time, some network executives feared the ratings system
would lead to bland scripts and cost them viewers.
For the most part, broadcasters have continued to push the
limits of decorum with programs such as "NYPD Blue," a pioneer
in the use of four-letter words. The show crossed another line
last season when ABC permitted writers to slip a coarse word
for bull dung into an episode.

# 3197. Can't We All Just Get Along?

Can't We All Just Get Along?

One of the most interesting aspects of amateur radio is its vast countenance. Regardless of your background, technical or otherwise, age, color, race, religion, creed, sexual orientation, or any other socioeconomic demographic from which you wish to analogize it, amateur radio has an interest to satisfy each and everyone.

These interests include: CW, SSB, FM, and AM transmissions; antennas of every kind imaginable; digital and analog circuitry; design; building; using; operating; to just plain tinkering; amateur radio offers aspects from the simple, to the complex, to the esoteric and beyond. As each and every day goes by, the hobby gets deeper, more complex, yet more inviting to greater and greater numbers of the demography. Unfortunately, this also brings out the ills and wills of the same demography.

Over the last couple of years that I have been sharing my experiences with the readers of eHam.net, I have noticed an escalation of hostility toward our fellow amateur radio operators. In Internet speak; it's called "flaming". Although we share a common hobby, it seems those who do not agree with each of our selected flavor of amateur radio are to be ridiculed, defiled, reviled, and hated. While politic opposition is the American way, and has helped us keep this country free, it has no place in a hobby which numbers are the only demographic-of-concern to the powers that be.

Unless you have been living under a rock and thus oblivious to recent attacks on our chosen hobby, now more than ever amateur radio and its various factions need to solidify into a common goal: the proliferation of amateur radio.

It makes little different what your area of expertise is, or why you chose to become an amateur. When you flame one of our fellow brethren for his/her lack of insight, or berate him/her for technical inaccuracy, or lambaste him/her for his position on an otherwise political position, you're also shedding unfavorable light on yourself. The old adage, "You're known by the company you keep" is true.

Everyone makes mistakes, and pointing out these mistakes is part of eHam.net. But all of the superlative adjectives are not needed, nor the name-calling, nor the destructive criticisms, and indeed the flaming which is highly unwarranted. Again, doing so just sheds light on an already beleaguered hobby striving to stay afloat among the various money-driven purveyors of our spectrum space.

One more aspect of the negative and demeaning tendency to flame our opposition is the apparent protection of anonymity. Far too many posters hide behind a pseudonym, or don't post their e-mail addresses, or even their correct name or call sign. While the Constitution and the Bill of Rights protects our right to be anonymous, it shouldn't be a cover-up for insidious behavior.

Rodney King of Los Angeles Riot fame coined the phrase which is the title of this article. If we continue on our present course of demeaning behavior and our propensity to flame our fellow hobbyists, we will be destined to fulfill our notch in history to the same place Mr. King has found himself today; A footnote in history.

I will miss that mag as well.... in the 70's and 80's I can honestly say it
was almost better than QST or CQ. You definitely got your money's worth in
the amount of content. In the 90's, it definitely started to dwindle
though.

I may not have agreed with everything Ole' Wayney said, but I definitely
support him in having the balls to say what he was thinking, even if the
"old guard" didn't like it. He did have a "few" really good ideas, and even
some that were way ahead of the time, but later became a reality.

Great, let me guess, you must be another one of those lazy, anything goes, pot smoking liberals, from B.C., that lives off government handouts. How nice. I love paying the highest taxes in the civilized world. No wonder we can't get rid of the liberal dictatorship. Give the people pot to smoke, filth on TV, and the "F" word, what more could you ask for. At least the "Yanks" you call them, have a culture and respect their traditions. I can't say that for canaduh. If it weren't for the "Yanks", we would probably be speaking Russian. Now if the Americans would like to take over canadah.....please!!!

Yes, those were great if you needed something to get your blood boiling.
Sometimes he had a good cause to champion, but most of the time he was
just looking to start a controversy. (The print version of today's
Usenet trolls, I suppose.) I'd go back into the back issues to cite
some examples, but I've long since disposed of them.

That is, if they don't get wise and start looking into ways of
publishing that do away with the costs of publishing. Monitoring Times
has done it right by making their magazine available in PDF format,
downloadable each month from their FTP site. They provide a smaller
file with somewhat lower resolution, suitable for downloading by dial-up
subscribers, plus a larger, higher-res version for those of us fortunate
enough to have access to broadband Internet connections. I put each
month's issues on CD-ROM so that they're readily available for
reference, without having to keep a bunch of magazines around. (I'm
always citing this as an example, so if I've gotten annoying by saying
it so many times I apologize.)

If only the rest of the publishers would consider similar options....

I ran across some listings on eBay in the past couple of days for a
Kenwood HC-10 station clock. Might be worth looking into for future
reference, or to get hold of one as a spare should the one you just
acquired go south on you.

This proves the fallacy of the Morse code test being a filter to keep out the "undesirable elements." Just because someone can pass an exam doesn't prove that person to be any better than anyone else in their behavior.

BUT... there are MANY more people out there on the air who conduct themselves like adults, respect other people's use of the airwaves, and generally do their best to maintain the good name of Amateur Radio operators. These are the ones you see participating in SKYWARN or MARS or ARES/RACES programs, working with the Red Cross and Salvation Army in disaster preparedness, volunteering with the Civil Air Patrol, or providing community services like helping out with the Tournament of Roses, or marathons, or MS fund raisers, or the thousands of other activities that "pay the rent" for the frequencies we enjoy. Don't judge all of ham radio by the conduct of a few morons who have forgotten the manners their parents tried to teach them....

> What features will I need to be able to start to do low-power CW, and
> is there a preferred brand or model to look for?

Low-power operation is referred to in the amateur radio lexicon as "QRP." If you search on that keyword in Google or Yahoo, you'll find that there are many different options available to you in that category.

You could purchase a QRP CW transceiver such as the Heathkit HW-8 or HW-9. They're easy to operate, fairly low-tech. But they are capable of operating CW and ONLY CW. If you get the itch to move on to SSB or digital modes, you'll need a different radio. Also, it's ONLY able to operate on HF, so if you decide you want to work some of the VHF or UHF bands, it won't go there.

Your best bet would be to get a transceiver that can accomodate multiple modes. My first rig was a Kenwood TS-520, a very forgiving radio that offered CW and SSB operation on the 80, 40, 20, 15 and 10 meter bands. It was all solid-state except for the final amplifier, which used tubes. You can find these on the used market nowadays for under $200 in decent condition. It operates at around 100 watts, but can be cranked down to very low power levels if you need to. (One of the rules in Amateur Radio is to use only the power output necessary to carry on the contact, and 100 watts is often overkill.)

My personal preference these days is the Yaesu FT-817 transceiver. It only puts out five watts, but it supports operation on all of the HF bands, plus 6m, 2m and 70cm. It also provides a general-coverage receiver for HF, plus receives (but won't transmit on) public-safety

VHF-hi communications, the FM broadcast band, and the VHF aircraft band.
With a device like a RigBlaster and just about any present-day computer,
you can also operate just about any digital mode with the '817.

(Obviously I'm a big fan of the 817! There's also the FT-857 if you
want to have a little more power on tap if needed.)

Hope that helps.

Consoling yourself by consorting with the NEGATIVE NERDS
and muttering in the corner of the room with them will not restore the loss
of face that you have experienced by supporting the gangrenous
degeneration that is the M3/CB licence, OM.

As to your comment about being out of my depth, it is noticeable that
you have turned tail in response to my standing up to you.

Hardly surprising when your latest acadaemic achievement was an
upgrade to an M3/CB licence?

Actually Ron, I didn't write the above point on grammatical content.

The FCC did (!) in their 'official' decision. Guess it proves the point
that the FCC *should be regulating technical issues* and not issues
of program content.

Your typical Washington DC bureaucracy at work.

When their not wasting money their likely wasting time and putting
out useless and/or esoteric info that's not worth the ink used to
coat the paper saidsame is printed upon.

There was never an KiloByte.

That did seem to be the intended title as they were getting ready
to publish the first issue. But by the time it was published, it
was Kilobaud. I have many of the issues, including the first six,
and it was always Kilobaud, until they changed the name to Kilobaud
Microcomputing and then just Microcomputer, about five years later.

I've heard varying stories on why the name was changed before the
magazine came out. The oldest would be that it would result in
a lawsuit from Byte, though I'm not sure if this had outright been
threatened or someone just urged Wayne to change his mind on this
because of the potential problem.

But more recently, someone pointed out that very briefly, Byte
ran a cartoon strip entitled "Kilobyte" and they suggested it
was a deliberate attempt at protecting the name. I'm not sure
if that's possible, but it was a lousy cartoon strip, having something
to do with "Star Trek" like characters. I never did go looking to
see exactly when they ran.

On 13 Oct 2003 03:16:22 GMT, Lloyd Davies - The Time Lord <daviesl2003@aol.com> wrote:

: One more aspect of the negative and demeaning tendency to flame our opposition
: is the apparent protection of anonymity. Far too many posters hide behind a
: pseudonym, or don't post their e-mail addresses, or even their correct name or
: call sign. While the Constitution and the Bill of Rights protects our right to
: be anonymous, it shouldn't be a cover-up for insidious behavior.

And indeed, only those who have been living in a Shirley Temple world would naively treat the Internet as a friendly place, where the most rapidly-growing twin crimes of identity theft and stalking don't take place, and where email spammers aren't trying to stuff your mailbox with pornography and drug sales pitches.

On the net, if you make your personal information easily available, you may pay the very high price of identity theft and have people apply for credit cards in your name, as well as have them access your bank accounts and withdraw funds. The crime of identity theft is so rampant that it has given rise to web sites such as http://www.identity-theft-protection.com and has led the US FTC to recommend that you put as little of your personal information on the net as possible.

The prudent netizen holds his or her personal information closely, and only reveals it to family and friends. For example, you can maintain a throw-away mailbox for unknown people, so that they cannot gather up any additional information about you or damage you by selling your address to others. Free mailboxes can be obtained from places like Hotmail and Lycos, while your ISP mailbox address is revealed only to close friends and family.

On both Usenet and the web, similar precautions need to be taken. Never post your ISP mailbox address, and never give out your personal information, because you literally don't know who is reading your posts. While 99% of the readers may be friendly, it only takes that one spammer, stalker, or thief to do exactly the wrong thing with your information. So why give them any edge? Don't publish your personal information in the first place, especially any amateur call you might hold.

And this gets me to the biggest problem of ham calls: Anyone who has access to a site like qrz.com can go look up precisely the kinds of things that identity thieves and stalkers need to begin their activities. Regretfully, I have to say that such information should no longer be made public by the FCC, just as driver's license information has been shielded by more and more state governments.

Data bases such as those maintained by qrz.com are a valuable resource for the criminal element, and we must now make that information much more difficult to obtain.

In my opinion, advising someone to make his personal information public on the Internet is similar to telling a pedestrian to cross the street anywhere he desires: It is incorrect; it can do great harm, and it is irresponsible.

So no, Shirley, the Internet isn't a nice, tidy "why can't we all be friends" world, although it is a valuable and entertaining resource. Respect it for what it is, and adjust your behavior accordingly when you venture forth here.

Hi,

Kenwood provides a manual with its TS-570D series explaining how to access the standard menu but as usual, they don't mention that there is another menu, a secundary one that each of us can set according his needs... One more undocumented feature to Kenwood !

Does someone know how to access this secundary menu ?
If you prefer you can send me a private email.

Thanks in advance.

I still remember how to change channels.

Programming is driven by revenue.
If people watch it, then the ad time is worth money, and whatever it is,
we'll get more of it.
If people turn it off, then the ad time looses value, and whatever it is, it
will get pulled.

Hard to imagine a more democratic method of selection.

Hi,

Are you speaking about the menu aligning the radio and that requires test
equipment to set several of the parameters ?
Does it includes the setting of SSB power and related ?

To make it brief as possible. He made a career of harassing other hams. He
would come on a frequency, just butt in and start talking. Even when told
to clear out, he would keep it up.

He claimed to be a draft dodger during the Vietnam war years, and made a point of attacking those that went. He would follow folks around and jam there conversations with computer 'tapes' as he liked to refer to them...etc. In otherwords he has a long record.

He used to be KC1ZQ. Was ordered for retest and failed the Advanced. He is the ONLY HAM in recorded history to downgrade his license class and STILL not learn anything.

The final straw was when he came on the air and accused another ham of being a porno star. This and many other acts were taped and supplied as requested to the FCC.

I think you are on the wrong frequency with this one OM. The world of telecommunications must run on one master oscillator. Call it GOD if you will. There is a heavily guarded master oscillator somewhere on earth that keeps everything in sync. I think it is somewhere in New England. All you have to do is get a feed if this master clock and phase lock loop all your ham junk to this frequency. What do you think would happen to all the worlds telephone, television and satellite gear if everyone had their own free running oscillators? Chaos. I doubt you can cut a piece of quartz to any predictable frequency without specialized equipment nor keep it at a predetermined frequency without a very accurate crystal oven. Remove just a pubic hair of quartz and all is lost.

What happened to the covers? Without covers, these radios are reduced to the status of parts rigs. What about microphones and manuals and mobile brackets?

I have an IC-751 I like but I wonder what you mean by the back cover.

Perhaps you can guess at a price for everything and I might take it all, in hopes of fixing up some of the stuff to get my money back and then having the rest gratis.

Let me know.

Well, there was the HRG (Hemispherical Resonator Gyro)which was touted as a low cost replacement for the Litton and GM Carousel systems, but, as you rightly comment they were beaten out by IRUs with RLGs.

The Boeing 777 has a unit called an ADIRU which comprises 3 IRUs and 3 ADCs in one unit with built in redundancy.

GPS inputs to the Flight Management Function come from MMRs (Multi-Mode Receivers) which comprise VOR/ILS/MMR/GPS/Marker in one box. (There are three of these per aircraft).

All very reliable compared to the 70s/80s type gear.

Last week on eBay, someone listed a 1-year subscription to "73" for
$9. There were no takers.

I'll have to do a search at the US Patent Office to see who might have a
patent
on the f-word. And to see if they wrote it offensively.

;-)

I wonder how many lifetime subscribers this will affect?

If I'm remembering right, fairly early on Wayne sold them, and they
were $37. In 1973, he sold them for $73. I think he continued to
sell them for some time after that; I have a recollection of a $150
life time subscription, but that's a more vague memory.

Were the lifetime subscriptions honored for all that time? How many
of them abandoned the magazine. explicitly telling 73 they didn't
want anymore issues, or just not providing a new address when moving?
How many who did buy a lifetime subscription were still alive by this
month?

Thanks for the info, I'll check out those models also.

I will probably be trying out all modes of operation on all bands eventually, as I learn more, so how many watts of output power will I need for most contacts? I don't want to start out undersized!

Also, does anyone know of a website that has side-by-side compairsons of rigs?

Thanks,
MikeB

But Noooooo, you all said Restructuring and the no-code tech license were good ideas. Why will new hams and upgrades buy a radio magazine to increase their knowledge and radio skill? They won't! They don't care about ham radio. They want to stay stupid! Having a ham license doesn't mean anything to them because they didn't have to put in any effort to get it. It was handed to them.

HA. The ARRL plan to support dumbing down ham radio is going to back-fire on them. Heee Heee. They put free licenses in people hands but those people aren't buying memberships. QST will be going the way of 73! HA. Hiram Maxim is turning over in his grave.

I was always under the impression that the word "$HIT" was considered more
indecent than the "F" word by the FCC.

Wayne has always been a "rebel" from way back to the beginning of RTTY vs the FCC. Along with some of the pioneers of RTTY, Boyd Phelps, W0BP, Byron Kretzman, W2JTP, Merrill Swan, W6AEE and a few others. Those amateurs convinced the FCC to allow FSK keying instead of "make and break keying". Wayne got his writing start with CQ magazine as W2NSD's "Amateur Teletype" bi monthly column or before with a small RTTY newsletter in Cleveland, OH? Then on to assistant editor or editor of CQ magazine before breaking away and the creation of 73 magazine.

In 73's heyday the magazine was twice as thick as QST, with just about every ham related company or store advertising in the magazine. Some of the articles and columns were very informative. The "April fools" issue was really a great innovation for it's time. The one I remember the most was the burial of a dipole underground and the signal therefore would be "inverted" on the transmit end and one also needed a buried dipole to receive the "inverted" wave.

He exposed a ham store in the suburbs of Chicago called "Trigger Electronics" The store advertised the purchase of your "used gear", When the received check bounced at the banks from Trigger then hams wrote to Wayne and he personally looked into the store and it's business practices. Put "Trigger" out of business by exposure in 73 magazine editorials.

The magazine promoted two meter FM repeaters, maybe even lobbying for the hams before the FCC to relax the rules some for repeater operation?

I was behind Wayne at a Hamfest in the coffee and doughnut line where he was the featured speaker, he mumbled something about the price of the doughnuts and that they were to small for the price, but he took one anyway.

I heard in the later years that Wayne required a certain format for articles or columns and if the author did not follow the format, then the article or column did not get published.

Think a lot of the advertisers were leery of Wayne when he attacked the ARRL so often in the editorials and they dropped out in fear of QST removal of their advertisements in that magazine.

Somewhere along the way, Wayne got off on the wrong tangent and destroyed a good technical magazine.

So not all is bad about W2NSD, he has contributed to the amateur radio in ways that are behind the scenes.

Thanks Wayne for the "good years" when 73 was great.

Just a *bit* of a stretch of logic there... I think you pro-code test types are having to dig as deep into the soot and dirt to come up with argument points now. It's a little difficult to believe that just a lack of interest in having a morse code profeciency test is to blame for a magazine not cutting it in a capitalist system.... they mentioned "a reason of economics".. ever thought that maybe it's just another product who's time has come and gone? Did you really think that the model-T would last forever and never be taken out of production?

Clint

I one I love was the "MAD Magazine" issue. The cover had ol Alfred E. Newman soldering a radio chassis with a big 300 watt soldering gun saying "What, me solder?" Inside the issue was "Ham versus Ham" comic strip which was a parody of "Spy Versus Spy". That whole issue had me in stitches for days.

QST used to be fun as well. Compare this month's issue from any one during the 40's, 50's, 60's and 70's.

The 80's and solid state electronics changed things.

Reading QST now is about as much fun as going to the dentist.

Of course, for my callsign I could use

Knife Zucchini One Oedipus

or even

Kilo Zero One One

We can only have 52 states. That would be a full deck.

The ATC thing reminds me of a problem that my dad and I had when we flew a Cessna 172, whose tail number was N466SR. Whenever we'd say "November 4 6 6 Sierra Romeo", there was a 50-50 chance that ground would reply to "zero romeo" (our 'sierra' sounded like 'zero'). Whenever we used "sugar romeo" as the phonetic, they always got it first time.

This coming Sunday....

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday October 19th 2003
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,
will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Sponsors: MIT Electronics Research Society
MIT UHF Repeater Association (W1XM)
MIT Radio Society (W1MX)
Harvard Wireless Club (W1AF)

For more info / advanced reservations 617 253 3776

I fucking hate to follow up a non-ham-radio posting on a fucking ham radio newsgroup, but (groups trimmed) this really fucking *is* about ham radio. I use that particular word in casual conversation more often than I did 20 years ago. I do, however, keep it G-rated on the air, by personal fucking preference.

I don't think I ever use that word to "describe sexual or excretory organs and activities". There are actually much better words for that, and in fact, many of them are patently non-offensive.

"Come" is a good example. "Blow" is another. "Dick" is a man's name. My grandmother, for example, uses those words in a non-offensive context all the time.

The only time she says "fuck" is when the woman next to her yells "BINGO".

He offered a lifetime subscription to Byte and later, to Kilobaud for
$150. I paid the $150 for Byte. After it was sold, I was notified my
subscription had expired. I sent a photo copy of the canceled check,
marked, "Lifetime subscription." They sent them for another year, then
pulled the same stunt, and refused to honor the contract. I have never
bought anything from the publisher, since they screwed me.

>
>
> That's an adverb, not an adjective.

Actually, "brilliant" is the direct object of the sentence, which by definition, is a noun, so that particular modifier is an adjective, and not an adverb. "This" is the subject, "is" is the verb, 3PS of "to be", and the sentence is actually not grammatically correct, so there are some problems deciding what part each word performs, or the fucking intent. When you have an illiterate moron musician trying to speak the King's English, you get "This is really, really, fucking brilliant." What the fuck does that mean? Is there, perchance, a light in his eyes that makes him unable to read the fucking teleprompter?

If he were to have said "This is really, really fucking brilliantly done", then 'fucking' would have been modifying an adverb, which still makes it an adjective. The only other uses of "fucking" would be either present participle ("Bubba is fucking his new cellmate"), or gerund (a noun formed from a verb, such as "I enjoy fucking", or maybe the classic failed Minnie Mouse insanity defense, during their divorce proceeding, where Mickey tells the Judge that Minnie is "fucking Goofy."

(anyone interested in this stuff, go to

First off, we know that Rush is being "investigated" for possession of unauthorized prescription painkillers. I do not see anything showing that he has been arrested so far. Last time I checked, that was an essential first step for prosecution.

Second, if he is arrested, it will be for possession (not sale). Apparently, he took 'em all when he acquired them.

And finally, there is no court that I know of in the USA that gives time to first offenders for possession offences -- even for possession of "street drugs" like crack cocaine or methamphetamine. If they have the funds (and Rush does) they go to private intervention programs like the one Rush is currently attending (or like Robert Downey did). If they don't have money or insurance, they end up in a publicly funded program, which is usually in some sort of minimum security facility, but they are released upon completion of the program.

I can't speak for Florida, though I hear their drug laws are also tough..
but Oklahoma, among other states, allows for extremely lengthy prison terms
(there are those there doing 99 years to life) for first offense use only
violations, including for simple possession/use of marijuana in small
quantities. This is not used on everyone, but is used often as a deterrant.

For the record, I don't like Rush.. I see him as a pompous blowhard who
needs to take a chill pill, rather than illicit pain killers (and I am a
moderate conservative). However, it is not right for people to kick anyone
while they are down. I hope Rush gets his act together, and goes on with
his life without the need for addictive drugs. He deserves the same breaks
that anyone else would get in the same circumstances.

IIRC, the subscription form in the mag for some time used to say
"Lifetime (ours or yours)".

The magazine cover parodies were always fun, the Playboy and QST's
particularly memorable.

Sadly, most of my 73 (and HR) collection got turned to mush in a
basement flood a few years back; still have a few of each.

I'm expecting that Wayne will be appearing on Art Bell some weekend soon
to Explain It All.

Let's try that again.

I am talking about Rush and holding him accountable for his own
virulent strand of moral behavior, not legal. So, here is what Rush says
about people like himself:

"And so if people are violating the law by doing drugs, they ought to be
accused and they ought to be convicted and they ought to be sent up."
- Rush Limbaugh

If Rush actually demands to be 'sent up,' whether he is or not, I
will alter my opinion of him as a hypocrite.

Until he walks the way he talks, he is just another snake oil
salesman, and you know it.

I disagree (in some parts).

A Ham Radio Group should be about ham radio, and the culture as well. Ten years ago, r.r.a.misc was that way. But as time went by, it was just like anything else that used to be good: the riff-raff found out about it, and ruined it.

Remember when you could occasionally use the postage machine at work? Remember when you could make a long distance call or two from work? Remember when we trusted each other?

Now, no.

G*D* punks are trying to steal, or somehow get, EVERYTHING for free. Cyberpunks. Script kiddies. Assholes, basically. Someone who would throw a brick at a parade. Someone who would spray paint grafitti on a work of art (or even on a brick wall). It's vandalism, and they are too stupid to see that this crime does have a victim.

Let's move on to the subject at hand: our Constitutinal scholar, who penned the followup (here, below), saying "the Constitution and the Bill of Rights protects our right to be anonymous", is flatus. In fact, the Bill of Rights only states the pre-existing rights of The People. Rights are God-given; protection is from the courts and the police; not from the CBR (Constitution and Bill of Rights).

For reference:

Amendment I

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the government for a redress of grievances.

(end quote)

The newsgroup followup is even worse. "The prudent netizen holds his or her personal information closely, and only reveals it to family and friends."

The word "netizen" is deprecated. Personal information is freely available, and it is time wasted to try to hide one's identity.

Security by obscurity never, never works.

Generally speaking, people who choose to taunt others anonymously, will wither when confronted with two facts: their identity can always be

determined with some due dilligence, and once the victim has shown that he or she is a strong supporter of the first two Amendments of the U.S. Constitution (of course, one protects the other).

These douchebags usually go away. And you know who you are.

The good part is that we hams can (legally) talk about anything we want to on the air, but because we have class, and care to promote "good will", we usually keep it friendly. We have been resoundingly successful in goodwill between nations, even to the point of saving lives during armed combat (WWII, Viet Nam).

People on this newsgroup who send barbs at strangers do not reflect the ham population, and in fact, are probably not licensed at all. They could not pass the test for some reason, perhaps not being old enough to drive to the test session, or not being able to get their short bus to do so. If they had a ticket, they would post their callsign along with their idiotic comment.

Then again, maybe they wouldn't act like such an idiot if their callsign were next to their posting.

73,
Dave

Having built quite a few prisons and jails and therefore having to
service their systems I believe I can say with a high level of
certainty that no one in their right mind would ever demand to be sent
up regardless of the circumstances. Besides, there is as great or
greater access to illicit drugs in prison as there is out in the free
world.

Of course it's a stretch, Clint. That's all some have left at this point. In reality, the magazine "73" has never obtained great success in the marketplace, which means advertising revenue has always been lower than the other magazines. At the same time, printing and other costs are going up, making it much more difficult for smaller publications to stay in business. This same thing is happening throughout the publishing industry. Lower advertising revenue, combined with rising costs, is putting many smaller magazines out of business. Knowing that, it shouldn't surprise anyone when the same thing happens to the ham radio publications.

Oh, don't spoil the children's fun. They think they're going to
win the lottery. You know how the only fun about buying a lotto
ticket is the time between when you buy it and you find out you
lost? Well, that's where they are. Think what a lifechanging
experience they're in for! Not!

Look on the bright side. We can all enjoy imagining their big
letdowns after the case is over. We all know that Limbaugh is not
going to serve a day in jail and rightly so. Hell, he's got years
of community service backlogged. That's assuming that he is even
charged, which is not likely. Then we can all enjoy their
suffering and gnashing of teeth.

For me, I could care less whether or not he serves a day in jail. I
do care quite a bit whether or not Rush lives by what he preaches.

Let's see if he demands for himself to be 'sent up.'

Okay -- here's something you'll appreciate. Let's follow your idol and do a Clintonesque parsing of words to uncover exactly what was said!

"And so if people are violating the law by doing drugs, they ought to be accused and they ought to be convicted and they ought to be sent up."

The key words are:

"Accused" -- definitely. (By the National Enquirer no less).

"Convicted" -- No, but he has made an admission that he is addicted to prescription painkillers. A confession. The honorable thing to do in a dishonorable situation. He didn't wave his finger and say "I did not get pills....from that woman.....my housekeeper..."

"Sent up" -- Absolutely. He's in rehab at his own expense. He short-circuited the process and went directly to his penance. As I mentioned before, first offense drug possession (if he's even charged) for abuse of prescription drugs is always sentenced to court-ordered rehab. That is the full meaning of "sent up" in the first offense context.

The problem is that you're so blinded by your misguided hate for Rush that you can't deal with the fact that he won't do time.

Meanwhile, left-wing icons like Aaron Sorkin and Robert Downey Jr. can be caught with crack cocaine and heroin and are held up as people to be pitied and given several shots at rehab before they actually have to go to jail. And even then, it is viewed as a last resort for their own protection so they won't O.D.

Again, either this is something that was genuine on the part of
President Clinton, or it isn't. Since I don't idolize the man, I vote
for the latter. So let's skip the parsing, shall we?

> "Convicted" -- No, but he has made an admission that he is addicted to
> prescription painkillers. A confession. The honorable thing to do in a
> dishonorable situation.

Instead, I'll just take your whole 'kit and kabudle' (something my
mother used to say): Honorable? Suddenly we have a new definition of
honorable and nobody told me? They keep doing that! First definition
that seems to suit your usage: "moral integrity."

Oh my. I guess they haven't changed the word on me after all. I'm
always doing that. So, Rush is honorable for admitting he was addicted
to drugs. Yes, I agree with the admission. He did admit it. Finally. But
as we say in treatment, it is never too late to admit you are addicted.
Kudos Mr. Limbaugh. However, admission is not synonymous with honor. Sorry.

To be honorable, to me, suggests a little more than admission after
you are caught. Don't you think?

AND, if he is guilty of buying them illegally, then we can consider
his admission as something even less than an admission . . . it was a
cover for something more sinister. Since he doesn't deny this aspect of
it, we can only assume it's true for now. Also, reading a prepared
script from your lawyer on the last day of the week (a known media
blackout day) is a little less than honorable, wouldn't you say?

> "Sent up" -- Absolutely. He's in rehab at his own expense. He

> That is the full meaning of "sent up" in the first offense context.

A few things . . . treatment is not penance. It is a country club for
people like Rush. They are perfumed and pampered and tucked in at night.
Rush of course could have meant "court ordered rehab in the first
offense context" could have been what Rush meant. Course, the spirit and
context of what he said and your huffing and puffing over this strained
logic leads me to believe otherwise.

> The problem is that you're so blinded by your misguided hate for Rush that
> you can't deal with the fact that he won't do time.

LOL. Rush is not worthy of my hate yet. Perhaps if I knew him
personally I could grow to hate him. To me words like "honorable" and
"hate" have a tremendous amount of meaning. I don't use them lightly.
Again, i could care less if rush does time, although i do care if he
walks the way he talks. But when your whole public life is based on
talking with very little public walking, it seems a bit odd to ignore
something this potent about how the man walks.

> Meanwhile, left-wing icons like Aaron Sorkin and Robert Downey Jr. can be

Sorry, bud, but you're dreaming. Those are tough statutes, but they haven't actually caught him with any oxycontin, much less enough for a mandantory minimum.

Of course, a housekeeper selling a story to the National Enquirer is saying it was a lot.

We know nothing of the circumstances behind any of these investigations, including whether or not she's exaggerating or even blaming being caught with her own supply on Limbaugh.

Again, we see nothing but your own wishful thinking.

Gee, so the news doesn't get covered on Fridays? Hah! That's a little weak. The Friday news gets talked about all weekend. Seriously, you should watch more Fox News.

Well, at least we agree that Sorkin and Downey are lilly-livered pansies.

As for the gist of your note that Limbaugh deserves special scorn because of who he is, it's true that those of us that agree with many of his viewpoints are very disappointed that Rush has these problems. He had better get a handle on this addiction because he won't be given any slack the second time around, unlike many liberal icons.

I feel sorry for him the way I feel sorry for an orthopedic surgeon I know that became addicted in a similar manner, who lost his practice, his wife, and his livelihood. What a waste. It's a shame that it takes people so long to get help. I have known or known of others, and it has usually been equally tragic.

Again, the hypocrisy that disturbs me most about this episode is the venom and ugliness that I have seen from those on the political left that are always so quick to call themselves compassionate and caring.

HF Guy,

"Did you pray for Bill Clinton in his hour of need?"

YES - I did.
The same prayer that I said for Nixon.
- God give this man the common decency to resign.
- - Nixon has the Personal Courage and Honor to "Do The Right Thing".
- - - Clinton seems to be still living by the motto "Just Do It !"

Born-Again Schisms

Republican rule brought war: now America mulls its baleful consequences

ANITA PRATAP

Team spirit has always been one of America's most admirable qualities.

Though encouraged to be individualistic from childhood, equal attention is paid to fostering team spirit through a variety of games and other group activities that carry on into adulthood.

In unity lies their strength.

But that team spirit appears to be in tatters now.

America has never seemed so dangerously divided, so passionately partisan.

It's split between Republicans and Democrats and the schism seems deep and poisonous.

The hard right is hard-nosed and aggressive.

The soft left is squeamish and ashamed.

Never have I heard so many liberals say they are uncomfortable in their own country, confused and worried about America's unrepentant deviation from national ideals.

The liberals comprise not merely intellectuals--they include blue- and white-collar workers, teachers, officials and entrepreneurs.

This divisiveness is the legacy of the Bush caucus.

Having reduced America's national interest to serve the vested interests of small powerful cliques, the Bush administration has aggressively waged a campaign of misinformation, disinformation, dirty tricks and relentless attacks on opponents to achieve its partisan goals.

In the process, America's twin towers of success--its democracy and economy--are getting hit.

Whistleblowers have been among America's greatest heroes, contributing to a system of checks and balances that have kept the US democracy strong and resilient.

But now they are publicly discredited and privately persecuted.

The hard right's slanderous attacks on opponents and heavy-handed methods to crush dissent have a familiar ring, be it in Germany, India or America.

The controversy that could yet turn into Bush's Watergate revolves around the sneaky disclosure by a White House official that retired ambassador Joseph Wilson's wife is a cia operative.

Wilson is being targeted and discredited for nailing the Bush lie that Iraq acquired enriched uranium from Niger.

An inquiry is now being held into this 'criminal' disclosure that jeopardises the operative's life and network.

But nobody expects anything out of this probe as the Justice Department is led by Bush appointee John Ashcroft, a born-again Christian like his boss.

The dangerous divide in American society is being aggravated by the media, notably the Fox news channel, Washington Times and the editorial page of the Wall Street Journal.

American liberals accuse them of tirelessly, stridently and unabashedly promoting a right-wing agenda--lynching Democrats, planting lies, pitching jingoism, justifying tax cuts for the rich and perpetrating partisan, abusive journalism.

The machinations of the hard right's footsoldiers are hilariously exposed in two new must-read books: Lies and the Lying Liars who tell them by Al Franken and Bushwhacked by Molly Ivins, both liberals and both soaring on the New York Times bestseller list.

Franken describes Rupert Murdoch as "evil", quoting Columbia Journalism Review:

"Murdoch uses his diverse holdings...to promote his own financial interests at the expense of real news gathering, legal and regulatory rules, and journalistic ethics. He wields his media as instruments of influence with politicians who can aid him, and savages his competitors in his news columns".

Franken is no squeamish liberal.

He gives it as hard as he gets from the hard right, who have their own phalanx of authors trashing Democrats, in particular Bill Clinton.

There is not a single crime he's not been accused of--murder, rape, treason.

But you can't fool people all the time.

More and more Americans now realise that the world was safer, they were safer, had enjoyed tremendous goodwill internationally and experienced the greatest economic boom during the Clinton era.

If America's democracy is under pressure, its economy is under greater stress.

Unemployment is no longer merely a statistic.

It's a harsh reality invading too many homes, disrupting too many lives.

Highly-qualified medical researchers now drive taxis.

College graduates have to wait at least two years to find a job.

Millions have abandoned their health insurance.

Pensioners cannot afford prescription drugs.

Americans wonder why their drug companies sell the same medicines in Canada for one-third the price.

This is not the triumph of capitalism.

This is collusive corporate greed of the worst kind.

And the backlash against unregulated freemarketeering that aggravates unpardonable social injustices is beginning within the US.

If the late 1980s signalled the end of communism, the early 21st century spells doom for crony capitalism.

The US right-wing agenda is uncannily similar to our own hard right--in form, substance, methodology and execution.

The Republicans succeeded in pushing America into war and today the entire nation suffers its consequences--they have created a terror hub in Iraq, US soldiers die every day, they are mocked and diminished in the eyes of the world, are saddled with a polity that is dangerously divided, stuck with a ballooning budget deficit and coping with a ravaged economy that is struggling to recover.

So, who is more patriotic?

The wise Democrats who cautioned against war or the macho Republicans who bulldozed their way?

Had we gone to war with Pakistan last year as our own "patriotic" right-wingers clamoured, would India be experiencing the remarkable economic boom this year?

Those of us who campaigned against war, despite the barrage of threats and abuses, feel vindicated.

But divisions should be consigned to the past, for strength lies in unity.

Team spirit and not crab mentality ought to be our national trait.

Steve, like Ham Radio magazine, now that 73 is "defunct" it's time for you to call into question of what value any of its contributing authors made to the ARS. Additionally, you may now call into question whether any of their work was original or not.

Finally, you may tell us how many articles you've had published by 73 magazine.

Best of luck, Brian

You're WRONG! No-Code Techs and Extra-Crispies are NOT the reason 73 magazine is out of business.

Britney Spears is to blame. Ever since the "Baby One More Time" video, Britney has been working tirelessly to corrupt all 6 billion members of the human race by exposing her midriff. If Britney hadn't tied up her shirt in the "Baby One More Time" video, the Good Old Days of ham radio would still be with us. :)

CQ, CQ, CQ baby one more time!

I dunno, Steve... I downladed a 46megabyte file from Germany last
week and it only took about 5 hours with my snailpace dialup.(no
broadband available here) Seems the website has a lot to do with how
download speeds. Or maybe I just lucked into a good net route. It never
even flinched during the entire process. Normally I would lose the link
after a time.

Good idea really, with the PDF subscription. I'll have to take a look at
Monitoring Times site.

Not that it matters to anyone what you think, but it seems to
me that the quotes from Limbaugh that I've seen refer to illegal
drugs (cocaine and the like). I'm sure in their blind hatred, the
"lynch Rush" crowd is unable and unwilling to see any difference,
and I see no reason to force feed them.

Sorry... we don't yet know WHAT he is being investigated for only that he
is under "investigation"

> Second, if he is arrested, it will be for possession (not sale).
> Apparently, he took 'em all when he acquired them.
>

Is that right? Perhaps you should pass this evidence along to the
authorities, it would save them having to do all that expensive
"investigating"

Besides in this ALLEGED quantity Florida law allws no distinction between
possessing and dealing.

Rush had his own cartel.

> And finally, there is no court that I know of in the USA that gives

>

Actually there are lots of states (like Florida) that have enacted laws
that possession/purchasing , in sufficent quantity is no different than
dealing. The ALLEGED quantity that the pigboy was buying would make him
subject to one of those laws which have one of those NICE minimum
sentences.

I still think he will do a deal, Newsweek reports that Black is talking
with the prosecutors.

I think he needs to do some time IF guilty, if only to disprove the
general theory that rich white guys don't go to jail. But he likely

won't.

Now please foad... you are boring me.

Okay, B....you can now move to the "A" twit list.

First off, you note it's still an investigation, yet you then let your hopes and dreams wander into the fantasy of charging him for dealing.

You speak from the abundance of your ignorance that "Rush had his own cartel."

He is an addict, but he's a well-to-do addict. He didn't need to "deal" to support his own addiction, like many other addicts do. Apparently, his housekeeper was also an addict, and did.

A first-year law student could successfully defend Rush from any dealing charge (and very probably from anything else) as I haven't seen them actually nab him with any illegal prescription drugs.

I'm sure his lawyer is talking to the prosecutors -- and telling them that Rush was only a harm to himself.

Just as fame should not be a shield from equal justice under the law, it should not be cause for singling out prosecution either.

Sorry about boring you. Maybe you can get someone to look up the longer words for you next time.

Thanks, Dan. I wasn't aware of this particular person's history. Not
sure why he didn't pop up on my radar, as some have in recent past.
Guess I should pay more attention to Riley Hollingsworth's bulletins on
the Rain Report website.

>
> LRod

I would've never thought this would've been an issue. My *own* method has to
generally adhere to the standard phonetics during message traffic, and
anything goes in informal QSOs. For example, the first time I ever signed
on years ago with KC4KWH, one of the guys on the local repeater remarked,
"AH! It's 'kilowatt hours"! And the name stuck. But he was not the only
one to think of it. When I "graduated" to HF, many times diverse hams
;picked up on those phonetics without any prompt-ing from me---even when I
sounded the suffix as
"kilo whiskey hotel", the guy was likely to respond with
'kilowatt hours'. During difficult conditions, I, too, have resorted to
kilowatt hours, and it *seems* to be universally understood. One or two in
the electrical industry said, "Boy, I wish I could 'buy' that call". LOL!
So when Vanity came along, I just dropped the 'c' and
became K4KWH.

Bottom line is, aw c'mon guys, relax and don't be so serious!

I think Rush should walk the way he talks. All he does is talk,
unfortunately, with little to show for anything else (except a mansion
in a posh area in Florida where they scorn the 'little guy,' or as they
call them, "The Help").

Like I said, when your whole public life is based on talking with
very little public walking, it seems a bit odd to ignore something this
potent about how the man walks. I personally wish him great success in
his recovery, but being a recovered addict myself, I know that it is not
going to be the Personal Responsibility Cakewalk that Rush has led
others to believe.

On the other hand, Limbaugh claims Character is King . . . morals
count. He has identified himself with his message, so it's a no win for
him and his detractors. If you criticize the message, you criticize the
man. Rush created this predicament for himself.

> I feel sorry for him the way I feel sorry for an orthopedic surgeon I know

> and his livelihood. What a waste. It's a shame that it takes people so
> long to get help. I have known or known of others, and it has usually been
> equally tragic.

It is. People like Rush shouting prejudicial and ill informed slogans
at addicts has not helped in the least. Rush has another component to
the scenario you describe above: your surgeon would also have to be
actively working against treatment of, and compassion for other addicts.
He would also have to have claimed the moral high ground for many years
while lying by omission to those he was preaching too. And, your surgeon
would also have to have waited until he was caught red handed before
making any attempt to address his hypocrisy.

> Again, the hypocrisy that disturbs me most about this episode is the venom
> and ugliness that I have seen from those on the political left that are

> always so quick to call themselves compassionate and caring.

You'll have to provide something from the left that counts as more than a few rumblings from the rafters. If you are referring to this newsgroup, it is a lousy barometer and does not count. We have to use the real world as a reference.

In the real world, I watch or read story after story where Rush get a pass. Alan Colmes gave him his heartfelt hope and wishes with no bile whatsoever; Fox, CNN, ABC, NBC, have all had expert doctors on to tell us about what Rush is going through; not one word about hypocrisy or suggestion that he deserves anything other than help. Newsweek, Time Magazine, event the LA Times all had compassionate stories that wished him well.

So, where exactly are these liberals who are being ugly?

Not that I'm pretending that you care what I think, but . . . LOL

Oxycontin is indeed an illegal drug if you get it without a
prescription. In fact, it has been outselling Heroin as the opiate drug
of choice. Are you aware of this?

> <groan>

Steve - this sort of nit-pick has no place in ham radio. There are many phonetic word lists, and they all have different words: International, Police, ITU, ARRL, Navy, Western Union, ICAO(CAA) - and not a one of them is illegal to use, and even the cute self-created ones work just fine. Yes, if I were doing police dispatching, I would use the police phonetics. But this is amateur radio, and it's supposed to be fun. In Ohio days I stopped using WILD ZEBRAS 8 ALFALFA because the "8" got confused with the "A"(as in "ate"). But as long as you could tell the call was WZ8A, it was legal. You would probably correct me if I said my "handle is Andy." Understand that the use of "handle," as a cute substitute for "name," was going on long before CB ever existed. I was saying "my handle is Andy" on the 11-meter ham band back in 1959. Hams probably picked it up from the military. The strict protocol may be good training for traffic nets and such, but please loosen up a little. That stuffed-shirt stuff could take the fun out of the hobby for a beginner, and there is no reason for it. Think I'll turn on the rig and send a "dit-dah-dah-dit-dit" waiting for a "dit-dit" back (instead of a CQ call). It's legal, as long as I send my call within ten minutes.

Am I aware of which? I don't keep track of the drug du jour and
how it stacks up against the others, no. I WAS aware that
Oxycontin is a LEGAL drug that requires a prescription, and to use
it WITHOUT one is illegal, yes.

I feel no need nor desire to make excuses for Limbaugh's
addiction, and neither does he. But there's a difference between
willingly starting up with cocaine or heroin, and developing an
addiction to a drug prescribed to you by a doctor.

Gee, that's terrible, DP. The heroin cartel better step up their
advertising.

If what you're getting at is that Rush might as well have been taking
heroin, your argument is just plain dumb. Addicts like Rush get started by
being injured and staying on pain medication for too long a period.
Generally, as their addiction increases they will try schemes involving
multiple doctors prescribing medications with each not knowing about the
other. When they start to catch on, they go for the black market, which
exactly what it sounds like Rush did.

Heroin addicts get started by looking for a high, and are foolhardy enough
to go for a street drug with no information on quality or potential dose.

Oxycontin is prescibed for pain of the degree that
cancers cause and for patients that are terminal.

Abusers generally break past the time-release
capsule and either inject or sniff it.

As I thought, you have the same trouble finding anything outside of
the knuckleheads on this newsgroup that proves liberals are attacking Rush.

However, I can find lots of examples where they have done the
opposite. So, you are wrong.

Oxycontin is outselling heroin. It's use and prescription is
extremely restricted. And, it is not prescribed for something as minimal
as back pain.

> I feel no need nor desire to make excuses for Limbaugh's
> addiction, and neither does he. But there's a difference between

Oxycontin is prescribed for cancer. Not back pain. Rush did not say
he was prescribed Oxycontin. He had to get it illegally.

Even in light of this, there is no difference. Unless you have been
addicted to drugs and then got sober. Have you? Do you know what this is
like?

Republicans break ranks as Bush's support drops
Chicago Tribune

WASHINGTON -

When President Bush took office, he made legislating look almost effortless.

With Republicans and Democrats behind him, Bush easily won passage of a huge tax-cut package as well as a key education reform bill.

Some Democrats who supported those proposals later had second thoughts, but Republicans remained unified in their efforts to enact Bush's legislative agenda.

Today, with voter anxiety mounting about American casualties in Iraq, the growing cost of Iraqi reconstruction and the rising budget deficit, a significant number of Republicans on Capitol Hill have begun to defy the president, speaking out against administration proposals and helping Democrats vote down presidential initiatives.

Not coincidentally, Republicans' independence is occurring as Bush's poll numbers sink to dangerously low levels for an incumbent up for re-election, down from a high of about 70 percent in the spring.

An NBC/Wall Street Journal poll in September put Bush's overall job approval at 49 percent.

A Newsweek poll the same month found that only 47 percent of Americans approved of the way he has handled Iraq.

And a recent Gallup poll indicated that 53 percent of voters disapproved of the president's handling of the economy.

"The old saying among Republican staff members is, they're incumbents first and Republicans second," said John Pitney, a government professor at Claremont McKenna College in California.

"The president has enormous clout when he's popular, but when his numbers go down, so does his leverage."

My wise old grandma used to say, "When they start calling names, they are out of logical ammunition." You know damn well I said:

"If you are referring to this newsgroup, it is a lousy barometer and does not count. We have to use the real world as a reference."

At the risk of being hasty, let's try that again.

You said:

> Again, the hypocrisy that disturbs me most about this episode is the
venom
> and ugliness that I have seen from those on the political left that are
> always so quick to call themselves compassionate and caring.

And I said:

You'll have to provide something from the left that counts as more than a few rumblings from the rafters. If you are referring to this newsgroup, it is a lousy barometer and does not count. We have to use the real world as a reference.

In the real world, I watch or read story after story where Rush get a pass. Alan Colmes gave him his heartfelt hope and wishes with no bile whatsoever; Fox, CNN, ABC, NBC, have all had expert doctors on to tell us about what Rush is going through; not one word about hypocrisy or suggestion that he deserves anything other than help. Newsweek, Time Magazine, event the LA Times all had compassionate stories that wished him well.

So, where exactly are these liberals who are being ugly?

I don't read these newsgroups too much anymore, but the demise of 73 is something I have to comment on. Basically, the magazine has no one to blame but Wayne Green.

His editorials often had very little to do with amateur radio, except how the ARRL and hams in general have failed to promote the hobby to attract young people. Other than that, Wayne's editorials would praise the latest pseudo-science, conspiracy theory, or any other crackpot idea that came along. The bad part about this is that Wayne would often combine these ideas with things that were tried and true, making it seem, to some, like he knew what he was talking about, and was an authority. Example: He has touted a change in diet and lifestyle to promote a long, healthy life and prevent disease - no argument there. But electroshock therapy with a "bioelectrifier" device to cure cancer and even AIDS? Give me a break!

But in all of his editorials, did Wayne ever ask himself if this was the kind of thing that ham operators were interested in? Did he ever conduct a poll to see what his readers were interested in? Did he do anything to attract new advertisers? My guess is that he probably didn't.

Despite this, I don't think we've heard the last of Wayne Green. The last I heard, he was trying to start a new magazine about living/vacationing in New Hampshire. He'll also probably still make the occasional appearance on Coast to Coast AM.

Dream on.

You know what amazes me? How a major political party is able to spread its socialist views and do things that would 'normally' be considered treason, in war time.

But isn't it great that we have such freedom? I think its wonderful. Unfortunatly in order to have this freedom we must be badgered by brain dead Democrats.

No, your question was just beyond the threshold of stupidity, even for you.
I didn't think you wanted a serious response. But okay, here goes...

I have a background in clinical psychology, and yes, I have done work with
heroin (as well as other) addicts.

Typically, addicts of prescription painkillers become so after having been
prescribed them by physicians. I don't pretend to know all the details
about Limbaugh's back problems, but I did know plenty of addicts that began
their acquaintance with Lorcet, Tylenol 3, and other painkillers as
treatment for their problems. Oxycontin was not around then, but I do have
a friend that was prescribed it for back pain. He has to take periodic drug
screens where his physician looks to see if he's taking more than the
recommended dose. I don't know if that's a state law, the physician's
practice, or even a federal law. I just know that's how it works here.

Comparing these people to the ones that went out to score heroin for a high,
is an apples and oranges problem. The closest the behavior of these two
types of addicts get is in the acute, high-dose area where the prescription
addicts have to turn to black-market sources for their drug. Even then,
most would only try for a maintenance dose to try to be able to function
normally in their careers.

After dealing with patients in a clinical setting, I chose not to continue
in graduate school pursuing a degree in clinical psychology because it
eventually became a revolving door of mostly addicts (various drugs and
alcohol). It was heartbreaking. Instead, I got a different degree.

Like I said, the fringe. The majority of liberal and media outlets have been overwhelmingly fair. Even the LA Times has Robert Scheer calling for compassion for Limbaugh.

Like I said, Alan Colmes gave him his heartfelt hope and wishes with no bile whatsoever; Fox, CNN, ABC, NBC, have all had expert doctors on to tell us about what Rush is going through; not one word about hypocrisy or suggestion that he deserves anything other than help. Newsweek, Time Magazine, event the LA Times all had compassionate stories that wished him well.

But, if you want to let the fringe define your world, far be it from me to stop you.

Let's see . . . so you have never been a heroin addict. And you are
not a psychologist, although you played one on TV. If you didn't pursue
and finish a degree in graduate school, then you didn't get to work with
patients. So, where did you work?

What you state below is so full of holes that any first year
psychology student could see it.

Your view that addiction is somehow different, if a Rich White guy
does it with pharmaceutical drugs is so far off the treatment 101 scale
that I can only assume that you are lying.

Bob,
Jezzzz, give the guy a break. He just lost his friend and your bitching about a covers, mic and manuals.
Maybe Jim will come over and install them for you also.
Offer the guy's family $5.00 bucks. You just want the stuff for nothing.
I see it time and time again. Slime like you hang around waiting for a ham to pass on
and then you want the equipment for practicly nothing. Then you sell off the stuff for a profit.
You make me sick.
---
And Jim, Sorry about your friend. You should take some digital pics of the equipment and put the stuff on Ebay. There you will get the most money for the family.

73 and good luck!!

---

I tried that one, but some Zulu tribes have an issue with it (and I
couldn't bust the Zulu pileup). So I went with Zsa-Zsa (as in Gabor).

Tom,

I tried to email you, but couldn't get past your spam filter. Please
reply to my adelphia address. I added the code on the subject line that
will get you through my spam filter.

Can you (addressing the group, now) believe how much crap we have to put
up with because of spammers? It's like someone sticking a finger in
your eye, and then say "I'd like to sell you something."

All the best, and 73,
Dave

There's another contributing or influencing factor; the internet. The
prevalance
of internet connections & accounts, growing all the time, has offered a new
medium through which information and published materials can be
shared. Just like with the snail mail industry, i'm sure there *has* been a
substantial impact upon the hard-copy publishing industry.

Then again, it shouldn't be surprising that the PCTA crowd doesn't
understand this, that it has gone completely over thier head, as the
mere concept of modernization and progress, along with evolvement,
is totally alien to them, I guess.

I'm sure the PCTA's will spin and twist this news to somehow say
it's another example of how NCI is destroying ham radio.

It's almost laughable.

So now I can't possibly be telling the truth. Sure.

My undergraduate degree was in psychology, and I did get hands-on clinical training in graduate school and work regularly in a clinical setting before I jumped ship for the MBA program 12 hours away from a masters degree. I just couldn't see wasting another semester for something I didn't enjoy.

Meanwhile, you continue to spew stupidity. You may be tipping your hand on the "rich white guy" comment, though.

There is a very significant difference in the two types of addicts that I have pointed out. Basically, one group gets high to completely escape their reality, while the other group doesn't have getting high as a priority -- they just want to be able to ignore their physical pain.

Read it slowly and carefully. If you're still confused, read it again.

Rather than repeat myself (even more) on subsequent posts, simply read my earlier ones (again -- slowly and carefully, and ask your Mom to help with the big words) if you bother to reply.

And where did you work? Sorry if I don't take you seriously, but if
you studied psychology as much as you did, you would understand that to
take anyone at their word in a medium like this is silly without proof.

So, if that is something you can't get with, perhaps you ought to
hang out in a different medium.

Spoken like someone who has never been, nor ever worked with addicts.

I haven't been following this thread, but I had a couple of thoughts after reading your post. First, some liberals are in a state of slap-happy right now over Rush's plight. They view this as some sort of moral victory, which I view as just another example of shallow philosophical reasoning (or lack of it at all). And along the way, these newly found moralists (which I'll explain) have tried to paint a picture of equating Limbaugh as your big-time hard-core criminal drug pusher/abuser, your regular Scarface. Now, I'm not defending Rush for his behavior, and he probably broke the law for which he will pay, but this reaching attempt to destroy his character will likely prove to be another short-sighted loss for the libs in question. People understand that you can be a moralist, a philosopher, an idealist, a leader, etc., and still make mistakes... even big one's. Mistakes must be paid for, but they don't automatically negate the entirety of one's message, character, or work. Rush's political/social perspectives, his character, and his work will likely be defined on their own and in totality, not just a single event.

This brings me to my moralist point. The liberals in question seemingly hate it when people take strong moral positions. To them morals tend to be more of a "situational" thing. (Although I wouldn't character Rush as a moralist primarily.) They get uncomfortable when people preach/discuss principles. It sets them off. Some libs hope and strive for an opportunity to prove these moralists as "hypocrites". Yet ironically, the libs themselves now seem to be setting ethical/moral standards so high, with such conviction and passion, that Superman would have a hard time living up to them. You see examples of this when they say things like, "Rush only admitted it because he got caught.", "Rush should have gone to rehab four years ago.", "Rush has only done the minimum required based on the information about him in the public domain.", etc. The implication is, the moment Rush took one painkiller too many, he should have handcuffed himself, turned himself in to the police, made a public apology, and given a sizeable donation to a liberal cause of their choosing. Yet here we are, Rush has admitted his problem, checked himself into a clinic for the 3rd time, and

hasn't ducked responsibility in any visible way... But it simply hasn't been good enough for our newly found moralists.

---

I'm not "in" this "discussion" but, for accuracy, the people who work the most with the patients are generally not degreed at all.

When I was a sophomore, I worked as an attendant on a male maximum security mental ward (and in rare cases, on the female maximum security ward).

The fellow I replaced was still in the hospital from a beating which the patients gave him after breaking into the janitor's closet and attacking the guy with buckets and such.

I was, perhaps. fortunate that I picked up the book, _I Never Promised You a Rose Garden_ (this was when it was being billed as "fiction" rather than an autobiography) in the Port Authority and finished it before I got to Brattleboro (Vermont).

I never had a single bit of trouble but then I genuinely liked the patients.

Gray Shockley
---
Oh; and three days on the geriatric's ward. One patient had a radio held up to his ear and he came up to me and held out the radio and said, "Listen. They're playing our song". It was: "They're coming to take me away to the funny farm". This is not a joke, this actually happened.

You just don't get it do you? He is not being judged by any "new found moralists", he is being judged by the same standards he set for others on his show and his writing. Liberals don't hate it when someone takes a strong moral position, they just hate it when the person who takes such a position is a hypocrite.

Mike Wilcox

# 3345. FS: Yaesu FT-51r with LCD spkr/mic and 35watt amp

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-15 02:36:59 UTC
From: Shadow of James <snowleopard99NOSPAM@earthlink.net>
Message-ID: <fp2jb.4196$kx.1345@newsread2.news.atl.earthlink.net>
Source record: 62315

I was going to list these items on Ebay, and figured I would give it a shot here first. I have a Yaesu FT-51r HT with the MH-29 remote control speaker mic. It has 1 Yaesu and 1 aftermarket 9.6v (5 watt) and 1 Yaesu 4.8 volt battery. It has the original Yaesu desk charger and an aftermarket quick charger. There is the E-DC-12 Mobile adapter/charger. Also the CSC-66 leather case for use with the 9.6v batts. I have owned the rig for about 2 years and am a non-smoker. It functions perfectly and has NO scratches on the displays, the radio or the mic. It has the factory dual-band antenna. I used it a few times in my truck, otherwise it sat here on my desk. I have the original box and manual. Also included in the package is a Power Plus 2mtr amplifier with receive preamp. Its 5w in 35-40w out. It also functions perfectly but is missing the mobile mounting bracket, as I never used it. You can see pictures of the equipment at http://home.earthlink.net/~snowleopard99/Ft51/ft51r.html
If you have any questions, feel free to ask here or in e-mail, just remove the NOSPAM
I am just getting out of the hobby for now, as other things have caught my interest (namely target shooting) and there isn't really much activity in my area anyway.
I will start out asking $400.00 for the package. If you have offers let me hear, and I would also consider trades on firearms.
Thanks, James KB9LTJ

I know just what you mean:

Senator Schumer advocates strict gun control laws - but has armed
bodyguards.

Senator Diane Feinstein declared that she believes guns should be made
illegal - yet admits to carrying a concealed weapon.

"I honestly think - and I am not an expert on the amendments - I think
the only people in this nation who should be allowed to own guns are
police officers. I don't care if you want to hunt, I don't care if you
think it's your right. I say 'sorry'. It is 1999, we have had enough
as a nation. You are not allowed to own a gun and if you do own a gun,
I think you should go to prison." - Rosie O'Donnell - "The Rosie
O'Donnell Show" - April 21, 1999

But Rosie has enough money to hire armed bodyguards to protect her
children

Mike. Remember when, a few years ago, Ted Kennedy, a staunch gun control advocate, ran into trouble when his bodyguard was arrested for carrying a full auto Uzi under his coat while accomplanying Ted in Washington? You never heard Dan Rather or Ted Koppel report on that, did you? Of course not.

This calls to mind an article in one of the ham mags 20 to 30 years ago
where
someone planted a battery operated transmitter and morse code generator
that would key up at random for a few seconds every few hours. It would
say "<hated person's callsign's suffix> SUX" Suppose he didn't like me, so
it would then be "ISE SUX" The frequency was on the input of a popular
repeater somewheres out West, like Arizona. Mountains in the area shielded
the rogue transmitter's signal from inhabited areas; only the repeater could
hear it. It was planted in a wildlife preserve, antenna partially
hidden in a
thicket of local weeds, and battery and transmitter buried. They had to get
permission from forest rangers or such to do a fox hunt to find it.

My point is that someone used code to say naughty words.....

sorry for the dumb question. About the receiver, does the entire thing
need work, or just the power cord? If so, how much?

I'm interested in purchasing assuming it's nothing too big, that is
unless you're already listed everything on ebay.

Lies and more lies. See you can't just say shit like this and
expect everyone to swallow it willingly. I don't know how many
times you and yours have to get snapped back before you learn that
lesson.

"I first started taking prescription painkillers some years ago
when my doctor prescribed them to treat post surgical pain
following spinal surgery."

"Rather than opt for additional surgery for these conditions, I
chose to treat the pain with prescribed medication. This
medication turned out to be highly addictive."

> Do you know what this is like?

You're saying no one can voice an opinion on this subject unless they themselves have been addicted to painkillers? I hope you realise how often you can be silenced in the future with that same idiotic argument?

For instance, unless you are a doctor, and more specifically LIMBAUGH's doctor, you can't possibly know his level of pain, nor what painkillers might have been prescribed. Case closed.

So . . .

Are you saying that Limbaugh should get off with less than the maximum
sentence for drug addicts?

Because he, years ago, was in pain?

I certainly have no problem with that.

I think drug addicts should be helped rather than sentenced.

After Bush and Clinton, we shouldn't be speeding our way to condemn and
sentence druggies.

Limbaugh's years long addiction to drugs should not dilute his messages -
over the years - that drug addicts should be helped rather than hindered.

That is what Limbaugh the drug addict said, right?

Or whatever. If he said that druggies should go to prison, then he has
already made his choice.

I think it is clear that Limbaugh's sentence should reflect exactly and
precisely what he has said over the last few years.

Oh, absolutely. I'm certainly buying fewer magazines today exactly because of that. I can usually find the information I need much quicker, and much more fully, on the internet. That obviously reduces the value of paper publications. However, I still buy just about as many books, though the typical content of that has changed (software manuals instead of leisurely novels).

> is totally alien to them, I guess.

I can understand their position to some extent. I'm not exactly thrilled with all the changes taking place today either. The romance, mystery, and charm, of life is disappearing, slowly replaced by hard facts, technology application, and an almost fanatical rejection of the "old" way of doing things wrapped under the guise or pretense of modernization and progress. With that comes an almost rabid zeal to push anyone opposing that out of the way, without consideration for their thoughts, feelings, or emotional needs. At the same time, many of the changes are not designed to, and often don't, benefit the "old guard," leaving them few reasons to actually support those changes. Many clearly see the efforts to regenerate Amateur Radio (removal of code testing, changes to the license structure, and so on) as just one more example of that process. Of course, when it comes to code testing, very few could claim we're exactly rushing to kill it off - it should have been dropped a couple of decades ago (at least). I obviously don't think we should rush into changes just for change sake, but we clearly shouldn't sit still forever either.

Gee, thanks for changing my words. But your reasoning doesn't follow. I
haven't heard of anyone trying to compromise principles (morals) on Rush's
behalf. Not even Rush. I am clearly not defending Rush's behavior, I'm
just getting a kick out of how the libs are responding with what appears to
be glee, couched in newly found moral standards. As I've said before, this
more than just about drug addiction. It's about contempt for Rush.

So, how short IS the list now...

I've heard at least 2 of them on national TV in 'family hours'.

"Piss" has been heard a few times, but the only one I can think of I'm
not sure of. War Games? Anyone know of other places?

And "teats" all over the place. Just recently in a broadcast of 'Witness'
with Harrison Ford in the barn with the Amish farmer...

Balderdash. The world of telecommunications doesn't run on a single master oscillator. Never has, never will. Clocks are commonly recovered from the transmitted signal by the front ends of telecoms nodes, but these are never AFAIK used as the master clock for the node. How do you imagine corrections could be made for the very many different path lengths between nodes, which will vary as elements of the network go in and out of service? (Clue: It can't be done).

# 3358. Where do ya think all those identical soldiers' letters came from?

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-15 14:30:27 UTC
From: An Metet <anmetet@liberty.gmsociety.org>
Message-ID: <09492877166f8c33c1f842a1308f434f@aonymous.poster>
Source record: 62328

NOTICE: This message may not have been sent by the Sender Name
above. Always use cryptographic digital signatures to verify
the identity of the sender of any usenet post or e-mail.

You may have read recently that the Bush administration is on the
offensive over the Iraq situation, and plan to push the message to
Americans that everything is just fine and dandy over there.

I don't know about on the offensive, but they certainly are offensive.

Conveniently for the administration, letters from soldiers stationed
in Iraq detailing the great progress of the rebuilding process have
been showing up in local newspapers all over the country recently.

But here's a funny thing - they're all identical.

Oh, sure, they're signed by different soldiers, but strangely the
wording of each letter is exactly the same.

And not only that, but when Gannett News Service contacted several of
the soldiers who supposedly authored the letters, none of them had any
idea who wrote them.

Gee, that's weird.

I wonder how these optimistic missives, all identical, all apparently
signed by soldiers currently serving in Iraq, managed to end up in the
mailbags of American newspapers?

I mean, surely the Department of Defense wouldn't go around forging
soldiers' signatures on fake letters, would they?

Would they?

## 3359. Latest Version of CWPlayer

Newsgroup: rec.radio.amateur.misc
Date: 2003-10-15 14:57:19 UTC
From: haf47@juno.com
Message-ID: <f03bf94f.0310150657.1a2cc293@posting.google.com>
Source record: 62329

The lastest version of Gabe Riviats' CW Player is now available in the form of Version 2.7.2

For those not familiar with this software, it is a CW traing package using the Koch method, which is considered by most to be the best way to learn.

This latest version allows for the choice of letter/word groups to be from 2 to 8 characters in length, rather than the tradional 5 letter sending groups.

Although not intended to be a CW decoder, very strong and well sent signals can be copied from an HF rig quite well. W1AW is an example.

It now supports 4 languages with English being the default.

One of the very best CW programs to be found and it is FREEWARE!

It can be found at: http://perso.club-internet.fr/f1orl/programe.htm

I think you'll like it.

Settle down, cowboy. Like I said, Rush did not say he was prescribed "oxycontin." Pain killers and Oxycontin are not synonymous. Next time, keep that knee from jerking one more second so you can absorb the context of what I said, ok?

>>Even in light of this, there is no difference. Unless you

I am glad you put it as a question. No, that is not what i am saying. Not that it would stop anyone here. anyway :)

I am saying that your credibility on this issue is in question when you start talking about things that are only knowable through direct experience.

> I hope
> you realise how often you can be silenced in the future with that

>
> For instance, unless you are a doctor, and more specifically
> LIMBAUGH's doctor, you can't possibly know his level of pain, nor
> what painkillers might have been prescribed. Case closed.

Actually, if I was making that argument, the correct way to say the above would be, Unless I were Rush Limbaugh, I couldn't actually know his level of pain." And as a matter of fact, I don't.

I believe Rush was in a lot of pain, that is why people seek drugs - to relieve pain. Are you aware that this is why all addicts seek drugs, to relieve or eliminate pain? It's not just those poor folk who take those "illegal" drugs that are trying to 'escape.'

But I assume, not being an addict yourself, and not having any treatment experience, you really wouldn't know, would you? I suggest you look into what you are talking about - it would help us all. If you want some good layman's books on addiction and recovery, I would be glad to offer them.

Um, no; it is modifying "brilliant", which is a noun. Thus it is an adjective.

That is because you are having trouble with people taking a moral
stance. Once you admit this to yourself, you will "hear."

> Not even Rush. I am clearly not defending Rush's behavior, I'm
> just getting a kick out of how the libs are responding with what appears to

I do have a sense of glee, yes. When cowards like Rush fall, it
validates my old moral standard: "You shall reap what you sow."

> As I've said before, this
> more than just about drug addiction. It's about contempt for Rush.

Ahh, ya. And the sun will be rising in the East tomorrow as well. No
secret here.

However, if contempt is your moral yardstick for condemning this
behavior in Rush's critics, then you must not be a fan of Rush either, yes?

Dear M3ABC

I really think that you should have that HUMOUR (HUMOR) DETECTOR
of yours looked at by a QUALIFIED person as it seems to be slightly
off tune by perhaps a few Hertz which might indicate that its master
oscillator is in need of an adjustment.

Regards

Humour Detectors Inc.

ISTR that the Plesiochronous Digital Hierarchy of BT ran
via a single master oscillator.

But that's the M3 for you - no technical qualification to
prove his worth as a Radio Ham.
